Subject: (CARMA) ISP's Starcom 21 system status

Anyone hearing anything about the ISP Starcom 21
system? September 2004 was a date thrown around
to have it up and running.

The New York 911 hearings scheduled for this week
will surely get some Chicago press coverage on
radios and public safety issues.

Curt

Just a note, in case everyone does not know it yet. Yahoo! has increased the limit of free & paid mailboxes effective last week.

I want email to
stay in touch,
share important moments with
people who matter.

I need to go to the
next level,
so give me
the works.

Yahoo! Mail
Free, reliable, and easy to use.
a.. Great spam protection with SpamGuard
b.. Virus scanning from Norton AntiVirusT
c.. Access anywhere you have a web connection
d.. Keep more, manage less with 100MB email storage
Learn More
Yahoo! Mail Plus
More control and capacity.
a.. No graphical ads
b.. Virus scanning plus cleaning for added protection
c.. SpamGuard Plus helps stop even more unwanted mail
d.. Virtually unlimited storage - 2GB
Learn More

Free!

only $19.99/year

I encourage those to change their Settings to EMAIL to receive full emails now.

Terry

From another moderator:
I found that many members have their email set to either special notices or no mail. This makes it impossible for those who do so to view the thousands
of great photos sent as attachments. That's because "Yahell", as some call it, decided to stop archiving attachments last summer.

Wait a minute! There is good news.

A few weeks ago Yahoo, for reasons unknown, decided to increase the email storage capacity of mailboxes. Those who want to pay $19.95 per year get 2GB (gigabytes) instead of 100MB (megabytes) as in the past. And for those who don't want to pay, the free accounts are now

100MB instead of 4MB. Unless the member goes offline for a couple of weeks there shouldn't be a problem with using even the free account which comes with every Yahoo ID.

I just filled the paperwork for the free radio
about 2 weeks ago--just in time for the deadline.

Interesting billing for the airtime if the radio
is used, free for 5 years though on the 1 radio.

Just a few quick questions that I'm sure you have answered a million times. The StarCom21 system is APCO25 none encrypted correct? As of now only the ISP is going to be useing this system, but it will be leased out to other state wide shortly after correct? Any word if St. Clair county will be switching over to this new system and when. Also, since Terry seems to be the guy to go to with freq's, do you have any heads up on the ISP freq's/groups and any other agencies that will be useing the system. Thanks for the time guys, I fell behind on the news about starcom due to my deployment.

Scott

Topic: 10 Message: 10

The latest I have heard is that they hope for some sort of deployment in late September 2004, but AFAIK it will be extremely limited. While ISP and the ITHA have both signed on as partners and users, neither has enough cash laying around to purchase radios or airtime. If they are to use the system soon it will have to be in return for allowances made for frequencies and sites.

St. Clair County is building an APCO25 system of it's own that is supposed to be able to work with StarCom, perhaps by co-hosting sites and sharing talkgroups. I would imagine that some other areas may consider doing the same thing. For example Cook County is building an APCO25 system, they may work out some sort of connection.

StarCom21 will be entirely 9600 baud APCO 25 digital, encryption will be available if the user wants it ($$$)

Don't throw away your old VHF and UHF radios, the ISP will be on them for a long time yet.

Topic: 10 Message: 11

I was under the impression that this system was built specifically for the ISP. It's strikes me as odd to hear that it will be some time before they migrate over to it. Who is the ITHA? And any word whether or not they will be using this system anytime soon? To tell you the truth I was somewhat looking forward to the new system, I am in Belleville and do not get much action on the ISP frequencies that I monitor, any suggestions there? Well thank you for the update any other information that anyone has would be greatly appreciated!

ITHA is the Illinois toll highway authority (the tollway) up here in northern IL and there 800 FREQs will be part of Stardom whenever it gets up and running. The big problem is money most state agencies are under a new order for 4% cuts. so that is hanging up a lot of things. AS far as ISP now there lowband & Highband FREQs are quite strong and a good antenna system will do wonders although the mobiles of course cannot be heard as far. From my house on the SW side of Chicago I can here D2 &D5 mobiles about 20 miles away on both lowband & there HF2 FREQs.

Scott... I don't have any problem hearing District 11, but I think I live near the tower anyway (near SIU/Ewardsville)

42.56 Base/Mobile Lowband
42.7 Some mobiles
42.5 Weather Alerts/Car-to-Car
155.46 HF-4 Collinsville to Springfield, DuQuoin, Effingham etc.
155.37 Point-to-Point (will hear a lot of Missouri traffic, but some Illinois State to Missouri bases/units)
151.25 Secretary of State Base/Mobile (repeaters in some areas)
151.28 Convervation Police
154.905/154.92/154.71 DCI (Dept of Criminal Investigation)
155.505 Mobile Extenders

See next email for more info about starcom

14. "I-STAR" StarCom21 information / status

Yahoo group: StarCom21
Date: 2004-08-25 22:08:17 UTC
From: terry.weatherford@scanIL.com
Topic: 14 Message: 14

I really don't know much about the status of the system.
I do know that St. Clair County and others throughout Illinois are going to use a local system in addition to the StarCom.

There is also another older statewide 800 mhz system that is not in use @ the Edwardsville site at least.
855.2125, 856.2125, 857.2125, 858.2125, 859.2125, 860.2125
It may be in use at its other areas as I believe there are multiple sites in the state for these frequencies.

Here is some info I have gathered in the last few years

State of Illinois

The Illinois State Police (ISP) is one of many public safety agencies faced with replacing an aging communications system that is nearing obsolete. To address this issue, the ISP has replaced its existing LMR system with a leased system. Rather than procuring, owning, and operating a new system, the ISP has leased a vendor-owned, operated, and maintained system.

Background. The ISP began developing a plan for replacement of its LMR system in 1994. An independent consultant performed a study to determine the cost of procuring a new LMR system covering a six-county area. The results of the study were presented to the governor□s office for budget approval, but the project was considered cost prohibitive. The ISP then considered partnering with the local utility company, which had extensive infrastructure throughout the state but did not have adequate spectrum to support the number of proposed users. This arrangement would have required the ISP to allow non-government entities to use its frequencies. The ISP did not feel this arrangement best served its interests and rejected this solution.

Ultimately, ISP officials considered a commercial option. They recognized that commercial entities already provided most of their communications capabilities, such as paging and wireless data. As a result, a commercial LMR system was viewed as a service they could possibly pursue.

The ISP released a performance-based RFP through the Illinois Central Management Service. This RFP stipulated that a vendor would build, operate, and maintain a voice communications system for use by the ISP, the Chicago Police Department, and any other government organization within the State of Illinois.

The State of Illinois possesses a number of valuable resources that make a lease arrangement favorable for the vendor and the state. First, the ISP has been granted $25 million through the Illinois Fund for Infrastructure, Roads, Schools, and Transit (FIRST) project to fund the initial capital cost of the user equipment. Illinois FIRST funds are issued through the governor□s office and are intended to revitalize critical infrastructure within the State of Illinois. This significant amount of start-up money considerably mitigates the ISP□s funding challenges.

Another resource that the ISP offers to the vendor is real estate. The State of Illinois owns a considerable number of radio towers and sites throughout the state, which the vendor in turn can use for site development or infrastructure installation.

Finally, frequencies already licensed to the ISP will be reused whenever possible. The ISP realizes a significant monetary value is associated with this resource and expects the vendor to note the value in its discounted pricing for the ISP.

System Details. The ISP has leased a trunked, 800 MHz LMR voice system capable of providing interoperable communications with other public safety providers. This system provides 95 percent statewide coverage. The contract states that the system must accommodate expanded users and provide flexibility for growth and special needs. The system is security encrypted.

Motorola□s solution, the Starcom 21 system (built and maintained by Motorola), is accessible to all levels of public safety agencies (i.e., local, state, federal) throughout the State of Illinois. The ISP lease is 10 years for voice traffic only. Although Motorola owns and maintains the system, the ISP will be the primary administrator of the system (e.g., adding users and assigning talk groups).

Contract Provisions. The ISP developed the contract using PSWN Program research and best practices guidelines designed for local, state, and federal public safety providers. As stated, it is a voice-only system. The contract requires Motorola to provide an operational statewide system within 36 months. The contract guarantees 95 percent or greater coverage for the grade of service (10 years). All provisions are guaranteed for the life on the contract.

Interoperability. The Starcom 21 system is a virtual shared radio system that facilitates interoperable communications. Although owned by a vendor, the system is available to all government organizations in the State of Illinois. The arrangement enables participating organizations to contribute resources (e.g., frequencies and towers) where feasible. Resource sharing promotes cost savings and interoperable communications, and prevents organizations from establishing isolated, redundant networks.

The ISP does not perceive loss of control as an issue. Although the vendor owns, operates, and maintains the system, the ISP will serve as the administrator. The ISP set the performance criteria for the system and conducted its own tests of the system. System reliability is determined entirely by the ISP. The ISP has also indicated that although the vendor will build and own the system, any upgrades to the infrastructure will belong to the ISP when the lease expires, at no cost.

Summary. The Starcom 21 system is embraced by public safety agencies throughout the state. All agencies within the state, including federal agencies, will be able to join the lease agreement. The new system will alleviate funding challenges faced by many smaller agencies and municipalities that do not have the resources to establish their own systems. More importantly, agencies will now be able to communicate on a single system, improving interoperability and coordination during emergency incident responses.1

(From another scanner listener) Update May 2003
I found this Starcom 21 info from this PDF file site:
www.mclean.gov/boardnotes/pdf/February2003/min_AdHoc12.pdf

The ISP Starcom 21 system will be an APCO-25, 700 and 800 mHz digital system, with over 186 tower sites throughout Illinois. Looks like the BC785D scanner may become of use to us, and probably the new Radio Shack digital scanner to be released soon (I don't know anything about it, though.) Motorola will also utilize some of the existing ClearTalk towers in Mclean county (possibly other towers, too?) for the system, having at least 95% mobile coverage statewide.

It will start out using existing ISP towers, then be put on the Starcom 21 towers later. The system should be operational by September, 2004. Public safety agencies in Illinois, including ALL State agencies using two-way radios, as well as federal agencies, will utilize the system.

Other information I have obtained on this subject:
IGNN: Budget Press Release February 20, 2002 Governor's Budget Proposal Strengthens Commitment to Public Safety

SPRINGFIELD -- Governor George H. Ryan today proposed a Fiscal Year 2003 budget of $383 million for the Illinois State Police (ISP), including funds to train 100 new troopers and to decrease backlogs at state police forensic labs.

"This budget reflects my commitment for Illinois to realize the full potential of DNA technology as a law enforcement and crime solving tool," Governor Ryan said. "With this budget, the state police will be positioned to erase a backlog which stood at nearly 3,000 cases just two years ago." Highlights of the FY 2003 budget include funds to continue the initiative begun last year to hire 80 forensic scientists and evidence technicians, and $2.3 million for outsourcing DNA cases while new scientists are in training.

"We live in a different world now after the terrorist attacks," Governor Ryan said. "Ensuring state police staffing is at optimum levels is an essential part of keeping our state safe."

Ryan's spending package also contains $109,500 for the second year of funding for the implementation of the statewide voice communications system, STARCOM21, and more than $24 million for capital costs. The new communications system will be operational by fall 2004, replacing the current system and equipment.

"Funding for troopers, forensics, and law enforcement communications demonstrates that public safety continues to be one of Governor Ryan's highest priorities," said ISP Director Sam W. Nolen.

The ILL State Police signed a contract with Motorola on a state wide trunk system . It will be digital and will use the 800 mgz and 700 mgz, switching back and forth. Who was it a while back that said we really dont need the 700mhz band in the 780XLT. They will be using a new type of radio from Motorola. As reported on CARMA the contract will be signed next week and delivery of the new radios ten days later starting in southern ILL. It will take three years to complete. They are hoping to bring in alot more towns as they progress. We may need add on boards for digital and 700mhz sooon here in ILL.

Just came from a NPSPAC region 24 (immediately adjoining Ill) meeting yesterday. The southern Illinois frequency advisor/ NPSPAC chairman was there and the Motorola engineer responsible for implementation was there also. I can verify their radio system will be wireless, at least from the vehicle to the fixed-end equipment. I believe their RFP includes a 10,000 foot tower in a corn field smack in the geographic center of the state where power could be modulated and radiated. In this manner the equipment would be energized.
Illinois Starcom 21

Dan,

I read your pages in Monitoring Times January 2001 and decided to drop you a line. I got this information from a local newspaper just last
week. Illinois Governor Ryan announced a $25 million grant for a new radio system phased in over the next 3 years. The state will lease
time on the new Starcom 21 network from Motorola. It will be made available to other federal, state, and local public safety agencies if they
want to update their own outmoded systems.

Reading between the lines, I would say the state police are going to phase out their low band radio system statewide. Also I would assume
the Illinois Department of Transportation 47 MHz system will follow also. The VHF 155 MHz state police frequency will have to stay in place
for use with other police departments (ISPERN, IREACH etc.) As we already know the state police districts in the Chicago area are already
using 800mhz.

I don't know anything about Starcom21-is there a scanner yet that will work with this system? Or is this digital? Maybe a competitive brand
two-way radio down the road properly programmed will be around. A the rate everyone is going, no one will be left on lowband. I've always
said give 29.7 - 54 MHz to us hams (we like skip conditions) and trade part of the 440 MHz and also 1.2 GHz for commercial use (they
don't like skip).

Daryl

Thanks for the information, Daryl. Funding for the Starcom 21 network comes out of the Venture TECH fund
from the Illinois Technology Office. This fund promises to provide research and development dollars for a
number of law enforcement initiatives, including expansion of the Illinois State Police Wireless Information
Network, wireless access to photographic images and fingerprints, more rapid access to wants and
warrants databases, and an automated voice dispatch system. The new Starcom 21 network is one of
those initiatives.

Motorola, headquartered in the Chicago suburb of Schaumburg, was selected to build Starcom 21after a
competitive bid process. The Illinois State Police will purchase new radios and lease airtime on the network,
as will other federal, state, and local public safety agencies. Rather than spending a lot of money to
establish their own independent systems, county and local agencies will have the option of joining the
state network.

The plan is to phase in the network over three years, starting with coverage in the southern part of the
state and moving northward. The state hopes that by having one common radio system, problems of
interoperability -- the ability of agencies to communicate directly with each other -- will

be a thing of the
past.

As Daryl noted, the Chicago District of the Illinois State Police is currently using a trunked radio system. It's
actually two EDACS networks, one covering a northern patrol area and the other a southern patrol.
Frequencies in LCN (Logical Channel Number) order are:

North: 866.8875, 866.4625, 867.3875, 866.9625, 867.4625, 867.8875, 868.3875, 868.4625, 868.8875 and
868.9625 MHz.

South: 866.4125, 866.4375, 866.9375, 867.4125, 867.9375, 867.9125, 868.4375, 868.4125, 868.9375 and
868.9125 MHz.

Unfortunately, I don't have any technical details about the Starcom 21 system. I expect that it will be a
trunked digital system, but I don't know if it will be compatible with other Motorola products or with the
APCO 25 standards, or something all together new. If readers have any further information about the
system, please send it along!

NPSPAC

Starcom 21 will almost certainly have the capability of operating on the National Public Safety Planning
Advisory Committee (NPSPAC) 800 MHz frequencies. The NPSPAC was formed more than ten years ago to
provide guidance in the use and coordination of public safety radio frequencies, and their recommendations
included the establishment of common inter-agency frequencies.

Five channels in the 800 MHz band are set aside for mutual aid across the country. One frequency,
866.0125 MHz, is designated a calling channel. The other four, at 866.5125, 867.0125, 867.5125 and
868.0125 MHz, are tactical channels. Each of these channels is 25 kHz wide and operates conventionally
(that is, not trunked) with a tone coded squelch frequency of 156.7.

So, as you're scanning the 800 MHz band, be sure to include these five non-trunked frequencies in one of
your scan banks.

That's all for this month. More information is available on my website at www.signalharbor.com, and I
welcome your e-mail at dan@signalharbor.com. Until next month, happy monitoring!

The 8xx.2125 channels were never used at all by the State. They were intended for StarCom21's proposed predessor or for a statewide data system, depending on whom you talk to.

Here is some info I have gathered in the last few years

State of Illinois

The Illinois State Police (ISP) is one of many public safety agencies faced with replacing an aging communications system that is nearing obsolete. To address this issue, the ISP has replaced its existing LMR system with a leased system. Rather than procuring, owning, and operating a new system, the ISP has leased a vendor-owned, operated, and maintained system.

Background. The ISP began developing a plan for replacement of its LMR system in 1994. An independent consultant performed a study to determine the cost of procuring a new LMR system covering a six-county area. The results of the study were presented to the governor?s office for budget approval, but the project was considered cost prohibitive. The ISP then considered partnering with the local utility company, which had extensive infrastructure throughout the state but did not have adequate spectrum to support the number of proposed users. This arrangement would have required the ISP to allow non-government entities to use its frequencies. The ISP did not feel this arrangement best served its interests and rejected this solution.

Ultimately, ISP officials considered a commercial option. They recognized that commercial entities already provided most of their communications capabilities, such as paging and wireless data. As a result, a commercial LMR system was viewed as a service they could possibly pursue.

The ISP released a performance-based RFP through the Illinois Central Management Service. This RFP stipulated that a vendor would build, operate, and maintain a voice communications system for use by the ISP, the Chicago Police Department, and any other government organization within the State of Illinois.

The State of Illinois possesses a number of valuable resources that make a lease arrangement favorable for the vendor and the state. First, the ISP has been granted $25 million through the Illinois Fund for Infrastructure, Roads, Schools, and Transit (FIRST) project to fund the initial capital cost of the user equipment. Illinois FIRST funds are issued through the governor?s office and are intended to revitalize critical infrastructure within the State of Illinois. This significant amount of start-up money

considerably mitigates the ISP?s funding challenges.

Another resource that the ISP offers to the vendor is real estate. The State of Illinois owns a considerable number of radio towers and sites throughout the state, which the vendor in turn can use for site development or infrastructure installation.

Finally, frequencies already licensed to the ISP will be reused whenever possible. The ISP realizes a significant monetary value is associated with this resource and expects the vendor to note the value in its discounted pricing for the ISP.

System Details. The ISP has leased a trunked, 800 MHz LMR voice system capable of providing interoperable communications with other public safety providers. This system provides 95 percent statewide coverage. The contract states that the system must accommodate expanded users and provide flexibility for growth and special needs. The system is security encrypted.

Motorola?s solution, the Starcom 21 system (built and maintained by Motorola), is accessible to all levels of public safety agencies (i.e., local, state, federal) throughout the State of Illinois. The ISP lease is 10 years for voice traffic only. Although Motorola owns and maintains the system, the ISP will be the primary administrator of the system (e.g., adding users and assigning talk groups).

Contract Provisions. The ISP developed the contract using PSWN Program research and best practices guidelines designed for local, state, and federal public safety providers. As stated, it is a voice-only system. The contract requires Motorola to provide an operational statewide system within 36 months. The contract guarantees 95 percent or greater coverage for the grade of service (10 years). All provisions are guaranteed for the life on the contract.

Interoperability. The Starcom 21 system is a virtual shared radio system that facilitates interoperable communications. Although owned by a vendor, the system is available to all government organizations in the State of Illinois. The arrangement enables participating organizations to contribute resources (e.g., frequencies and towers) where feasible. Resource sharing promotes cost savings and interoperable communications, and prevents organizations from establishing isolated, redundant networks.

The ISP does not perceive loss of control as an issue. Although the vendor owns, operates, and maintains the system, the ISP will serve as the administrator. The ISP set the performance criteria for the system and conducted its own tests of the system. System reliability is determined entirely by the ISP. The ISP has also indicated that although the vendor will build and own the system, any upgrades to the infrastructure will belong to the ISP when the lease expires, at no cost.

Summary. The Starcom 21 system is embraced by public safety agencies throughout the state. All agencies within the state, including federal agencies, will be able to join the lease agreement. The new system will alleviate funding challenges faced by many smaller agencies and municipalities that do not have the resources to establish their own systems. More importantly, agencies will now be able to communicate on a single system, improving interoperability and coordination during emergency incident responses.1

(From another scanner listener) Update May 2003
I found this Starcom 21 info from this PDF file site:
www.mclean.gov/boardnotes/pdf/February2003/min_AdHoc12.pdf

The ISP Starcom 21 system will be an APCO-25, 700 and 800 mHz digital system, with over 186 tower sites throughout Illinois. Looks like the BC785D scanner may become of use to us, and probably the new Radio Shack digital scanner to be released soon (I don't know anything about it, though.) Motorola will also utilize some of the existing ClearTalk towers in Mclean county (possibly other towers, too?) for the system, having at least 95% mobile coverage statewide.
It will start out using existing ISP towers, then be put on the Starcom 21 towers later. The system should be operational by September, 2004. Public safety agencies in Illinois, including ALL State agencies using two-way radios, as well as federal agencies, will utilize the system.

Other information I have obtained on this subject:
IGNN: Budget Press Release February 20, 2002 Governor's Budget Proposal Strengthens Commitment to Public Safety

SPRINGFIELD -- Governor George H. Ryan today proposed a Fiscal Year 2003 budget of $383 million for the Illinois State Police (ISP), including funds to train 100 new troopers and to decrease backlogs at state police forensic labs.

?This budget reflects my commitment for Illinois to realize the full potential of DNA technology as a law enforcement and crime solving tool,? Governor Ryan said. ?With this budget, the state police will be positioned to erase a backlog which stood at nearly 3,000 cases just two years ago.? Highlights of the FY 2003 budget include funds to continue the initiative begun last year to hire 80 forensic scientists and evidence technicians, and $2.3 million for outsourcing DNA cases while new scientists are in training.

?We live in a different world now after the terrorist attacks,? Governor Ryan said. ?Ensuring state police staffing is at optimum levels is an essential part of keeping our state safe.?

Ryan?s spending package also contains $109,500 for the second year of funding for the implementation of the statewide voice communications system, STARCOM21, and more than $24 million for capital costs. The new communications system will be operational by fall 2004, replacing the current system and equipment.

?Funding for troopers, forensics, and law enforcement communications demonstrates that public safety continues to be one of Governor Ryan?s highest priorities,? said ISP Director Sam W. Nolen.

The ILL State Police signed a contract with Motorola on a state wide trunk system . It will be digital and will use the 800 mgz and 700 mgz, switching back and forth. Who was it a while back that said we really dont need the 700mhz band in the 780XLT. They will be using a new type of radio from Motorola. As reported on CARMA the contract will be signed next week and delivery of the new radios ten days later starting in southern ILL. It will take three years to complete. They are hoping to bring in alot more towns as they progress. We may need add on boards for digital and 700mhz sooon here in ILL.

Just came from a NPSPAC region 24 (immediately adjoining Ill) meeting yesterday. The southern Illinois frequency advisor/ NPSPAC chairman was there and the Motorola engineer responsible for implementation was there also. I can verify their radio system will be wireless, at least from the vehicle to the fixed-end equipment. I believe their RFP includes a 10,000 foot tower in a corn field smack in the geographic center of the state

where power could be modulated and radiated. In this manner the equipment would be energized.
Illinois Starcom 21

Dan,

I read your pages in Monitoring Times January 2001 and decided to drop you a line. I got this information from a local newspaper just last
week. Illinois Governor Ryan announced a $25 million grant for a new radio system phased in over the next 3 years. The state will lease
time on the new Starcom 21 network from Motorola. It will be made available to other federal, state, and local public safety agencies if they
want to update their own outmoded systems.

Reading between the lines, I would say the state police are going to phase out their low band radio system statewide. Also I would assume
the Illinois Department of Transportation 47 MHz system will follow also. The VHF 155 MHz state police frequency will have to stay in place
for use with other police departments (ISPERN, IREACH etc.) As we already know the state police districts in the Chicago area are already
using 800mhz.

I don't know anything about Starcom21-is there a scanner yet that will work with this system? Or is this digital? Maybe a competitive brand
two-way radio down the road properly programmed will be around. A the rate everyone is going, no one will be left on lowband. I've always
said give 29.7 - 54 MHz to us hams (we like skip conditions) and trade part of the 440 MHz and also 1.2 GHz for commercial use (they
don't like skip).

Daryl

Thanks for the information, Daryl. Funding for the Starcom 21 network comes out of the Venture TECH fund
from the Illinois Technology Office. This fund promises to provide research and development dollars for a
number of law enforcement initiatives, including expansion of the Illinois State Police Wireless Information
Network, wireless access to photographic images and fingerprints, more rapid access to wants and
warrants databases, and an automated voice dispatch system. The new Starcom 21 network is one of
those initiatives.

Motorola, headquartered in the Chicago suburb of Schaumburg, was selected to build Starcom 21after a
competitive bid process. The Illinois State Police will purchase new radios and lease airtime on the network,
as will other federal, state, and local public safety agencies. Rather than spending a lot of money to
establish their own independent systems, county and local agencies will have the option of joining the
state network.

The plan is to phase in the network over three years, starting with coverage in the southern part of the
state and moving northward. The state hopes that by having one common radio system, problems of
interoperability -- the ability of agencies to communicate directly with each other -- will be a thing of the
past.

As Daryl noted, the Chicago District of the Illinois State Police is currently using a trunked radio system. It's
actually two EDACS networks, one covering a northern patrol area and the other a southern patrol.
Frequencies in LCN (Logical Channel Number) order are:

North: 866.8875, 866.4625, 867.3875, 866.9625, 867.4625, 867.8875, 868.3875, 868.4625, 868.8875 and
868.9625 MHz.

South: 866.4125, 866.4375, 866.9375, 867.4125, 867.9375, 867.9125, 868.4375, 868.4125, 868.9375 and
868.9125 MHz.

Unfortunately, I don't have any technical details about the Starcom 21 system. I expect that it will be a
trunked digital system, but I don't know if it will be compatible with other Motorola products or with the
APCO 25 standards, or something all together new. If readers have any further information about the
system, please send it along!

NPSPAC

Starcom 21 will almost certainly have the capability of operating on the National Public Safety Planning
Advisory Committee (NPSPAC) 800 MHz frequencies. The NPSPAC was formed more than ten years ago to
provide guidance in the use and coordination of public safety radio frequencies, and their recommendations
included the establishment of common inter-agency frequencies.

Five channels in the 800 MHz band are set aside for mutual aid across the country. One frequency,
866.0125 MHz, is designated a calling channel. The other four, at 866.5125, 867.0125, 867.5125 and
868.0125 MHz, are tactical channels. Each of these channels is 25 kHz wide and operates conventionally
(that is, not trunked) with a tone coded squelch frequency of 156.7.

So, as you're scanning the 800 MHz band, be sure to include these five non-trunked frequencies in one of
your scan banks.

That's all for this month. More information is available on my website at www.signalharbor.com, and I
welcome your e-mail at dan@.... Until next month, happy monitoring!

Thanks all for catching me up on the latest info on starcom21.
Sounds to me like it may be a while before we see any APCO25 system
in use in our area. Also thanks Terry for the ISP freq's I'll match
them to the ones I have and give them a try. I'll also be raising my
antenna 20 feet above my already very high roof line pretty soon so
im sure that will help with my coverage. Right now its just hanging
out one of my windows because I have just recently moved in. Thanks
again.

Scott

So will all municipalities in St. Clair county switch over of just
the sheriff? Also, what will the system be? I have heard different
things from trunked analog, 3600 digital, or 9600 digital?

I still hear ISP District 8 on 155.52 and 42.36 with no mention
of any other communication system. I also saw two District 8
squads last Friday with no 800 mhz antennas on the squads. I have
a feeling that it will be a while, because their was an article in
the local paper about the ISP that mentioned a lot of the ISP
squad cars are between 5 to 10 years old. I cannot see starcom
being used statewide until the state has more money to purchase
the radios, let alone replacing the older squad cars.

Subject: (CARMA) Starcom timetable

Watch for the St. Clair county joint site to be the first activation in the Starcom system, possibly towards the end of December. Additional southern Illinois sites to activate early 2005, with a push towards and into central Illinois. Another site activation sweep across western Illinois working north starting second quarter 2005. Metro area Chicago has been delayed. Our area will probably not be activated until 4th quarter 2005, possibly not until 2006, though they are hoping for sooner rather than later. Expect the Chicago/Cook county region's sites to be among the last activated in the system. This is all very tenative and subject to large scale changes.

Argonne National Labs will go Starcom when the ISP district Chicago's current GE-EDACS trunked system frequencies get switched to Starcom. Same with the Dupage agencies currently using the ISP's EDACS trunked system. Illinois Secty State police and IL DNR are very likely possible future Starcom users.

Concerns are arising that if other high traffic volume users sign up in the Chicago metro area that additional Starcom frequencies might have to be obtained to handle the increase in system loading.

That's all the Starcom scuttlebutt I have for you this morning. It's not on anywhere yet, but it's coming. Happy Scanning! - Ted

Latest News Update Posted on 11-05-04 15:46
Watch for the St. Clair county joint site to be the first activation in the Starcom system, possibly towards the end of December. Additional southern Illinois sites to activate early 2005, with a push towards and into central Illinois. Another site activation sweep across western Illinois working north starting second quarter 2005. Metro area Chicago has been delayed. Our area will probably not be activated until 4th quarter 2005, possibly not until 2006, though they are hoping for sooner rather than later. Expect the Chicago/Cook county region's sites to be among the last activated in the system. This is all very tenative and subject to large scale changes.

Argonne National Labs will go Starcom when the ISP district Chicago's current GE-EDACS trunked system frequencies get switched to Starcom. Same with the Dupage agencies currently using the ISP's EDACS trunked system. Illinois Secty State police and IL DNR are very likely possible future Starcom users.

Concerns are arising that if other high traffic volume users sign up in the Chicago metro area that additional Starcom frequencies might have to be obtained to handle the increase

in system loading.

31. Radio signal

Yahoo group: StarCom21
Date: 2004-12-09 22:01:53 UTC
From: slars1327
Topic: 31 Message: 31

Hi all,
A question we were talking about the other day in out training office:

Is the system pure digital ?

Can anyone still listen in on a scanner ?

Is encrytion allowed on the system?

My answers were:

yes , digital signal to allow better reception.

I am not sure if any digital scanners are out in the world yet also I
don't think the analog scanners can track the system.

Encrytion at present isn't in the system but it has been engineered
so that an upgrade for encryption can be intergrated .

Well how did I do ?

We are still waiting to see what will really come online and when so
we can see if the system would be right for our use,

Thanks,
Slars1327

32. OFF TOPIC > But useful -- Make Acrobat Reader 6 load faster

Yahoo group: StarCom21

From: Terry Weatherford
Topic: 32 Message: 32

This really works. Use Update 2.
Great for viewing PDF file reports from RadioReference.com.
Trunked Systems can now be printed in PDF format. Regular entries coming soon.

from http://dotnetjunkies.com/WebLog/darrell.norton/archive/2003/10/06/2095.aspx

Make Acrobat Reader 6 load faster
Recently I repaved my laptop to make it a dual-boot Windows Server 2003 / Windows XP machine. I use Windows Server 2003 as my primary operating system, but keep around XP for when I am not connected to a power source (server sucks up the power like there's no tomorrow). Anyway, I installed the new Acrobat Reader 6, and it loads much too slowly! So, after poking around the Internet, I found that it is all the plug-ins that are enabled by default slowing Acrobat reader down. After removing all but 3, it loads pretty much instantly.

Here's how to do it:

Go to C:\Program Files\Adobe\Acrobat 6.0\Reader (replace the C if you installed on another drive, like I did).
Create a new folder called plug_ins_disabled.
Move all files from the plug_ins folder to the plug_ins_disabled folder.
You're done.
UPDATE: See what the Acrobat Reader plugins do.

UPDATE 2: It is better to put all the plug-ins that you want disabled into the "optional" directory. This way the plug-ins will still work, they just won't be loaded at startup. So do this instead:

Go to C:\Program Files\Adobe\Acrobat 6.0\Reader (replace C if you installed on another drive, like D or E).
Move all files from the "plug_ins" folder to the "Optional" folder.
You're done.

33. Re: [StarCom21] Digest Number 20

Yahoo group: StarCom21
Date: 2004-12-10 14:39:15 UTC
From: Rich Carlson, N9JIG
Topic: 33 Message: 33

StarCom will be regular Motorola Astro25 digital, using the standard 9600 baud data signal. All modulation will be digital. Whether it is better voice quality or not is subjective. Having heard several Astro25 systems as well as hybrid digital/analog systems it is my opinion that analog voice is of much higher quality than digital.

There are several scanners out there that will allow one to listen to StarCom, including the Uniden BC786 and BC296 as well as the Radio Shack Pro96.

Encryption will be up to individual subscribers. Since it degrades voice quality and range dramatically, encryption will need to be used judicially. Encryption is also very expensive. Subscriber units are already going to run about $4000.00 or more each, add encryption and you can almost double the cost of the radio. Add in the expense of more complex infrastructure and the expense goes up even more. Some systems save money by having only a couple repeaters at each site capable of encryption, and when encryption is used it would be on those channels only.

There also is the difficulty of making sure all users have the correct key loaded. These issues usually have encryption capable users stop using encryption for routine traffic and only using it during the most sensitive operations and Kryspy Kreme runs.

All sounds good to me, and yes there are scanners out that can track digital P25 systems that are NOT encyrpted. Slars, do you work for the ISP? Most of your aircraft just moved over by me at Mid America airport.

Scott

From: todd hartzel
Topic: 35 Message: 35

Greetings all,
St Clair County, Illinois has their system
partially operating. There is now a 9600-baud data
channel on 866.2250Mhz. With 3 messages being
continuously sent:

96:SY140
96:BEE00
96:TO33B

No talkgroups, yet.
Only 1 site operational. I believe it to be the
'SAVE ROAD' site in SE Belleville.

I can hear it at my QTH in S. Stl City.

Sent: Monday, February 07, 2005 6:12 PM
Subject: StarCom21 FCC Applications & Update

This wording is attached to the recent FCC applications for Central/SouthEastern Illinois sites.

Applications: http://gullfoss2.fcc.gov/cgi-bin/ws.exe/genmen/uls/lic_state_res.hts?db_id=19&rows=0&sndx=ILANAS%&state=IL

The state of Illinois and Motorola, Inc. have partnered to build a statewide, trunked voice radio network. The 186 site STARCOM21 trunked voice radio system, currently in the design and implementation stages, will provide voice radio coverage to at least 95% of the geographic area of the state.

The scope of this project will require an extended implementation period to reach maximum potential. The target completion date is September of 2006. Testing on the system will commence with full foliage in Spring of 2005, with completion anticipated in September of 2006.

..... (see the rest online) .....

Subject: StarCom21 FCC Applications & Update

This wording is attached to the recent FCC applications for Central/SouthEastern Illinois sites.

Applications: http://gullfoss2.fcc.gov/cgi-bin/ws.exe/genmen/uls/lic_state_res.hts?db_id=19&rows=0&sndx=ILANAS%&state=IL

The state of Illinois and Motorola, Inc. have partnered to build a statewide, trunked voice radio network. The 186 site STARCOM21 trunked voice radio system, currently in the design and implementation stages, will provide voice radio coverage to at least 95% of the geographic area of the state.

The scope of this project will require an extended implementation period to reach maximum potential. The target completion date is September of 2006. Testing on the system will commence with full foliage in Spring of 2005, with completion anticipated in September of 2006.

..... (see the rest online) .....

38. ISP District 10 Patrols

Yahoo group: StarCom21
Date: 2005-02-19 03:53:37 UTC
From: Julie
Topic: 38 Message: 38

Somewhat off topic from Starcom21, but can anyone provide any information on the patrol assignment system assignments for District-10 Pesotum. I hear references to patrol 21, 22, 23,24 etc.. I would be interested in knowhing how patrols are set up in this ISP district.

Thanks

Julie

Everything you need:

http://f1.grp.yahoofs.com/v1/kIgsQkFJ3fe_TVnx3ruMJRSI0M3HKVmOEqf6TU7nL_qEWEV2RWewmmOGp2IG1KdiUFQzeW_fZkGXCpgghPx-25qrBw/Profiles/D15.pdf

If link doesn't work go to chicagocarma
yahoogroups look in files under District 15, you
probably know--but in case not--they are 800
conventional (NOT trunked). The system is also a
"ribbon system" (I hope I got the term right),
which means they concentrate the signal to the
toll system so you pretty much have to be a few
miles either side in line with the system.

Curt

Don't forget the car-car VHF high band
stuff---B-1, B-2, and B-3 have become active in
just the past couple of days.

As far as I know, Starcom is not up and running in this area that you are traveling. Try 42.56 and 42.6 for Galesburg and Peoria area. Also search between 154.8 and 155.475. 155.475 is the statewide emergency network and is dispatched by the ISP. rich65_36 wrote: I looking for all digital freq for the state of Ill. Sent: Thursday, April 14, 2005 1:13 PM
Subject: [StLASE] ETSB latest Publication: APRIL, 2005

Greetings all,
The ETSB has published their latest radio system upgrade
document for those that want to read it:

http://www.911.co.st-clair.il.us/radio.html

or:

http://www.911.co.st-clair.il.us/radio042005.pdf

I'm not positive on this...
I would think that when Starcom 21 gets activated
locally, that ETSB's TRS will start advertising the
nearby towers of the ISP. Those of you that use
PRO96COM know what I'm talking about. Its under
the 'TOWER INFORMATION' tab at the bottom of the
screen. Its called the 'ADJACENT TOWER INFoMATION'.

I'm sure the same will be true with the ISP's towers
advertising the other nearby ISP towers & advertising
the ETSB system. It'll be nice to see that currently
used window fill-up.

On a side note, since they activated some of the
other ETSb sites, I am getting weaker signals from the
DuPont site. Must be some signal-cancelling taking
place. My decode of the Voice Channels has dropped
off too. At my Home QTH.

53. Mason Site - Effingham County - Goes On Line

Yahoo group: StarCom21
Date: 2005-04-20 03:14:22 UTC
From: kd4ygg
Topic: 53 Message: 53

And late tonight, I picked up this one:

System ID : 140
System Name : IL STARCOM21
WACN : bee00
Tower Number (Decimal): 327
Tower Number (Hex) : T031B
Tower Description : Mason, IL
Control Capabilities : Voice,Registration

-Tables
#Format: Table ID,Base Freq,Spacing,Input Offset,Assumed/Confirmed
0,851.00625,0.00625,-45.00000,Confirmed

-Frequencies
#Format: Channel,Usage,Frequency
0-a9d,c,867.98750
0-b2b,a,868.87500

For those that may not be familiar - "c" is main control channel,
and "a" is alternate control channel in the above FREQUENCIES section.

This is starting to get interesting and FUN!!!

56. Godfrey site

Yahoo group: StarCom21
Date: 2005-04-23 16:41:18 UTC
From: Todd Hartzel
Topic: 56 Message: 56

Greetings all & Terry,
I have not yet been to Godfrey to check
the 866.675 repeater. But, now that you have
pointed it out, I will go up there with my pro-96
and get the STARCOM 21 TOWER number. I can not
receive it at my home QTH.

I will let you know my results.

Btw Terry, I guess D11 intends on using only
those 4 tower sites to cover all of D11? Minus
TOWER 359, which is the St Clair Cnty-Wide system.
So, based on the D11 map & the fact that St Clair
county will be covered already:

- the East St Louis site should be pointing
towards Monroe County

- Godfrey pointing S and/or SE towards the
whole Metro-East basin (West of the Bluffs)

- Edwardsville pointed due East towards Bond
County

- Belleville site pointed due East towards
Clinton County

Could this be a likely scenario, since the
licenses indicate very high ERP ratings
(obviously, beam antennas used)?

I used this map as the basis for my guess:

http://www.isp.state.il.us/districts/districthome.cfm

Well, for as many sites/ freqs they are adding in District 12 right now, I would imagine that many many more sites/ frequencies are to come, especially as more users come on in Madison County. But for now, that could be the likely coverage area. Thanks Terry ----- Original Message ----- From: Todd Hartzel To: STARCOM21@yahoogroups.com Sent: Saturday, April 23, 2005 11:41 AM Subject: [STARCOM21] Godfrey site Greetings all & Terry, I have not yet been to Godfrey to check the 866.675 repeater. 58. sys140, tower-359

Yahoo group: StarCom21
Date: 2005-04-23 18:31:37 UTC
From: Todd Hartzel
Topic: 58 Message: 58

Greetings all & Terry,
I wanted to pass along, I did another county drive-loop of St Clair Cnty. Seems 8 of the 10 sites are online. Fayetteville & Lenzburg are still silent. Rception in South St Louis County is better now. This can be explained by the Millstadt site being turned on. Before Millstadt was switched on, with just DuPont ; reception was horrid in South St Louis County. It kinda goes-against of what might be ordinarily expected ; since DuPont is closer to Lemay, Mehville & Oakville.

This time, I took I-64 East to Il Hwy 4.
Then south on Il Hwy 4 to Hwy 13.
Then West on Il Hwy 13 to Freeburg.
Then west on Freeburg-douglas Rd to Il Rt 3.

The only one I did not get near, was the NW Belleville site (Metrolink) site. But the ETSB website says its operaational. I'll take their word for it.

So only the 2 far-east Rual sites have yet to be switched on. Then the TOWER-359 simulcast system will be complete.

I'm glad to hear of the other sites up-state coming online too.

60. Godfrey site ; not yet operational

Yahoo group: StarCom21
Date: 2005-04-25 02:08:30 UTC
From: Todd Hartzel
Topic: 60 Message: 60

Greetings all & Terry,
False alarm on the Godfrey site. With PRO-96,

From St Louis City, I took...

- I-55/I-70 east
- took I-255 north to Il Hwy 143
- west Il Hwy 143 to U.S. 67
- North U.S. 67 to Stamper Ln
- stopped at the McDonalds there for soda.
(Drive-Thru)

Nothing heard on anything between 866-869Mhz.
Looked at the two Radio towers on the west side
of intersection. (McDonalds was alittle busy,
so had some time to try a few things on the
PRO-96)

Callsign: WQCJ504

License indicates that is the spot. But nothing
audible from 866-869Mhz. So its a false
alarm ; not active yet.

http://gullfoss2.fcc.gov/cgi-bin/ws.exe/genmen/uls/call_res.hts?
db_id=19&rows=&callsign=WQCJ504

I enjoyed the drive though. I had not been to
Lewis & Clark College since my last visit to the
hamfest there back in the mid-1990s. I don't
frequent the River-Bend area much. Those 2 towers.
I know one belongs to Lewis & Clark College ; one
should be 89.9-FM.

61. New Control Channels In Marion County Area

Yahoo group: StarCom21
Date: 2005-04-28 02:51:59 UTC
From: kd4ygg
Topic: 61 Message: 61

Picking up 866.8250 and 866.4500 tonight, although am not decoding any
System ID information at all.

866.4500 is the Vandalia site.
Suspect 866.8250 might be conversion for IL DOC at Centralia.

Also there must have been some band enhancement tonight around 9:45 PM.
My QTH is Salem, IL and the shack's on the 2nd floor.
With a PRO96 and Radio Shack 800Mhz Rubber Duck,
I was getting anywhere from 80-99% reception per the P96
from the St Clair County system.

Interesting!!!
Chris

Keep an ear on the Champaign site. They are to be testing
during the first 2 weeks of May. It will be keyup only with no
audio. The control channel has been up and running for a
couple of months or so. They plan voice testing late summer.
The Champaign site is slated to be the first one in
operation, probably spring of 2006. This comes from a
technician within the syatem. So, I guess we won't hear
anything exciting for about a year.

63. Band Opening???

Yahoo group: StarCom21
Date: 2005-04-28 12:20:44 UTC
From: kd4ygg
Topic: 63 Message: 63

It appears there was a band opening on 800Mhz last night and this morning.

Correlating the licensed frequencies, I am hearing data channels on the following sites in the Marion County/Clay County area:
866.3375 - alternate control channel for Newton site?
866.4750 - Greenup Site in Cumberland County?
867.4625 - alternate control channel for Mason site?
866.8250 - Lakewood site in Shelby County?
866.4500 - Vandalia site in Fayette County?

What's interesting is that my PRO96 is not decoding any type of system ID on these frequencies, although what I am hearing is DEFINITELY Motorola control channel data.

In addition the Mason and Newton sites are chirping away on their main data channel as well.

"Strange days indeed - most peculiar..."
Chris

866.9000 Was going strong with control channel data this weekend. It appears the radio I was using won't do 9600 baud control channels, so sorry, no system ID for you. But it's there.

Springfield system(s) / freqs seemed all quiet.

Up on the north end of Logan county I caught a control channel data stream on 866.3375, which I listed either Logan or McLean county sites, forget which one. But it was quite weak and may have been a different entity than Starcom.

Happy Scanning! - Ted & Kim

I'm still toying with my new pro-96, I have a control channel loud and clear here in Springfield, (867.325). I did have 867.975 a little weaker but it has now disappeared. If they start transmitting voice on the system, will I be able to monitor it with just the control channel programmed into my scanner? Thanks for any input- I'm still learning. Also, has anyone heard anything about the city of Springfield or any other agency with a trs planning on joining the starcom system once it's up and going?

Tim (and everyone else)

Park on the control channels and report out what you're seeing.

It should come up with a system ID (0140), and tower info (Txxx number).

Any info is definitely appreciated.

Thanks
Chris

From: kd4ygg
Topic: 103 Message: 103

One good thing about tonight's weather east of St Louis - another 800Mhz band opening.

I believe I have identified the East St Louis site as Tower 323 (decimal). Todd (or others near St Louis) - can you confirm?

Also, I'm receiving Tower 333 (decimal) very clear here at the home QTH in Marion County. I suspect it is the IDOC facility in Centralia, but cannot confirm. The only other possibility is up near Chicago - and I doubt the band is open that much.

Both PRO96COM files uploaded for your convenience.

Whie I was typing up the last email regarding Godfrey, I figured I would tune over to the Belleville site just to see if I could catch it (especially difficult with the Newton Site being rather loud at my location most times).

Band must be open just right.

Main Control Channel Frequency: 866.8625
Alternate Control Channel Frequencies: 867.3875, 867.9125

Indeed a good night of luck!!!

110. Belleville site

Yahoo group: StarCom21
Date: 2005-06-13 13:14:08 UTC
From: Todd Hartzel
Topic: 110 Message: 110

Greetings all,
I am curious abt something with the
Belleville site. I am receiving the
866.8625Mhz control channel 99% all the
time w/ my pro-96. My question, sounds
like a slower data signal on 866.3375Mhz.
anybody else getting it too? The PRO-96
does not decode it. Sounds like trunk.

Also, the data channel on 866.8625 T0305
is alot (I mean alot clearer & stable
then the St Clair Cnty TRS T033B. There
is so much of a differance of the overall
superior quality of the 866.8625Mhz data ;
as opposed to the weaker & quite noiser
signal of the 866.2250Mhz data channel.

866.8625 is also quite abit higher volume
level then the weaker volume of the
866.2250Mhz channel.

Glad to see the other MetroEast sites coming
online.

Now I need to see how strong a signal
866.8625 projects into nearby counties.
I'm guessing its targetting towards East.

With the E St Louis site targetting SE at
Monroe County. And Godfrey maybe targetting
East too. Or SE.

Todd,
See the notes Chris has put on the RadioReference.com STARCOM21 page.
http://www.radioreference.com/modules.php?name=TRSDB&sid=2324

I have also noticed changes, different baud rates (actually getting CNTRL to show up on the Pro-92/2067, misc. talk groups, but no traffic). (and actually picking sites up now that I never have)

Terry

Update May 2005
Rollout continues in St. Clair County.
Several sites in the Effingham, Pesotum, and Springfield Districts are on line transmitting trunking data. In addition, some sites are transmitting 3600 baud data channels for test purposes only, with no system ID.

112. Data Channels With No System ID; 3600 Baud Data Channels

Yahoo group: StarCom21
Date: 2005-06-13 14:16:11 UTC
From: kd4ygg
Topic: 112 Message: 112

Terry, Todd, and the Group

Have noticed this alot on sites in the eastern part of District 12:

1) 9600 Baud Data With No System ID being transmitted
2) 3600 Baud Data With No System ID being transmitted
3) 3600 Baud Data Channels at sites with active 9600 Baud data

Have observed that the 3600 Baud systems can't be decoded by TRUNKER either.

Have been told that this is similar to what was done over in Ohio on the MARCS statewide system. Apparently what is happening is that the sites are being set-up with whatever system controllers are in stock at Motorola just to get the sites up and running to test purposes (and to reduce Motorola inventory). Then the hardware/software are flash upgraded to 9600 Baud when the techs are ready to put the site on line. Sounds pretty strange, but apparently is common practice - I believe they call it "concurrent engineering."

114. E. St Louis (T0323)

Yahoo group: StarCom21
Date: 2005-06-14 23:50:48 UTC
From: Todd Hartzel
Topic: 114 Message: 114

Greetings all,
Curious abt one thing. Who is receiving
the E. St Louis site?

I am currently in Lemay, Mo. And no signal at all
from the E. St Louis Site. I am just a few miles
away. I figure that I should get some sort of
faint signal, if they are using 100-watt repeaters
(no matter which direction the antennas might be
pointing towards).

Who is receiving E. St Louis? What is your Loc?
(Approximate Loc, just give city name)

Due to personal demands/reasons, I have not been
giving my pro-96 or any radio of mine alot of
attention over this past month. Now that local
STARCOM 21 sites are up, I will be giving it more
attention. But E. St Louis site is not even
detectable here in Lemay, Mo.

I am located very near Lemay Ferry & Telegraph Rds.
Nicely elevated location.

I am not doubting it being on-air. But I am more
interested in the coverage contours of its
directional antennas.

If its online, its certainly not audible here. Which
would mean that its directional antennas are very,
very effective. And that perhaps its targetting
something else then Monroe county.

My guess was always that E. St Louis would target
Monroe County. I have past-by the Exchange Ave tower
many times observing the antenna orientation. I
thought that any orientation (preference) to Monroe
county would mean easy reception in South St Louis
County.

Todd

Haven't done any tests from the Missouri side, so can't really comment on directional antennas.

Have received this site regulary in the early morning (5AM) from my home location in Marion County (Centralia/Salem), in addition to the Godfrey and St Clair Simulcast Tower (the original tower ID).

While over in Fairview Heights (St Clair Mall area) last Saturday, was getting full quieting on the East St Louis and Godfrey sites on the PRO96 with a Rad-Shack 800Mhz duck. They came in better than the weaker St Clair Simulcast tower.

Makes me wonder if the proposed Simulcast system is going to be replaced with specific sites with different frequencies?

867.3875* > 867.9125*

The plot thickens... I went to work tonight listening
to 867.3625. I triple checked the display screen. It said:
SY140 - BEE00 - T0317

Reception along I-55 was horriable. Absolutely horrid.
In downtown, next to no signal from E. St Louis Site.
But T0305 was strong. Interesting results.

I will try again tomorrow.

120. T0317 & T0305

Yahoo group: StarCom21
Date: 2005-06-16 20:16:13 UTC
From: Todd Hartzel
Topic: 120 Message: 120

Greetings all,
On Wed morning, I made a short loop
around St Clair County, Il. I used this
route:

- PSB I-64 (east) to I-255
- I-255 (south)to Il Rt 3
- Il Rt 3 (south) to Il Hwy 158
- Hwy 158 (east) to Il Hwy 159
- Hwy 159 (north) to I-64
- I-64 (west) to I-255
- I-255 (south ; again) to I-55 (missouri)

Here are my coverage contour results
with my PRO-96 (on stock antenna inside car).
1st, T0305 ; has good coverage in Missouri.
Has much better coverage in Downtown Stl then
the much weaker T0317. (I was alittle
surprised by this). ALso T0305 has good
coverage in South Stl County. T0317 has
no coverage in South Stl County.

(I know Missouri is not the target of the
towers, but this info helps to determine
the direction of the antennas)

@I-64 & I-255, reception of T0317 was solid.
PRO-96 Attenuator 'ON', still 99% signal.

@I-255 & Il Rt 3, reception of T0317 was
difficult. alot of static. T0305 did ok
at this location.

@Il Rt 3 & Il Hwy 158, both T0317 & T0305
disappeared. No signals. Obviously Monroe
County is not the intended target of T0317.

@Il Hwy 158 & Il Hwy 159, T0317 was
detectable, but not decodable. T0305 was
solid.

@Il Hwy 159 in Swansea, T0305 still solid.
T0317's signal was getting better as I
kept north.

@Il Hwy 159 in Fairview Hts, T0305 still
100% solid even with Attenuator 'ON'.

T0317 signal decodable, but suffered drop outs at times. Perhaps localized overloading from nearby 800Mhz Cell / 900Mhz pagers.

@ Il Hwy 159 & I-64, still good signal of T0305. T0317 signal had dropouts. But got better as was Westbound on I-64.

My conclusion:

T0317 is certainly not pointing at Monroe County. I did not travel into nearby Clinton or Washington Counties in Illinois.

I am coming to the conclusion that perhaps T0317 & T0305 might in fact be pointing at each other. T0305 does well in Missouri. Yet T0317 does not. But T0317 does well towards the center of St Clair County.

This arrangement means that it is providing duplicate coverage of St Clair County's system.

With that in mind, why would ISP need T033B to be plugged into STARCOM 21? I thought the purpose was that St Clair County would build its system, and the ISP would not be required to duplicate its coverage.

I guess they want a backup in place, if St Clair County's system goes out. Obviously, they have little faith in the St Clair Cnty System. This proves it.

I'm still surprised they are installing the T0305 & T0317 sites before they do EDW. And not to forget the other sites that will be needed to cover the rual areas: Clinton, Monroe & Bond counties. I'm pretty sure that the Godfrey site is pointing East. Perhaps Godfrey is getting a signal into Bond County, Il.

All

Yesterday we put about 10 of our Astro digital 800 MHz portable radios to work in a regional terrorism exercise. These radios were being used in the basement and top floor our Health Dept (former brick 5 floor building, the basement of our jail facility (no cell phone access) and a newly constructed large energy efficient high school some 7 miles to the west of the first two buildings.

The radios were used beginning on the day prior to the exercise until the end of the day of the exercise. We received no notice that any conversation could not be heard easily. Today we received a call from those team leaders involved who wanted to congratulate us on the new system and who wanted to know when they would get their permanent radios.

We want to thank Motorola for letting us use the radios in a live environment prior to any acceptance.

Yep, it was talkgroup 7006, for those that were monitoring.
I did.

The CEMA talkgroup on 58512 on the SLMPD system was busy too.
The CEMA talkgroup is normally dorment/vacant/unused.

The site being referred to is about 1.5 to 2 miles east of Silver Cross Hospital on Joliet's eastside. The tower is about 500 feet southeast of the intersection of Maple (US6) and Briggs Street. That tower is relatively close to District 5 headquarters on Route 53 and their neighbor Stateville Correctional Center (which will probably eventually add their frequencies to the mix for Starcom)and has no obstruction between the towers.

For those of you who listen to Stateville. Ever since Joliet Corr. Ctr. closed as far as a "prison" and the 800 Mhz. freqs. were reassigned to Stateville, the TG's have been changed considerably. I am only able to monitor a couple times a week but if you have the old talkgroup layout....which I put together when they first went to the 800Mhz system, it is now very different. The NRC or Northern IL. Reception and Classifcation Center at Stateville is a fenced complex west of the walls and they have old TG's reassigned to them and many new ones. I will post the update at the Carmachicago Yahoo group and Radio Reference once I have a solid grip on the changes.

I will also post any activity with Starcom in the Joliet/Lockport area here should I catch anything.

Brian and all...

I know that there is a Starcom21 site at D-05, and another at the ISP Elwood tower site (south of Joliet) but I can't understand why there would be third so close to those - such as the one you describe on the east side of Joliet. Are you sure this tower you describe has Starcom21 equipment there? The ones at the D-05 tower locations are both STANDALONE equipment housings - and from what I've been told, the Elwood site also has its own tower structure (but I haven't traveled there personally yet to verify that).

Yahoo group: StarCom21
Date: 2005-06-20 12:08:52 UTC
From: Todd Hartzel
Topic: 125 Message: 125

Greetings all,
I just returned home after being
away for a week & 3 days. T0305's coverage
is good at my Home QTH in South St Louis City.

Is much better in quality than T033B (t0359).
At my Home QTH, no trace of these towers:

- T0317 (t0323) E. St Louis
- T0337 (t0355) Godfrey

Still not positive on the primary direction
of T0317 (t0323) Antennas. Could be NE or
ESE.

T0305 uses 100-watt repeaters, 195.8-watt ERP.
Directional antenna, yes. Not alot of directive
gain. Could be a pair of 'Twin-Trucker-Antennas'
providing a Bi-Directional preference. Say a
N-S or E-W. My travels do not help to figure out
its primary contour lines. Coverage of this site
is great in Missouri. Yet coverage was great all
along Hwy 159 up to I-64 ; where I stopped. I
should have continued north into Madison Cnty,
to see how much longer the signal would remain
that strong. But I did not. Traveling north into
Madison cnty on Hwy 159 would have also givin me
a better idea if T0317 (t0323) is pointing more
to the NE or not.

Another time, perhaps...

Hi Mark! Long time no see.

I am basing this off of the original post where the lady I think said she spoke to a tech. I was just IDing the tower she described as being on the eastside by the drive in. I have no knowledge of whether it is/isn't, will/won't be a Starcom site. unless of course they use it as a backup tower if Joliet City agrees to "share" some frequencies?..... Who knows. Maybe the original "poster" in this case will chime in. Thanks for sharing the other stuff about District 5 Mark. Hey, is Will County gonna stick with the crappy EDACS or will they jump on board with this thing?.....

Thanks for the info Norm. As you know, Champaign County is in the final stages of the design for our own Digital 800 Astro system. This is good news, indeed!

Greg

>>> 06/16/05 4:43 PM >>>
All

Yesterday we put about 10 of our Astro digital 800 MHz portable radios to work in a regional terrorism exercise. These radios were being used in the basement and top floor our Health Dept (former brick 5 floor building, the basement of our jail facility (no cell phone access) and a newly constructed large energy efficient high school some 7 miles to the west of the first two buildings.

The radios were used beginning on the day prior to the exercise until the end of the day of the exercise. We received no notice that any conversation could not be heard easily. Today we received a call from those team leaders involved who wanted to congratulate us on the new system and who wanted to know when they would get their permanent radios.

We want to thank Motorola for letting us use the radios in a live environment prior to any acceptance.

Hi, Brian (and all...)

Will County is staying with EDACS. They have well over $16 mil invested in their system to date.

I personally agree with them that to scrap the system now would be extremely cost inefficient (i.e., a waste of taxpayer money). Plus, they then would have to pay a monthly "lease" for each radio they placed on the Starcom system. Last cost figures I've heard are about $40/radio/month. As you can see that can get real expensive, real quick.

Also, I'm not saying that EDACS is any better than Motorola, or vice versa... Personally, I'm not a big fan of trunked 800MHz either way - I abhor the audio "quality". Even more, I still don't understand why the ISP decided to change what they have in the first place - after all, it wasn't broke (to the best of my knowledge)...

Topic: 131 Message: 131

This weeks IL-Grants do not contain the Joliet freys as yet, i think Whiteside Co were listed, went thru the newer license stuf for the Illinois, state of on the FCC and nothing listed as yet. The tower in Elwood is south east of the village of Elwood but i have not checked it for the 800 antennas yet. As Mark stated D-5 has the 800 antennas mounted on there tower but a ham friend who does tower work for the state also stated D-5 was on Stans site, time will tell. My PRO96 worked great in Michigan on there 9600 baud system going from tower to tower in the same bank.......Ron in Joliet

132. Talkgroup 7012 on St. Clair ETSB/STARCOM21

Hi all,

I've been running Pro96com on tower 359 (T033B) this evening and have monitored talkgroup 7012 quite a bit. It appears to be a dispatcher, but no corresponding mobile units. It wasn't active when 154.740 was up, so I don't think it was a St. Clair simulcast.

Any ideas?

Greg

Terry,
As luck would have it, I didn't hear a peep out of it later in the evening. I'll try to catch it, and will scan the local VHF channels like you recommended. I can also post my Pro96Com data files if that would be any help.

Thanks,

Greg

OK, it appears that talkgroup 7012 is CENCOM rebroadcast of
155.415/155.760. I don't hear any mobiles on it, though. It's
sporatic, sometimes only getting a part of the transmission. Anybody
else monitoring it?

137. 7012 talkgroup

Yahoo group: StarCom21
Date: 2005-06-29 15:48:52 UTC
From: Todd Hartzel
Topic: 137 Message: 137

Greetings all,
While monitoring 7012 this morning. I
noticed its no longer a simulcast of 155.760.

In fact, they keep refering to picking up
dogs and other animals. Sounds like:

- Animal Control
- Animal Regulation
or perhaps - St Clair Cnty Humane Society?

One conversation I heard was to pickup a
dog in Allorton, Il.

Also, another note. When I got a blast of
that Compression-artifact noise, they too
seemed to receive it. They reqested to
repeat the transmission. 'Did not copy!'

So perhaps 7012 is no longer a simulcast
of any VHF/UHF user. Perhaps 7012 has a user
now.

I'll listen on-and-off for a couple of days.
See if 7012 changes again.

Greetings all,
While monitoring 7012 this morning. I
noticed its no longer a simulcast of 155.760.

In fact, they keep refering to picking up
dogs and other animals. Sounds like:

- Animal Control
- Animal Regulation
or perhaps - St Clair Cnty Humane Society?

One conversation I heard was to pickup a
dog in Allorton, Il.

Also, another note. When I got a blast of
that Compression-artifact noise, they too
seemed to receive it. They reqested to
repeat the transmission. 'Did not copy!'

So perhaps 7012 is no longer a simulcast
of any VHF/UHF user. Perhaps 7012 has a user
now.

I'll listen on-and-off for a couple of days.
See if 7012 changes again.

Im a friend of Jenny the one that posted my message for me

I heard on a Amateur Repeater a radio tech that does work for various telecom groups and also worked on installing a dept of homeland security radio system used in chicago. I wish I could remember his callsign he is from New Lenox. This guy made mention of this tower being a site for starcom and also joliet trunking.
He was at this site to do some work on some equipment and made mention starcom was there.. Thats all I know my ham radio did not have enough power to make the repeater he was on(ht) Sorry! I wanted to ask the guy questions
He seemed very intresting I will sort thru the hams in New Lenox and find his callsign:) take care!

Topic: 140 Message: 140

I and others sent that ham email about the freqys he was working with on that tower, the freqys have NOT been issued as yet for Joliet, he was refering to the Nips-pac freqys that are built in to the system already. Keep a eye on the www.midwestgrants.com for the license to show up. The system should be analog the first year and then be changed to digital...Antennas are mounted at D-5 Hdqtrs and at the Elwood ILL tower of KXT894, not sure that tower called Stans Tower will actually be a site. I have a list of the sites which name the ones i have and also two more unidentified locations in the Joliet area.......

142. Talkgroup 1 on STARCOM21/St. Clair County

Yahoo group: StarCom21
Date: 2005-07-02 03:11:41 UTC
From: Greg Horine
Topic: 142 Message: 142

I monitored a short transmission between two users on talkgroup 1.
Sounded like car-to-car traffic between to police officers. I didn't
have Pro96Com running, so I didn't catch anything else. I'll monitor
this weekend and see if it pops up again.

Anybody else listening in?

73, Greg

145. Digital Ready Scanners

Yahoo group: StarCom21
Date: 2005-07-03 17:35:08 UTC
From: Jesse Risley
Topic: 145 Message: 145

I have a question for the group:

I am new to this yahoogroup and I'm not very familiar with digital ready scanners on the marketplace. Which model is currently recommended for STARCOM 21 monitoring? I understand that both Uniden and RadioShack have scanners available with APCO-25 digital boards.

I live in McDonough County (Macomb) and would be interested in monitoring for traffic from either the Schuyler County transmitter or the Hancock County transmitter. I'm hearing that District 14 in Macomb may be allocating some tower space in the near future for testing purposes as well.

Thanks,

Jesse L. Risley

The Uniden 296 and 796 both work with the Starcom system. The new 396 should work fine also. It has just been released for sale. All 3 come with the digital board built in. The previous models of Uniden digital had the digital board optional. Those units (250 and 785) will handle 3600 baud control channels but not 9600 baud. The 3 newer ones do handle the 9600 baud. I'm not very familiar with the RS scanners. I do have the Unidens, but not the 396 yet.

The state will not use the system until next summer, 2005. However, many towers are up and control channels are active. Some of the other services using the Starcom system may be up an running soon. Don't expect to hear a lot right now on most towers. System testing is in progress.

I am not very familiar with digital scanners either, but I have a pro-96 from RS and it can monitor the starcom system. I have only programmed it by hand so far, and can recieve one of the control channels here in Springfield, (867.325). I have a uniden bc 780 but it does not recieve digital signals, so I can't give you any info in ragards to the digital scanners made by uniden. The pro-96 seems to work very well, though, on both digital and analog signals.

All the additional sites have been added to RadioReference.com

Multiple Chicago area sites, many for ISP Districts 21, 20, 18, 12 & 13.

There are also new frequencies for the Illinois Toll Highway Authority, they are being licensed with the same number of mobiles, so I added them to the STARCOM21 system. (99xxx site numbers)

Feel free to double check my work for mistakes. There should be no mistakes on frequencies, they were just copy and pasted. Some counties have multiple sites with the same frequencies, so I put them all together as Multiple.

150. Talkgroup 7082 - St Clair County

Yahoo group: StarCom21
Date: 2005-07-05 10:23:06 UTC
From: kd4ygg
Topic: 150 Message: 150

Heard some brief transmissions on the St Clair County site using talkgroup 7082. Not enough traffic, and too far away to clearly hear the traffic.

Anyone closer monitor the same traffic? It was after storms rolled through the Belleville area, so it may have been related. Also heard Belleville Fire on UHF and O Fallon Fire on VHF being told to go to their backup radio systems - perhaps they were testing???

Thanks & 73s
Chris

Greetings all,
Glad to license coming out for Monroe
county. I plotted out 11840 Holloway Rd on
maps.google.com, and it is in the SE corner
of Monroe County. Is not too far from the
Lenzburg tower (T0359), nor too far from
Chester, Il and alot of Randolph Cnty.
Its very close to the D13 tower @Pickneyville.
And not too far from D13's tower @DuQuoin,
or D13's tower at Evansville.

Quite a sandwich-ing-in of those towers.
The Monroe tower looks to be pretty dominating.
Structure is: 127.4 meters (382.2 feet).
Antenna located at the: 97.5 meters (292.5
foot) level on the tower. Not bad.

I am also glad to finally see those D18 towers.
will plot them on maps.google.com too. See
what kind of coverage zone to expect.

Added District 18 site at Mt. Olive (Montgomery/Macoupin)

Also picking up Pro-92 CNTRL on 866.8375 (thought it was a control on Mt Olive 866.85, but not) which is a site 323 (East St. Louis) but not listed as Control (of course this is not 9600 baud)

Subject: [StLASE] 800 Mhz Rebanding

I found this

These slides come from Motorola's rebanding site. Maybe we can
make this a sticky to serve as a quick-reference for the two most
frequently-asked rebanding questions:
"Will my radio have to be replaced?", and
"When will the rebanding occur in my area?".

Note: "Reprogram Subscriber" means the radio requires a Flashport upgrade.

157. STARCOM21 New Sites & Call Signs issued

Yahoo group: StarCom21
Date: 2005-07-23 23:42:16 UTC
From: Terry Weatherford
Topic: 157 Message: 157
Attachments: 1 described; binary payloads are missing from this source WARC

Many call signs issued this week, updated the RR.com website.

Thanks to Robert, "remedy44" for helping with the call signs.

Also new sites added in districts 01 (Multiple) 13,18, 20 (Quincy), 22 (multiple-Southern IL), another Chicago site on the same frequencies as already listed, and an additional District 2/McHenry site on its same frequencies.

It appears to that STARCOM21 may NOT Be using the old 800mhz frequencies/sites that have been around for years.

855.21250 856.21250 857.21250 858.21250 859.21250 860.21250

Have not heard anything or seen anything (new) about 700mhz (or 900mhz) frequencies being used.

Additional information can be found on the ScanIL website, sorry it has NOT been updated. Look far down the page.
http://www.scanil.com/F/SW/isp.htm

Hopefully I can update/re-organize that page soon.

Thanks and please submit any information to Rich and RadioReference.com

Subject: STARCOM21 sites added

Additional sites added today. Districts 1, 7, 9, 14 (and maybe others - sorry can't remember right now)

All former old IL state TRS sites with 855.21250 856.21250 857.21250 858.21250 859.21250 860.21250 have been moved to 8xxxxx series site numbers. It appears as if these MAY not be used with STARCOM21, as they are licensing other frequencies in the same city. Please continue to check these frequencies, just in case of activity.

McLean installing new radios

Friday, August 5, 2005

BY CARRIE KEEPLE

OF THE JOURNAL STAR

BLOOMINGTON - The McLean County Sheriff's Department is hoping to get online by next month with a new radio system that eventually will be broadcast statewide, connecting participating police and city and county agencies.

McLean County Sheriff David Owens said Motorola's StarCom21 digital radio system will provide more efficiency and better clarity and quality that will improve communication among officers.

"And the side benefit will be we'll have interoperability with the Illinois State Police," Owens said.

He said Motorola officials plan to turn on a controller for the radio system Aug. 23 in Springfield. Then they will conduct some tests before the Sheriff's Department can get online on or shortly after Sept. 1.

Owens said, much like owning your own cell phone, the department will pay Motorola to use the system, which will include maintenance for the towers in the county.

Three to four towers will operate initially, he said, with the potential of eventually hosting six to seven towers across the county.

The towers will transmit signals to radios in police vehicles and also officers' portable radios.

The department began installing new radios Thursday in about 30 vehicles to be compatible with the system. Radios also will need to be installed in all rural McLean County police vehicles and Normal Police

and Normal Fire Department vehicles, Owens said.

He said after all cars are updated with new radios and online, the Sheriff's Department will conduct its own tests before completely transferring from its current E.F. Johnson system to the StarCom21.

The new system will cost about $2.9 million, Owens said, which will be paid for through federal grant money and a 25 percent local match by the Emergency Telephone Service Board. McLean County will receive about $2.2 million as part of a federal grant shared with St. Clair County, Owens said.

He said he's worked on getting the system for four years.

"And if this gets up and is a success, we would want to share it with other agencies," Owens said, noting he's hoping Peoria will get involved.

FORWARD:

All

Just a note. Today at 10:10AM the new 700/800MHz radio system in St. Clair County began live operations. To date there are users from two law enforcement agencies on the system. Tomorrow we transition the St. Clair County Highway Department. The independent St. Clair County system which is connected to the Motorola Statewide system and which will enjoy roaming State wide is the first such system to begin live operations.

171. Good Luck with the system, you will need it

Yahoo group: StarCom21
Date: 2005-08-26 14:59:00 UTC
From: rangerd4ever
Topic: 171 Message: 171

Just got back from Michigan and lots of "real" conversations with state troopers, state DNR folks and local fire and cops on their Motorola system. All I can say to my brother officers in Illinois is GOOD LUCK...the actual end users of the Michigan system have a LOT of complaints about the system. Ask someone who is honest about why Oakland County (Detroit etc.) went on an EDACS system instead of jumping on the Motorola bandwagon. Lots of luck working a portable on the system without shelling out LOTS of big bucks to make it work right. Its Florida all over again !!

174. St Clair Sheriff also on SLMPD NPSPAC-2

Yahoo group: StarCom21
Date: 2005-09-03 05:18:02 UTC
From: Todd Hartzel
Topic: 174 Message: 174

Greetings all,
Just to let everyone know. The
St Clair County Sheriff (154.740) &
Talkgroup 7017 on Tower 359 (33B)
for STARCOM 21 is now also being
repeated over the SLMPD's new NPSPAC
repeater system. On:

- NPSPAC-2 - 866.5125 - CTCSS: 156.7Hz
--1200 Clark - downtown St Louis, Mo--

Only the Dispatcher is being simulcast
over the SLMPD repeater. Not the mobile
units. (This is also how the simulcasting
first started on T0359). Earlier in the
day I'd heard the 57840 - Comport
talkgroup (SLMPD) calling the St Clair
County folks directly on that talkgroup.
They chatted for awhile. And making
comments about the sound quality.

175. New Talkgroups - St Clair County

178. St Clair Cnty 155.415 on the SLMPD 866.0125 Rpt

Yahoo group: StarCom21
Date: 2005-09-06 21:56:41 UTC
From: Todd Hartzel
Topic: 178 Message: 178

Greetings,
155.415Mhz - CTCSS: 141.3Hz is simulcast on
the SLMPD Repeater 866.0125Mhz - CTCSS: 156.7z.
Not sure how long it will last. The 154.740Mhz
simulcast did not last long on SLMPD's 866.5125
Rpt.

Again, just like before. It is only the dispatcher
for 155.415 that is being simulcast. Not the
mobiles.

179. 7018 talkgroup (T0359)

Yahoo group: StarCom21
Date: 2005-09-06 22:09:50 UTC
From: Todd Hartzel
Topic: 179 Message: 179

Greetings,
Btw, the 7018 talkgroup is the 155.415Mhz
simulcast.

180. Comments abt talkgroup 7018 & 155.415

Yahoo group: StarCom21
Date: 2005-09-06 22:41:34 UTC
From: Todd Hartzel
Topic: 180 Message: 180

Greetings Terry,
Here are some comments abt the
155.415Mhz -to- Talkgroup 7018 Patch.
--I say patch because it seems like a true
patch now--

First of all, let me explain that my QTH in
Southwest St Louis City is on the outer
fringe area of the the St Clair County VHF
radio system. Signals are very weak. In
fact, 155.415Mhz is weaker than 154.740 or
155.760.

I was listening to both 155.415 & the Talkgroup
7018. I heard the dispatcher mention a test with
Millstadt units. Well, one of those Millstadt
units replied. I heard the reply on my PRO-96
(this was expected with a repeater in use).

However, I also heard that Millstadt unit on two
of other radios tuned to 155.415Mhz. The signal
strength was same as the dispatcher's signal.
My guess: is that the Millstadt units now are
actually using 800Mhz radios, and the 7018 talkgroup
and 155.415Mhz frequency are indeed truely patched,
true cross-band two-way comms can now occur.
(not just simple simulcasting)

I heard those Millstadt units on VHF because the
Dispatcher's VHF Base Station is now patched into
the 800Mhz talkgroup.

OK, as far as I know, only Millstadt is the only PD actually using 800mhz radios.

So that would indeed possibly be the issue here.

Sounds very exciting, wish I could hear it all!

Subject: *STARCOM21* Comments abt talkgroup 7018 & 155.415

Greetings Terry,
Here are some comments abt the
155.415Mhz -to- Talkgroup 7018 Patch.
--I say patch because it seems like a true
patch now--

First of all, let me explain that my QTH in
Southwest St Louis City is on the outer
fringe area of the the St Clair County VHF
radio system. Signals are very weak. In
fact, 155.415Mhz is weaker than 154.740 or
155.760.

I was listening to both 155.415 & the Talkgroup
7018. I heard the dispatcher mention a test with
Millstadt units. Well, one of those Millstadt
units replied. I heard the reply on my PRO-96
(this was expected with a repeater in use).

However, I also heard that Millstadt unit on two
of other radios tuned to 155.415Mhz. The signal
strength was same as the dispatcher's signal.
My guess: is that the Millstadt units now are
actually using 800Mhz radios, and the 7018 talkgroup
and 155.415Mhz frequency are indeed truely patched,
true cross-band two-way comms can now occur.
(not just simple simulcasting)

I heard those Millstadt units on VHF because the
Dispatcher's VHF Base Station is now patched into
the 800Mhz talkgroup.

184. St Clair County Becoming More Active!!!!

Yahoo group: StarCom21
Date: 2005-09-08 01:42:14 UTC
From: kd4ygg
Topic: 184 Message: 184

St Clair County looks to be coming on line fast.

New talkgroups tonight.

7006 Appears to be CENCOM/PSAP Centers Mutual Talkgroup
7011 Unidentified Law Enforcement
7038 Lebanon Police???
7067 Unidentified Law Enforcement

Let's get monitoring!!!

PS - hearing lots of comments on the clarity of the radios.

PSS - I'm receiving the system from Salem, IL from a 2nd story apartment on a PRO-96 and Radio Shack 800Mhz rubber duck!!!

And they say scanning is dead???!!!

7006 --> 'County Calling'
(In my PRO-96, its 'Cnty Calling')

I have heard multiple-multiple references
to 'County Calling' on alot of the other
talkgroups.

Oh yes, the system is alive & kicking
Big-Time. Lots of talkgroups now!!!!
Still have problem here at my QTH of
multiple Site RF Canceling. Is very
bad for P-25 Digital audio.

Obviously you are not suffering same fate
as me. My qth is Southwest St Louis City.
The multi-site RF canceling in my PRO-96
is extremely bad. Plus, I know Nextel's
towers at Morganford/Fyler are not helping
me one-bit. They cause havoc on my other
radios when monitoring SLMPD.

186. talkgroup 7048

Yahoo group: StarCom21
Date: 2005-09-08 16:13:05 UTC
From: Todd Hartzel
Topic: 186 Message: 186

Greetings all,
Not sure abt this. But 7048 could be
a sanctioned Towing Company for the Cnty.
Comms on 7048 are very similar to the Comms
on S & H Towing's Talkgroup: 192 on System
7B24. So far today,

Keep hearing units say...

'Got two more coming your way'.
'Got three, sending them down your way'.
'Got one more for you'.
'Its a Red PU Truck'
'Its blk truck, send them over here'
'Blk BMW, last'

The Comms are identical to S&H Towing's
talkgroup. Anyone know if St Clair County
owns their own Tow lot? Or has contract
with one?

Just a guess so far.

187. Talkgroup 7076

Yahoo group: StarCom21
Date: 2005-09-08 16:25:12 UTC
From: Todd Hartzel
Topic: 187 Message: 187

Greetings all,
Talkgroup: 7076

Heard this:

'Animal Services to Unit '

I had suspected it was some sort
of Animal Control/Regulation or similar
organization ; based on the previous
comms heard.

On my PRO-96, I have Talkgroup 7076
listed as:

'Animal Svcs'

St Clair County does not have it's own tow lot. They use various
towing firms throughout the county to handle the county's tows.

It's a Highway Channel. They're working opposite ends of the road at
a roadside worksite (my guess is out of line of sight of one another)
and they're taking turns holding traffic. There's two such channels
that I've identified so far-7041 and 7048.

PAX.

Topic: 197 Message: 197

FYI... supposedly all Millstadt agencies are to be using the system.

Public Works/Street
Police

Are you hearing any kind of unit numbers on the Police Channels?
From my notes, all I've ever heard on VHF was "Millstadt unit from CENCOM"

There is a FCC license for M Ambulance Service, but not sure that it still exists.

Formerly, MPD had:

1 local channel (also public works & Fire/ems) and 2 channels they could use to talk to on CENCOM.

Fire: I've never heard a "Millstadt Fire" page....
There is a FPD, called "Union Fire" bases out of Millstadt, but more than likely not associated with the village and they would still be on VHF.

Thanks
Terry

Thanks for the follow-up.

Didn't really note unit numbers - the system comes in quite clear in the evening, so I'll do some listening tonight.

7018 was previously reported as Millstadt PD and was being simulcast on 155.415. The users on TG 7018 said "go car-to-car" and came back up on the Talkgroup noted.

201. St Clair County - Only 5 Frequencies In Rotation

Yahoo group: StarCom21
Date: 2005-09-13 02:09:30 UTC
From: kd4ygg
Topic: 201 Message: 201

Very interesting observation from this past weekend and tonight.

Only 5 of the frequencies licensed are currently in rotation as noted
by using the PRO96COM program.

866.0750
866.2250
866.7000
867.1625
867.5875

Of these, 867.5875 and 867.1625 are carrying a majority of traffic.
866.0750 has only shown up as a CW Identifier.
866.2250 has only shown up as an alternate data channel, but no voice.

538 is Fairmont City, being repeated on 155.415 (strong signal but mobile was hard to understand)

Possible Fairmont City is on actual STARCOM21 using 800mhz units.

Will keep monitoring

Also heard
7101 couldn't hear mobiles
4595 same scale as dispatch
2126 couldn't hear mobiles

203. St Clair Talkgroups vs. Old VHF Assignments

Yahoo group: StarCom21
Date: 2005-09-14 02:33:52 UTC
From: kd4ygg
Topic: 203 Message: 203

Terry and the group,

Based on Terry's unit number listing on scanil.com, I am wondering if the new Starcom radios are set up similarly to the old VHF assignments?

i.e.

Sheriff Dispatch 1 Talkgroup on STARCOM has same users as 154.7400 used to.....

This could possibly explain hearing different unit numbers on talkgroups we've guessed at.

Not sure how St Louis PD transitioned over when they switched to 800Mhz, but from a user standpoint, wouldn't you want the day-day layout of the radio to be familiar if not identical???

Chris

204. St Clair - Talkgroup Educated Guesses, Part 1

Yahoo group: StarCom21
Date: 2005-09-14 03:24:14 UTC
From: kd4ygg
Topic: 204 Message: 204

Group

Normal Motorola radios have a 16-position selector switch that is NORMALLY programmed as a channel/talkgroup selector. To transfer between different banks, usually a keypad depression (or other selector switch) is done to select a different ZONE (bank).

This being said, and knowing that USUALLY system designers use sequentially assigned talkgroups (based on a lot of other systems), I present the following to ponder...

Zone 01, Talkgroups 7001-7016
TG 7001-7016 are systemwide type talkgroups

Zone 02, Talkgroups 7017-7032
TG 7017-7020 appear to be direct replacements for old VHF F1 to F4
Other talkgroups are most likely "ops" channels

Zone 03, Talkgroups 7033-7048
Most likely more PD ops channels???
Talkgroup 7041 and 7048 may be highway department related.
However, these could also be traffic control or "ops"-type talkgroups. More investigation is needed!!!

Zone 04, Talkgroups 7049-7064
Most likely more PD ops channels???
Possible Fire talkgroups???
No noted usage of these talkgroups YET

Zone 05, Talkgroups 7065-7080
Appears to be more PD ops channels.
TG 7078 was positively ID as car/car for units using the F2 dispatch talkgroup users. TG 7077 sounded similar in nature - it's most likely car/car for F1 dispatch talkgroup users. Another is Animal Control.

Zone 06, Talkgroups 7081-7096
Possible Fire talkgroups???
No noted usage of these talkgroups YET

Zone 07, Talkgroups 7097-7112
ESDA, Mutual Aid Talkgroups?
NOTE: ETSB-1 talkgroup is LAST Channel in this zone

Zone 08, Talkgroups 7113-7128
Zone 09, Talkgroups 7129-7144
Zone 10, Talkgroups 7145-7160
Zone 11, Talkgroups 7161-7176

Zone 12, Talkgroups 7177-7192
Zone 13, Talkgroups 7193-7208
Zone 14, Talkgroups 7209-7224
Zone 15, Talkgroups 7225-7240
Zone 16, Talkgroups 7241-7256

Don't think a county this size needs this many talkgroups? Look at some other systems - well over 100 talkgroups, many with 200 talkgroups.

Things to ponder and a "possible" plan to figuring the system out.

Thanks & 73's
Chris

Subject: *STARCOM21* St Clair - Talkgroup Educated Guesses, Part 1

Group

Normal Motorola radios have a 16-position selector switch that is
NORMALLY programmed as a channel/talkgroup selector. To transfer
between different banks, usually a keypad depression (or other
selector switch) is done to select a different ZONE (bank).

This being said, and knowing that USUALLY system designers use
sequentially assigned talkgroups (based on a lot of other systems), I
present the following to ponder...

Zone 01, Talkgroups 7001-7016
TG 7001-7016 are systemwide type talkgroups

Zone 02, Talkgroups 7017-7032
TG 7017-7020 appear to be direct replacements for old VHF F1 to F4
Other talkgroups are most likely "ops" channels

Zone 03, Talkgroups 7033-7048
Most likely more PD ops channels???
Talkgroup 7041 and 7048 may be highway department related.
However, these could also be traffic control or "ops"-type
talkgroups. More investigation is needed!!!

Zone 04, Talkgroups 7049-7064
Most likely more PD ops channels???
Possible Fire talkgroups???
No noted usage of these talkgroups YET

Zone 05, Talkgroups 7065-7080
Appears to be more PD ops channels.
TG 7078 was positively ID as car/car for units using the F2 dispatch
talkgroup users. TG 7077 sounded similar in nature - it's most likely
car/car for F1 dispatch talkgroup users. Another is Animal Control.

Zone 06, Talkgroups 7081-7096
Possible Fire talkgroups???

No noted usage of these talkgroups YET

Zone 07, Talkgroups 7097-7112
ESDA, Mutual Aid Talkgroups?
NOTE: ETSB-1 talkgroup is LAST Channel in this zone

Zone 08, Talkgroups 7113-7128
Zone 09, Talkgroups 7129-7144
Zone 10, Talkgroups 7145-7160
Zone 11, Talkgroups 7161-7176
Zone 12, Talkgroups 7177-7192
Zone 13, Talkgroups 7193-7208
Zone 14, Talkgroups 7209-7224
Zone 15, Talkgroups 7225-7240
Zone 16, Talkgroups 7241-7256

Don't think a county this size needs this many talkgroups? Look at
some other systems - well over 100 talkgroups, many with 200
talkgroups.

Things to ponder and a "possible" plan to figuring the system out.

206. clarification

Yahoo group: StarCom21
Date: 2005-09-14 12:39:24 UTC
From: jburgess1974
Topic: 206 Message: 206

I just want some clarification.With this STARCOM21 system, to monitor do you have to program multiple sites or only particular sites you want to monitor? Is it possible to monitor any site no matter the location in the state (e.g. live in Montgomery County and monitor communications in Logan or even Peoria County)?

207. Re: clarification

Yahoo group: StarCom21

Topic: 206 Message: 207

This should explain it:

Type II SmartZone

SmartZone systems are comprised of Type II Smartnet systems that are networked together via microwave or land-line data circuits to provide multi-site wide-area communications. Each individual trunked system is considered a site, and is controlled by the Zone Controller, which is the master controller for all activity and is where all network links are terminated at.

Your primary type of sites are 6809 (single or Simlcast configurations), MTC-3600 (introduced to take the place of the 6809), and IntelliRepeaters (single-site only).

A feature unique to SmartZone and allows efficient use of channels at each site is called "Dynamic Site assignment." Its simple purpose is to determine whether a site needs to broadcast a call or not. In order to make this feature work subscriber radios are required to affiliate, or send in their radio id and talkgroup, whenever they power-up, change channels, or change sites. These affiliations are compiled into a table which the Zone Controller maintains. When a call is requested at a site the Zone Controller determines which site that talkgroup is registered at and routes that audio via a switch, to the appropriate channel at the site. Many large public safety and state agencies use SmartZone systems for wide-area communications.

The characteristics of a Motorola SmartZone system are similar to Smartnet systems with the following changes:

Up to 28 channels per site
Up to 64 sites (older ZC versions were limited to 48)
Analog and/or digital voice

Monitoring a SmartZone system with a trunktracking scanner is the same process as monitoring any other Type II Smartnet system, except that you can only monitor one site at a time.

For you to monitor a specific talkgroup on a SmartZone site, someone's radio must be affiliated to that specific site. Therefore, if you are monitoring talkgroup "POLICE-NORTH" on a site with no affiliated radios on that talkgroup, then you will not hear any communications on that talkgroup on that site.

Now if a mobile unit from let say St. Clair County in enroute to Springfield to pick up a prisoner, then the sites along the way would probably be broadcasting talkgroups that that mobile unit may need to communicate back with base... correct?

Same with EMA or ISP units that are not currently in their home district but need to stay in touch with home?

I'm sure it could work many different ways when needed?

When i took my PRO96 to Michigan going up to Holland i had programmed in along with what RS/GRE had in V-Folder 8 the tower and back up data channels for TO303(Jones-Cass Co), TO304 (Summerville), 306 (Sawyer-BerrianCo), i separated them by a couple of conventional freqys and the radio kept shooting out the Talk Groups for the area i was in and actually changed towers and was still hearing Berrian Co, this is i hope a good example of what we will have here in IL. I really liked the digital sound, nice and clear and the radio with automatic AGC (no adjusting) performed great as it also did in Indiana with the towers for there system in Gary,Lowell, Plymouth....Ron in Joliet

211. STARCOM21 - Scanners Which Can Trunktrack System

Yahoo group: StarCom21
Date: 2005-09-15 00:54:50 UTC
From: kd4ygg
Topic: 211 Message: 211

STARCOM21 is a Motorola P-25 Smartzone system operating with 9600 Baud control channels.

The following scanners are the only ones that can trunktrack the system:
Radio Shack PRO-96 Handheld
Radio Shack PRO-2096 Base
Uniden BC296D
Uniden BC796D
Uniden BC396T

Chris,

This is a P25 system, and should be programmed as such.

I've got a 396. Check your firmware version-mine did the exact same thing when I first got it, then found out that there was a problem with TGIDs > 4096 (all of St Clair county's are above 4096). The first firmware update corrected this-(version 1.0.7.01) They're currently on the second updated Firmware release-1.0.8.07. Apply the update, and the problem should go away.

Also, I've been reading that others have had problems with the 1.0.8.07 firmware taking a bit longer to decode the digital signals, but personally, I haven't seen this problem. If you do, just revert back to 1.0.7.01.

Take it easy-

Steve

215. 155.415 - Talkgroup 7018

Yahoo group: StarCom21
Date: 2005-09-19 13:51:22 UTC
From: Todd Hartzel
Topic: 215 Message: 215

Greetings all,
Obviously alittle bit of confusion is
going around. Millstadt PD is NOT the
exclusive PD agency on talkgroup 7018.
After all, anyone that monitored or still
monitors 155.415 knows that this is NOT true.
The 7018 talkgroup is simply a mirror of the
155.415 frequency.

When I announced that Millstadt units were
using 800Mhz radios on 7018. I was merely
stating that they were the first to migrate
from 155.415 to 7018. Millstadt does not,
nor has held the exclusive rights to 155.415.
Nor 7018 (as far as I know).

What does surprise me ; is that at least it
seems that no effort has been made to migrate
the folks on 155.760 - CTCSS: 100.0Hz.

Nor is there any PATCH or SIMULCAST of 155.760
on the St Clair 800Mhz System.

For my PRO-96, I labeled the talkgroups for
the most basic of simplicity, but also so
the TEXT tag will fit on screen:

ID - Talkgroup Name
7006 - Cnty Calling
7017 - 154.740
7018 - 155.415
7041 - I-Dot - Ch2
7048 - I-Dot - Ch1
7076 - Animal Svcs
7112 - ETSB-1

Yes, I labeled 7041 & 7048 as I-DOT because
they are the ones adding and/or supervising
the additional lanes on I-64 in St Clair
County.

For more info go to I-DOT's special website:

http://www.64addlane.com/

216. Re: *STARCOM21* 155.415 - Talkgroup 7018

Yahoo group: StarCom21
Date: 2005-09-20 04:33:31 UTC
From: Terry Weatherford, N9MAE
Topic: 216 Message: 216

The one thing we still have to remember is the interoperable channels.... many may just link one to another or something,..... maybe?

I can't believe there is not a talkgroup patch/simulcasting some of these:

154.19 Fire
ISPERN 155.475
I-REACH 155.055
ESDA 158.835 (10am every day gives weather forecast and more)
IFERN 154.265

other possibilities include

A patch for
Abbott EMS, 400mhz
MedStar EMS (on their own 900mhz TRS)
155.28 IL Dept of Public Health - Hospital Disaster Coordination
155.34 MERCI-1
155.16 MERCI-3

Belleville Police 400mhz
East St. Louis Police 400mhz
Fairview Heights Police 400mhz
O'fallon Police 400mhz

School Districts/Security/Buses

Link to SAFB new VHF APCO-25 TRS system.

Link to METRO (Metro Link) / St. Clair County Transit District

With a site right there, Mid-America Airport ops all switch soon too ???

Also, been doing extensive monitoring of 155.415 and 155.76 this last week to see what agencies are operating on what.

You can see a lot of my results here:
http://www.radioreference.com/modules.php?name=RR&action=codes&code_id=958

Conclusion at this point:
Fairmont City & Millstadt are the ONLY 2 agencies actually using 800mhz radios. ALL their transmissions are repeated same scale as dispatcher.

Just this weekend, for some reason, never noticed it before, no matter which frequency the mobile unit was using, CENCOM would talk back on BOTH 155.76 & 155.415 at the same time.

So all the channels with "unidentified police" give me a clue to street names, references and unit numbers and I'll try to monitor and pull these talkgroups together.

NON-TRS related :::: ALSO, with the 3 or 4 sites simulcasting paging 154.19 for fire paging, here in Madison County it is sometimes hard to understand or you can just tell the sites are not aligned properly or something. There was also a 100.0 PL tone on the page tone and still CSQ on the voice.

217. Trunked system question

Yahoo group: StarCom21
Date: 2005-09-22 02:26:52 UTC
From: eagle_602000
Topic: 217 Message: 217

Good evening,
I am new to the list and have just recently began
reading about Starcom21.

Am I correct in thinking the system will be operated solely through
land based repeaters? If so, what impact will this have if a
communications infrastructure failure were to happen as it did in the
gulf states? Does the system in any way use satellite links to the
served agencies in the state?

As I said I am just learning about the system, but with what I would
really like to know is the Starcom21 system going to be more
effective than the current methods of radio communications? If there
are no satellite links, this system will be no better than the
current method. The units will have to work simplex, meaning the
interoperability between agencies/jurisdictions will not be at all
efficient.

I am just wanting more info on my questions/observations.
Thanks,
Jimmy Hill, W9JDH

218. Trunking Failures

Yahoo group: StarCom21

From: dataman60435
Topic: 218 Message: 218

I realize this may not be the correct group for this but a quick comment on N.O. trunking. Some great articles on the failure of trunking in the effected area are on www.strongsignals.net, i think your correct on land based towers, when the trunk system here in Joliet IL got struck by lightning it did NOT fail soft, they had to use cell phones to call areas for fire and police calls. Too many different kinds of systems, no interoperability, keep your good old low band and VHF system handy...Thanks for listening...

219. Re: *STARCOM21* 155.415 - Talkgroup 7018

Yahoo group: StarCom21
Date: 2005-09-25 08:01:30 UTC
From: Terry Weatherford
Topic: 216 Message: 219

Been monitoring the VHF channels more the last few days.

There is another frequency, 154.815 used for Shiloh, Lebonon PDs.

It appears to be in use the same ways that 155.76 and 155.415 are
being cross-patched.

Sometimes the dispatchers are on 1, 2 or all 3 frequencies, and the
mobiles only on 1 (if I can here them). Some of the mobiles on ANY
of the 3 channels could be the same scale as the dispatcher.

If I actually had the capabilities of listening to the digital
system, I could make more out of this.

I have continued to update the Police Units numbers on
Radioreference.com to help identify what frequency MAY be used.

220. Re: *STARCOM21* 155.415 - Talkgroup 7018

Yahoo group: StarCom21
Date: 2005-09-25 18:13:59 UTC
From: kd4ygg
Topic: 216 Message: 220

Terry

Observed 154.8150 Lebanon PD being simulcasted with Talkgroup 7018 during a trip to Fairview Heights on Saturday.

Also, it appears that the Starcom21 site in Collinsville (not the county system) is also transmitting this talkgroup. Anyone running the PRO96COM program should be seeing neighbor site information if this is the case.

Interesting

221. Non-Motorola Equipment?

Yahoo group: StarCom21
Date: 2005-09-25 18:27:23 UTC
From: dcserkits
Topic: 221 Message: 221

Does anyone know of any agency using non-Motorola equipment on STARCOM21, such as M/A-Com 7200 or EFJohnson? Aside from the politcal issues, and reason why these cannot be used?

Thanks

222. VHF INTEROPERABILITY TALKGROUPS

Yahoo group: StarCom21
Date: 2005-09-25 18:39:07 UTC
From: dcserkits
Topic: 222 Message: 222

Terry wrtites:

"The one thing we still have to remember is the interoperable channels.... many may just link one to another or something,..... maybe?

I can't believe there is not a talkgroup patch/simulcasting some of these:

154.19 Fire
ISPERN 155.475
I-REACH 155.055
ESDA 158.835 (10am every day gives weather forecast and more)
IFERN 154.265"

Keep in mind that each talk groups sited would have to be tied to a VHF base station somewhere. With a statewide trunked system, where would you put a VHF base station? It would be assumed you would require several, right? If they were "zoned", remote portions of the trunked system would then also rebroadcast the VHF traffic, and so on, and so on, so you may hear one giant state-wide hetrodyne on the VHF channel in question and/or many of the trunked 800 channel would be used, swamping the trunked system. When this was posed to the previous program director of STARCOM21, they had no answer.

223. RE: *STARCOM21* Non-Motorola Equipment?

Yahoo group: StarCom21

From: Wayne Cornick
Topic: 221 Message: 223

I seem to remember reading on one of the pages about the St
Clair County System that Motorola reserved the right of approval of
acceptable equipment for use on the Starcom System for the first 2 years of
operation. From this you could infer that Only Motorola equipment will be
found to be acceptable. How can this be enforced you ask?

Simple. Motorola remains the owner and operator of the switches that allow
equipment to 'log onto the system'! The State and counties (in St Clair's
case) own the site equipment. I.e.: Transmitters and related stuff, whiles
Motorola controls the internetworking of all traffic on the system...

Wayne

Been running PRO96COM on T-359. You said 7018 is also on the
Collinsville Site? Which one is that? I can receive T-305
just fine here at my QTH. But not T-323. T-323 is the
Exchange Ave tower at the I-64/I-55/I-70/Il Rt 3/St Clair Ave
intersection. But it is pointed away from St Louis City.
So next to impossible for me to receive at my QTH. Did you
mean T-323? Which is not too far from Collinsville?
If 7018 is roaming on the nearby ISP towers, it would stop, once
that unit traveled back into the normal T-359 coverage
zone (roaming unit would reaffiliate with its 'Home System' ;
it would then unaffiliate with that other ISP tower ; that
talkgroup would then cease to be heard on that other roaming
tower).

So far, no neighbor towers found on my PRO96COM program
for towers 305 & 359. Well keep PRO96COM running for
awhile.

Anyone else noticing that 155.415 is now 100% dead? 155.760
is still alive, and still no linkage to T-359. I'm guessing
when it does appear on T-359, it would appear as 7019, just a
guess.

Subject: [INENA] St. Clair CO Provides Roaming Access to Starcom21 Sites

St. Clair County and Motorola have reached an agreement that will allow any user of the Starcom21 to roam on the St. Clair County system. Roaming will be allowed on a Least Preferred basis. This means that out of County roamers will move to the St. Clair sites when their radios can no longer see the Starcom21 sites located in our County. We anticipate that this arrangement will come into play mostly with regard to the use of portable radios indoors.

Also for those passing through the area the CENCOM PSAP is now monitoring the NPSPAC interoperable talk groups, the repeaters for which are located on the City of St. Louis Police Department.

---

All,

A while ago, I upgraded the scanner that is feeding the streaming audio for this site. The scanner is now a Uniden BC796D with APCO25 decoding capabilities.

Last week, some Starcom-25 sites began operating in McLean County. Today, I added the known channels for Bloomington, Leroy and Congerville to the scanner audio. I have not verified them, so please reply to this thread if you hear any traffic that will confirm what I have inputted.

The corresponding video that I am streaming with the audio should assist you in marrying talkgroups, frequencies and sites. Please include that data in your postings.

I'm glad to hear the digital frequencies on the live stream.

Here is what I could decipher today...

Frequencies for Watterson Site:

867.875 P25 Voice
868.400 DAT Control channel

Sites:

Watterson is site 29
Congerville tower is site 31 (this tower isn't tied in yet)
Pontiac is site ?? (site is not up yet)

[note: Site numbers on RadioReference.com area all 3-digit numbers so I don't know how these site numbers fit in]

Talkgroups

TG 30358 was Sheriff Dispatch (range testing 10/5/05)

Richard,

I don't have a BC796 but it sounds like it is set up correctly. The only talkgroup I've seen used is 30358 "Sheriff Dispatch". Most of the time there is no activity on the system. Some days they are range testing and on October 12 they were actually using this sytem to dispatch the Rural PDs and Sheriff's Dept until the EF Johnson system came back online.

You may want to change the modulation to FM instead of NFM.

The first thing I would do is go out and buy a new radio. The 890 will not work on StarCom.

Right now the radios that will work on StarCom include the BC296, BC796, BC396, the upcoming BC996, the RS Pro96 and Pro2096. The BC250 and BC785 (with the digita card) will hear the voice traffic but not track the system.

The 890 is analog only, and does not track the 9600 baud data channel that StarCom uses.

McLean County Police Are On The Air
Video

Nov 01, 2005 - McLean County and 11 other rural police departments are now using a new radio system.

StarCom 21 allows a broader range of communication than before. Officers can communicate statewide.

They say that will mean better coordination of mutual aid during disasters. Sheriff Dave Owens says it will also guarantee a better signal throughout the county.

"Dependability, audio quality, range, uh clarity. I mean it just, I can't compare the two systems. There's no comparison."

The Normal police and fire departments will join StarCom 21 in December, followed by State Police next year.

The new radio system being paid for with a 6 million dollar federal grant.

PDs are now using the STARCOM radios. Normal PD and FD will be
switching to STARCOM in December 2005 according to the WEEK-25 article.

240. McLean Co. Starcom Streaming Audio

Yahoo group: StarCom21
Date: 2005-11-03 01:37:54 UTC
From: echelon0911
Topic: 240 Message: 240

If anyone is interested, I have added the Starcom system that went on-line today to my streaming scanner site. At the moment, we have a melting pot of communications technologies in the county ... some low-band, some VHF, some UHF, some EF Johnson 800 and some Starcom 800.

The audio quality on the Sheriff's Starcom talkgroup -- 30358 -- is superb. Sounds better than the UHF conventional systems in my opinion.

I don't know what the implications of the following will be, but found this interesting:

Normal Town Council Meeting Minutes - October 17, 2005
From:
http://www.normal.org/MayorAndCouncil/CouncilAM/Minutes2005_10_17.htm

"Motion Authorizing The Purchase Of Encryption Software For Portable Radios On The Starcom Communications System:

Motion:

Council member Reece offered comments on this proposed project, indicating this was a radio interoperability grant which included all McLean County with the exception of the City of Bloomington.

Motion declared carried."

~~
Key significance: Encryption Software

(Note: McLean County Sheriff's Dept is not currently using encryption on its dispatch talkgroup)

242. Re: *STARCOM21* Town of Normal approves Encryption Software for STARCOM portables

Topic: 241 Message: 242

That doesn't sound too good. I'm wondering if this is going to be the trend for most agencies once starcom is up and going statewide.

I am just wondering, What is the purpose of encryption in a supposed Interoperable Radio system?

In an Interoperable communications system isn't encryption kind of defeating the purpose?

Oh well, sounds typical!!

I expect the encryption will not be full-time. Hopefully it will only be used on sensitive talkgroups. The reason I say this is that reports are that Normal Police will simulcast their Starcom dispatch talkgroup over their 460.025 repeater that they currently use (so that Bloomington PD and ISU PD who both will remain on UHF can contact them). I don't see the point in encrypting a Starcom dispatch talkgroup if they are going to simulcast it over UHF.

Sorry the correct information on Normal PD going to Starcom the encryption will be used only on talk groups used by vice,drug units and cid units only patrol division radios will not have this install and for the simulcast that information is not correct and I don't know where u got that but not correct. BPD chose not to be a part of this program and only will have access to NPD and sheriff dept will be done with a patch only set up when needed and not on all the time.

247. Encryption on STARCOM21

Yahoo group: StarCom21
Date: 2005-11-14 22:51:41 UTC
From: Tom Laue
Topic: 241 Message: 247

I don't have confirmed info about what ISP plans to do regarding encryption; however:

If what other states have implemented is any indication...Michigan, Minnesota, Colorado, Ohio, Indiana, and Arkansas all have statewide Motorola digital systems and do not use encryption on state police dispatch talkgroups.

You are correct about Ohio. The only users of full time encryption on the Ohio MARCS system are DNR Rangers (Why, I don't quite know), various Federal Agencies (DEA, ATF, etc...) and a few others have the option to use it. But, they choose not to use it full time.

249. ILEAS Mobile Radio's Only, no portable

Yahoo group: StarCom21
Date: 2005-11-17 01:34:17 UTC
From: Bruce J. Hayer
Topic: 249 Message: 249

I received word from our vendor, Chicago Communications, that ILEAS changed their mind and cancelled all the portable radio orders. Agencies will only be issued mobile radio's.

If we want the radio installed at a location other than a mobile unit, the agency is responsible for the cost of additional equipment and labor to complete the installation.

Any one else hear this?

Yes--Barrington Hills received a call from
Chi-comm.

We want to incorporate ours into our Comm Center
software, but we are responsible for the costs.
Our software won't change the channel though--in
other words--it will work on our software--but
someone will have to run back to the closet and
manually change the channel.

252. DELIVERY OF MOBILE RADIO

Yahoo group: StarCom21
Date: 2005-11-22 19:28:37 UTC
From: SERKITS@comcast.net
Topic: 252 Message: 252

We got our mobile dropped shipped with no installation. We have no clue as to how this will work. We were told that MABAS would have 4 talk-groups, and only one is on the list. We had Chi-Com provide a printout of what was in the radio, and we will be asking for more info. The printout shows that in 27, 28, 29, 30, 31 are the NPSPAC I/O channels but not on the channel plan with the regions, etc. Note that after Wave 1 rebanding, the radio will have to be "touched" to move these down by 15mHz.
We will be firing up the RSS and looking at the radio very soon.

Chi-Com stopped by out station last week in Spring Grove to look at where we wanted the radio. The Tech asked me how he should install the Coax because he only has a 8 ft ladder and we have about 20 foot ceilings. He then told me he doesn't work past 430 and he would come back the next day. He never returned so I am not sure what is going on with our Starcom install....

(from another yahoo group)

What is STARCOM21?

STARCOM21 is the official Illinois statewide public safety two-way radio system. This state-of-the-art digital mobile radio system is built, owned, and operated by Motorola in cooperation with the State of Illinois. It has been designed to serve state, local, and federal law enforcement agencies statewide by facilitating multi-agency communication through radio interoperability.

The new radio system in St Clair County, Illinois is also part of the STARCOM21 system. In fact, St Clair County made the first area-wide call on the STARCOM21 system on October 24, 2005. St Clair County and McLean County also had a test conversation between Belleville and Bloomington, Illinois on November 2, 2005 using the STARCOM21 system.

257. McLean Co Sheriff pleased with Starcom radios (article)

Yahoo group: StarCom21
Date: 2005-11-28 22:24:27 UTC
From: Tom Laue
Topic: 257 Message: 257

Saturday, November 12, 2005 - Pantagraph newspaper article "Sheriff pleased with new radios"

http://www.pantagraph.com/stories/111205/new_20051112020.shtml

The newspaper said Normal Fire would be switching from EF Johnson to Starcom21 in late December 2005. Normal PD will be switching from UHF to Starcom21 in January 2006. A big reason Normal wanted to switch to Starcom was so that PD and FD would be able to communicate with eachother directly (which they haven't had the ability to do since Normal PD switched back to UHF in September 2001).

~~~~~~~

Agencies believed to be using Starcom21 TG 30358 'Sheriff Dispatch' (Dispatched by: METCOM)

Sheriff's Dept ("Paul" units)
Chenoa Police
Colfax Police
Danvers Police
Downs Police
Ellsworth Police
Gridley Police
Heyworth Police
Hudson Police
Leroy Police
Lexington Police ("LX" units)
McLean Police ("MC" units)
Stanford Police

McLean Co TG 30358 is carried on the Leroy, Normal, and Congerville Starcom21 sites
~~~~~~~

258. 700 MHz. in use for StarCom yet?

Yahoo group: StarCom21
Date: 2005-12-03 22:58:33 UTC
From: n9jig
Topic: 258 Message: 258

At todays CARMA Meeting a member said he had heard a StarCom control data channel operating from the Metamora site on 774.30625. He also said that the McLean county SO mobile extenders are also using 700 MHz. channels.

It was my understanding that no 700 channels were yet in use at StarCom sites, am I wrong?

Subject: *STARCOM21* 700 MHz. in use for StarCom yet?

At todays CARMA Meeting a member said he had heard a StarCom control data channel operating from the Metamora site on 774.30625. He also said that the McLean county SO mobile extenders are also using 700 MHz. channels.

It was my understanding that no 700 channels were yet in use at StarCom sites, am I wrong?

261. 700Mhz - Where To Search???

Yahoo group: StarCom21
Date: 2005-12-04 19:37:49 UTC
From: kd4ygg
Topic: 261 Message: 261

The recent postings regarding the use of the 700Mhz band brings up a good question... Where does one search for the 700Mhz band?

According to the FCC's website:

The 700 MHz Public Safety Band (764-776 and 794-806) rules can be found under Part 90, Subpart R. These rules allow the licensing of the 700 MHz general use narrowband channels, narrowband low power channels and wideband general use channels for assignment to public safety eligibles, subject to Commission approved regional planning committee (RPC) regional plans. The Narrowband Low Power Itinerant Channels are licensed for nationwide itinerant operation and are not subject to regional planning or frequency coordination.

The four narrowband segments are:
764-767 MHz (Channel 1 ☐ 480)
773-776 MHz (Channel 481-960)
794-797 MHz (Channel 961-1440)
803-806 MHz (Channel 1441-1920)
Each narrowband segment is divided into 480 channels having a channel size of 6.25 kHz.

The two wideband segments are:
767-773 MHz (Channel 1-120)
797-803 MHz (channel 121-240)
Each wideband segment is divided into 120 channels having a channel size of 50 kHz.

I heard from a Dist 12 trooper that he had heard from other troopers they would soon be going to the new system. He said the other troopers had been told by telecommunicators that the master sgts and higher ups including the state radio lab would be able to open any officer's mic they wanted and listen in to their conversations and also their traffic stops and such. Interesting but he wasn't so sure it would happen said it sounded a little far fetched.

Farfetched? Hardly. It will be quite easy for administration to monitor any radio transmission. Since every broadcast must hit every controller (maybe I'm not using the correct terminology), anyone with access to a controller will be able to monitor anything.

Mike,
I personally do not doubt the technology to "open" a specific microphone(s) by commanders, I don't believe this will happen. By listening in to conversations without informing the participants is a violation of both state and federal laws regarding 'eavsdropping'. I do not have the particular references in front of me, but they can be easily found by doing a web search under 'eavsdropping laws'. What a can of worms to open!!

That might be difficult as long as the mic has a mechanical switch connected to it. But with the state of electronics as it is, such as power buttons that are really just 'turn off the display' buttons, it wouldn't surprise me if the transmit button was nothing more than an "I want to transmit" button, and really not part of the mic circuit at all.

Actually, not at all. Employers can listen in on any employees conversation at any time under the pretext that the employer owns the system being used. Employees should have no expectation of privacy.

It should be especially true for Starcom considering the broadcast nature expected of radio.

270. RE: *STARCOM21* RE:*STARCOM@!*in central Illinois

Yahoo group: StarCom21
Date: 2005-12-07 12:46:07 UTC
From: Curt Underwood
Topic: 267 Message: 270

In Illinois you must have to have both party's consent to record or use electronic means to listen to any conversation. No doubt because we are a blue state. There is an exception when there is an emergency or when a person feels that their life is in danger. Also conversation can be recorded while investigating a violation of the Illinois Vehicle Code--ie in car video recorders.

I would guess that the only time that a mic would be keyed remotely is in a hostage/kidnapping situation (rightly so). A new case has arisen regarding taping audio in lock up fscilities. Officers are arguing that they are not giving consent to audio recording while booking prisoners---has yet to be ruled on.

Interesting case---

http://caselaw.lp.findlaw.com/cgi-bin/getcase.pl?court=7th&navby=case&no=982680

Note that the one untaped line at the Woodstock PD is now the attorney's business line :-)!
"But we point out that the plaintiffs' side of the case has not lost utterly. (815) 338-7799 is no longer a recorded police line; it is now the phone number of the plaintiffs' lawyer."

Curt

To make it clear--I think we are talking about keying a radio remotely without the officer knowing--rarely if ever done---and most officers if taken hostage would welcome this with open arms!

The HT1000 has had this capability for years but not many use it or know how to activate it.

271. Eavesdropping

Yahoo group: StarCom21
Date: 2005-12-07 21:13:23 UTC
From: Richard Ranson
Topic: 271 Message: 271

Perhaps many have forgotten about the infamous Patriot Act, gives law enforcement almost unlimited power to do eavesdropping. And who would refute them doing it to themselves? The technology does exist and is available in many of the newer model analog radios as well. A separate microphone built into the radio and controlled via software as to when it is activated. As for the employers, many employers require you to sign a document agreeing to electronic monitoring of email and other communications. I will contact a source I have as to this feature on starcom and report back.

Rich

272. Re: *STARCOM21* Eavesdropping

Yahoo group: StarCom21
Date: 2005-12-07 21:28:11 UTC
From: Denny B
Topic: 271 Message: 272

Also, there is a feature on many Motorola radios that allows remote monitoring and remote ptt. This could be an aid in case of stolen or strayed radios, among other uses. I know that this is a feature of MDC-1200 stat-a-lert, but not sure on the new digital radios.

Otherwise, I don't see any legal impediment to an agency monitoring use of their own radios,Patriot Act,or not. In Illinois,isn't an employer permitted to monitor telcom systems that it owns?

You must have 2-party consent to monitor or record phone calls, but I don't believe that carries over to any other form of communication (otherwise, there would be big problems with email since business routinely reviews their email logs). I don't expect it would apply to typical broadcast radio, since there is no expectation of privacy anyway.

The law requiring 2-party consent is to encourage the belief that privacy exists on the phone network.

I agree with You some what. Here is another question for thought. IF the mic is opend by a comander, he listening to both people involved in the conversation, I see 2 nd party violation, unless the other party id informed & maranda warning read. Other wise I can see a judge throwing out the conversation as eveidence do to miranda violtation.

Wednesday, December 21, 2005

By M.K. Guetersloh
mkguetersloh@pantagraph

BLOOMINGTON -- A statewide police radio system that county officials say clears up years of crackles and transmission dead spots for sheriff's deputies received final approval Tuesday from the McLean County Board.
Also, the cost of living at the county's nursing home will increase, as will the cost for certified copies of birth, marriage and death certificates.

The board approved the $2.9 million contract and user agreement with Motorola for its Starcom 21 radio system.

The radio system replaces the EF Johnson radio system adopted in the mid-1990s. Police and fire agencies often criticized the EF Johnson radio system because of poor reception and frequently dropped signals.

County Board member Tari Renner said the agreement paves the way for the county to be 95 percent covered by Starcom.

The contract includes the purchase and installation of Starcom consoles at Metcom, the countywide emergency dispatching system.

"This will provide us with great coverage and a better quality of signal," Renner said.

In addition to the McLean County Sheriff's Department, the town of Normal's police and fire departments will be on the Starcom system. The city of Bloomington, which chose to leave Metcom, will not use the Starcom system and equipment.

Illinois State Police will be on the Starcom system, which allows users to monitor and talk with any other agency on the statewide system.

Three-quarters of the cost of the system is paid for by federal money.

In other business, the board approved raising the private-pay rate of the non-Medicare-certified section at the county nursing home to $123 a day. The previous rate was $119.

The rate for the Medicare-certified section remains at $150 a day.

It also will cost more to receive certified copies of birth, marriage and death certificates. Previously it cost $10 per copy of birth and marriage certificates and $8 for death certificates. The rates will now be $12 for the first copy of each certificate and $6 for additional copies of the same record.

County Board Vice Chairman Matt Sorensen estimated the increase in costs will generate about $10,000 to $15,000 a year in additional fees. The increase, however, still does not cover the estimated $20 to $25 cost to provide those records.

From: n9jig
Topic: 282 Message: 282

At the last CARMA meeting a member came to me and said he had heard a 9600 baud control data signal from the "Metamora" State Police post in Germantown Hills (a few miles east of Peoria). I refused to believe him, as I was under the assumption that 700 had yet to be
opened in this area but he was pretty insistent. I figured he was hearing an image or something.

I finally had some time off for the holidays and I took a ride down there so I could prove my
superiority. Turns out he was right (as I sheepishly slinked off...).

From the post's tower, loud and clear, was a 9600 baud control data signal on 774.3125 MHz., with a system of 140h and site ID of 316 as displayed on the BC396. I searched the entire 800 MHz. band for a possible image source and there was none.

I was able to hear a couple other StarCom sites, including Congerville on 866.8500 (Site231)
with all voice grants I heard from there going to 867.9000. I also heard Site 225 (Peoria) with
control data on 867.9750 and Site 21D (Normal) with control data on 868.4000.

The only voice traffic I heard from any StarCom21 site on this trip was the McLean Sheriff ops
on 30358 from the Congerville site.

283. Compatible radio systems would cost billions

By Paul Davidson, USA TODAY
As chaos engulfed New Orleans after Hurricane Katrina struck, emergency responders traded urgent information in a way that was hardly a model of 21st-century high technology.

Deputy David Hebert of St. Bernard Parish Sheriff's Office shows off his two-way radio.
H. Darr Beiser, USA TODAY

With floodwaters surging, they scurried on foot to ferry messages among city police, state troopers and the National Guard.

It's not that the agencies' radio systems didn't work. They just didn't work with each other.

The breakdown in New Orleans was the latest proof of a troubling quandary: Many of the USA's 50,000 public-safety agencies still can't talk to each other in a crisis. The problem has plagued emergency responders in every big disaster in recent memory — from the Oklahoma City bombing to 9/11 to Katrina.

The main culprit? Incompatible radio equipment.

"We didn't learn our lesson after the '93 World Trade Center bombing; we didn't learn our lesson after Sept. 11," Sen. Barbara Boxer, D-Calif., said at a Senate Commerce Committee hearing on Katrina. "We don't need anymore failures."

Yet there's no simple fix. Local agencies often lack the money and radio frequencies needed to upgrade equipment. And federal aid is sorely limited. Even with more money and frequencies, other hurdles thwart seamless communication among first responders:

• City, county, state and federal agencies buy radio equipment for their own needs. Turf battles often keep neighboring agencies from buying compatible gear, or even from teaming in an emergency. The federal government can't force all agencies in a state or region to buy the same gear.

• Safety agencies often fail to plan for interagency communication in disasters or to train officers in how to talk to their counterparts.

• Technology standards that would let disparate radio systems talk with each other have been delayed. Experts at least partly blame foot-dragging by radio manufacturers.

The upshot: Free-flowing communication among agencies in the USA won't come till 2023. At least that's the projection of Safecom, a program in the Homeland Security Department that promotes public-safety communication.

"It's going to take years to do it and a lot of money," says Harlin McEwen, who chairs the communications committee of the International Association of Chiefs of Police. "There isn't any magic bullet."

Congress is poised to take its most dramatic steps yet. It's expected to pass legislation that would give emergency responders more radio channels and money for new equipment. Yet emergency officials say the money is inadequate and the frequencies won't come soon enough.

Still, some areas of the country are attacking the problem, at least in a piecemeal way. Some are pursuing state or regional radio systems that counties or towns can join. Other areas have "gateways" that bridge disparate systems in emergencies. On the way: software-based radios that can span different radio networks.

"It's a big problem that's moving toward a solution quicker than we thought was possible a few years ago but slower than we would like," says David Boyd, who oversees radio compatibility at the Homeland Security Department.

The root of the problem is that radios on one frequency band typically can't talk to those on another. And radios made by different manufacturers are incompatible. Decades ago, agencies chose different channels from their neighbors to avoid interference. Manufacturers also built digital radios that had proprietary technology.

In a survey last year by the U.S. Conference of Mayors, 23% of local public-safety agencies said they couldn't communicate across their own police and fire departments. A third said they can't talk to the county sheriff. Most can't talk to state or federal agencies.

Those gaps can thwart teamwork during crises that draw multiple jurisdictions. A prime example: the 1999 Columbine school shootings in Colorado — where 46 agencies converged with mostly incompatible radio systems.

The most notorious breakdown occurred after the Sept. 11 terrorist attack on the World Trade Center. Police in helicopters couldn't warn firefighters of the imminent fall of the North Tower because the two agencies use different radio systems. More than 100 firefighters died when the tower fell.

Precious seconds

After the 1995 bombing in Oklahoma City, couriers had to carry messages by foot among state, county and city agencies that couldn't talk by radio.

Sometimes, responders relay messages through dispatchers, wasting precious seconds in an emergency.

Some cities use gateways that patch together different radio systems at disaster scenes by funneling the audio of one into the other. The devices cost as little as $10,000 — far less than the millions needed to replace a radio system. But gateways can be hard to set up on the fly. And they work only if the responding agencies have their own transmitter towers in the area.

"It's a stopgap," says John Powell of the National Public Safety Telecommunications Council.

The 2001 terrorist attacks spurred a call to fix the problem. Federal funding was boosted so state and local agencies could pay to upgrade walkie-talkie systems. But critics in Congress call the funding inadequate. It'll cost up to $60 billion to replace radio systems nationwide so agencies can talk to each other, Safecom has said.

Since 2003, the Justice Department has awarded $241 million to states and localities for such upgrades. Yet Congress slashed that funding to $10 million for 2006, from $93 million this year.

A separate Homeland Security grant provided about $7.3 billion for first responders. There's no mandate, though, that any of it pay for compatible radio networks. Just about $1.5 billion has gone toward that goal.

Rep. Bart Stupak, D-Mich., a former state trooper, faults the Bush administration for not dedicating more money to improved communication. "There's no leadership from the federal government," Stupak says. "All we get is a lot of talk."

In the administration's defense, Boyd says Homeland Security grants have risen sharply, from just $1 billion in the three years before 9/11. The department, he adds, doesn't want to dictate local spending decisions.

Another hurdle is a shortage of frequencies. Areas such as Los Angeles County would like to buy new radio systems in frequency bands used by neighboring agencies. Yet there are few available channels.

The federal government had been scheduled to reclaim a swath of analog channels for public safety from TV stations at the end of 2006, when the stations were to start broadcasting in digital-only. That shift, though, has been delayed to 2009 in legislation that sets aside $1 billion for new radio gear.

Some states, such as Alabama, Oklahoma and Mississippi, have tried to build radio systems to link state agencies and let local governments hook up, too. But the cost has proved too high.

Costs prove too high

A Mississippi network could cost $150 million to $300 million. "Astronomical," says Willie Huff of the state Transportation Department.

Even states that do build their own radio systems often can't persuade local agencies to tie in. Denver hasn't joined Colorado's Motorola system, which includes most of the state's localities. The city would have to pay up to $80 million for radios and transmitters.

Oakland County, Mich., declined to join Michigan's new $220 million Motorola digital system. Instead, it built its own $43 million M-A/Com network. Among other concerns, county officials said they feared they'd be forced to cede control to state officials in emergencies and share some frequencies with nearby counties.

Other obstacles:

•Training and planning. Experts note that first responders often spend little time preparing for interagency communication. Some agencies fail to teach responders how to use gateways.

In New Orleans, city officials used three channels for emergency services after Katrina struck. But they failed to set aside separate channels to talk to other area agencies, says Dan Hawkins of Search, a non-profit consortium that aids public-safety agencies.

Two years ago, when an inmate fled from sheriff's deputies in Lincoln, Neb., deputies had to call 911. The deputies, local police and state troopers had never set up a common radio

channel for communication. The inmate was on the lam two days before being captured.

•Lack of cooperation. Officials often use radio lingo that differs from city to city or state to state, causing confusion in emergencies, says Donald Lund, a consultant on law-enforcement technology.

Example: "10-99" has dozens of different meanings throughout Texas, from a domestic dispute to an officer going off-duty.

In New York City, a rift between police and fire officials prevented the agencies from setting up a joint command post that might have let police warnings reach firefighters. Such command posts are now required in the city. Police and fire still use separate systems. But fire commanders carry an extra radio tuned to the police band so they can talk to police if necessary.

•Incomplete standards. Fifteen years ago, radio manufacturers started developing a common standard, called P25. The idea was to link different radio systems.

A lack of consensus, though, has kept that standard from being finished. And manufacturers have certified some radios as P25-compliant even though they aren't, says Derrick Orr of the National Institute of Standards and Technology.

Big industry players often have little incentive to back standards that would let responders use equipment from smaller vendors, says Powell of the telecom council.

No. 1 supplier Motorola disagreed, saying it's "a leading driver and proponent of the" standard.

Glimmers of hope

In some states, innovations are offering glimmers of hope. About 10 states, including Indiana, Colorado, Michigan, Minnesota and Florida, have built statewide radio systems that city and county agencies may join. Indiana got most local agencies to join by "including everyone in the design," says project head David Smith.

That network paid dividends in 2002, when a tornado roared through south-central Indiana. Thirteen agencies communicated seamlessly. Calm was restored in seven hours. By contrast, when a tornado struck the same area in 1996, incompatible systems prevented responders from talking.

Other areas, including San Diego County, Alabama and Littleton, Colo. — site of the Columbine shootings — have taken a less-costly route. They've installed gateways that link an area's radio systems. A $194,000 Raytheon JPS system in Littleton connects 36 local, state and federal agencies.

M/A-Com's radio networks bought by Denver, Oakland County and New York state have a more elaborate gateway system. It converts disparate radio transmissions into one Internet protocol for up to hundreds of users. But gateways "require somebody to patch in the call" and use up channels, says Mike Morgan, assistant fire chief in Los Angeles County. "I look at it as an interim solution."

A longer-term answer might be software-defined radios. They could tap into various frequency bands and could be ready in three years, says Fred Frantz, a communications consultant.

Powell envisions "a system of systems." Each region would use a common network and tie in to neighboring regions or states with a gateway.

And when might that arrive?

"We'll see good headway in the next decade," he says.

The map shows as no areas using Starcom yet? Is it able to be colored
by county? If so McLean and St. Clair could be colored in.

This map shows what State Police districts use StarCom21, and is so
far correct, as no ISP units are on it yet.

We got our radio about 2 weeks ago. Yet to receive the antenna, so it is just a paper weight right now (a very nice looking one at that). I do like the lack of any information that came with the radio with regards to the radio system, so if you do not have someone who knows what it is or how it works then I guess you're out of luck. I think it will be a nice system, but for the cost, I do not think we will be switching anytime soon.

294. New to the list

Yahoo group: StarCom21
Date: 2006-01-05 14:56:06 UTC
From: Terry Storer, Logan County EMA
Topic: 294 Message: 294

Good morning. I am new to the list and am looking forward to learning about the system.

We are slowly receiving the STARCOM units in our county. My fire department did receive their radio, but it was minus the microphone.
Also, there was no documentation with the radio, so I hope instructions will be forthcoming.

295. 700Mhz Starcom21 in St Louis area

Yahoo group: StarCom21
Date: 2006-01-05 18:22:55 UTC
From: Todd Hartzel
Topic: 295 Message: 295

Greetings all,
Just wanted to report I found a
700Mhz Starcom 21 site in Metro St Louis,
Mo. The data channel is:

- 775.55625
- SY140
- BEE00
- T033A

Anyone else hearing it? how strong
are you getting it?

Is this the Edwardsville site, perhaps?

296. PRO96COM on 775.55625

Yahoo group: StarCom21

299. bcd396T

Yahoo group: StarCom21
Date: 2006-01-05 21:33:43 UTC
From: Todd Hartzel
Topic: 299 Message: 299

Greetings all,
Now that I know 700Mhz is going to get
alot of use in the St Louis Metro area for
Starcom21, I'm starting to think that a bcd396t
might be in-order soon.

The PRO-96 can not monitor 700Mhz Motorola
trunks unless you tinker with the Multi-Table
mode of the radio.

300. pro96 tinkering

Yahoo group: StarCom21
Date: 2006-01-05 22:00:13 UTC
From: Todd Hartzel
Topic: 300 Message: 300

Greetings all,
I have a few questios about the PRO-96
multi-Table. I have mine set for the following
so I can try monitoring 700Mhz Trunking:

- 9600 CC Mode = Multi Table

My Extended Trunking Table looks like this
using the WIN96 program:

Ch LO Ch HI Base Freq Offset Step
0 0 65535 851.00625 0 6.25
1 0 65535 762.00625 0 6.25

I came up with these based partially on the
'DEFAULT' 800Mhz 9600-baud table. And what
PRO96COM is reporting in the Tower-####.txt
files under the section marked: TABLES

The TABLES section of each 'Tower' file is the
same for all Starcom21 system I can monitor on
the 700Mhz & 800Mhz bands.

IF you look uder the NEIGHBORS section of the
Tower files, you might notice that PRO96COM puts
a 00-#### or 01-#### next to each channel number.
Indicating if its 800Mhz (00) or 700Mhz (01).

I'm guessing that this configuration should
work with the PRO-96 if these 700Mhz Trunk
Systems come to life with voice comms.

It proves nothing really. It comes down to goverment wanting to listen
to You, but not You listening to them!

In STARCOM21@yahoogroups.com, "Tom Laue" <citrus801@y...> wrote:

305. Re: *STARCOM21* DELIVERY OF MOBILE RADIO

Yahoo group: StarCom21
Date: 2006-01-06 01:43:46 UTC
From: Rich Carlson
Topic: 253 Message: 305

We were supposed to get a desktop set with outside antenna
installation and ended up getting some sort of epoxy cutting board
with the radio mounted to it and a mag mount antenna. I ain't putting
that in my Comm Room!

I ended up taking the XTL5000 off the contraption and mounted it in
our console, connected to an existing 800 MHz. antenna left over from
a former Nextel installation.

It had the 5 ITAC channels and a bunch of MABAS and interoperabilty
channels. The ITAC channels work fine, but as StarCom has not
installed any sites in the Chicago area yet the trunked talkgroups all
report "Out of Range"

The FD got a similar set-up for the Command Van. They are going to
leave it on the cutting board so that it can be taken out and put in a
police or fire vehicle as needed.

306. System.ini file (PRO96COM)

Yahoo group: StarCom21
Date: 2006-01-06 05:19:49 UTC
From: Todd Hartzel
Topic: 306 Message: 306

Here is what my system.ini file
looks like now:

```
[System]
SystemID=320
SystemIDHEX=140
WACN=BEE00
Description=Starcom 21 (ISP Radio Network)

[Towers]
125=D05 - Morris (Grundy)
138=D09 - Lynnville (Morgan)
201=D10 - Oreana (Macon)
202=D10 - LeRoy (McLean)
203=D10 - Champaign (Champaign)
204=D10 - Danville (Vermillon)
205=D10 - East Lynn (Vermillon)
206=D10 - Pesotum (Champaign)
208=D10 - Paris (Edgar)
217=D09 - ISP D9 HQ (Sangamon)
225=D08 - Peoria Cnty (Tazewell)
227=D09 - Taylorville (Christian)
228=D10 - Decatur North (Macon)
229=D06 - Normal (McLean)
230=D09 - Springfield (Sangamon)
231=D08 - Congerville (Woodford)
234=D10 - Mattoon (Coles)
236=D10 - Decatur South (Macon)
301=D?? - 700Mhz (700Mhz)
304=D13 - Ina (Jefferson)
305=D11 - Belleville (St Clair)
313=D12 - Newton (Jasper)
316=D08 - Metamora (Tazewell)
323=D11 - E. St Louis (St Clair)
327=D12 - Mason (Effingham)
329=D?? - ????? (?????????)
333=D13 - Evansville (Randolph)
346=D12 - Flora (Clay)
350=D12 - Greenup (Cumberland)
353=D11 - 700Mhz (700Mhz)
355=D11 - Godfrey (Madison)
358=D11 - 700Mhz (700Mhz)
359=D11 - ETSB TRS (St Clair)
-- End of File - EOF
```

As you can see, still have a couple of
mysteries:

Tower-0301
Tower-0329
Tower-0353 (received DIRECTLY)
Tower-0358 (received DIRECTLY)

I'm certain Tower 0358 is apart of
D11 (District 11). The signal is so
strong here in Missouri (Stl). Since
I am getting a signal from Tower-353 too.
It too has to be somewhere close to me.
So it might be D11 too.

Not sure where tower 0329 is, but Tower-359
indicates its control channel is on: 866.8625
Which means it could be one of several
possible cities on the FCC Lisenses.

307. Re: *STARCOM21* DELIVERY OF MOBILE RADIO

From: Curt Underwood
Topic: 253 Message: 307

I was told by Chi-*** that if you don't take
delivery by Jan 1 you won't get one?????

This is after I requested a tech to check if it
could be integrated into our software as a
channel in the Comm Center--still have not seen a
tech for this request.

Still have yet to receive the radio also.

Curt

For those of you who may be interested I have been told that those of you
who have received ITTF radios are allowed to use those radios at no charge until you are notified, in advance by Motorola, that charges will start to be levied. I do not have this in writing but I feel confident that it is accurate.

309. Starcom test between St. Clair County unit & Peoria County unit yesterday

Yahoo group: StarCom21
Date: 2006-01-07 14:25:12 UTC
From: Jason McDowell
Topic: 309 Message: 309

Hi Guys, just monitored a test between 2 units yesterday about 14:30.
It was on talkgroup 30328 on control channel 867.975.
Which for me is the Peoria D8 simulcast site. Anyways
it was announced as ILEAS I believe and was a test
between St. Clair County 911 unit 2 and someone in
Peoria answered up as 934 in Peoria County. I don't
know if they meant State Police Dist. 9 or if it was
Elmwood 934. Which is a PD unit that uses our County
Sheriff frequency here in Peoria County. Anyways it
was clear as a bell, sounded great.

Jason

310. Fw: [] Interoperable Communications Update 1-7-05

Subject: Interoperable Communications Update 1-7-05

Yesterday we successfully communicated with Peoria County from the St. Louis City Fire Dispatch center over the ITTF talk groups. We are installing a control station there as part of our Grant. One at a time we are conquering
silos.

Logan county is going on board with Starcom too? Dang guess down here in Southern IL we are keeping it old fashioned lol

I wondered if those radios that IEMA gave out as part of interoperability with all the banks and such were for starcom but they have been out a year or so, and they don't cover any new channels, they aren't digital because they receive our traffic now. They are the state grant radios. Anyways different list!

Have a good one getting interesting now in 2006 this list is getting active!

Mike

Good morning. I am new to the list and am looking forward to learning about the system.

We are slowly receiving the STARCOM units in our county. My fire department did receive their radio, but it was minus the microphone.
Also, there was no documentation with the radio, so I hope instructions will be forthcoming.

From: SERKITS@comcast.net
Topic: 312 Message: 312

We looked at the radio under RSS.

Interesting notes:

* Seems to have been set up with som control channels in the 700mHz range. FCC check shows no license held (and should have listed STA's, but I couldn't find the authorizations on line..anyone else find these?)
* Has no encryption key loaded, and OTAR has been inhibited. hmmm...
* Allows for 2W power for intinerent simplex (a good thing - at least someone is thinking about on-scene nets)
* The feature for pre-emptive announce talk group looks like it has been shut off
* The CURRENT NPSPAC I/O channels are in it, so the radio will have to be "touched" when the NPSPAC channels move down 15mHz.
* It contains the MABAS, ILEAS, Public Health, and IEMA talk groups, the "Incident" talk groups, and all the ITTF planning region talk groups

The radio still does not "see" a tower/control channel, so any talk group selected shows the "out of range" error.

We just received the letter from ITTF/MABAS regarding the use of the radio. I skimmed it and set it aside for later reading, and will report any salient details.

More later...

313. McLean County - Encrypted talkgroup heard

Yahoo group: StarCom21
Date: 2006-01-09 22:02:18 UTC
From: Tom Laue
Topic: 313 Message: 313

Some new talkgroups heard recently in McLean County:

TG 30330 ITTF MABAS {P25}
TG 30373 TESTING - possibly Fire related ? {P25} (Normal site)
TG 30369 UNKNOWN USER - {ENCRYPTED} (Leroy Site) (Normal site)

314. Need Help...

Yahoo group: StarCom21
Date: 2006-01-11 01:10:25 UTC
From: tpatur1
Topic: 314 Message: 314

Hello Everyone...

I have a Radio Shack Pro-96. I'm New to this and got it a few months ago from a pawn shop. I live in Bloomington-Normal but I go to school in Chicago. I have all the police and fire programmed in for both Chicago and Bloomington. I get all the 400.000 channels and some of the airport signals. I never ever got the whole "trunking" stuff down because everytime I tried all I got was just static. Now that this new "StarCom 21" came out, I was wondering if my scanner would pick this up. They have a "live scanner online" that i got from landofoz.com and whatever scanner that person is using picks up the StarCom channels.

I tried programming some channels in but i just keep getting fed up with it. I just keep getting static. Specially when you have to do all the talk group id's and stuff like that....I've been trying to do this for a while now and am about to give up!!

Can someone please help me or tell me how to program this thing...

Hope to hear from someone soon!! Thanks...

315. Peoria D8 possibly testing out Starcom

Yahoo group: StarCom21
Date: 2006-01-12 01:51:48 UTC
From: Jason McDowell
Topic: 315 Message: 315

Well I think Peoria D8 is starting to test out Starcom tonight. Wierd thing is, I thought Trunked ID's can only be in bits of 16? I have status bits off but tonight as of about 3 hours ago, TG 5 is active on CC 867.975 which is the Peoria Simulcast site. Clear as a bell. Havn't had a bunch of time to listen as was fixing supper and stuff. They were talking as if its a chat channel, calling each other by there regular names. Hutch, Troy and Boe were heard. Mentioned that they were going to go do the take down after viewing Boes house. Then mentioned about coming back across the river to Peoria. Also mentioned that they didn't hear for a call to the district car yet. No dispatching on it yet but sounds like it could be a few troopers testing the system out. I'll let ya know further.

From the look of the submissions and TGs currently on RadioReference.com, I'm guessing APCO-25 Common Air Interface Exclusive is just about anything, not in multiples of 16.

From: Rich Carlson
Topic: 315 Message: 317

Astro25 trunked systems (using the 9600 baud control data signal) do not use the same talkgroup ID scheme as we are used to on older Motorola systems with the 3600 baud control data. StarCom21 and other full digital systems, like the Michigan statewide system or the St. Clair County IL system use plain integer numbers, not just numbers divisible by 16.

From: Jason McDowell
Topic: 318 Message: 318

K, that TG 5 I posted before is now being used on 774.3125, that new CC that was found couple weeks ago. Also McLean Countys TG 30358 is now booming in on CC 867.975. Before it was only on the Congerville tower. I think they may have bumped up the Peoria Simulcasts tower power. Also on the TG 5, I just heard couple guys say there heading back to the station for a potty break and to talk to Boe. Definitely a Peoria area department though, as they were talking about Peoria and looking at one of there houses. Maybe I should turn on the neighboring counties Starcoms now to see if anything new out there.

Terry wanted to give you alittle update on the Mclean County system we have moved back into our comm center as of yesterday afternoon and have switched off the EF Johnson Obercomm radio consoles and are now using the new Motorola Gold Elite consoles and see we have a bunch of new talkgroups on the screens for the starcom system. 1 talkground is assigned to the Mclean Co Health Dept ie animal control wardens and then the sheriff dept has several talkgroups on the screen called channel 3 and 4 and about 6 tactical groups also the Law and Justice Center court officers will be on a simplex channel with a digital code and with a inside the building antenna system and we will be tied into there base via phones lines. Also NPD is scheduled to start there installs on Monday January 16th and I know they have been testing the last 2 days with there new talkgroup patched over to the NPD UHF Ch2 repeater 453.950. I don't have a list as of yet with the talkgroup id's bur when and if I get one I will pass it on to you. Poss I will check and see if I can take a couple of pictures of our radio screens of the new system. Also on the rumor's again on NPD being scrambled for the patrol units is false false false there will be radios on the system that will have scramblers that will be available only to detectives, vice, drug and swat team radios only not patrol. I will keep you posted. Andy

From: Rich Carlson
Topic: 318 Message: 321

Motorola and ITTF personnel will be sending out instructions and coming out to train ITTF radio receipients after all the grant radios have been distributed and the buildout of StarCom21 has been completed. According to a meeting I was at today, they plan on this being complete by December 2006 statewide.

Your radio (probably an XTS5000, looks like a Spectra) will have the ITAC Calling and 4 Tac channels, and several ITTF, MABAS and ILEAS talkgroups. Unless there are active StarCom sites in your area the trunked groups won't work yet.

323. FYI.... Fw: [] Dept of Corrections Interoperable with St. Clair

Yahoo group: StarCom21
Date: 2006-01-12 05:37:22 UTC
From: Terry Weatherford, N9MAE
Topic: 323 Message: 323

from inside source

Yesterday with the help of Motorola and Tom Costa (IDOC) the State Correctional Facility in Washington Park/East St. Louis became interoperable with other Public Safety agencies in our County. They have a portable that is equipped with the St. Clair County Calling talkgroup and several others.
The portable is kept in the control room and they can talk out and receive. The Calling Talk Group is being included in every radio on our system so that each user can theoretically hail another user and then move to another talkgroup to complete long discussions.

We have a second radio which xxxxxxxxxxx will deliver as soon as we can send him to Menard. After this is installed Menard will be able to talk to ESTL and to us. You all might remember correctional facilities and prisoners became quite a problem in LA.

324. Has there been activity in Lake County?

All,

Has there been activity in lake county?

I programmed in the 4 channels listed in RadioRef, set the trunk type
to 800 Type 2 with a plan of Plan 1.

There may not be any activity which would explain why I hear nothing. :)

I am using a Uni 296D.

Thanks,

Jef

Starcom in the Chicago area is not expected to be
complete until around May 2006.

There is a Lake County MA-Com trunked system
though--also has some Lake County municipalities
on it.

327. Some misc. Peoria area Starcom notes

Yahoo group: StarCom21
Date: 2006-01-12 19:41:05 UTC
From: Jason McDowell
Topic: 327 Message: 327

Just a couple other notes on the Peoria area Starcom, just copied McLean Health Department on ID 30373 on the 867.975 CC on the Peoria simulcast site. Also McLean Sheriff 30358 is booming in on that as well. For some reason, 30358 is barely coming in on the Congerville/Woodford tower now. Something is changing thats for sure.

Jason

328. Any Schedule For ISP Switchover???

Yahoo group: StarCom21
Date: 2006-01-13 02:03:14 UTC
From: kd4ygg
Topic: 328 Message: 328

Is there any firm schedule for switching over the ISP Districts or are they going to wait until the build-out is complete?

Chris

For whatever it is worth, the word I received from one of the ISP radio technicians was that they won't put the system into use until Spring or Summer of 2006. District 10 was to be the first one to make the switch. That information was given last Summer, and could be outdated.

Thank you.

Rich Carlson <rich.n9jig@...> wrote: Motorola and ITTF personnel will be sending out instructions and
coming out to train ITTF radio receipients after all the grant radios
have been distributed and the buildout of StarCom21 has been
completed. According to a meeting I was at today, they plan on this
being complete by December 2006 statewide.

Your radio (probably an XTS5000, looks like a Spectra) will have the
ITAC Calling and 4 Tac channels, and several ITTF, MABAS and ILEAS
talkgroups. Unless there are active StarCom sites in your area the
trunked groups won't work yet.

FYI.... from another group

----- Original Message -----
From:
To:
Sent: Saturday, January 07, 2006 11:23 AM
Subject: [] UPDATE: *STARCOM21* DELIVERY OF MOBILE RADIO

We looked at the radio under RSS.

Interesting notes:

* Seems to have been set up with som control channels in the 700mHz range. FCC check shows no license held (and should have listed STA's, but I couldn't find the authorizations on line..anyone else find these?)
* Has no encryption key loaded, and OTAR has been inhibited. hmmm...
* Allows for 2W power for intinerent simplex (a good thing - at least someone is thinking about on-scene nets)
* The feature for pre-emptive announce talk group looks like it has been shut off
* The CURRENT NPSPAC I/O channels are in it, so the radio will have to be "touched" when the NPSPAC channels move down 15mHz.
* It contains the MABAS, ILEAS, Public Health, and IEMA talk groups, the "Incident" talk groups, and all the ITTF planning region talk groups

The radio still does not "see" a tower/control channel, so any talk group selected shows the "out of range" error.

We just received the letter from ITTF/MABAS regarding the use of the radio. I skimmed it and set it aside for later reading, and will report any salient details.

More later...

The Starcom radios are getting confused with the ILEAS radios are they? or are the ILEAS radios actually Starcom radios?

IEMA had a grant also for radios and our county got it, they had HT500's or the such and the radios had your county in one bank and several other surrounding counties in other banks all fire and police for their repeaters and such should you be needed to operate in their area.

ILEAS, MABAS, and IEMA have distributed TWO radios. One radio is a "Starcom 21" 700 / 800 mHz radio radio. The other is a VHF radio. Both are Motorola XTL-5000 series radios.
There have been other communications grants which agencies can use to buy additional radios.

Do we know what channels are in these VHF high
band radios?? Most PD's have ISPERN/IREACH
radios with 15 available channels.
I am assuming they have some of the V-tac
channels, ESMARN, possibly Firegrounds???

Still waiting for my Starcom radio.

I think it varies slightly depending on who distributed them. Fire service radios would have MABAS channels, Police may have ISPERN. My understanding is they will all have IREACH, the V-TAC channels as well. I have yet to read one with software...I'll know more later.

http://www.mabasradio.org/Word_Excel_Files/VHF_INTEROP_RADIO_PROFILE.xls

This is a link to a spreadsheet showing the channel
layout for the VHF radios. ILEAS, MABAS, and IESMA
radios are programmed differently.

http://www.mabasradio.org/Sub_Main_Pages/VHF_IO_ITTF_RADIO_POLICY.htm

This is a link to the policy page for the radios.
Apparently it's ok to add channels as long as you
don't delete the preprogrammed interop channels.

338. General Starcom21 Questions.....

Yahoo group: StarCom21
Date: 2006-01-21 02:29:46 UTC
From: Mike
Topic: 338 Message: 338

Ok so how does this system work? If I were on the system and keyed my radio to talk to my dispatch in for example Clay Co which isn't going starcom everyone in the state would hear me? How is this accomplished? By links for repeaters or what? That challenges me. I guess Trunking I understand but Apco 25 throws me.

Trunking I understand that a bank of frequencies is used, and when someone transmits the controller selects a free frequency and transmits to the base, the base receives it on that frequency then transmits and the controller at the base or repeater does the same in return. How is Apco different other then being digital?

Mike

It works like a cell tower. If your roaming, then anyone in that county or near that tower will hear you and your county. K, lets say your with the Clay County department and you need to do a road trip. As you travel, the signal roams from tower to tower so Clay County can reach you. Thus anyone near the tower thats carrying your signal will hear Clay Co. So say right now that a St. Clair County Unit which is on Starcom visits your county or near one of your towers, you would be able to hear St. Clair County. As for statewide TG's, I believe the signal is what it states, statewide.

Well......

A regular Motorola trunked system has up to 4 control (data) channels. The mobile radio basically scans these and locks onto the control data and that data will tell the radio what freq to use when it is involved in a conversation.

Mobile radios are usually set to transmit occasionally to let the system know they are there, this is called Affiliation. When a radio affiliates with the system the system knows the radio is available for call grants.

On a networked system, such as StarCom, the mobiles have more available control channels that it is programmed with (I don't recall the number, but 38 seems to ring my bell). The radio scans these and finds the control data and sends a Howdy Do to the system to let it know it is in the area.

When a radio is affiliated with a specific site (a node of the system basically) the site will transmit any traffic that mobile is supposed to hear. If there are no radios affiliated with a specific site when a talkgroup is used, then the traffic will not go out on that site.

Let's say that sites are defined by counties (they aren't, just an expample to illustrate the point here). There is a site in Clay County, one in Effingham County one in Lake county, another in Vermilion County and one in Franklin County. Your radio is on TG # 80, and you are in (and affiliated with the site in) Clay County. I also have a radio on TG 80 here in Lake County. There is no one in the other counties with a radio on TG 80.

The tower in Lake County and the one in Clay County will both broadcast the traffic on TG 80, but the towers in the other counties will not.

Let's say you are driving around and are now in Effingham. The tower their will now broadcast your traffic on TG 80, and Clay will not, unless someone else is affiliated with the Clay tower.

StarCom is planning on something like 168 sites around the state, and should have full coverage statewide for mobile radios when complete.

This should allow someone to talk to another almost anywhere around the state.

There are ways to limit access, some TG's will only be set to work at certian sites. There really is no reason to have the TG assigned to Clay County SO work all the way up here in Lake County, so it might be limited to the sites in and around Clay County.

Excellent article Rich on Starcom works, Joliet just received there set of six freqys that are now assigned to the prison trunk system. The prison uses the three 850 freqys for there data so i presume a data channel will be assigned for the six 860 that will be used by D-5 with joining Talk Groups. Some one pointed out tho there are whats called STATE BLOC FREQYS, does anyone know what they are and how there applied....Thank You ...Ron in Joliet

Well......

A regular Motorola trunked system has up to 4 control (data) channels. The mobile radio basically scans these and locks onto the control data and that data will tell the radio what freq to use when it is involved in a conversation.

Mobile radios are usually set to transmit occasionally to let the system know they are there, this is called Affiliation. When a radio affiliates with the system the system knows the radio is available for call grants.

On a networked system, such as StarCom, the mobiles have more available control channels that it is programmed with (I don't recall the number, but 38 seems to ring my bell). The radio scans these and finds the control data and sends a Howdy Do to the system to let it know it is in the area.

When a radio is affiliated with a specific site (a node of the system basically) the site will transmit any traffic that mobile is supposed to hear. If there are no radios affiliated with a specific site when a talkgroup is used, then the traffic will not go out on that site.

Let's say that sites are defined by counties (they aren't, just an expample to illustrate the point here). There is a site in Clay County, one in Effingham County one in Lake county, another in Vermilion County and one in Franklin County. Your radio is on TG # 80, and you are in (and affiliated with the site in) Clay County. I also have a radio on TG 80 here in Lake County. There is no one in the other counties with a radio on TG 80.

The tower in Lake County and the one in Clay County will both broadcast the traffic on TG 80, but the towers in the other counties will not.

Let's say you are driving around and are now in Effingham. The tower their will now broadcast your traffic on TG 80, and Clay will not, unless someone else is affiliated with the Clay tower.

StarCom is planning on something like 168 sites around the state, and should have full coverage statewide for mobile radios when complete. This should allow someone to talk to another almost anywhere around the state.

There are ways to limit access, some TG's will only be set to work at certian sites. There really is no reason to have the TG assigned to Clay County SO work all the way up here in Lake County, so it might be limited to the sites in and around Clay County.

ok so point is I am only going to hear the statewide traffic if I buy a new scanner unless someone comes into the area with a radio with other TG in it? Okay you probably saved me alot of money cause I was going to buy one thinking I was going to be able to receive traffic from all across the state.

Jason McDowell <jasonpeoria911@...> wrote:
It works like a cell tower. If your roaming, then anyone in that
county or near that tower will hear you and your county. K, lets say
your with the Clay County department and you need to do a road trip.
As you travel, the signal roams from tower to tower so Clay County can
reach you. Thus anyone near the tower thats carrying your signal will
hear Clay Co. So say right now that a St. Clair County Unit which is
on Starcom visits your county or near one of your towers, you would be
able to hear St. Clair County. As for statewide TG's, I believe the
signal is what it states, statewide.

Well eventually your going to need it to hear your ISP district and possibly any other counties in your area joining it. Its worth the money in the long run and if its anything like the Indiana Safe T system, users there have reported hearing the EMA and department of health thruout the state numerous times a day.

Six freqys now being used at Stateville prison now have shown up on the Starcom site list for Joliet-Dist-5. The three 850 freqys used by the prison are there primary data channels so i presume these 860 six will be shared by both state users with many IDs assigned. The tower that had been listed on Hoff RD in Elwood has 800 antennas on top but has been left off the list.....Ron in Joliet

The XTL5000s are causing some major confusion out
there :-)

I tried for an hour to convince my fire chief that the
XTL5000 we got wouldn't do VHF, UHF, Starcom, and
EDACS trunking all in one radio. He didn't believe me
because two different radio shops told him that the
radio would to Starcom and VHF at the same time. Even
the radio shops are confused since there are so many
XTL5000s showing up all over. Some are Starcom, some
are ILEAS VHF, some are MABAS VHF. The one we got is
MABAS VHF. I don't think it came programmed, but I
could be wrong.

I won't be vindicated until the radio comes back from
being programmed with a note that says "oops I guess
it can't do Starcom" :-)

ILEAS, MABAS, and IEMA have distributed TWO radios. One radio is a "Starcom 21" 700 / 800 mHz radio radio. The other is a VHF radio. Both are Motorola XTL-5000 series radios. There have been other communications grants which agencies can use to buy additional radios.
Bill

Mike Dickerson wrote:
The Starcom radios are getting confused with the ILEAS radios are they? or are the ILEAS radios actually Starcom radios?

IEMA had a grant also for radios and our county got it, they had HT500's or the such and the radios had your county in one bank and several other surrounding counties in other banks all fire and police for their repeaters and such should you be needed to operate in their area.

FYI.... from another group

----- Original Message -----
From:
To:
Sent: Saturday, January 07, 2006 11:23 AM
Subject: [] UPDATE: *STARCOM21* DELIVERY OF MOBILE RADIO

We looked at the radio under RSS.

Interesting notes:

* Seems to have been set up with som control channels in the 700mHz range. FCC
check shows no license held (and should have listed STA's, but I

couldn't find
the authorizations on line..anyone else find these?)
* Has no encryption key loaded, and OTAR has been inhibited. hmmm...
* Allows for 2W power for intinerent simplex (a good thing - at
least someone is
thinking about on-scene nets)
* The feature for pre-emptive announce talk group looks like it has
been shut
off
* The CURRENT NPSPAC I/O channels are in it, so the radio will have
to be
"touched" when the NPSPAC channels move down 15mHz.
* It contains the MABAS, ILEAS, Public Health, and IEMA talk groups,
the
"Incident" talk groups, and all the ITTF planning region talk groups

The radio still does not "see" a tower/control channel, so any talk
group
selected shows the "out of range" error.

We just received the letter from ITTF/MABAS regarding the use of the
radio. I
skimmed it and set it aside for later reading, and will report any
salient
details.

More later...

Okay, so we will need new scanners to hear ISP and anyone else who gets on board the system.

What scanner would be recommended? I would like to get the right scanner this time instead of going though several scanners to find the right one.

Thanks for any suggestions.

For now the only scanner that will work out of the box on 700 is the
BC396. The upcoming BC996 will work as well.

I have heard (but haven't tried it) that the PRO96/2096 could be
opened for 700 but I don't know if it will track in trunked mode.

Congrats to St. Clair County and Norman Forshee!

By Steve Jankowski
Illinois Bureau Chief

KSDK-Ribbon cutting ceremonies were held Wednesday afternoon, officially opening the new 911 call center in St. Clair County.

The state-of-the-art facility was equipped, in part, with several million dollars in Homeland Security Grants.

The equipment at the center allows law enforcement and fire departments on both sides of the river do something they hadn't been able to do: talk with each other during an emergency. The 911 center is the busiest in St. Clair County, and the location for any wireless 911 call made in the county.

More than $100,000 such calls reached the center last year.

Emergency system draws high praise
BY ALIANA RAMOS
News-Democrat
BELLEVILLE - St. Clair County is in the forefront of emergency communications, according to James Turk of the U.S. Department of Homeland Security.

Turk, program manager for the department's Office for Domestic Preparedness, spoke to a crowd of about 50 people who gathered Wednesday, before the ribbon-cutting ceremony for the 911 administrative offices for the county's $8.9 million interoperable radio system.

"The old system was so bad, that we had people who could see each other, but couldn't communicate by radio," said Capt. James Lay, of the St. Clair County Sheriff's Department. "If you were in a house or building you couldn't contact dispatchers. You didn't even need to be in a building and you couldn't communicate with officers coming to assist you."

St. Clair County received a grant for $3.8 million from Homeland Security in 2003 to build a radio system that would allow safety personnel to communicate during times of emergency. St. Clair County and the Emergency Telephone Service Board pay for the remaining cost.

The interoperable radio system is part of a push by the federal government to address communications problems experienced by first responders after the terrorist attacks on Sept. 11, 2001.

The Millstadt Police and St. Clair County Sheriff's Department have been using the radio system since August, said Norm Forshee, 911 coordinator for St. Clair County.

Lay said since the new system has been in place, there has rarely been a problem.

"Believe me, this is a big improvement," said Sheriff Mearl Justus of the St. Clair County Sheriff's Department. He called the old radio system antiquated.

"The real bottom line, I'm not sure if people are aware, is that this is one of 17 programs in the United States that competed across the nation for grant money," Turk said. "I can tell you that by looking around here, this is the very best in the entire country right here."

Turk said state governors were allowed to "select places that had unique situations to serve as models," to receive the grants. He said St. Clair County has created a system that includes not only public safety personnel but other organizations such as hospitals and the state Department of Transportation. He also commended St. Clair County for creating a user-friendly system.

For example, the radio system allows police and fire personnel to communicate directly with each other, without having to go through a dispatcher first, explained Forshee.

The system is powered by multiple electric companies and has a backup generator, that would allow users to talk to each other during a power failure or disaster. Users are assigned to talk groups and can scan other talk groups, to see whether there is anything that requires their attention. A four-hour class is required for all people who are assigned the new radios, Forshee said.

Forshee said a radio on the system has reached as far north as Peoria.

However, only the users who have been assigned to the system can access it. So far, there are 466 radios connected to the St. Clair County system from 59 agencies from both sides of the Mississippi River, said Forshee. He said there were about 500 more radios assigned to members of the Illinois Terrorism Task Force.

In order to meet the Federal Communication Commission's frequency standards, the county must sign up about 700 users or 100 users per frequency in the next three years, Forshee said. He hopes to get about 1,600 users connected to the system.

"This is the first step towards statewide interoperability," Forshee said.

Appears we have a group of Starcom folks in the Peoria area talking on TG's 1 & 8. Heard on the Peoria Simulcast tower CC 867.975. They were on 8 for a few minutes then switched to 1 for about a half hour. Not sure where there from, there staying at a local hotel here and drove down south on Rt. 29 into Peoria. Obviously weren't from the area as they were giving directions to a couple other cars in the fleet. Were using first names. Were talking about what there radio ID's were showing up as. Mentioned that the Starcom testing and formalization is at 1 & 10pm today at Illinois Central College here in Peoria. Then mentioned something about merging Scott's AFB system into Starcom and that all their frequencies had to be programmed within the next week before Starcom goes statewide at the end of the month. Also mentioned that Wireless and Mid-America I believe it was, is going to be at ICC today for the testing.

So not sure what all is going down but something big is going on at ICC today, i'm going to keep my BC396 only on Starcom thru at least 2pm and see what all pops up.

Got an update, on TG 1, St. Clair County Unit 2 just came up calling a Motorola Unit on what he called the Motorola TG. Motorola announced themselves as Unit 17. St. Clair inquired about the status of moving ISPERN to 800. Motorola said they were still working out the kinks with it but didn't give a timetable. Also should mention that some McLean County units are making there trek to the same hotel as the Motorola reps and are now talking on 30359 which I show as McLean County channel 3. Ok now just copied a Motorola unit trying to raise St. Clair county on TG 7006 with no joy. Things are certainly heating up.

Hmm you'll have to plug your area frequencies in, I'm not sure what they are but it can be found on the RR site. This is going to be a statewide test to get a feel of the coverage from what I gathered listening to the guys talk. You might hear something. Maybe this'll make the Peoria County/City folks jealous at how good Starcom is instead of flipping M/A Com lol.

Jason-
Thanks. I'm in Kankakee County- we have a moto Type 2, 10 frequecies does every agency in the county. I have a scanner with 989 open slots!
iM THINKING THE STAES AN EASY 1 YEAR away????
Thanks for the info.

366. Re: *STARCOM21* Starcom Alert Peoria

Yahoo group: StarCom21
Date: 2006-02-02 02:25:26 UTC
From: R.D. Marathon
Topic: 359 Message: 366

I sure hope so, but do not hold your breath on that! I sure hope this makes them jealous! It's plain stupid not to use starcom21. But nothing new for Peoria!

367. Fw: [INENA] New 911 Center Opens in St. Clair County

Yahoo group: StarCom21
Date: 2006-02-02 10:01:01 UTC
From: Terry Weatherford, N9MAE
Topic: 367 Message: 367

The 911 coordinator has offered to give a group of us a tour the 911 center, etc in St. Clair County. This is the first STARCOM21 system in use in Illinois in a brand new state of the air 911 PSAP.

Who would be up for this?

Would it be best on a Saturday???

Let me know.

email directly please terry.weatherford@...

Thanks
Terry Weatherford

368. Re: Bearcat vrs. Radio Shack units for digital trunking

Yahoo group: StarCom21
Date: 2006-02-02 14:28:36 UTC
From: Tom Laue
Topic: 359 Message: 368

So far, the Uniden 396 is the only one that can do 700/800 MHz digital systems like STARCOM, so my vote would be for Uniden since there will be 700 MHz frequencies used in this system. The 396 has more features, but many have said the Pro96 has better digital audio quality. I don't currently have either but I will likely get a Uniden 396 or its successor.

There are threads on the Radioreference.com forums comparing the two scanners.

Its in Belleville (about 15 miles south of I-65, on IL-159)

Or take I-55 to Collinsville, 255 south to 64, back to IL-159 to Belleville

Let me know

Terry

I also heard the PO's chatting on 30368, talking about someones wife I think lol. 30332 is the ITTF statewide TG. They were doing major testing on it here in Peoria yesterday and last night with the Motorola techs.

Its in Belleville (about 15 miles south of I-65, on IL-159)

Or take I-55 to Collinsville, 255 south to 64, back to IL-159 to Belleville

Let me know

Terry- What city is the center in for St. Clair county. I might be able to get the guys from the Kankakee Co. 911 system to come with.

Want to see how far and the best route. I'd be interested. I'm a photographer by trade so Saturdays are limited, but with some advamce planning we could do it.

Paul

Researchers warn of file-destroying worm
By Anick Jesdanun, Associated Press
NEW YORK — If you have computer files you'd rather not lose, now is a good time to make sure your anti-virus software is up to date. A worm set to activate Friday will corrupt documents using the most common file types, including ".doc," ".pdf," and ".zip." Hundreds of thousands of machines are believed to be infected, mostly in India, Peru, Turkey and Italy, said Mikko Hypponen, chief research officer for Finnish security company F-Secure Corp.

The worm, known as "CME-24," "BlackWorm," "Mywife.E" or a number of other monikers, even tries to disable anti-virus software that is out of date, he said.

Thus, users should make sure their software is turned on and has the latest definitions, generally available for free from the software vendor's website. F-Secure also has created a free removal tool.

"If you are infected, and you find out about it today, you still have time to get rid of the virus," Hypponen said.

As worms go, the spread of BlackWorm is relatively low. But worms these days are generally designed to help spammers and hackers carry out attacks, not to destroy files as this one does. So the impact this time may be more severe.

Microsoft issued an advisory Tuesday warning customers about the worm, which affects most versions of its Windows operating system.

Users should be safe if they have the latest anti-virus software or if their computers are set with limited privileges, a common setting in larger organizations. They are vulnerable if they, like many small business and home users, leave their computers set with full administrative rights.

And users should check the date on the computer. The worm hits the third of every month, so if the computer's local calendar settings are off, Hypponen said, files may be destroyed sooner or later, even if the computer is never turned on Friday.

378. Motorola Offers Software for Rebanding Public Safety Communications

Yahoo group: StarCom21
Date: 2006-02-07 01:20:26 UTC
From: Terry Weatherford, N9MAE
Topic: 378 Message: 378
Attachments: 1 described; binary payloads are missing from this source WARC

IT News Online Staff
2006-01-29
Motorola has developed software that enables equipment critical to public safety communications to be rebanded to a new segment of the 800 MHz spectrum in order to provide less interference for public safety radio communications.

The company said the developed software has been tested and will be available approximately three months ahead of schedule.

Public safety radio systems, those used by police, firefighters, emergency medical technicians, and other systems operating on the 800 MHz band have been experiencing interference as a result of commercial wireless carriers operating in the same or adjacent spectrum bands.

To alleviate the interference between the two types of systems, the Federal Communications Commission (FCC) has ordered a reconfiguration of the 800 MHz band, moving public safety to a lower segment of the band and commercial cellular networks to a higher segment. The developed software is needed by radios that use the NPSPAC (National Public Safety Planning Advisory Committee) portion of the band.

Motorola's software makes the spectrum swap easy for first responders to manage. The software allows radios being used to instantly understand which band plan is in use at a given site. The new software simplifies the transition by providing full interoperability throughout the transition.

"It was important to Motorola to get this critical milestone completed early so that we can help move the FCC's process along and minimize disruption to our customers as they transition to the new frequencies," said Tony Marshall, Motorola's General Manager overseeing the 800MHz rebanding program. "We're very proud of the early completion on such an immense effort undertaken by our software design and test teams and look forward to assisting our customers throughout the rebanding process."

380. Winnebago County control channel

Yahoo group: StarCom21
Date: 2006-02-13 18:40:33 UTC
From: John Marx
Topic: 380 Message: 380

I live in Green County Wis. about 20 miles north of the border. I'm hearing a control channel on 866.4625. The FCC data base indicates that the only license on that channel anywhere close is WQDB973 at Pecatonica in Winnebago County, IL. Can I assume that an active control channel there means District 16 will go live on Starcom soon? I haven't followed Starcom closely, so I hope I'm not asking a dumb question.

Thanks for the info. Nope. No system ID. I was just guessing using the FCC database which shows only State of Illinois licenses on that frequency. Nothing in Wisconsin is licensed on that frequency at all. I'll keep an ear on it now and then.

McLean County update

New talkgroups heard in McLean County

TG 30331 unknown (guess: ITTF talkgroup since it's close to other ITTF talkgroup #s)
TG 30366 unknown, testing
TG 30367 Unknown ch2?
TG 30368 Normal PD ch3?
TG 30370 unknown
TG 30372 Normal Fire (testing only)
TG 30377 Juvenile Detention Center - transport (TG 30350 was only used for testing)
TG 30378 unknown, testing

Based on the FCC license for KNNK867, it appears that the old EF Johnson frequencies will be reassigned to Starcom21 as follows:

Congerville - Site 231
858.2375
859.2375
860.2375
Leroy - Site 202
858.9375
859.9375
860.9375
Normal - Site 229
856.7625
857.7625
858.7625
859.7625
860.7625

The freqs listed below are still used by the EF Johnson LTR Multi-Net system and are not yet part of Starcom21...
856.7625
858.2375
859.7625
860.7625

McLean County update

New talkgroups heard in McLean County

TG 30331 unknown (guess: ITTF talkgroup since it's close to other
ITTF talkgroup #s)
TG 30366 unknown, testing
TG 30367 Unknown ch2?
TG 30368 Normal PD ch3?
TG 30370 unknown
TG 30372 Normal Fire (testing only)
TG 30377 Juvenile Detention Center - transport (TG 30350 was only
used for testing)
TG 30378 unknown, testing

Based on the FCC license for KNNK867, it appears that the old EF
Johnson frequencies will be reassigned to Starcom21 as follows:

Congerville - Site 231
858.2375
859.2375
860.2375
Leroy - Site 202
858.9375
859.9375
860.9375
Normal - Site 229
856.7625
857.7625
858.7625
859.7625
860.7625

The freqs listed below are still used by the EF Johnson LTR Multi-Net
system and are not yet part of Starcom21...
856.7625
858.2375
859.7625

860.7625

ITFF Radio/Starcom21 FAQ: http://www.ileas.org/radio%20programs/starcomupdate.pdf
--Motorola anticipates having the Starcom network complete and operational for State of Illinois usage by Dec. 31, 2006
(also included on this page is a description of some of the statewide talkgroups set up)

Starcom21 implementation info/timeline:
http://www.ileas.org/radio%20programs/starcomnetwork.pdf

January 6, 2006

Dear Illinois Public Safety Official:

On June 28, 2004, I sent you a letter announcing the Illinois Terrorism Task Force (ITTF) was offering a STARCOM21 (800 MHz) control station or mobile radio to every police, fire, emergency management and public health agency, as well as, dispatch centers throughout the state. As I advised previously, STARCOM21 is the wireless voice radio system being implemented statewide by the State of Illinois and is open to all government agencies in Illinois. The system offers the possibility of interoperability among all of the public safety disciplines.

I’m pleased to report that over 1,300 public safety agencies in Illinois requested a STARCOM21 radio in response to the 2004 survey. As of December 30, 2005, over 90 percent of these radios have been deployed and wide area trunking has been achieved in multiple regions throughout the state.

I have been made aware that the installation of the radios has resulted in a number of questions from public safety agencies. The purpose of this letter is to address some of the most frequent questions we have received regarding the STARCOM21 project.

Question: When will the remaining STARCOM21 radios be installed?

Answer: Motorola will complete all standard mobile and control station radio installations by March 31, 2006.

Question: Who is responsible for costs associated with the installation of the STARCOM21 radio?

Answer: There is no cost to the public safety agency if Motorola performs a basic installation of the STARCOM21 radio. However, if the recipient requests a custom installation, those additional charges will be the responsibility of the receiving agency.

Question: Can public safety agencies procure additional STARCOM21 radios?

Answer: If your agency wishes to purchase additional radios for day-to-day operations, you are welcome to contract with Motorola under separate agreement. Dave Lander is the Motorola STARCOM21 sales contact, and he can be reached at (309) 663-6004 or email at David.Lander@Motorola.com.

Question: Can an agency still request a STARCOM21 radio from the ITTF?

Answer: All of the funds for the STARCOM21 project have been allocated by the ITTF. If an agency failed to respond to the 2004 survey, and are not schedule to receive a radio, they should put their request in writing to me no later than February 1, 2006. Requests will be filled in the order they are received, if additional equipment becomes available.

STARCOM21 Project Update

Page 2

January 6, 2006

Question: When does the free prepaid access to STARCOM21 system end?

Answer: The radio, as well as five years of basic access to a statewide communications system, was provided by the ITTF at no cost to local agencies and departments per the established operating guidelines. After five years, the cost for basic access will be $100 per year per radio. The ITTF and Motorola agreed to delay the beginning of the five-year basic access to the date Illinois achieves "wide area trunking." This means the five-year prepaid basic access period will begin when all 186 STARCOM21 sites are operational.

Question: When will the STARCOM21 system be fully operational and in "wide area trunking?"

Answer: Motorola is targeting to have the STARCOM21 system complete and available for operational use by the State of Illinois by December 31, 2006. Motorola will allow ITTF-purchased radios to operate on STARCOM21 sites that are operational and in "wide area trunking" in advance of the targeted operational date. Sites will be phased in and it is anticipated that these sites will be available in advance of the projected operational date. The ITTF will regularly make available a system map, developed by the Motorola Project Team, to update public safety agencies on the status of the project.

Question: When does the warranty period begin for the STARCOM21 radio received by my agency?

Answer: The radio warranty will begin upon full Homeland Security Region (HSR) activation. An HSR is considered activated when the STARCOM21 sites that are required for the applicable HSR applicable region are operational and in "wide area trunking." Motorola will notify ITTF when an HSR region is considered activated. The warranty period will begin for the radios operating in that region at that time. An additional 4 years of service after warranty is provided by ITTF through Motorola.

Question: What are the charges associated with the monitoring of the statewide STARCOM21 announcement talk group?

Answer: The statewide STARCOM21 announcement talk group can be monitored free of charge by any agency that has a STARCOM21 radio. The free basic access provided by the ITTF includes:

• Notification of change to the Homeland Security Threat Advisory System from the State Emergency Operations Center (SEOC)

• Monthly statewide tests

• Exercises (quarterly, or approved in advance by the STARCOM21 Systems Operations Manager)

• Notification from the SEOC about incidents

• Communications en route while responding to an incident

STARCOM21 Project Update

Page 3

January 6, 2006

Question: Can a public safety agency receive a portable radio instead of a mobile or control station?

Answer: Public safety agencies were asked to select a STARCOM21 mobile or control station through the ITTF survey. Portable radios were not offered because of uncertainty regarding their coverage area. Motorola was unable to guarantee reception in non-urban areas.

Question: What is the charge for public safety agencies to utilize the STARCOM21 system for ongoing responses to an incident?

Answer: Agencies utilizing the STARCOM21 system for ongoing responses to an incident will be directed to another talk group and may incur radio charges for every 30-day period that the STARCOM21 radio is utilized for the incident response.

Question: What is the cost to public safety agencies after the free basic access period?

Answer: After five years, the cost for basic access will be $100 per year per radio.

Question: What talk groups were established for the STARCOM21 system?

Answer: Motorola has established a statewide STARCOM21 announcement talk group that includes all public safety agencies in the state. Additionally, Motorola established a separate talk group for each of the 19 Homeland Security Regions, as well as, three disaster response talk groups where regions and/or counties could be linked. Talk groups have also been established for the Mutual Aid Box Alarm System, Illinois Law Enforcement

Alarm System, Illinois Emergency Services Management Association and public health. The ITTF is currently working with Motorola to establish a separate talk group for the Chicago/Cook County Urban Area Security Initiative (UASI). Information on the availability of this talk group will be made available to the members of the Chicago/Cook County UASI at a later date.

Question: What is the statewide interoperable plan for the selection and use of the STARCOM21 radio by public safety agencies?

Answer: The Illinois Emergency Management Agency (IEMA) and ITTF Communications Committee are currently developing protocols and procedures for the selection and use of the STARCOM21 radio during an event, as part of the statewide interoperability plan. The ITTF Communications Committee has representation from a multi-jurisdictional group of subject matter experts from public safety agencies. IEMA and the associations for public safety agencies will circulate information regarding the protocols and procedures when they are completed.

STARCOM21 Project Update

Page 3

January 6, 2006

Question: Is there training available on the use of the STARCOM21 radio?

Answer: At the time of installation,

388. RE: *STARCOM21* McLean County update

Yahoo group: StarCom21
Date: 2006-02-17 01:06:28 UTC
From: Andy Stubblefield
Topic: 386 Message: 388

Terry the Johnson system is still up and running now on only 3 frequencies like Tom said the rest will be going to the starcom site. I brought the 2096 for my base last Friday nite and is working grear, my fire dept brought the undien 796 and I think the 2096 is by far alot easier to program for the system I am also hearing the lot of Motorola guys talking to each other also everyday. I was told today as of next Tuesday Feb 21 at 7AM Normal PD will be switching to the starcom system and I guess the plans are still to hard patch there mail dispatch talkgroup over to the 453.950 repeater so Blm PD and ISU will be able to hear them. I know they are finishing up with the instatll of all the new radio equipment in Normal FD this week and have not heard yet when they are switching when I find out I will let you know for sure. Also I have not heard a confirm date when they will be shutting down the rest of the Johnson system but suspect it will be later this summer.
Thanks Andy

McLean County update

New talkgroups heard in McLean County

TG 30331 unknown (guess: ITTF talkgroup since it's close to other ITTF talkgroup #s)
TG 30366 unknown, testing
TG 30367 Unknown ch2?
TG 30368 Normal PD ch3?
TG 30370 unknown
TG 30372 Normal Fire (testing only)
TG 30377 Juvenile Detention Center - transport (TG 30350 was only used for testing)
TG 30378 unknown, testing

Based on the FCC license for KNNK867, it appears that the old EF Johnson frequencies will be reassigned to Starcom21 as follows:

Congerville - Site 231
858.2375
859.2375
860.2375
Leroy - Site 202
858.9375
859.9375
860.9375
Normal - Site 229
856.7625
857.7625
858.7625
859.7625
860.7625

The freqs listed below are still used by the EF Johnson LTR Multi-Net system and are not yet part of Starcom21...
856.7625
858.2375
859.7625
860.7625

The METCOM EF Johnson Multi net system is on and in use by public works of both normal and Bloomington as well as normal and Bloomington fire and from what I have heard normal police is switching to starcom next week from their UHF freq. Plans are that the multi net system may remain as long as one year. Will update when info is available.

I'm confused, so is the old EF Johnson frequencies going to act as Control channels or just voice channels? Trying to see if I have to put them in a seperate BC396T system or not.

391. Re: McLean County update

Yahoo group: StarCom21
Date: 2006-02-17 22:25:29 UTC
From: Tom Laue
Topic: 385 Message: 391

So far, I've only seen the old EF Johnson freqs being used as voice channels for Starcom21. The EF Johnson freqs will be added to three existing Starcom sites at Leroy, Normal, and Congerville. Below are the listed frequencies from Radioreference.com as will be the case once EF Johnson is totally phased out of service (however I'm not sure that the .2125 freqs for LeRoy will be used ☐ anybody know?) If you put in the six "*" frequencies and set the scanner for control channel only, you won't miss any of the activity.

```
202 * D06 McLean (LeRoy)

855.2125
856.2125
857.2125
858.2125
858.9375
859.2125
859.9375
860.2125
860.9375
866.350*
866.875*
867.400
867.925
868.450

229 * D06 McLean (Normal)
856.7625
857.7625
858.7625
859.7625
860.7625
867.875*
868.400*
868.975

231 * D08 Woodford (Congerville)
858.2375
859.2375
860.2375
866.325*
866.850*
867.375
867.900

#########
```

I had heard that the Normal PD talkgroup will only be carried on SITE 229, so we'll see if that is indeed the case (I know Jason reported hearing 30368 on one of the Peoria sites).

TALKGROUP UPDATE: heard encryption on SITE 229 TG 30370 ☐ unknown user

392. I-CALLS on STARCOM21

Yahoo group: StarCom21
Date: 2006-02-17 22:28:06 UTC
From: Tom Laue
Topic: 392 Message: 392

I-CALLS on STARCOM21

Has anyone heard if I-CALLS will be used/allowed on Starcom21?
I-CALLS would use up available frequencies and many rural sites only
have three frequencies (one for control channel and two for voice).

393. Coming June 06 - Uniden BCD-996T Mobile Trunking Scanner w/GPS

Yahoo group: StarCom21
Date: 2006-02-18 00:51:35 UTC
From: Terry Weatherford, N9MAE
Topic: 393 Message: 393
Attachments: 3 described; binary payloads are missing from this source WARC

http://www.grove-ent.com/BCD996T.html

Uniden BCD-996T Mobile Trunking Scanner w/GPS
$539.95
SCN48

NEW! THE MOST FULLY-FEATURED SCANNER EVER BUILT—THE UNIDEN BCD996T!

EXPECTED LATE MAY TO JUNE, 2006

Cutting-edge technology includes dynamic-allocated memory with GPS-controlled system reception and multi-system trunk tracking, Call Close Call™ reception of local signals, multi-system trunk tracking, unencrypted APCO 25 digital monitoring, and 25 MHz-1.3 GHz (excluding cellular and UHF TV frequencies) frequency range.

Store up to 500 Systems, 1000 sites, and 6000 frequencies and/or trunk system talkgroups; search and scan up to 100 channels per second (300 in 5 kHz steps) with 250 permanent and 250 temporary lockouts, priority scan; travel in safety with GPS alerts for dangerous roads and crossings as well as points of interest (with user-provided GPS receiver) and NOAA SAME severe-weather message alarm. Displays location and travel information based on input from user-provided GPS receiver.

Trunk Tracking of Motorola (Type I 800, Type II 800, 900, UHF, VHF, P25); EDACS (wide, narrow, SCAT); and LTR; multi-site Motorola and EDACS trunking for wide-area systems.

Service Search automatically scans for public safety, news, ham radio, marine, railroad, civilian and military aircraft, CB, FRS/GMRS, racing, FM and TV broadcasts, and special services. Close Call (continuous or periodic to avoid interrupting a currently-active channel) automatically detects, stores, displays, scans and monitors up to 10 local active frequencies; selectively skips annoying data, pager, FM and TV broadcasts, NOAA weather, and user-entered frequencies.

Other features include frequency and ID autostore with 16-character alpha tagging, PC control and cloning,

attenuator, repeater input/output channel reverse, fire tone-out, red or green backlight selection, key-beep/alert-tone volume adjust, and automatic volume adjustment for different signal-audio levels.

(NOTE: Preliminary information subject to change)

MSRP $849.99

BCD996T FEATURE SUMMARY

*** THIS IS A PRELIMINARY LIST OF THE BCD996T’s FEATURES. ALL FEATURES ARE SUBJECT TO CHANGE ***

Memory Architecture Dynamic allocation. Construction: 400 Systems, 6000 Channels*
Maximum Systems: 400
Maximum Channel Groups per System: 20
Maximum Channels in a Trunked System: 200
Maximum Channels in a Conventional System: Limits of memory

*Creation of Systems and Channel Groups use some channel slots, so the total number of channels could be less than 6000.

Search with Scan

Temporary Lockout

99 System Quick Keys + 10 Group Quick Keys per System
Startup Configuration – lets you set systems to be automatically locked or unlocked during power-up.
Single-Handed Function Operation
Priority Scan
Priority Plus
Channel Alert
Alert Plus – keeps the scanner silent except during alert events (channel with programmed alert, weather alert, location alert, etc).
Dropout Delay
Attenuator
Repeater Reverse

Quick Recall – quickly navigates to a specific Channel by choosing the System, Group, and Channel.

Weather and SAME Alert

10 Custom Search Ranges

Service Search – Public Safety, News, HAM Radio, Marine, Railroad, Air, CB Radio, FRS/GMRS, Racing, TV Broadcast, FM Broadcast, Special, Military Air

Tone Search – Rapidly searches for the CTCSS/DCS used during a transmission.

Fire Tone-Out

Frequency Autostore

ID Autostore
Quick Search
“SOFT” Search Keys – let you assign search ranges to front-panel keys.
200 Search Lockouts
Alpha Tagging – For System, Group, Channel, Talkgroup ID, Custom Search Range and SAME Group. The scanner allows up to 16 characters for each name.
Duplicate Input Alert

Data Skip

Broadcast Screen – sets the scanner to ignore hits on Pager, FM, UHF TV, VHF TV, NOAA WX and custom band frequencies.

Trunk Tracking – supports the following systems: Motorola: Type I 800 / Type II 800, 900, UHF, VHF, P25; EDACS: WIDE, NARROW, SCAT LTR
APCO Project 25 Decoder – lets you listen to digitalized voice data that is compliant with the APCO Project25 standard.
APCO Auto Adjust Threshold
Multi-Site Trunking – allows independent system sites to share common talk group channel lists.

Control Channel Only mode
Battery Save
Two-Color LCD and Keypad Backlight – select red or green backlighting.
Independent Alert Tone Volume – lets you set the volume level of the following tones: Key Beep, Emergency Alert, Channel Alert, Close Call Alert and Battery Low Alert.

Key Lock

Close Call RF Capture

Close Call Do-Not-Disturb – sets Close Call RF Capture to operate only when no transmission is being received.

Close Call Temporary Store – automatically saves and scans the last 10 Close Call hits.

PC Control

Wired Cloning

On-Air Programming

Scan Speed – 100 CH/Sec. in Scan Mode (max)

Search Speed / Turbo Search – 100 Steps/Sec. in Search Mode (max) - except for 5 kHz step.300 Steps/Sec. in Search Mode (max) - (Turbo Search) - for 5 kHz step
Memory Back Up

Trunking Activity Indicators

Audio AGC

Location-Based Scanning – Each system can include latitude, longitude, and range information and can be automatically enabled/disabled when a GPS is connected and the unit is within the defined range of the system.

Non-Radio Location-Based Features – the scanner can include location alerts (that sound alert tones when the unit approaches a defined latitude/longitude) and speed-trap alerts (that sound alert tones if the unit is traveling at > than a set speed limit while it is within a grid area).

GPS Display Mode – displays location and travel information based on the GPS input.

do the PRO-95 receive apco 25? If not then nope. The system is digital, you will hear the control channels but no conversations because that is digital. Check back they have a post, if you are member of the yahoogroup, just search for scanners and there was a post of the scanners currently available which can monitor starcom.

No, the Pro95 will not work on StarCom21.

The scanners that will hear and track StarCom21 include the Uniden
BC296, BC796, BC396 and BC996 as well as the RS Pro96 and Pro2096.

Older BC250 and BC785 will allow one to hear the audio but not track the system.

From: John Coker
Topic: 398 Message: 398

More specifically, I wonder if it will do the 700 mhz channels that Starcom21 is using in Illinois? Implies it may only doe 800 and 900 mhz.

<<snip, snip>>
5. Coming June 06 - Uniden BCD-996T Mobile Trunking Scanner w/GPS
From: "Terry Weatherford, N9MAE" <terry.weatherford@...>
Subject: Coming June 06 - Uniden BCD-996T Mobile Trunking Scanner w/GPS

http://www.grove-ent.com/BCD996T.html

Cutting-edge technology includes dynamic-allocated memory with GPS-controlled system reception and multi-system trunk tracking, Call Close CallT reception of local signals, multi-system trunk tracking, unencrypted APCO 25 digital monitoring, and 25 MHz-1.3 GHz (excluding cellular and UHF TV frequencies) frequency range.

<<snipped>>

Trunk Tracking - supports the following systems: Motorola: Type I 800 / Type II 800, 900, UHF, VHF, P25; EDACS: WIDE, NARROW, SCAT LTR
APCO Project 25 Decoder - lets you listen to digitalized voice data that is compliant with the APCO Project25 standard.
APCO Auto Adjust Threshold
Multi-Site Trunking - allows independent system sites to share common talk group channel lists.

399. Starcom CC online N-IL/suburbs? 774.30625

Yahoo group: StarCom21
Date: 2006-02-18 20:53:13 UTC
From: ka9kdc
Topic: 399 Message: 399

Noting that I am seeing a Starcom Control Channel : 774.30625
here from my tower in Dupage Cty (@~100ft its solid signal)

SID identifying as #0140h-0113
(which does correspond since 0140 is the IL-Starcom System ID)

-observed this sort of accidentally, as I was setting up for
programming for downstate/West Cent-IL: (McLeanCo/StClairCo/...)
and after programming completed - the radio
quite solidly detected 774.30625 as CC
[a freq used on site#316 @Dist8 Tazewell (Metamora)]

Could be simply testing from Moto campus or signs of the actual buid-
out in N-IL.

Yes, it will do the 700 band, just as the 396 does now.

talked with a Dist 12 trooper says they are getting 44 new cars reportedly, and they aren't going Starcom until August! Says they will have all those new cars with the low band whip antennas then get plugs on them when they take out low band. He says he has a new portable and system in his car, just pushes the button he wants to transmit on and it selects it. He like it, his portable was a newer EF johnson he said.

402. 155.28 - 155.16 patch in St.Clair County

Yahoo group: StarCom21
Date: 2006-02-20 16:35:08 UTC
From: Terry Weatherford, N9MAE
Topic: 402 Message: 402
Attachments: 1 described; binary payloads are missing from this source WARC

I am copying what I believe to be a CENCOM simulcast of 155.16 (possibly from the STARCOM21 system) but it is coming out on 155.28 CSQ. Hearing 4C71, 4C73 to Belleville Memorial. Hearing all units same scale. Also, a lot of key ups with no voice. This just started about 10am, this Monday morning.

And yes, I am copying some of the traffic directly on 155.16.

(FYI 155.16 is MERCI 3, the MERCI frequency used in this area. 155.28 CSQ is used only for EMS Dispatch of a few agencies in St. Clair County, also IDPH Disaster Coordination with 141.3 PL)

now ... 4C70 calling Kenneth Hall (E St. Louis) Could copy mobile unit and hospital clearly on 155.16 (direct)

Is this possibly being heard on TG 7020????

Also, a 911 system in Missouri, that is on 155.28 just cross-patched back on to 155.16.

So, either some weird testing here or something is all screwed up

403. RE: *STARCOM21* 155.28 - 155.16 patch in St.Clair County

Yahoo group: StarCom21
Date: 2006-02-20 17:43:51 UTC
From: Cris Hanna
Topic: 402 Message: 403
Attachments: 1 described; binary payloads are missing from this source WARC

In as much as 155.28 is used to page several EMS services by CENCOM this could be pretty ugly. As a former Paramedic and Dispatcher for Lifeforce, and in Mascoutah. Mobile units would be confused about which channel their on.

EMS units also communicate with CENCOM on 155.16 when enroute to scene, on scene and enroute to hospital

Communications to the hospitals is contraled via PL.

OK.....

The patch is still continuing.

The key-ups you may hear on 155.28 with no traffic, is apparently when the mobile units on 155.16 are barely in range. (Sometimes the mobile may actually break through)

I just heard a local agency full scale on 155.16 talking to hospital in Maryville IL and the mobile unit was just making the 155.28 patch "key" up, but the Hospital was coming through loud & clear.

Now, I'm still not sure of the purpose of this patch and WHY it would be going back on 155.28.

Still not sure if its actually on a STARCOM21 TG, but would have to assume this to be this case.

Date: 2006-02-21 23:44:34 UTC
From: Terry Weatherford, N9MAE
Topic: 408 Message: 408

From St. Clair County 911 coordinator.

This is a small village though....

I'm guessing this probably had something to do with the cross-patching yesterday.
I have not heard any comms on 155.28 that were duplicated from 155.16 today.

Terry

Subject: Village of Millstadt Converts Police, Fire and EMS to New 800MHz System

All

The Village of Millstadt has become the first Village to convert all
emergency service providers to the new St. Clair County 700/800MHz radio
system. All police, fire and ambulance personnel have been trained and
assigned radios.

409. PRO96 vs 700

It seems to be intermittent, I can pick up McLean Sheriff all the time on Peoria Simulcast Tower and intermittently on the Congerville & 700 mhz tower. However Normal comes in intermittently on Peoria Simulcast Tower and Congerville. I think it just depends on how strong the signal is.

413. Bush signs 700 MHz transition package into law

Yahoo group: StarCom21
Date: 2006-02-28 22:41:50 UTC
From: Terry Weatherford, N9MAE
Topic: 413 Message: 413
Attachments: 1 described; binary payloads are missing from this source WARC

Feb 9, 2006 3:11 PM By Donny Jackson

As expected, President George W. Bush yesterday signed budget-reconciliation legislation that includes a firm date for TV broadcasters to clear 700 MHz spectrum and $1.2 billion in funding earmarked for public-safety communications.

Last week, the U.S. House of Representatives voted 216-214 to approve the budget package, which requires broadcasters to clear the 700 MHz airwaves on Feb. 17, 2009, after which 24 MHz of frequencies will be allocated nationwide to public safety. Other airwaves in the band will be auctioned to commercial operators in a bidding process expected to generate $10 billion in additional revenue for the government.

Under previous law, broadcasters tentatively were targeted to clear the 700 MHz band by the end of this year, but they were not required to do so until 85% of all U.S. television sets could receive digital signals—a threshold that could take decades to reach, according to many analysts.

Some public-safety officials previously had expressed hope that first responders might receive more than the 24 MHz of airwave earmarked, but enacting the budget measure effectively ends such discussion, said Harlin McEwen, chairman of the International Association of Chiefs of Police communications and technology committee.

“All the spectrum that is not going to public safety is ready to be auctioned, so it is highly unlikely [that more frequencies would be dedicated to public safety],” McEwen said.

In addition to allocating spectrum to public safety, the law creates a $1 billion grant program to pay for public-safety interoperable communications systems, $156 million for national alert and tsunami warning systems and $43.5 million to help fund E-911 upgrades as called for in the Enhance 911 Act passed in 2004.

Most of the $10 billion in expected auction proceeds will be used to reduce budget deficits and to fund a program designed to provide people with analog TV sets low-cost converters that will let them receive digital broadcasts.

I live in S. IL/ Franklin County, getting data reads from area but no audio at all, using 2096/WIN96 and imported directly from RadioReference for Starcom 21. Anyone have any updates on when audio is coming?

Also wondering if anyone has information on Marion Fed Pen in Williamson County, same import of date into my scanner but no audio. Wondering if this might be encrypted? Offset and step is correct.

Your responses greatly appreciated.

At todays meeting of the Southwestern Illinois Region IV Medical Disaster Committee that is headed by Terry Walhter, of Belleville Memorial, the Region POD Hospital, held at Anderson Hospital, Maryville, Ill., It was reported that NO Hospital has their Starrcom 21 Radios installed. Motorola seems to be unable to get to them for awhile. When Anderson Hospital had contacted Motorola they were told there was no schedule for hooking up their Radio at this time.

Terry,

Thanks for the update on Madison County, IL. This is somewhat close to me and gives me more information about when/what to expect on the migration to Starcom 21. It appears as if it might be a while yet for this part of IL.

Thanks again for the info and please keep us posted.

417. Fw: [STARCOM21-users] UPDATE: *STARCOM21* DELIVERY OF MOBILE RADIO

Yahoo group: StarCom21
Date: 2006-03-05 18:33:19 UTC
From: terry.weatherford@scanIL.com
Topic: 417 Message: 417

In case this was never forwarded before.

Terry

-------------- Original message --------------
From: "
We looked at the radio under RSS.

Interesting notes:

* Seems to have been set up with som control channels in the 700mHz
range. FCC
check shows no license held (and should have listed STA's, but I
couldn't find
the authorizations on line..anyone else find these?)

++++++

Found the State "block" license on line.

++++++

* Has no encryption key loaded, and OTAR has been inhibited. hmmm...
* Allows for 2W power for intinerent simplex (a good thing - at
least someone is
thinking about on-scene nets)

++++++++

Please note that ANALOG is allowed on these 2W channels for on-scene tactical. To me, that is a great feature for the FD's and should be set aside for fireground/tactical.

++++++++
* The feature for pre-emptive announce talk group looks like it has
been shut
off

+++++++++

This is potentially a very BAD feature.

+++++++++
* The CURRENT NPSPAC I/O channels are in it, so the radio will have
to be
"touched" when the NPSPAC channels move down 15mHz.
* It contains the MABAS, ILEAS, Public Health, and IEMA talk groups,
the

"Incident" talk groups, and all the ITTF planning region talk groups

The radio still does not "see" a tower/control channel, so any talk
group
selected shows the "out of range" error.

++++++++++

I am not aware of anyone in DuPage County that has had any luck hitting a control channel.
All radios show give an out of range error message on any STARTCOM21 talk group.

++++++++++

We just received the letter from ITTF/MABAS regarding the use of the
radio. I
skimmed it and set it aside for later reading, and will report any
salient
details.
++++++++++++++

If any legit users would like to see it, email me privately.

+++++++++++++++
More later...

DC Rauter, LWFD
MABAS Comms Committee

I would wonder exactly whom they called? Did they call MOTOROLA?? or did
they call the local Motorola shop (Dechant Electronics / St. Louis
Electronics / Wireless USA). The local shop is independently owned and
operated, and contracted by MOTOROLA to do the installs. They have
limited personnel available, and have been overburdened by the St. Clair
County system. I have also been told that the "Base Station" packages
were shipped without antennas. The real installation is the antenna
since the rest of it is no more than a mobile on a power supply. As far
as I know NO base station packages have been installed. Last I heard,
they were way behind on mobile installations. This is a HUGE
undertaking, and will take some time to complete.

I caution anyone who is "calling MOTOROLA" to understand the who, what,
when, of it, and be sure they are calling the appropriate party.

MOTOROLA sold the radios to ITTF with a fixed installation charge
included. (typically this includes all antennas feedlines, etc.)
ITTF Distributed the radios, antennas, and feedline to the local MSS
(independent local Motorola Service Stations)
The MSS is to install each radio, in accordance with the agreement
between MOTOROLA and ITTF
MSS gets paid when the install is done.

419. Kendall County transmissions heard

Yahoo group: StarCom21
Date: 2006-03-06 17:06:43 UTC
From: Jason McDowell
Topic: 419 Message: 419

This is the first i've heard an upstate 911 center on Starcom. Transmission heard on Peoria's Simulcast tower on CC 867.975. It was a Blackhawk Mobile unit from Rockford on his way to Peoria talking to Yorkville 911 center on TG 30330 which is a MABAS TG. The Blackhawk guy never said his location just that he was on his way here to Peoria. He said he was encouraged by Motorolla to test the unit on the way here. You chicago area guys might want to break out the searches and find that Kendall County CC that Yorkville/Kendall County is monitoring.

From: dataman60435
Topic: 420 Message: 420

There are no active towers here as yet Jason. I heard the same transmission from Dist 5 today and it came over the 774.55625 freqy. I heard it fine in "Digital" decoded perfect on my PRO96 thanks to Win96 and a great friend in Morris setting it up for me. So far we are stuck with 700mgz at Dist 5. The 96 does not trunk it but does AGC perfect in the decoding conventionally. I hope in time we do change to 800 because the PRO96 performs very well on Indiana and Michigan systems...

Henry police could get equipment upgrade

Saturday, March 11, 2006

BY KEVIN SAMPIER
OF THE JOURNAL STAR

CAMBRIDGE - A new communication system that would allow police to talk to each other from farther away and on more channels could come to Henry County, depending on how much the equipment costs.

Henry County Sheriff Gib Cady will host a meeting from noon to 3 p.m. today in the Geneseo High School auditorium so police, firefighters and other emergency personnel can ask questions about the StarCom21 Radio Project.

Representatives of Motorola, the company offering the service, will be at the meeting.

Cady said StarCom21 would enable police to talk to each other from opposite sides of the county with just their hand-held radios.

The system would offer more radio frequencies and stronger signal reception and transmission so even police in different counties could communicate.

Cady said the current radio equipment being used in Henry County has an effective range of only about five miles and is vulnerable to weather conditions.

But there are still a lot of unknowns about the project, including what it might cost the county.

"This radio system is moving into the future, but unfortunately we're going to look at the cost and see how fast we're going to move," Cady said.

Any purchase would have to be approved through the Henry County Board.

Cady said about 180 radio towers have had StarCom21 transmitters placed at their bases across the state, including two in Henry County. Eventually, the program will take effect statewide, but some areas will take longer to convert because of funding, Cady said.

Topics he plans to address today include equipment operation and employee safety, long-term financial solutions and state and federal

requirements.

423. 1st round of good storms to Starcom Towers

I was talking to a Moto guy yesterday and he mentioned
that he had been out all night on Sunday working on
systems that had gone down. I said something about
"yeah you probably had a lot of stuff go down last
night with all of those storms". He replied "not that
much went down, but what went down was big". So then
I asked him if it was Starcom that had gone down. He
replied very quickly (too quickly) that "no no no it
wasn't Starcom." Hehehe. Apparently whatever went
down that "wasn't Starcom" was due to backup
generators not starting. If they still have towers
down it must be a bigger issue than that.

And it would make sense for that to be a low priority,
since no agencies in Peoria are using Starcom for
operations...the site could be down for reasons
unrelated to storm too. Maybe it's a planned outage.

The links to the controller in Springfield are down because of the storms.
Obviously, the Peoria system is not critical at the moment.

From: Terry Weatherford, N9MAE
Topic: 435 Message: 435
Attachments: 1 described; binary payloads are missing from this source WARC

from MABASRadio.org:
Illinois Senate Bill 2870

Please check back often for an official MABAS position on this legislation.

SB 2870
Short Description: ST POLICE-RADIO OPERABILITY
Senate Sponsors: Sen. John M. Sullivan-M. Maggie Crotty
House Sponsors: Rep. Susana A Mendoza-Michael P. McAuliffe

Synopsis As Introduced
Amends the State Police Radio Act. Requires that the Director of State Police, or his or her designee, serve as chairman of 2 public safety radio interoperability entities, the Illinois Statewide Interoperability Executive Committee and the STARCOM21 Oversight Committee. Specifies the minimum voting membership of those committees and authorizes the Director to increase the membership of the committees. Effective immediately.

Senate Floor Amendment No. 1
Adds the Director of the Secretary of State Police or his or her designee as a member of the State Interoperability Executive Committee.

Please email your concerns or questions to our MABAS Radio Committee Co-Chair, who is point-man on this bill:

Chief Paul Maplethorpe (chief@...)

MABAS needs to be fully represented on both of the entities named in this bill, with assurances that MABAS is represented in all decisions regarding radio interoperability, and all issues involving STARCOM21. Please make your opinions known to our Co-Chairmen.

Be it enacted by the People of the State of Illinois

represented in the General Assembly:

Section 5. The State Police Radio Act is amended by adding Section 10 as follows:

(20 ILCS 2615/10 new)

Sec. 10. Public safety radio interoperability. Upon their establishment and thereafter, the Director of State Police, or his or her designee, shall serve as the chairman of the Illinois Statewide Interoperability Executive Committee (SEIC) and as the chairman of the STARCOM21 Oversight Committee. The Director, as chairman, may increase the size and makeup of the voting membership of each committee when deemed necessary for improved public safety radio interoperability, but the voting membership of each committee must represent public safety users (police, fire, or EMS) and must, at a minimum, include the representatives specified in this Section.

The STARCOM21 Oversight Committee must comprise public safety users accessing the system. The SEIC shall have at a minimum one representative from each of the following: the Illinois Fire Chiefs Association, the Rural Fire Protection Association, the Office of the State Fire Marshal, the Illinois Association of Chiefs of Police, the Illinois Sheriffs' Association, the Illinois State Police, the Illinois Emergency Management Agency, the Department of Public Health, and the Secretary of State Police (which representative shall be the

From: Jason McDowell
Topic: 436 Message: 437

Actually its the other way around. Radio shack can only listen to the frequencies, it can't trunk track it. The Uniden BCD396T and the soon to come out BCD996T, are the only scanners that can track it. Your best bet is to get the Unidens. More and more digital systems are going 700 mhz, plus you can't beat the dynamic memory & close call.

Both Uniden and RadioShack make scanners that can track Starcom's 800 MHz. operations but only the Uniden BC396 and BC996 can track 700 MHz. Some 700 testing in the Plainfield and Peoria area has already taken place, although most operations will remain on 800 for now.

The RS Pro96 and 2096 as well as the Uniden BC296 and 796 will work fine on the 800 MHz traffic. There may be ways to open the RS radios to monitor 700 MHz. channels but they won't track the system on 700.

439. D22 - Massac County

Yahoo group: StarCom21
Date: 2006-03-25 21:19:53 UTC
From: Todd Hartzel
Topic: 439 Message: 439

Greetings all,
While in Paducah visiting a longtime ham fried of mine
I searched for ISP D22 700/800Mhz sites. Sadly, I did not
receive anything. I was very close to the Ohio River, so if
any sites in nearby Massac County were on, I figure I should
have heard them. But nothing. I used both my PRO-96 &
BCD-396T.

For those that might be familar with Paducah, I was in the
area of U.S. Hwys 60+62, Benton Rd & Husbands Rd. I am rather
surprised by the fact I received nothing. The only 700/800Mhz
anythig I found was the Paducah/McCraken County PS TRS on
859.7375 (Mot HEX ID: 3713 on PRO-96)

Though I had my FCC License with me (in case I got stopped
my Ky LE), I did not operate the radios while mobile. Though
I probably should have.

Down in Ky they have those radio law requirements.
I will get another try at it soon...

440. Normal Fire Department switches to Starcom21

Subject: Re: [] Operations During Tornado

Norm, I'm so sorry your PSAPS had to experience this. We had 6 F0-F1 tornadoes touch down here that same night, but we were so fortunate this time. Not a lot of damage compared to the 12th, and again, no one was seriously injured or killed. It's amazing, isn't it, what our telecommunicators are capable of? I wish there was a way to communicate that to officers and the public, but you really do have to see it to believe it.

Congratulations on your radio system. We've had the same experience with Wireless USA of Springfield. Can't imagine running a PSAP without their support.

If there's anything we can do to support your people, please don't hesitate to call. Tell them they're in our thoughts...

Mallorie Teubner, ENP
Director
Sangamon County Emergency Telephone System Department

"
>>> nforshee911@xxxxxxxxxxx 04/05/06 7:38 AM >>>
As you all have probably heard parts of our County were hit by an F1/F2 tornado Sunday night that stayed on the ground for about eight minutes. Major damage, one death and injuries, were reported in Fairview Heights and
O'Fallon. The death was the result of a collapse of a large discount clothing store. Many new brick constructed homes suffered extensive damage including the total collapse and entire rooms being relocated to adjacent lots. These were homes in the 3000/4000 square foot range. Whole floors of apartments were eliminated. US 50 was still closed yesterday and is not expected to open until this evening. ISP District 11 lost their microwave and IDOT District 8 lost their radio communications for some time.

We rerouted all 9-1-1 calls from the Fairview Heights PSAP to our County PSAP to allow them to deal with the immediate results of the storm. The County PSAP took well over 1,000 calls 9-1-1 and 10 digit the day of the tornado with the vast majority occurring between 4PM and 8PM. From 4 to 8 they answered almost 600 9-1-1 calls and less than 50 rolled over to the

backup/overflow PSAP.

Though at one point the radios system went into site trunking due to issues that resulted from the lightening hit at the State building in Collinsville the users on the street were never impacted. The T/Cs selected their console backup folder and all went forward. In fact we distributed extra radios for coordination purposes.

Once again I had the chance to watch the T/Cs working under an extremely high volume of life and death traffic (the County PSAP had the responsibility for coordinating with the County IEMA Director, Coroner and many others) and I they performed extremely well even though some worked in excess of 16 hours. As we know, to many times they are taken for granted but when it counted they came through and did a fine job. Without them the radios, 9-1-1 and the new center would be of no value.

As you know I have been known to hold the vendors feet to the fire to insure that St. Clair County and the ETSB get what they are paying for. I think I need to acknowledge the efforts of a couple of vendors that stepped to the front during the storm. Rich O'Herron and his Motorola staff including Doug Phelps worked through the evening to resolve the issue at the State facility. They coordinated with SBC who had problems with their smart jacks when the telephone central office power changed from generator to commercial (still no interruption of our radio services). I know that these guys who are supposed to work 9-5 were still working at 1:30AM. I am confident in their dedication to the product.

Maybe even more impressive was the Wireless USA response. A technician who had just buried his father left his home to help resolve these issues. He did not have to do this as others were covering for him but because of his dedication he also stepped up to the plate.

I thank these people who are also involved in Public Safety.

This map <http://www.911.co.st-clair.il.us/starcomstatus121905.jpg>
does show a site will be located at Macomb, but no frequencies are
licensed in McDonough County for Starcom21 yet.

The closest site to Macomb I've heard is a control channel on 868.925
coming from the Monmouth site (I don't have a BCD396T to determine
the site number). 868.925 does sound different than other control
channels I've heard, so somebody should check to make sure that it is
infact a control channel and not just transmitting data. I've yet to hear
anything coming from the Gilson (Knox Co) site or the E. Ft Madison Site
(Hancock County).

From: Terry Weatherford, WX9SAR
Topic: 453 Message: 453

A couple of months ago our city fire department switched back to a VHF system from our 800mhz trunking system He reported at a 911 meeting last night that all Illinois fire departments are either staying on VHF or going back to VHF. I know over the last several months some counties have been working or in the process of trying to purchase new countywide radio systems. How many agencies are on 800mhz vs. VHF? Are your fire departments on board with the 800 MHz system?

For those of you purchasing or have just purchased a countywide radio system, how was this funded? Was it all paid for or being purchased by 911 if not what other parties contributed?

I am just trying to collect information to take back to my 911 board.

Effingham City Police Department

454. Very interesting 911/VHF/800 Fire Info

Yahoo group: StarCom21

From: Terry Weatherford, WX9SAR
Topic: 454 Message: 454

Assorted snippets from 911 boards:

You are correct. We will be keeping fire paging on VHF.

METCAD
Champaign County, IL

>>> 4/12/2006 18:34 >>>

Something that has to be remembered is the majority of firefighters in Illinois (and nationally) are volunteer, and the volunteer service revolves around voice pagers. There is not - that I'm aware of - an 800 MHz pager system. I know some have experimented with alphanumeric pagers, but voice (e.g. Minitor) pagers are still the defacto standard, and will remain so for quite a while.

Clinton County 9-1-1

-----Original Message-----
Subject: RE: 800 trunking system

True. All VHF operations will have to be narrow banded by 2013. That includes all the current fire frequencies whether for individual licensees/local operations or for mutual aid operations such as the current IFERN frequency. The current spectrum for public safety, including VHF, UHF, and 800 is 24 MHz in total. The new portion of the 700 MHz spectrum (4 UHF TV channels) that is due for our use in 2009 will double that by adding another 24 MHz.

-----Original Message-----

We need to mention 2013 and the changes in store for VHF, the lack of VHF frequencies and the fact that narrow banding may not provide
many more VHF for public safety.

In addition only about 20 to 30% of the available public safety spectrum resides in VHF and 70 to 80% resides in the 700-800MHz spectrum.

St. Clair County ETSB

-----Original Message-----
Subject: RE: [INENA] 800 trunking system

While VHF is the frequency for mutual aid (MABAS) for the fire service in IL, there are departments that are on trunking and will stay on trunking. They do have methods to handle situation and operate on VHF for MABAS Box alarm situations.

Throw some money at those counties in Illinois that don't have a lot of resources or much luck receiving grants and we will come out of our silos.
Sometimes it is not a lack of desire but an inability to come up with the necessary funds or our inability to convince our local elected officials to justify another major expense.

Fortunately, we have achieved VHF interoperability in our county as all public safety agencies including the state police and our county health department, county highway department, etc. have all of each other's frequencies in their radios and we have good interagency communications.

We may finally achieve Enhanced 9-1-1 in 2007, entirely through local funds and without an ETSA surcharge, after nearly 17 years of Basic 9-1-1 operations. There are smaller counties around us that don't even have a 9-1-1 system in place and cannot afford one anytime soon. A county-wide 800 trunking system is only a dream for us.

Am I envious of those systems with the revenue stream, access to grants, and yes, the leadership and drive to keep up with all the cutting edge technology? - you bet I am.

We do the best we can with what we got.

Quincy/Adams County 9-1-1

Correct me if I am wrong but I don't think two mobile radios are required per truck. I think a dual head radio, one in front and one in back will suffice. I think a radio for each person on the truck is required.

You probably already have a VHF base station that is probably going to replaced or modified to accept narrow band. Once you add the 800 you then have the one thing we should have learned from NYC on 911, interoperability.

The idea behind this 800 network in IL is nteroperability for public safety. Today the type of event determines to a large degree what type of agencies are most needed and who needs to work with who. Yes police, fire and EMS may be there but the real need may be for Public Health, the big highway trucks or any other agency you can think of. By coming out of our historical silos and sharing we can communicate. We can have greater flexibility and the ability to put all of those agencies working a given part of the event in their own special communications area while allowing them to communicate with the scene commander as might be needed.

If I'm a firemen and I need help that the closest assistance is a cop on the other side of the emergency who can't hear me scream but could hear me if we had common communications, guess who I want to talk to?

The inability of the VHF system to provide good FD communications in NYC contributed to many deaths. If you get a chance pick up your VHF radio and listen to it. Alongside of the VHF hold the new digital 800 and listen to it. Tell me which one delivers the best quality.

Oh, one other tidbit, a thing called coverage. It does no good to have MABAS if your in the inside of the building or even the outside in an area that has no or insufficient coverage. We can hear and talk in many, many places that we could not hear or talk before.

This is not about police or fire this is about us all working together and coming out of our silos. I don't get one dime more for anyone who joins the system. All I get is the opportunity to put interoperable talk groups (work) in their radios, if they are near me to provide even more interoperability.

This is not necessary for those around the State they can talk to me today but for those adjacent to us including the USCG and St. Louis we want an expanded capability? When the time comes and we need to play in the same
sand box we have a bigger box to get in.

You know, this 800 radio system project is the only project in my career in St. Clair Co for which I received an award from a public safety agency. I have done my part and now I will go implement a new CAD system, bye.

St. Clair County

In Champaign County, we are moving all public safety to a private 800 Digital Trunked system that will be interoperable with StarCom21. The 26 fire departments in the county unanimously decided to move to 800 for many of the reasons mentioned by others. Chiefly, the 2013 deadline to have to replace much of the end user radio equipment anyway and the lack of available spectrum to increase operational channels. Most of our major incident emergency plans have a heavy use of MABAS and other interop VHF channels anyway, and agencies will maintain these, mainly for when they have to operate with agencies outside of our county in mutual aid roles, or with non-800 agencies, etc.

Originally we had thought we were going to keep fire on VHF with only law enforcement moving to 800. But as our selection process moved along, it became apparent that the only real answer for true interoperability was to have every public safety official on the same system. This eliminates the need for patching or dual radios in vehicles, etc. Unfortunately, 800 has been given a bad rap in some areas. This was difficult to overcome with some of our, shall I say, seasoned fire professionals, but when you really explain to them how the system works and how much it can improve communications, even the most opinionated tend to see the benefits.

The infrastructure is funded by the METCAD (the PSAP), mostly from 9-1-1 funds. The end user mobile and portable equipment is being purchased be each individual agency. METCAD (a consolidated center) has been around for almost 27 years and this is the model we have always followed. METCAD funds and maintains the infrastructure (mostly through 9-1-1 funds, but also through user contributions) and each agency funds and maintains their end user equipment out of their budgets. Alternate funding methods are being considered that may change this in the future and make it possible to purchase this equipment out of our funds, but that remains to be seen.

Champaign County

I can hear 868.925 almost everywhere in western IL. I will try and check that freq with Pro96Com in the next week or so while I am there.

73, Chuck, N2DUP | Rochester MN and Macomb IL | scanning1.com

In a message dated 4/15/2006 07:04:12 Central Standard Time, "Tom Laue" citrus801@... writes:

This map <http://www.911.co.st-clair.il.us/starcomstatus121905.jpg> does show a site will be located at Macomb, but no frequencies are licensed in McDonough County for Starcom21 yet.

The closest site to Macomb I've heard is a control channel on 868.925 coming from the Monmouth site (I don't have a BCD396T to determine the site number). 868.925 does sound different than other control channels I've heard, so somebody should check to make sure that it is infact a control channel and not just transmitting data. I've yet to hear anything coming from the Gilson (Knox Co) site or the E. Ft Madison Site (Hancock County).

As far as cities, some Illinois city FDs use their local 800 MHz TRS. Normal Fire is interesting in that they use Starcom21 for dispatch/ops, but each firefighter carries a VHF portable which can transmit/receive the Starcom21 800 MHz talkgroup via a cross-band mobile extender in their rig.

As far as counties, 95% are using VHF. I know Livingston and Kendall Counties are using UHF. Kankakee County is the only county I know of currently using 800 MHz trunked for rural fire. A recent message in the Starcom21 Yahoo!Group said that METCAD in Champaign County plans to have all rural fire agencies migrate to the new Champaign County ASTRO TRS when it is built.

I'm still hearing traffic right now on High Band (Adam-39 & others).... Haven't heard anything on low band in the last 15 minutes.

BUT I would think, that at least for a while, if they would go to STARCOM21, that it would be simulcast on high band AND we would get to hear the mobiles on the TRS rebroadcast back over on 154.655.

Especially, since any out of district cars would still need to be able to get in touch with other cars. Although I'm sure the high band mobiles would probably stay in car for a while.

Yes, the 396t is the only scanner that will track 700mhz p25 transmissions. The RS models will only work in the conventional mode on the 700mhz frequencies,with the win96 software.

yes - a 396 tracks the IL Starcom21 system fine, for both 700 & 800 mhz sites.

Not all looking into upgrades to meet 2013 federal deadline

Sunday, April 30, 2006

BY ANGELA GREEN AND HALEY MURRAY

OF THE JOURNAL STAR

PEORIA - Peoria County is not alone in upgrading its emergency radio system by a 2013 federal deadline that aims to multiply the number of mobile radio channels and accommodate the growing number of public safety users.
While some local agencies have either met the requirements or are well on their way to meeting the deadline, others are scrambling to find money to pay for the expensive upgrades.

Stark County, for example, hasn't even found the money yet to meet the Federal Communications Commission's previous mandate on enhanced 911. The state should "come up with a viable option for smaller counties to provide their citizens with the same protection larger counties take for granted," County Board Chairman Mike Bigger said.

The FCC's desire to "narrow-band" the system began 14 years ago, when it decided to improve efficiency and double the number of radio channels by moving users to new, narrower ones that are half the size.

The FCC did not issue a mandate requiring the switch until 2003. When announced, it gave police, fire and rescue groups across the country 10 years to switch over.

"Nobody should be surprised by this," Illinois State Police Lt. Col. Craig Allen said. "This is nothing new. The FCC first proposed doing this in 1992 and finally put a rock-solid date on it."

A decade may seem like a long time to make a purchase, but this isn't simply buying a batch of new radios. It's a multimillion-dollar purchase that takes a few years to install and get running.

Peoria and Woodford counties are in the same boat as enormous Cook County and smaller, more rural counties: They all operate on a "conventional" system and need to either narrow-band it or upgrade to a "trunked" system, whereby computers more efficiently direct related users to available frequencies.

"You can't just wait until 2012 to start looking for a new system," said Peoria Fire Chief Roy Modglin, a member of the county's Emergency Telephone Systems Board.

Tazewell County has met the requirement since 1998, when it upgraded to an 800 MHz trunked radio system. It was one of the first in the area, if not the state.

"Our radio system in the 1990s was much antiquated. We saw (trunked radio) as the industry standard it was going to. We embraced that," said Steve Thompson, director of the Tazewell/Pekin Consolidated Communications Center.

Its system is sort of a cross between conventional radio systems and the top of the line system Peoria County is considering. Benefits include improved radio coverage, accommodation for more users at any given time, improved communication between departments and reduction of some operating costs.

"Everybody is going to trunking. It's extremely efficient," said Bill Clancy of M/A-COM, one of the top communications companies in the nation.

Peoria County's E-911 board meets Wednesday to discuss whether it's ready to commit to the frontrunner for the job: a $21.6 million, 700/800 MHz system called OpenSky offered by M/A-COM. If Peoria County goes with that system, it will have the most advanced radio equipment in the state three years from now when it is up and running, Clancy said.

Illinois State Police thinks its new system is pretty good, too. Called StarCom 21 (State Radio Communications for the 21st Century), it was created by Motorola exclusively for Illinois and allows for any public safety agency in the state to tie into its trunking system. It will be fully operational by January 2007, Allen said.

Already McLean and St. Clair counties have joined StarCom 21, and more groups are expected to follow. It provides an easy way for public safety licensees to meet the new requirements without spending hundreds of thousands of dollars or more on infrastructure. They can tie into the system if they buy corresponding radio equipment and pay a fixed monthly fee of $53 per radio.

Peoria County chose to pass on StarCom 21 in favor of newer trunking technology.

However, most central Illinois counties have no immediate plans for a pricey major upgrade. Instead:

- All of Woodford County's radio equipment is ready for the leap into narrow-banding, said its county ETSB chairman, Matt Smith.

Every department in the county has a conventional radio system. It works fine, and the county has no plans to spend big money on a leap into 800 MHz trunking.

"Why spend $5 million to get (into 800 MHz) when for $100,000 I could make the existing equipment the best system on Earth?" Smith said. It would cost much less to soup up the system with more radio towers and more operating licenses.

Plus, some officials say privately the FCC has been known to change its deadlines and are skeptical that the 2013 cutoff is written in stone.

- Knox County officials have just started discussing and calculating what it will cost to upgrade all its radio equipment to meet the federal mandate. In the meantime, they've made sure that all radio equipment bought in the last couple of years is capable of being both wide-band and narrow-band, data communications coordinator Vicki Miller said.

- Lt. Bill Arndt of the Fulton County Sheriff's Department said an FCC-inspired upgrade to the entire county radio system "hasn't really been a topic of discussion. . . . It's 2006 right now. It's still a ways away."

Some of the county's existing equipment is capable of narrow-banding. If a full upgrade is in order, Arndt, who also sits on Fulton's ETSB, thinks the state's StarCom 21 would be the best bet. "It's the wave of the future," he said.

- Stark County Sheriff Jimmie Dison said if his county has plans to meet the 2013 deadline, he doesn't know about them.

"That was mandated, but there were no funds (in Stark County) and they (the FCC) weren't going to provide those funds," he said. "And this county is broke."

Two referendums to fund Enhanced 911 have failed. The county is "doing all the things we need to do to be ready for (E-911); we just don't have the tax dollars to do that," Bigger said.

- Mason County's radio equipment is new enough that it can be upgraded to narrow-banding without much effort, Sheriff Wayne Youell said. "We are not there yet, but we aren't far from it."

- The Springfield Police Department has used a Motorola trunking system since 1999, and the fire department was added a little more than a year ago, said Michael Midiri, telecommunications manager for the city.

- Other areas have banded together to meet the federal deadline. Will County 911, the DuPage County Communications Center and other agencies in DuPage County, and agencies in Naperville, Aurora and Elgin, joined forces to form the Northeast Illinois Communications Consortium.

NICC project manager Dan Voiland said a regional communications system could potentially save them all millions of dollars. By working together, Voiland estimated, each agency could save 28 to 30 percent in purchasing costs.

"If we each did our own system, the total cost would be $228 million. If we do a regional system where we're able to share a system, the price goes down to about $165 million," he said.

Topic: 474 Message: 475

First off, the 2013 deadline has nothing to do with 9-1-1, it is for narrow band radio channels. Existing VHF, UHF and lower 800 MHz. systems will be required to use narrower bandwidths by 2013 if the deadline actually holds up. I think Low Band is exempt.

That said, 2013 is not an unreasonable deadline. Most base station infrastructure is amortized over 10 years, and has a 15-20 year expected lifetime. Often agencies replace infrastructure and subscriber units at different times to avoid huge expenditures. This means that while the equipment changes the type remains. This explains how the State Police for example are still using 42 MHz. equipment after 40 years, but it is unlikely that
40 year old radios are still in place. The Narrow Band rules have been out there for years, it has just been the deadline dates that have been in question.

The Woodford County solution, using 2013 compliant conventional radios instead of jumping on the trunking bandwagon is exactly what we did. Mr. Smith's remarks are right on the money, and pretty much what I told our board when we upgraded our infrastructure.

Our base stations are digital and narrowband compliant, meeting the 2013 standards. They are operating in the analog and wide band mode for now as per the terms of our license. Our portables and mobile fleet are all narrowband compliant but analog only. There is no reason for us to buy $2500 portables and $4000 mobiles for digital operations when for $600 each I can get analog portables and mobiles that work just as well, if not better. We don't need trunking, conventional works for us.

I agree 100%, the 911 board has made it & continues to make it an 911 issue. I see no valid reason for not going with narrow re-banding with money not availible to many of us. There's no promise of obtaining a grant for changing to 800 trunking! Then the issue You got to maintain an vhf/uhf re-banding for pager disptaching. Look @ PA. & the mess with 800 trunking. Tazewell/pekin, Ask why FD is not on thier 800 trunking system! Ask how much after the intial cost had to be spent to get the system up running!!!! If it's not broke why fix it comes to minds of many! Why are there certain 911 board member(s) determined we have to have M/A Com ? Loss of jobs closing 2 psaps is not worth the very small amount that would be added by this result to change to M/A com!

479. T305 talkgroup activity

Yahoo group: StarCom21
Date: 2006-05-03 15:34:24 UTC
From: Todd Hartzel
Topic: 479 Message: 479

Greetings All,
Nice to see the Metro East sites of St
Louis, Mo are back. And now active with
actual talkgroups. T305 is alive and kicking.
Kicking with low talkgroups in the 29, 30 & 31.
Heard numerous audio quality tests conductioned
this morning (Wed, May 3rd, 2006).

Yahoo group: StarCom21
Date: 2006-05-05 11:36:24 UTC
From: Rich Carlson
Topic: 482 Message: 484

The basic answer is you don't. The 2051 is not capable of use on
StarCom, it does not do digital or 9600 baud control data, both
required for StarCom.

The only radios that will work on StarCom are the RS Pro96 and 2096
and the Uniden BC296, 796, 396 and 996.

485. Starcom21 updates (area 3: southern illlinois)

Yahoo group: StarCom21
Date: 2006-05-05 23:13:19 UTC
From: Todd Hartzel
Topic: 485 Message: 485

Greetings all,
I have a few updates on the Area-3
towers of Starcom 21. I took alittle
drive this morning.

St Louis down Il Rt 3 to Il Rt 149, then
E. to I-57. Then S. to Il Rt 3. Then
back north to Stl.

I took my PRO-96, and put in all of
Area-3's tower's frequencies in radio
as 'MOT-TRunk' programmed.
But, I put the PRO-96 into Non-Trunk
Mode so it would stop on any hits
as I traveled around.

I used my PRO-96 inside car with
stock-antenna (all inside vehicle).
This way I could use attenuator
to assist in figuring out those
sites with 'DIRECTIONAL' antennas.

It seems that 700Mhz sites are
mostly confined to the St Louis
area (as far as towers in the
Starcom 21's Area-3). I made
frequent scans of the 772-777Mhz
range in several keys locations:
Sparta-Evansville ; Chester ;
Gorham ; Murphysboro-Carbondale ;
I-57 & I-24 interchange. No 700Mhz.

First, here are the SITE IDs I got,
that have not been previously known:

Gorham, Il (Jackson Cnty) is on-air
today on: 867.3125 ; PRO-96 reports:
HEX ID: T0320 (or T332 decoimal).
I heared voice comms coming from Gorham.
Though I did not put radio into 'TRUNK'
mode to get the talkgroups. Also, this
site has a very directional pattern.
On Il Rt 3, the site is hard to hear
south of the 'FOUNTAIN BLUFF', 'GAS
PIPELINE BRIDGE' & 'Tower Rock'.
Or even along-side 'FOUNTAIN BLUFF'.

But signal is great to the NW & N of
FOUNTAIN BLUFF. Even to Chester ;
Signal from Gorham is great.

Makanda, Il (Randolph Cnty) is on-air
today on 866.8625 ; PRO-96 reports:
HEX ID: T031D (or T329 decimal).

Cora, Il (Randolph Cnty) was on-air.
But was in 'TEST' mode-only.

DuQuoin, Il is on-air. And seems
to be spitting out 9600-trunk. But
the PRO-96 does not decode it.

Chester is NOT on-air. No signals.
McClure is NOT on-air. No signals.
Cobden is NOT on-air. No signals.
Nothing detected from Thompsonville.
Nothing detected from Alto Pass.
Nothing detected from Elco.

Cypress is NOT on-air. Although,
while I was at I-57/I-24, I heard
an unexpected 9600-baud data channel.
Its on 867.4875, and sounded like
9600-baud. But PRO-96 would not
display anything.

486. Gorham Tower

Yahoo group: StarCom21
Date: 2006-05-06 02:00:18 UTC
From: Todd Hartzel
Topic: 486 Message: 486

Greetings all,
A couple of years ago I had taken a
few photos of Gorham, Il. Back in 2002.
It looks like I might have snapped a
picture of the Gorham Starcom 21 tower.

I added that photo into the 'PHOTOS'
section.

Enjoy!

487. errors from previous msg

Yahoo group: StarCom21
Date: 2006-05-06 12:52:22 UTC
From: Todd Hartzel
Topic: 487 Message: 487

Cora is in Jackson Cnty, Il
Makanda is in Jackson Cnty, Il

Now for the FCC error:

Gorham, Il is in Jackson Cnty, Il.
Not in Perry Cnty, as report by
the FCC License: WQDC439

NOTE Some addl notes on the DuQuoin
tower site. This one is very impresive.
I could hear it before I reached Chester.
I could hear it as I passed Chester.
I could hear it in Gorham. I could
hear it in Murphysboro (very strong).
I could hear it in Carbondale. I could
hear it in Marion. I could hear it as
I traveled away from it going SB on I-57.

Further on 867.4875. I do NOT believe
that I was hearing the NEBO site from
Calhoun Cnty (D18). The I-24/I-57
interchange is very far away from D18.
I am aware that the NEBO site is using
highly DIRECTIONAL antennas: ERP shows
535.2-watts. Even if NEBO were pointed
towards Marion, Il. I still do not
believe that I would hear it that far
south. That's quite a distance. I was
using my PRO-96 inside my car with the
stock antenna also inside vehicle.
You can verify NEBO's directional
antennas: WQDE408

488. Fw: [ScanStLouis] Madison County sheriff to seek new equipment (Radio)

Yahoo group: StarCom21
Date: 2006-05-07 17:55:57 UTC
From: Terry Weatherford, WX9SAR
Topic: 488 Message: 488
Attachments: 2 described; binary payloads are missing from this source WARC

----- Original Message ----- From: Terry Weatherford, WX9SAR To: StLASE (YG) ; ScanStLouis@yahoogroups.com ; ScanIllinois Sent: Sunday, May 07, 2006 12:37 PM Subject: [ScanStLouis] Madison County sheriff to seek new equipment (Radio) Madison County sheriff to seek new equipment Chad Morelli Of the Suburban Journals Collinsville Herald 05/07/2006 Madison County Sheriff Robert Hertz is hoping to upgrade the communications equipment that his deputies use on a daily basis. Hertz will soon request that the County Board gather bids for new in-car radio equipment that will work through an 800-megahertz digital system. The current radios in the department's vehicles rely on VHF waves, using technology that is more than 30 years old. Captain Eric Decker, who oversees the administrative services division of the department, said the upgrades are overdue. "It's getting to a point where we can't get adequate parts for our equipment because it's that old," Decker said. "You just can't find replacement parts anymore." Advertisement (http://oascentral.stltoday.com/RealMedia/ads/click_lx.ads/www.stltoday.com/neigh/granitecity/833060510/Frame1/Postnet/StonebridgeGolf300x250-050106/StonebridgeREC.html/3462303032323262343434373961313 0?http://www.golfatstonebridge.com/) Moving to a digital system would be also be a long-term solution for a problem that many police agencies will soon face, Decker said. The Federal Communications Commissions intends to slice up many of the available radio frequencies over the next decade or so, making the airwaves more accessible for radio stations, private enterprises and the public. In some cases, police agencies relying on VHF radio bands will see their available bandwidth cut in half, Decker said. With so much traffic traveling on VHF, he said digital radios offer a better solution. "We could stick with VHF and have to make even more upgrades in the future, but that doesn't seem like the best route to go," Decker said. "This way, we would eliminate a lot of future problems." Decker also said the new digital communication gear will offer statewide coverage, relying on the universal "Starcom" towers. When a deputy drives out of the range of communication towers in Madison County, the communication gear will automatically link up with other towers to transmit voice and data. "It would be a smart network, totally seamless," he said. Decker said he was still unsure exactly how much the equipment would cost, saying only that it would represent a sizeable investment. If the County Board approves the request for proposals, the Sheriff's Department would be able to create a list of requirements and send it out to bidders. The department may also request an upgrade to its current records management and dispatch system. New software would allow the department to quickly process criminals and further link together various databases in the criminal justice system. "This is the type of upgrade that would get all of our databases talking to one another, making everything a lot easier and a lot quicker," Decker said. "It would be a huge deal for us." 490. Still More Southern Illinois Sites

Yahoo group: StarCom21
Date: 2006-05-07 22:43:42 UTC
From: kd4ygg
Topic: 490 Message: 490

Looks like Todd and I had the same idea this weekend, only different routes and destinations.

The eastern part of District 13 is progressing nicely, and there are at least three 700Mhz sites in the District 22/District 12 area identified.

PRO96COM files have been uploaded to the FILES Section.

Tower Number (Decimal): 226
Tower Number (Hex) : T021A
Tower Description : Lakewood (Shelby County)
-Frequencies
#Format: Channel,Usage,Frequency

491. BC396T Table Settings For 700Mhz Trunktracking

Yahoo group: StarCom21
Date: 2006-05-07 23:53:56 UTC
From: kd4ygg
Topic: 491 Message: 491

Just curious what settings anyone is using on the BC396T for proper trunktracking of the STARCOM21 700Mhz sites (i.e. base/spacing/offset)?

I try to enter the frequencies using the USAD software and it rounds off to 4 decimal places.

Thanks in advance
KD4YGG

Same here. My 396T does same thing. But it does trunktrack
correctly. When the talkgroups, 00001, 29, 30 & 31 were
active just a few days ago on T305, they also appeared
on the T353 700Mhz system. My 396T handled T353 fine, even
though the 396T kept rounding off that last digit of the
Data Channel & voice repeaters.

Addl thoughts on Gorham site ;
The FOUNTAIN BLUFF is 500-feet high in the middle of the
Mississippi River Valley. They put the Starcom atennas
at the 180-foot level of a 210-foot tower (sitting in
the valley, to the north of FOUNTAIN BLUFF). Obviously,
reception to Grand Tower and other points south is quite a
problem. Its a shame they could not negotitate to put it
on top of the BLUFF. If that had been the case, the Gorham
site would probably have the widest coverage zone of any
other starcom tower. Gorham (currently) probably covers
pretty good into nearby Perry Cnty, Mo. I'm sure FOUNTAIN
BLUFF blocks any coverage into Cape Girardeau Cnty, Mo.
Or Bollinger Cnty, Mo. I already know reception into
nearby Union Cnty, Il is lacking because of the BLUFF.

From: Terry Weatherford, WX9SAR
Topic: 495 Message: 495

I heard the 700mhz frequencies were part of an "Auction" that were bought by whomever, like Motorola.

The only 700 i've ever seen licensed are in St Charles County MO and these are not even for a TRS.

764.05625 WQDU825 M Nationwide Itinerant Low Power for interoperability with 700mhz system FM
764.06875 WQDU825 M Nationwide Itinerant Low Power for interoperability with 700mhz system FM
775.99375 WQDU825 M Nationwide Itinerant Low Power for interoperability with 700mhz system FM
794.05625 WQDU825 M Nationwide Itinerant Low Power for interoperability with 700mhz system FM
794.06875 WQDU825 M Nationwide Itinerant Low Power for interoperability with 700mhz system FM
805.99375 WQDU825 M Nationwide Itinerant Low Power for interoperability with 700mhz system FM

St. Clair County are licensed for the same frequencies

764.05625 WQDT269 M SWAT / Nationwide Itinerant Low Power for interoperability with 700mhz system in MO FM
764.06875 WQDT269 M SWAT / Nationwide Itinerant Low Power for interoperability with 700mhz system in MO FM
775.99375 WQDT269 M SWAT / Nationwide Itinerant Low Power for interoperability with 700mhz system in MO FM
794.05625 WQDT269 M SWAT / Nationwide Itinerant Low Power for interoperability with 700mhz system in MO FM
794.06875 WQDT269 M SWAT / Nationwide Itinerant Low Power for interoperability with 700mhz system in MO FM
805.99375 WQDT269 M SWAT / Nationwide Itinerant Low Power for interoperability with 700mhz system in MO FM

Todd

I heard the same thing in that same area. Sounds like the same data stream that was being transmitted on the St Clair County system prior to it going on line. The PRO96 will display "DG" but nothing else, correct?

I've also noticed that some sites that had been transmitting 3600 baud (yes, 3600 baud) control channel data has stopped in the eastern part of District 12 (Effingham). I suspect that these sites were using whatever controllers were available during installation and would be reflashed to STARCOM21 specs when the system is ready to go on-line. You'll recall that most likely a lot of the Motorola stuff that was to be installed late last year ended up further south (ie New Orleans).

BTW I heard from one of the ISP Pesotum District radio techs a couple of weeks ago that installs were progressing up there in vehicles, and that a large majority of the southern part of the system was up and running in test mode.

He didn't know exactly when the transition would start, but did confirm that VHF Low-Band will be taken out of all cars by end of the year - only the current VHF high-band repeaters will be left in place as the STARCOM21 system comes on line.

Nope, no special tables here in my 396T. Under
BandPlan (or EditSysOption>EditBandPlan ) is has
the standard P25 stuff:

0:851.00625/6.25
1:762.00625/6.25
2:---------/----
3:---------/----
4:---------/----
5:---------/----
6:---------/----
7:---------/----
8:---------/----
9:---------/----
A:---------/----
B:---------/----
C:---------/----
D:---------/----
E:---------/----
F:---------/----
```

(This is what mine looks like)

I have version firmware 1.11.03. Which I
think is still the latest firmware.

Here is the weblink:

http://www.uniden.com/index/downloads.cfm?product=BCD396T

Now we need PRO-96 to get firmware update
to include this too. 396T includes all
16 tables. And are completely programable,
from the radio. PRO-96 only has 6 tables,
but must be programmed via win96 software.
And does not do 700Mhz trunking. However,
the PRO-96 does have the correct STEP rate
for 700Mhz. The 396T cuts off the last
digit.

498. scanner emulator?

Yahoo group: StarCom21

State of IL ==> State Wide Block License for Public Safety within the State:

000764.00000000 - 000776.00000000
000794.00000000 - 000806.00000000
WPTZ798

The state license is a geographic area license based on state boundaries, which differs from traditional site-based public safety licensing. State licenses are subject to the general limits that govern geographic licenses including antenna structures and air navigation, international coordination, and environmental requirements including quiet zones.

How much spectrum has been designated?
The Commission designated 2.4 megahertz of spectrum, all narrowband channels for statewide, geographic-area licenses. It designated the same amount of spectrum for all states, regardless of size, and it designated the same 2.4 megahertz of spectrum nationwide.

Who received the State Licenses?
All 50 states, Puerto Rico, U.S. Virgin Islands and the District of Columbia were granted a State License on or before February 1, 2002.

Does the State License have construction conditions?
Yes. Construction and operation requirements were established to ensure timely and efficient use of the spectrum, including the provision of service to rural and remote areas. The initial construction/operation benchmark was set at 5 years; however, because broadcasters are not required to complete relocations until December 31, 2006, the start date for calculating the benchmark is January 1, 2007. The first build-out date is January 1, 2012 and the second build-out date is January 1, 2017.

When can states begin building their systems?
Planning can begin now. States may begin using the state license spectrum when:

a.. Full power TV or DTV stations vacate the 700 MHz spectrum

b.. Project 25 Phase 1 equipment is available for purchase

c.. General operating and technical requirements are met such as:
1.. coordinating transmitting sites near the U.S./Canada and U.S./Mexico border;
2.. compliance with quiet zones, and
3.. registration of antenna structures with the FAA and FCC as required under Part 17 of the Commission's Rules.
For further information about the State license, see the Commission's Rules, 47 C.F.R. 90.529 and Public Notice DA 01-406 (includes Fact Sheet

attachment).

501. ****NEW STARCOM TOWERS ALERT*****

Yahoo group: StarCom21
Date: 2006-05-10 15:48:43 UTC
From: Jason McDowell
Topic: 501 Message: 501

Well just did a search thru the Starcom band about 15 times here in
Peoria and these
are the hits I got with some killer skip on just the regular stock
antenna. Most of these are not listed
on Radioreference yet so they must be new or undiscovered so far...

Sites- CC Frequency heard on
==========
221- 867.825, heard no traffic, 200 series is central IL though
215- ? , I forgot to write this frequency down and can't pick
it up now.

145- 866.875, heard no traffic
229- McLean County, heard most of there TG's
352- 866.9375, heard no traffic
214- 866.900, heard no traffic
356- , This is D18 Calhoun area, this was actually
overriding Site #231 the Congerville site close to me.

I also picked up a LTR system on home channel 858.0125. There was
traffic on one TG but couldn't make it out where they were from.

K, thats about it, i'm gonna go to bed now. Worked 3rd shift all night.

502. VoWiFi Push to Talk solution for PDA devices

Yahoo group: StarCom21
Date: 2006-05-10 15:46:18 UTC
From: amalamwa
Topic: 502 Message: 502

Hi,

I just saw this and it seem quite intriguing. Do you think this will have an impact on interoperability. Imagine being able to use a PDA like a radio.

http://www.pangeantech.com/ytalk.php

-Akim

Pangean Technologies is beta-testing a SIP-based software application said to turn WiFi-enabled Windows Mobile PDAs into walkie-talkies with push-to-talk (PTT) capability. Y-Talk offers a single interface for presence, push-to-talk, instant group conferencing, and more, according to the company.

Pangean says that Y-Talk allows enterprises to leverage existing wireless networks and access points for in-building and campus-wide communications. Communication is maintained as users roam across multiple access points. The system supports one-to-one, one-to-many (broadcast), and conference-style communication. Additionally, location-based services reports on the participation -- and geographic location -- of group members.

Y-Talk has three components, according to Pangean:
Client -- Windows Mobile-based SIP endpoint that integrates secure voice and data communication; the application uses a "buddy list" style GUI for spontaneous communications that also provides presence and availability information in real-time

Server -- provides media control and end-user management that enables Y-Talk Clients to communicate with each other

Management Server -- a web-based server that facilitates management of user and group configurations
Both the Server and Management Server can reside on the same Windows 2000 or 2003 Server based machine.

Pangean says it has also partnered with Symbol to integrate Y-Talk onto Symbol's MC50 and MC70 Enterprise Digital Assistants (EDA), and that it expects to receive certification from Symbol.

Y-Talk is scheduled for general released at the end of June, according to Pangean. Information about how to participate in the beta test is available here.

Interesting you mention that..... I was listening this morning to Dist 7 IDOT HQ traffic one of the guys local on the 40 mhz freqs requested dispatch advise another guy to call him on his cell phone. The dispatch came back with does, that guy have a blackberry. I assume they are using blackberries for messaging. I know a while ago they switched over to a signal system, when a radio transmits the base knows who it is transmitting, they made them all test numerous times and check to see what showed up on the base console, it was annoying lol.

Hi,

I just saw this and it seem quite intriguing. Do you think this will have an impact on interoperability. Imagine being able to use a PDA like a radio.

http://www.pangeantech.com/ytalk.php

-Akim

Pangean Technologies is beta-testing a SIP-based software application said to turn WiFi-enabled Windows Mobile PDAs into walkie-talkies with push-to-talk (PTT) capability. Y-Talk offers a single interface for presence, push-to-talk, instant group conferencing, and more, according to the company.

Pangean says that Y-Talk allows enterprises to leverage existing wireless networks and access points for in-building and campus-wide communications. Communication is maintained as users roam across multiple access points. The system supports one-to-one, one-to-many (broadcast), and conference-style communication. Additionally, location-based services reports on the participation -- and geographic location -- of group members.

Y-Talk has three components, according to Pangean:
Client -- Windows Mobile-based SIP endpoint that integrates secure voice and data communication; the application uses a "buddy list" style GUI for spontaneous communications that also provides presence and availability information in real-time

Server -- provides media control and end-user management that enables Y-Talk Clients to communicate with each other

Management Server -- a web-based server that facilitates management of user and group configurations

Both the Server and Management Server can reside on the same Windows 2000 or 2003 Server based machine.

Pangean says it has also partnered with Symbol to integrate Y-Talk onto Symbol's MC50 and MC70 Enterprise Digital Assistants (EDA), and that it expects to receive certification from Symbol.

Y-Talk is scheduled for general released at the end of June, according to Pangean. Information about how to participate in the beta test is available here.

From: Jason McDowell
Topic: 503 Message: 505

Well it would be nice to run Unitrunker however I don't have a discriminater tap on my 396T. Least not that I know of unless thats what the USB cable for computer control is connected to inside the scanner. I'm not even going to attempt saudering inside my $500 scanner to create the discriminater tap.

506. Woodford County 700 mhz channel

Yahoo group: StarCom21
Date: 2006-05-11 03:03:17 UTC
From: Jason McDowell
Topic: 506 Message: 506

Is anybody still picking up the 774.30625 CC in Woodford County? I used to pick it up all the time but as of the last month or so I havn't been able to receive it here in Peoria. Also while conducting a custom search of the 700 mhz band, I can only get 4 digits to show up after the decimal point, not the 5 digits for Starcom 700 mhz. Is there a setting for that?

Jason

507. Re: Woodford County 700 mhz channel/FOUND NEW 700 Mhz tower

Yahoo group: StarCom21
Date: 2006-05-11 03:19:43 UTC
From: Jason McDowell
Topic: 506 Message: 507

Ok nevermind about the 4 numbers after the decimal part. I figured the problem out. Its always going to be a 5 at the end so it doesn't display it. However in the custom search, I decided to mess around with the step sizes to see if I could pick up the Woodford CC, I still couldn't pick that one up but I did stumble across another Site that would only hit on it with a step size other than auto. Site info is below. It just appears that the Woodford 700 mhz is down at the moment, well has been down for the past month.

New Site- 220 Frequency is- 774.03125, no traffic heard on it yet, unk location of site.

508. 7006 talkgroup on T358 (700Mhz)

Yahoo group: StarCom21
Date: 2006-05-12 15:12:04 UTC
From: Todd Hartzel
Topic: 508 Message: 508

Greetings all,
Just heard: Greenville PD call on the
Cnty Calling talkgroup 7006. But it was on
T358 (data: 775.30625 - 7006 appeared on
voice repeater: 775.80625).

Used BCD-396T. Audio quality is excellant
in Missouri - Stl City. Not sure if
Greenville Pd (Bond Cnty) was using
HT radio coming in on T358, or some other
tower. Somebody on T358 is affiliated
with talkgroup 7006.

Also wanted to point out one other talkgroup
that has been appearing on T358 (700Mhz)
alot. Talkgroup: 7096

I think ALL talkgroups in the 7000 series
are allocated to T359. So someone on 7096
from T359 keeps wandering onto T358.

509. T353 (700Mhz)

From: Milt Forsberg
Topic: 513 Message: 514

You are hearing 2 different systems. The 866.9375 is Starcom21. That has been the control channel for several months. The 867.4625 is the City of Champaign 3 channel trunking system. You will hear city services and the park district on that system. It has been in place for many years and is not related to Starcom21 at all. I don't know where the alternate control channel information came from since we have always seen 866.9375 as the control channel for site 203. We did request that RadirReference put 866.9375 back in as a control channel after you removed it from site 203 listing earlier this month. I sent you a note on this.

515. Fw: St. Clair Radio Interoperability Update

Yahoo group: StarCom21
Date: 2006-05-25 01:15:59 UTC
From: Terry Weatherford, WX9SAR
Topic: 515 Message: 515

From the county 911 coordinator:

All

For those interested in interoperability and who might have access to ITTF or Starcom radios we have recently added the Metro East Auto Theft Task Force, the Millstadt School, the Marissa PD and very soon the Mascoutah PD to our list of users. All of these user radios can be accessed on the ITTF or St. Clair County interoperable talkgroups.

516. Re: Champaign Site

Yahoo group: StarCom21
Date: 2006-05-27 16:45:49 UTC
From: Tom Laue
Topic: 513 Message: 516

I believe KD4YGG is correct: 867.4625 is licensed to the State of IL
under license WQBV729 for Starcom21 site 203. 857.4625 is licensed to
the City of Champaign under license WPBY934 and is used for the city's
3 frequency Motorola II analog system.

521. Couple new Starcom Towers and new TG, along w/couple new LTR systems

Yahoo group: StarCom21
Date: 2006-06-08 15:46:35 UTC
From: Jason McDowell
Topic: 521 Message: 521

Well the skip was rolling into Peoria this morning. Caught a few new systems. I'll list them below....

-New Starcom Tower- #222 with CC of 866.8625, no traffic heard

-New Starcom Tower- #224 with CC of 866.9625, no traffic heard

-Monitored TG 32 on Peoria Simulcast Tower, poss. D11 testing, sounded informal, mentioned for this one guy to wipe the ice cream off his face. Not much else heard.

-New LTR system with home channel of 860.0875. Heard communications but nothing to give a location.

-New LTR system with home channel of 868.350. Heard no communications.

From: dmccorm@charter.net
Topic: 523 Message: 523

Make sure the system is programmed as a P25.

MOT TYPE 2/P25 – Motorola Type II and APCO 25 systems

Hold on the control channel to see if the sysid is displayed, if so it is an active system, but it may have little or no activity so far. Radioreference has no talkgroups listed specifically for Oregon county.

527. Major Update On Radio Reference.Com

Yahoo group: StarCom21
Date: 2006-06-12 00:45:15 UTC
From: kd4ygg
Topic: 527 Message: 527

Traveled I-24/I-57/I-70 between Paducah, Kentucky - Marion, Illinois - Effingham, Illinois - Terre Haute, Indiana this morning.

Several new tower sites identified. Information updated on radioreference.com

D22 - Golconda South, Alto Pass, Cypress, Metropolis, Cobden
D12 - Casey
D13 - DuQuoin, Thompsonville
D19 - Fairfield

A couple of others received near Goreville - FCC data doesn't match up with anything in the area.

800Mhz reception exceptional this AM due to the weather changes.

534. C/P Yahoo Issues (Don't open New Graphic messages)

Yahoo group: StarCom21
Date: 2006-06-13 01:57:25 UTC
From: Robert
Topic: 534 Message: 534

There is an Internet worm working its way around the Internet via the Yahoo systems that carries the title "New Graphic Site". We have already had 3 of them hit the CARMA Yahoo group.

I have deleted the messages as they come across but they are hitting many different Yahoo groups. They seem to propagate via the contact lists.

Just delete the messages, do not open them.

535. Re: *STARCOM21* C/P Yahoo Issues (Don't open New Graphic messages)

Yahoo group: StarCom21
Date: 2006-06-13 22:41:56 UTC
From: Rich Carlson
Topic: 534 Message: 535

While the CARMA Yahoo groups hasn't been directly infected since we do not allow attachments thru the list several members are also members of lists that have been hit, so we are getting some of the messages there.

Owners of all Yahoo lists should turn off attachments. There is no reason whatsoever for them on these lists, that is what the Files Section is for.

Subject: (CARMA) Starcom Grid Testing-Joliet

Today about 8am started hearing three teams "grid testing here in Joliet, not sure if it was simulcasting from central IL or from D-5. This was on 774.80625 and the signal was 99% on my PRO96. Going east out of town the signal got worse until i entered the village of New Lenox where at RT30 and Wolf RD it was again very clear and 99% on the PRO96 using the stock antenna. At RT30 and Wolf RD there is a cell tower with what looks like two 800mgz green antennas mounted, this maybe the third D-5 tower other than the Elwood Tower and D-5 HDQTRS.....The testing "the bird is on the wire" stopped around 11am... Yesterday the data channel on the four 700 freqys rotated to 774.05625....

Today the grid tests are on 774.80625 and 774.55625 all day...Talked
with a tech friend working on Starcom related items and he did verify
the Cell Tower at RT30 and Wolf RD is a Starcom receive site for the
Mokena-Frankfort area with two 700-800mgz antennas.....Mentioning
sites at Metamora and LaSalle as soon working audio sites....

538. BC 796 Question

Yahoo group: StarCom21
Date: 2006-06-14 20:52:46 UTC
From: thall1971
Topic: 538 Message: 538

Does anyone know of any talk group numbers that will work on the BC 796. I have the talk group ID's from Radio Reference page, but I keep seeing where they do not work on these uniden scanners.

Tim

539. Couple new Starcom Towers

Yahoo group: StarCom21
Date: 2006-06-15 01:37:09 UTC
From: Jason McDowell
Topic: 539 Message: 539

Found another CC for the D9 Manito tower. Its 867.3125. ID'd as Tower 223. I already show a partial listing for that tower on RR but it doesn't have a tower number assigned to it. Also found a new 700 mhz tower. Its 774.2833 and ID'd as tower 220. Comes in with 2 signal bars with great skip this morning so it can't be to far from Peoria here. No traffic on either one.

Jason

540. More Testing

Yahoo group: StarCom21
Date: 2006-06-15 14:29:57 UTC
From: Jesse Risley
Topic: 537 Message: 540

Work has been ongoing this week at the Macomb District 14 post too, including console work on the squads. The were working on the tower at post on Tuesday. The Niota and Monmouth sites are transmitting data (heard on the 996), but no traffic yet. I was informed that the Monmouth tower needs to be reworked due to some tower/area problems that have arised.

The Champaign and Pesotum towers are being tested today. They ran tests all day yesterday as well. Various teams call in with short sentences, which is similar to other sites around the state. It is a good time to check out scanner reception as it is almost continuous testing. Towers 203 and 206. Today is Thursday June 15.

Thats what i ment, I have it in ID Search. Anyways I dont think that is a compleat list of the Oregon system on RR. As far as i know you need all the system frequencys for a P25 system before you can program it into the 996T, you can't use Control Channel only for a P25 system.

All you need in the 996 is the control channel. The radio does the
rest. That's all I have programmed in mine and it is hearing the local
towers just fine. In ID search, it finds all the IDs that are active.

547. District 14 Info

Yahoo group: StarCom21
Date: 2006-06-16 01:33:45 UTC
From: Jesse Risley
Topic: 523 Message: 547

District 14 in Macomb is IDing on contol channel 866.93250, showing up as tower site 211 (in Macomb) as of today, but no actual transmissions have been heard yet. An informational page was conducted today on 42.500 MHz at approximately 11:00 AM at which point District 14 radio operators announced that they will no longer be activating 10-10 receivers for severe WX effective June 22nd.

"Respect for religion must be reestablished. Public debt should be reduced. The arrogance of public officials must be curtailed. Assistance to foreign lands must be stopped or we shall bankrupt ourselves. The people should be forced to work and not depend on government for subsistence." - Cicero, 60 B.C.

Topic: 548 Message: 548

FYI... this license application was returned by the FCC and is currently inactive.

The FCC denied it because of the Nextel rebanding situation and they say that 866.9325 is not a valid frequency frequency.

Also site:

11403 D14 Fulton (Blyton) 866.86250 867.38750 867.91250 868.43750

was returned by FCC.

From: Jesse Risley
Topic: 523 Message: 550

I did some driving today and was able to receive the following towers around the Macomb area:

Warren County - IDing as site 221 on 868.3500 MHz

**The Macomb tower which I reported IDing as site 211 on 866.9325 MHz is still active, but the 996t is showing 1-2 S units in the city of Macomb. The strongest signal on this tower was found about 12 miles south of Macomb near the McDonough County/Schuyler County line, registering all 5 S units on the 996t.

Hancock County - IDing as site 225 on 867.3500 MHz

Niota - IDing as site 210 on 866.9000 MHz

The Mt. Sterling site is rather strong up this way, although I am now receiving data on 866.9125 MHz IDing as site 215.

I am traveling to La Salle County tomorrow and I will be checking for any activity between Macomb and Streator. I have yet to hear anything more than ID transmissions out this way on all of these freqs.

Drove down IL Route 1 from Marshall to Mt Carmel this morning.

No 700Mhz stuff heard.

Confirmed Eaton, Sumner, Lawrenceville, Fairfield, Carmi, and
Crossville sites with PRO96Com

Eaton - Crawford County
Site 326
867.3375 - control channel
868.3875 - alternate CC

Sumner - Crawford County
Site 302
866.9125 - control channel
866.3875 - alternate CC

Robinson - Crawford County
Not On Line

Lawrenceville - Lawrence County
Site 311
868.4000 - control channel
867.8750 - alternate CC

Fairfield - Wayne County
Site 328
868.3500 - control channel
868.9250 - alternate CC

Carmi - White County
Site 308
866.8750 - control channel
867.4000 - alternate CC
867.9250 - alternate CC

Crossville - White County
Site 340
867.3250 - control channel
867.8500 - alternate CC
868.3750 - alternate CC
Note: This site is not licensed, but is shown on map.

From: kd4ygg
Topic: 552 Message: 552

Have identified four sites, monitored from the Goreville area last
weekend that need help identifying exact location/confirmation.

The frequencies do not show up in FCC records as being anywhere
closeby (or in the case of 700Mhz, no license at all).

All four sites were monitored in and around Goreville on I-24/I-57

Site 319 with Control Channel of 867.98750
Site 321 with Control Channel of 775.33125
Site 334 with Control Channel of 774.58125
Site 351 with Control Channel of 866.88750

Thanks
KD4YGG

556. MAPS & SITES

Yahoo group: StarCom21
Date: 2006-06-20 22:32:50 UTC
From: Steve Rauter
Topic: 556 Message: 556

If you create a map in MicroSoft Streets & Trips, enter in the sites with the 'push-pins', you could add comments into the site 'tag'. If Lat/Lon is known, it would be slightly easier but tedious, and do-able. Then you turn on the feature that pops them up if nearby (with GPS puck). MS S&T also allows for import from EXCEL if you prep site info ahead of time.

561. More 30's testing today

Yahoo group: StarCom21
Date: 2006-06-22 01:55:38 UTC
From: Jason McDowell
Topic: 561 Message: 561

Sorry this is delayed, Yahoo groups was down this morning. Lot more testing on the 30, 31 & 32 TG's today on the Peoria Simulcast & the Metamora 700 mhz towers. The motorolla techs announced themselves as Team # whatever and kept saying various odd sentences. They literally sounded like they were in my backyard. Very clear transmissions. I don't know where they were transmitting from though.

Topic: 564 Message: 565

Well it all depends, they estimate that Starcom is suppose to be
statewide by years end. So that gives you about 6 months or so.

Topic: 566 Message: 566

Have uploaded PRO96COM files for towers identified this past weekend on a trip to Chicago.

Also, posted some screenshots of PRO96COM showing adjacent tower affiliations around the 201-208 series sites.

Then only thing to keep in mind is when purchasing a scanner look at
the freq ranges it sweeps you will come to find that starcom 21 uses
alot of 400mhz 700mhz freqs which most portable or desktop scanners do
not sweep they might have finally gone with a system that "we the
people" might not be able to listen to. Darn goverment they actually
do have some smarts....lol

This freqy has been very active in the last three days here at D-5.Sounds like it may be grid testing being simulcast thru the D-5 tower from central IL. My RS2096 hears this digital perfect with the AGC on.....Three other 700 freqys listed to Joliet as T129 on the rr.com board of Starcom have never been active here??...

Thanks for the info. I think i will hold off on paying 500.00 for a digital scanner to listen to ISP and may not be able too.

571. Re: *STARCOM21* Re: Dist #20???

Yahoo group: StarCom21

Topic: 564 Message: 571

StarCom21 will not employ any 400 MHz. frequencies, it is and will be exclusively 700 and 800 MHz. The current BC396 and 996 digital scanners will work just fine on StarCom21. Other digital scanners like the Uniden BC296 and 796 as well as the Radio Shack Pro96 and 2096 can not track 700 MHz. trunked systems.

I would be extremely surprised if the next generation of Radio Shack scanners do not have the ability to track 700 MHz. systems like this. The current ones can hear the traffic, just can't track the system.

As for encryption, only selected operations will be encrypted, requiring specially programmed radios. The majority of traffic will be in the clear.

572. Sites 312, 314, 325 - All 700Mhz

Yahoo group: StarCom21
Date: 2006-07-01 01:12:43 UTC
From: kd4ygg
Topic: 572 Message: 572

Drove to Effingham area after work this afternoon.

Can positively confirm Site 314 is Centralia in Marion County. Site neigbors include Vandalia, Flora, Mt Vernon, and Mason.

As for site 312 and 325, these only show up as neighbors to the Vandalia site (as of today). I suspect these are over toward St Louis, perhaps around Greenville or Carlyle - cannot confirm.

Anyone over in that part of the world running PRO96COM???

KD4YGG

573. Huge Band Opening This AM - Major Update On Radio Reference.Com

Yahoo group: StarCom21
Date: 2006-07-02 17:55:50 UTC
From: kd4ygg
Topic: 573 Message: 573

Thanks to a very big band opening this AM, was able to identify almost all of the 300-series sites.

Drove Marshall to Effingham along US40 - picked up Carmi, Alto Pass, Ina, Mt Vernon, Normal, and several 700Mhz sites.

In addition, most of the 300-series sites are now networked together and showing neighbors. Will be working this afternoon to "triangulate" some of the 700Mhz sites to positively identify location based on the STARCOM21 map.

Have updated Radio Reference site.

574. 700 Mhz Sites - Speculation

Yahoo group: StarCom21
Date: 2006-07-02 18:46:12 UTC
From: kd4ygg
Topic: 574 Message: 574

Any assistance in tracking these down would be appreciated

Site 301
Neighboring sites: Centralia, Sparta, and 325
Suspect this is Edwardsville instead of present listing of Mt Olive
Site 353 - suspect this is Mt Olive

Site 325
Neighboring sites: 301, 312, Belleville, Vandalia, Godfrey, St Clair Co
Suspect this site is in the Highland area

Site 334
Neighboring sites: Cora, Cypress, Makanda, Elco, Thompsonville
Suspect this site is Goreville

Site 335
Neighboring sites: Carmi, Crossville, Equality
Suspect this site is in the McLeansboro area

Site 337
Neighboring sites: Equality
Suspect this is Harrisburg

Greetings,
Referencing Sites 301 & 353. There is only one
problem to this. I live in South St Louis City, in
Missouri. I am receiving Tower 353 (good signal,
day or night). I do not, nor can I receive Tower
301. If Tower 301 were in Edwardsville, I should
get it loud and clear. This is not the case.
Instead Tower 353 is loud and clear. So, this can
not be correct, UNLESS, Mt Olive is using directional
antenna pointed right at South St Louis City ; my QTH.
And EDW were using directional antenna, pointed away
from my QTH.

Although, I must admit homestly to all of you ; we all
know of the Directional antenna used at the E. St
Louis Site, that points away from St Louis City.
Which causes no reception of Tower 323 in Missouri,
unless you are in the eastern-end of downtown STL City.

Btw, kd4yq great job nailing down the remaining towers
of Area-3 (Southern IL). Awesome job... Congrats...

576. tower 301

Yahoo group: StarCom21
Date: 2006-07-08 21:47:39 UTC
From: Todd Hartzel
Topic: 576 Message: 576

Greetings all,
Well, I loaded up PRO96COM.
And got the latest neighbor towers
for the St Louis area sites. Here are
my results:

1st: tower 359 (ETSB - St Clair)

FileVersion:3
-TowerInfo
#This section is here for information only. With the exception
#of the Call Sign(s), This data is not Read back into the program at all.
System ID : 140
System Name : Starcom 21 (ISP Radio Network)
WACN : bee00
Tower Number (Decimal): 359
Tower Number (Hex) : T033B
Tower Description : D11 - ETSB TRS (St Clair)
Control Capabilities : Voice,Registration
Call Sign(s) : WQAH919
Timestamp : Sat Jul 08 15:48:10 2006

-Tables
#Format: Table ID,Base Freq,Spacing,Input
Offset,Assumed/Confirmed,BandWidth
00,851.00625,0.00625,-45.00000,"Confirmed",0.00625
01,762.00625,0.00625,30.00000,"Confirmed",0.00625

-Frequencies
#Format: Channel,Usage,Frequency
"00-2411","i",866.07500
"00-2435","cv",866.22500
"00-2511","cav",866.70000
"00-2585","cav",867.16250
"00-2653","vi",867.58750
"00-2679","v",867.75000

-Neighbors
#Format: TowerID,TowerIDHex,System ID,Channel,Frequency,Tower Name
301,"T0301",140,"01-2124",775.28125,"D?? - 700Mhz (700Mhz)"
306,"T0306",140,"00-2699",867.87500,""
323,"T0317",140,"00-2617",867.36250,"D11 - E. St Louis (St Clair)"
325,"T0319",140,"01-2132",775.33125,"D12 - D12 - 700Mhz"
353,"T0335",140,"01-2004",774.53125,"D11 - 700Mhz (700Mhz)"
355,"T0337",140,"00-2539",866.87500,"D11 - Godfrey (Madison)"

* Interesting notes *
Tower 306 way up in Brussels (Calhoun Cnty)
seems to be a neighbor of Tower 359. Althgough,
PRO96COM currently lists it as: Failed, connect
IF Tower 301 were in Mt Olive, or any location
north. I suspect the Godfrey tower T355 would
have to appear on T301's neighbor list.

Here is my latest Tower 358 file (700Mhz):

```
FileVersion:3
-TowerInfo
#This section is here for information only. With the exception
#of the Call Sign(s), This data is not Read back into the program at all.
System ID : 140

333,"T0321",140,"00-2549",866.93750,"D13 - Evansville (Randolph)"
353,"T0335",140,"01-2004",774.53125,"D11 - 700Mhz (700Mhz)"
```

* Interesting Notes *
Tower 301 appears in both 358 & 359.
And Tower 333 also appears in here. This
would indicate that tower 358 should be
somewhere south of the St Louis area.
Perhaps further south then T359. Which
would mean if Tower 301 were way up far north,
it should not be a neighbor on this one.
Beginning to believe that T301 is somewhere

south ; rather then far north. T353 also
shows up on both T358 & T359. This too would
imply that T353 is also somewhere south of the
Metro St Louis area. Also, since T355 is not on
this ones's neighbor list, this should rule out
T358 as being anywhere north of Metro St Louis.

I can not decode T353 right now. The signal is
too weak, instead here is my T305 file:

```
FileVersion:3
-TowerInfo
#This section is here for information only. With the exception
#of the Call Sign(s), This data is not Read back into the program at all.
System ID : 140
System Name : Starcom 21 (ISP Radio Network)
WACN : bee00
Tower Number (Decimal): 305
Tower Number (Hex) : T0305
Tower Description : D11 - Belleville (St Clair)
Control Capabilities : Voice,Registration
Call Sign(s) : Unknown
Timestamp : Sat Jul 08 15:40:37 2006

-Tables
#Format: Table ID,Base Freq,Spacing,Input
Offset,Assumed/Confirmed,BandWidth
00,851.00625,0.00625,-45.00000,"Confirmed",0.00625
01,762.00625,0.00625,30.00000,"Confirmed",0.00625

-Frequencies
#Format: Channel,Usage,Frequency
"00-2537","c",866.86250
"00-2621","ca",867.38750
"00-2705","av",867.91250

-Neighbors
#Format: TowerID,TowerIDHex,System ID,Channel,Frequency,Tower Name
301,"T0301",140,"01-2124",775.28125,"D?? - 700Mhz (700Mhz)"
323,"T0317",140,"00-2617",867.36250,"D11 - E. St Louis (St Clair)"
325,"T0319",140,"01-2132",775.33125,"D12 - D12 - 700Mhz"
333,"T0321",140,"00-2549",866.93750,"D13 - Evansville (Randolph)"

358,"T033A",140,"01-2128",775.30625,"D11 - 700Mhz (700Mhz)"
```

* Interesting Notes *
We all know where this one is. Southern half
of the St Louis area. Claiming linkage to T301,
T333, T353 & T358 just as the other ones. With a
new one showing up T325. Since this one is the only
one that points at T325. T325 has to be somewhere well
EAST of St Louis & the Belleville area. That is my

guess.

* My thoughts *
Based on these files. I suspect now
that Towers: 301, 353 & 358 are all
located somewhere south of St Louis City.
I do not suspect any of them are north.
T325 is somewhere well EAST of the St
Louis Metro Area. The only way to verify
would be to do a signal-strength audit.
I will have to make time for this in the
near future.

It is not hard to do. Take a PRO-96 with
all of the freqs. Attach the stock antenna,
use the radio & antenna inside your car
(No outside antennas). Switch the PRO-96
Bank Mode from 'MOT' to 'Not Trunked'.
(This way it stops on any Data Channel it
encounters ; then hit the 'MAN' key to view
the Control Channel info). And turn on the
'Global Attenuator' when needed to verify
close-proximity. . Its very simple &
effective. And convenient for driving
purposes.

577. Re: Todd's Postings

Yahoo group: StarCom21

From: John Dees
Topic: 577 Message: 577

Todd

Thanks for some super information.

If they would only license these sites - but that would take the fun out of the investigative work.

Also have some additional data for the far southern part of the state that I'll be updating on the radioreference site.

Golconda North is the only one which could not be evaluated - Golconda South tower is highly directional, pointing straight south into Kentucky - suspect the north site to be similar.

578. signal-strength audit (results)

Yahoo group: StarCom21
Date: 2006-07-09 23:43:36 UTC
From: Todd Hartzel
Topic: 578 Message: 578

Greetings all,
Well, I went on a little bit of audit today.
I took my PRO-96, my Garmin IQUE 3600 GPS-Palm &
my sirius satellite radio (for entertainment).

First, so everyone knows. I had long suspected
that there would be some sort of 700Mhz something
in EDW. I knew that spot would be the SIUE campus.

n9sim, a friend of mine was a former SIUE police
explorer (80s). And my brother also attend there
in the 1990s. So I am very familar with SIUE.
Most people know that SIUE police and ISP have
very close relations. I figured something STARCOM
21 related would show up on campus. I was right.

I was scanning exclusively for 700Mhz trunk.
I took a drive today:

- SIUE Campus
- Mt Olive
- I-55 & I-255

When I got to ISP HQ in Collinsville (I-55 & I-255)
started getting T325 (Hex id on PRO-96: T319)
on 775.33125

The signal got stronger as I headed twds I-270.
I took Univeristy Dr thru the center of campus.
(Attenuator turned: ON) Rock solid signal.
99% signal on PRO-96. When I got to the
Cougar Lake area (Formerly Tower Lake part of
campus) the signal got better. When I got to
Poag Rd & N. University Dr the signal was at
its best. The Cougar Lake (Tower Lake) RF tower
was to the SW of intersection. To further
verify this, I took the antenna off of the
radio. Still 96% signal.

So I can verify with 100% certainy, T325 (Hex: T319)
is at the SIUE campus (Cougar Lake tower or Tower
Lake). I'm sorry, I keep refering to it as Tower Lake
; its because my brother stayed on campus at the old
Tower Lake Apts complex. Bldg #512 or 510 during the
1990s.

I drove N on University Dr to the terminator at
Hwy 143. Went EB into downtown EDW. And met up
with I-55 at the WRYT-AM towers. Took it NB
to the Litchfield exit.

Found T312 (HexID on PRO-96: T30C) on 774.58125
I was still receiving the EDW site for miles
upon miles NB from Hwy 143. T312's signal climaxed
at the Staunton Exit at mile marker #41. Actually,
just alittle bit south of the exit. (Attenuator
turned: ON). Signal still floating between
96-99% in and around Mile Marker #41 (exit #41 too)
then I got to Mt Olive, signal dropped, dramatically.
Was 84% signal. With ATT turned: ON

I then headed back south. Took I-55 to I-255 and
went down to JB Bridge. T353 (Hex ID on PRO-96: T335's
signal climaxed at the I-64 I-255 intersection with
ATT turned: ON at 99% mostly, with some 96% readings
in the surrounding area. As I continued SB twds JB
Bridge, T358 (Hex ID on PRO-96: T33A) started getting
better as I went from Rt 3 exit (Columbia) to the Bridge.

579. T325's exact location

Yahoo group: StarCom21
Date: 2006-07-10 02:18:03 UTC
From: Todd Hartzel
Topic: 579 Message: 579

Greetings all,
I thought I'd provide a way for
those that want to plot out on a map
the exact location of the Tower for
T325 (Hex: T319). Here it is:

Go to:
http://maps.yahoo.com

- Type in the address field:

New Poag at University

- Type in the City, State, Zip field:

Edwardsville, IL

Zoom out to level 3 or 4 for better
map views. T325 is located just to
the SW of the intersection (Intersection
marked by the RED STAR).

Little delayed but a couple techs were doing testing from about 1pm
till around 4pm today on TG 449 on Peoria Simulcast Tower. One guy was
driving around the Toulon/Galva area keying up and saying how strong
the signal meter was. I think there going all around the state and
assessing the coverage. They were way down south when I posted the
other day.

Radio techs testing today at the site located at ISP District Chicago HQ 9511 Harrison St. in Des Plaines. Talkgroup 00001, control channel 866.9625, alternate control channel 854.9875, voice channel 868.9125.

584. Starcom 21 talkgroup listings on radioreference.com

Yahoo group: StarCom21
Date: 2006-07-18 23:08:52 UTC
From: Todd Hartzel
Topic: 584 Message: 584

Greetings all,
I was wanting to make a suggestion on the organization of the talkgroup listings on the radioreference.com website. This is only a suggestion, reflecting only my opinion (as far as I know).

The talkgroup listings for the various sites on the system. First, I think there are simply too many sub-group(s) for Tower-359. I do not think tower-359's listings should be so sub-divided in its current form. I think Tower-359 should have one single 'Group' listing, with no sub-divisions (as is currently in place).

The reason: It looks very cluttered. I think one single 'Group' listing, with talkgroup listings in numerical-order, would do nicely. All agencies in the 70XX & 71XX would be correctly listed as being apart of Tower-359, and everyone apart of Tower-359 would get their listing in numerical-order, but in one single-solid category. No sub-divisions.

The 70XX & 71XX talkgroups are mostly allocated / uniquely-assigned to Tower-359.

As other parts of the State of Illinois come-on-board, they are going to demand a large sum of talkgroups too. And if those other 'TOWERS' across the state are so 'Talkgroup Sub-Divided' on the radioreference.com site, it will get out of control. And the clutter will be horrid.

Please consider this alternative, to the current scheme. Other parts of the state are due to come on-board soon. And there is going to be a talkgroup 'FLOOD' in the not too distant future. Tower-359 is NOT going to be the only STARCOM 21 Kid-On-The-Block.

Again, everything Tower-359 related (70XX & 71XX talkgroups) should go into one-single Talkgroup list. Please consider this ; talkgroup expansion is coming soon to Starcom 21.

Another thing that bugs me is the way RadioReference lists StarCom sites. They use only the decimal format while the Pro96 and 2096 displays in Hex. Perhaps they could add a column to show the hex equivelant for the tower sites fo those Pro96/2096 users.

Todd...

You are probably correct - the listings may get out of control.

You previously addressed this to me personally and while I was thinking about it all, had computer issues and seriously just forgot to reply with possible ways to resolve this.

I was also awaiting to see what the future database upgrades are being brought to RadioReference.com before we made any drastic changes. (Many changes are coming in the future)

(Not saying this is going to happen, but has been suggestions made) It's possible that we may be able to get a talkgroup to be "county specified" and for only the local sites and local talkgroups to show up on a county TRS list (even though the TRS is multi-county). Or a sort by county talkgroup list. There also may be other way to print reports that are county/site(s) specific etc.

Now, wouldn't the problem be, with listings by tower, that some agencies will definitely be on multiple towers -- with not even being able to specify a so-called "home" tower? This would include large EMS agencies, ISP Districts (which can cover from 3-8 counties), IDOT districts, SOS Districts, Conservation Districts, other statewide agencies, maybe even County Sheriff's Departments. What would be the proper way to list these... on each tower? (or only in a separate state department/district category, which may require more searching by the user)

Since most counties will not be simulcast towers (I'm assuming), like the whole county of St. Clair currently is, wouldn't this increase the number of towers that TGs may be on? This means that, for example, if 18001 was District 18 Dispatch, there are possibilities that the talkgroup could show up on at least the 9 towers currently in District 18, plus any of the other towers that are bordering the same area.

[We currently have the same situation on the Illinois Cooperative Association DBA Cleartalk TRS in Illinois.... many businesses are only on 1 tower, but some go across many counties or across the state, what is the correct way to list these?]

I've meant to check out other states systems to see how they all look.
--Indiana appears to be sorted by state departments, then by county, with no obvious sign to what site they are on.
--Michigan appears to be nearly the same way as IN, but with some obviously needed break-downs with-in the county (like Wayne County/Detroit)
--Ohio appears to be nearly the same, but some of the grouping are rather large and they have very few by county listings.

So, we also need to consider, besides our thoughts --- what do we think would be the best and easier for a Novice scanner user?

Suggestions everyone!

Terry

I think the best way to handle the hundreds of talkgroups that will eventually be identified with StarCom21 is to list them all in a single table, sorted by TGID. Have a column for TGID, another for the user description (Mayberry PD F1, Mayberry PD F2 etc.) and a column for the overall group the user belongs to, such as "Statewide", "McLean County", "ISP".

A fourth column could list known tower sites that that particular talkgroup is known to work, since most talkgroups will have some sort of geographical limitations. Only a few specialized talkgroups will work at all towers, those with Starcom radios now can see how this works with the ITTF talkgroups, the various Regional TG's will only work within that region.

Since TGIDs will be unique, and there will likely be some semblance of grouping this should probably be the easiest and smiplist way to handle this.

I have seen various talkgroup and tower lists for the MPSCS system, which is similar in layout and size as StarCom would be, and this seems to work best there.

596. Madison County Sheriff to spend $2.1 million on new radios (STARCOM21)

Yahoo group: StarCom21
Date: 2006-07-20 02:13:40 UTC
From: tweatherford@radioreference.com
Topic: 596 Message: 596
Attachments: 1 described; binary payloads are missing from this source WARC

Chad Morelli
Of the Suburban Journals
Granite City Press Record
07/16/2006

Madison County Board members will likely approve a $2.1 million plan to purchase a new communication system for the Sheriff's Department at Wednesday's meeting.

Sheriff Robert Hertz has said that his department's current equipment is old and often in need of servicing. The equipment is becoming so antiquated, he said, it often becomes difficult to find parts to make repairs.

The new in-car radio system, known as STARCOM21, will solve many of the department's current communication problems. In the past, deputies have found a series of "dead spots" around the county where they have a difficult time communicating with each other. The STARCOM gear, manufactured by Motorola, relies on a series of repeating towers that will allow deputies to use the radios not just in the county, but anywhere in the state.

Captain Eric Decker, who operates the administrative services division of the department, said the purchase will bring the Sheriff's Department up to date with many other law enforcement agencies.

"A lot of departments are going with STARCOM because of all the advantages it offers," Decker said. "It's a statewide system that will make it much easier for our deputies to communicate."

The Illinois State Police rolled out the STARCOM system in 2000, a $25 million investment requested by then-Gov. George Ryan. The system is state-of-the-art, totally seamless and completely digital, Decker said.

"It doesn't matter where you're driving to, the radio does all the work," he said. "You don't have to worry so much about frequency switching and where you are at or how to get service."

The Sheriff's Department will pay for the new system from its capital outlay budget. The department will receive a discount by utilizing the state's contract with Motorola.

In the coming months, the department may also request an upgrade to its current records management and dispatching system. The new software would allow the department to quickly process criminals and further link together various databases throughout the criminal justice system.

597. Starcom21 & 700-800 band enhancement occurring

Yahoo group: StarCom21
Date: 2006-07-20 04:46:57 UTC
From: Larry Schroeder
Topic: 597 Message: 597

Very out of the norm- band openings up into 700/800 this evening
---

In suburban Chicago, quick checks showing data/tower information
rcving on various Starcom21 contrl channels (x0140- system) including:

twr-id contrl channel
0109 867.8875
0124 857.2125
0125 867.3875
0132 860.2125
0134 866.8375
0135 868.0625
0111 866.4125
0231 866.8500
0237 867.9750
0229 868.4000
[did not list the 700 segement, but it was equally enhanced too]

In the case of the later ones which cover McLean, P25 Bit error is even low/
and excellent decode.
At a well over a 125+ miles.
-- its like statewide, even without all the controller/internetworking.

"Display" field:

My question is, how is the display field being used in the radioreference.com database? My understanding is that this field is to include what the actual Motorola radio displays, so that if we see an officer whose radio display says "TAC-1", we can look at the database and find the corresponding talkgroup that he is monitoring. Is that how the field is being utilized on the Starcom21 page?

Guys,

I hate to ask a redundant question,but i pass thru illinois from time to time and 2 nights ago i set up the Starcom21 sites along I-70 the radio seemed to have trouble with the 700Mhz Control Channels, so i am wondering if I did something wrong.

thanks
Jason W.

Mike,
Try the ITTF and the Moto tech tg's listed on RR.com.

Has anyone seen a pattern on the talkgroups that first show up on a new
site as it first comes on line? I have a bank of the starcom frequencies
assigned around here in the Quad-Cities. Of course I have the bank in
control channel mode. But I would like to put in and label some
talkgroups in the bank also.

Currently the Display field is being used incorrectly.

A "Text Label" field will be added soon for programming scanners.
The current info in Display field will be moved to there and then the Dispay
Field will be used as what the radio displays.

Like Greg said, these are the common ones I've heard for testing, key-ups, etc. after sites come online:

29 Testing
30 Testing
31 Testing
32 Testing
30328 IESMA Statewide
30329 ILEAS Statewide
30330 MABAS Statewide

Terry,

If you create a PDF, the PDF will give Hex and Decimal and you have the option of sorting TGs into one group. Two complaints that can be done away with by being a paid member.

Jim

Subject: Re: *STARCOM21* talkgroup listings

If your referring to the Hex number for Uniden or whatever, we can't do anything about that until the RadioReference.com database is updated with another column.

Currently, the column only supports numbers, no alpha characters.

I was starting to put the Hex number on the description line when it was given to me.

Also, if anyone wants to give Site Neighbors (in decimal) (confirmed with Pro96com or whatever) that would be great.

Thanks
Terry

Below is what I've been able to hear in Cent IL. Obviously, I use a Pro96
with pro96com.
This is quite long, hope it makes it.
Hope this helps.

Greg

617. T305 disappeared

Yahoo group: StarCom21
Date: 2006-08-01 15:05:56 UTC
From: Todd Hartzel
Topic: 617 Message: 617

Greetings All,
Anybody in the Metro-East of St Louis, Mo
still getting a data channel from T305?

The signal has disappeared here at my QTH.
And has been this way for some time.
(a few weeks now)

If anyone in Metro-East is still getting it,
I guess that would mean that they changed the
Transmit Antenna-Beam Alignment. I noticed
this same thing with T353. Back when T353
was newly on-air the signal in South City of
St Louis was awesome. But a few months ago
they played with the Transmit Beam-Alignment,
now T353 is very weak here. And Now T305 has
disappeared completely.

Anyone else across Illinois noticing any
differances in the overall coverage zone of
near-by Starcom 21 towers?

Perhaps their doing audits on other towers,
and trying to maximize coverage in under-
served areas.

Subject: (CARMA) Tollway trooper with "StarCom" portable

Was out at the Emergency Vehicle show in North Aurora today and spoke with a Tollway Tropper with a new XTS 5000 with a Commander mike on. He said the State is testing now on the Tollway system and the new portables are programmed to "switch" to Starcom as soon as the word comes down from command.

622. Tower 105 ID'd

Yahoo group: StarCom21
Date: 2006-08-06 13:00:40 UTC
From: n9jig
Topic: 622 Message: 622

StarCom21 tower 105 is at Ashton, in Lee County (ISP District 2). It transmits from a District
15 tower located along I-88 at Midway Road, south of town. Control data is on 774.28125, although CloseCall on the 386 will also report 774.2875. I heard no call grants while I was in
range.

623. Tower T020E D09 Logan (Lincoln IDOC)

RR.co contributor reports

10951 D09 Logan (Lincoln IDOC)

I was just in Lincoln, IL tonight and found the tower information for this tower. On my Pro-96 it said "T020E" which I believe is the tower number. I'll try and find out more information. But, that's what I have so far.

Can someone give me the Decimal Tower number?

Thanks
Terry

There was a mock drill going on in Sangamon county this weekend, might have something to do with it. They mentioned something about mabas on the news last night. Does anyone know what talkgroup 500 is? Heard it a couple of times, the last time there was no audio coming through, just a carrier.

20E would be 214 in Decimal.

To translate these numbers take apart the displayed designater
(T020E). T02 indicates Zone 2, and the remaining 0E equals 14.

Hex numbers translate like this:

Hex Dec
0 0
1 1
2 2
3 3
4 4
5 5
6 6
7 7
8 8
9 9
A 10
B 11
C 12
D 13
E 14
F 15

Or you can use the Hex-Dec converter in the Windows Calulator. Select
"Scientific" in the "View" menue, click the "Hex" button, enter the
Hex value, then click the "Dec" button. This also works the other way.

Hearing on this freqy today a military type of Starcom testing coming from as mentioned the Springfield area here in Joliet IL.Also hearing Wescom in the Village of Plainfield IL dispatching in between the testing....

632. Sangamon County Drill

Yahoo group: StarCom21
Date: 2006-08-08 03:26:03 UTC
From: tc62sar
Topic: 632 Message: 632

Just to fill everyone in, this was a 2 day drill, USAR and Fire, hosted by the Springfield Fire Dept. The area was at the end of New City Rd, and a little South, The IO Van from Tazewell County was the only IC base comm on site. Most of the drill was burning of a couple of large homes, collapsed building, and a rubble pile to play in.

633. Springfield received Enhanced Communication Equipment

Yahoo group: StarCom21

CITY RECEIVES ENHANCED COMMUNICATIONS EQUIPMENT TO HELP THE SPRINGFIELD AREA RESPOND TO DISASTERS

August 2, 2006
for more information:
Ernie Slottag 789-2235

The State of Illinois today presented high-tech communications equipment to the City of Springfield that will enable area responders to better communicate during disasters. "On 9/11, we saw what can happen when first responders aren't able to communicate with each other," said Michael Chamness, Chairman of the Illinois Terrorism Task Force. "High-tech communications tools can help ensure that firefighters, police officers and other first responders are able to relay critical information during the heat of a disaster.

"This equipment is critical to those people whose jobs are to save lives and property." Mayor Tim Davlin said. "They shouldn't have to be concerned about how they will relay information from one agency to another. This communication system will provide ample resources so that multiple agencies from multiple jurisdictions can function efficiently together at doing their jobs."

In July 2004, the Illinois Terrorism Task Force (ITTF) awarded $18 million in grants to the state's 19 homeland security regions to help build response and communications capabilities throughout the state. The Illinois Transportable Emergency Communications System (ITECS) presented today is one of nine that will be strategically located throughout the state and be available for response to disaster scenes within the region or anywhere in the state it is needed.

The equipment includes a tow trailer equipped with a cross band interface device, two laptop computers for programming the system, satellite Internet system, transportable UHF and VHF tactical repeaters, a multi-line telephone system, two battery optimizers, a 50-foot communications tower and 10,000 watt diesel generator. The City of Springfield also received a 2005 Ford F550 four-wheel drive pickup truck to tow the ITECS to disaster sites.

"The Illinois Transportable Emergency Communications System is a valuable tool for interoperable communication in Illinois. By deploying these regionally we will have the ability to respond anywhere in Illinois quickly to ensure interoperable communications," Chamness said. "Between the STARCOM radio systems, EMnet, 13 mobile command posts, the ITECS and completing the IREACH system statewide, first responders will have many tools to choose from for more effective emergency response."

Chamness also noted that while the equipment was purchased using homeland security funding, it will be available for response to any type of disaster that occurs, such as tornadoes, floods, train derailments and hazardous materials incidents.

The tow vehicle and communications suite cost nearly $400,000. Funding for the equipment comes from the state's federal homeland security funding, which was allocated by the Illinois Terrorism Task Force (ITTF) and approved by Gov. Rod R. Blagojevich. The Springfield Police Department will provide maintenance, insurance, license fees and fuel and oil, since these expenses aren't allowable under federal grant guidelines.

While the new ITECS equipment will be maintained by the Springfield Police Department, it will be available for response to disasters anywhere in the 15-county Illinois Emergency Management Agency (IEMA) Region 6 which includes Adams, Hancock, Pike, Brown, Schuyler, McDonough, Fulton, Mason, Menard, Cass, Scott, Morgan, Peoria, Sangamon and Christian. The equipment is considered a state asset during disasters, so it can also be called to assist during a disaster anywhere else in the state.

"We think the ITECS will be a valuable asset in West Central Illinois for responders to talk to one another during emergencies," said Don Kliment, Chief of Police for the City of Springfield. "When responders from several different agencies arrive at the scene, we'll use the ITECS to patch their radio frequencies together so they all can easily communicate."

Nine ITECS suites will be stationed in regions around the state, and a tenth ITECS suite will be maintained by IEMA in Springfield. Each ITECS suite is staffed by three personnel: a supervisor/frequency manager; an electronics/computer technician; and a mechanical technician. These personnel received special training on the equipment and will attend a training workshop each year to keep current in equipment operations.

635. Site 115 down?

Yahoo group: StarCom21
Date: 2006-08-10 02:57:09 UTC
From: n9jig
Topic: 635 Message: 635

The "North Maine" site (#115) in Cook County (Data on 866.9625) has not been operating correctly for the last few days. There is a data signal there but it is weak and not being decoded, either by an XTL5000 or by my Pro2096, BC796, BC396 or BC996.

This is a fairly new site and may not be completed yet but it has been operating the last few
weeks.

636. Re: *STARCOM21* Site 115 down?

Date: 2006-08-10 18:42:29 UTC
From: jkdrouillard@aol.com
Topic: 636 Message: 636

Rich- When I went to test the signals around that site several weeks ago
there was a lot of interference from the EDACS system being on the same tower.
So I'm sure they're still working the bugs out.

637. Starcom Dupage?

Yahoo group: StarCom21
Date: 2006-08-12 17:26:01 UTC
From: daniel_sekerak
Topic: 637 Message: 637

I live in Glen Ellyn and have yet to hear anything via starcom21/ISP
in my area. The closest system is apparently active in Cook County.
Why isn't Dupage County listed among those counties receiving freqs on
the radioreference page dedicated to this system?

638. Re: *STARCOM21* Starcom Dupage?

Yahoo group: StarCom21
Date: 2006-08-13 00:38:59 UTC
From: Rich Carlson
Topic: 637 Message: 638

The StarCom21 system is not yet built out in the Chicago area. The
site in Des Plaines ("Maine North", Nr. 115) is actually not working
itself right now.

Eventually the system will be working in the DuPage area, with several
sites in or near the county to serve it.

Keep an eye on the RR database, it seems to be the most accurate info
on site locations out there for StarCom.

640. STARCOM Update

Yahoo group: StarCom21
Date: 2006-08-16 03:04:29 UTC
From: tweatherford@radioreference.com
Topic: 640 Message: 640
Attachments: 2 described; binary payloads are missing from this source WARC

from MABASradio.org

Representatives from Motorola provided a status update on the installation and operations of the STARCOM21 radio system in Illinois. The following topics were discussed:

· Downstate portions of STARCOM21 network are operational. Illinois State Police are conducing testing. The target start date for ISP's operations on STARCOM21 is 12/31/2006.

· Redundant system controllers are located in Collinsville, Springfield and Downers Grove.

· No fees will be charged for system use until after the State accepts STARCOM21, expected in the fourth quarter of 2006. After the system is accepted, fire departments will be allowed to use the network during approved drills and emergency response without incurring any cost. If a department begins to use the system inappropriately, Motorola will contact ITTF/IEMA who in turn will warn the offending department before any bills are issued.

· Statewide talkgroups, including MABAS & ILEAS, are truly statewide. Concerns were raised concerning loading issues when statewide talkgroups are active.

· Regional talkgroups are only regional.

· Incident Talkgroups are statewide.

· Roaming issues were raised concerning the ability for a unit to be recognized across the entire network. Motorola indicated that units should be recognized anywhere within the state.

· Plans are progressing to include VHF to STARCOM21 patches for ISPERN and IREACH. D/C Rauter raised strong concerns that these patches could create a ping-pong effect that would overload both the VHF and STARCOM21 networks. Motorola recognizes that the VHF patches could be problematic.

· Motorola advised that the State EOC would have control of the network to seize control of all radios and make pre-emptive announcements. Many concerns were raised over this issue, especially if public safety related radio traffic is pre-empted, including the need for this feature at all. This spurred considerable discussion about the true function of STARCOM21 for the majority of the State's first responders. Mr. Mefferd reported that ITTF's two objectives for STARCOM21 were notification via alerting and coordination of statewide response plans.

· Questions were raised about scanning talkgroups.

· Motorola reported that the fire department's use of STARCOM21 was not intended for day-to-day operations.

· Additional talkgroups can be added to the system at no cost to ITTF/IEMA. Chief Maplethorpe reported that MABAS needs 3 talkgroups for MABAS, TRT and USAR. Motorola

indicated that this would not be a problem, they only need authorization from Mike Chamness.

· A request was made to include MABAS as a member of the STARCOM21 user group.

· A long discussion ensued concerning the use of encryption, encryption keys and over the air programming.

· Training for use of the system was discussed. Motorola reported that two training sessions were held in southern Illinois that was based on radio operation. The Communications Committee concurred that a plan for the fire service's use of STARCOM21 needs to be prepared before any additional training can be offered.

· Console installations are only XTL5000 mobiles with tone control interfaces. Control stations are not completely compatible with dispatch consoles. ILEAS has purchased 43 consolette dispatch consoles that will be fully compatible with most radio consoles.

Wowsers, looks like they still have a ways to go yet. I particularly like the idea of ISPERN and IREACH being added into the mix. Be neat to see how far away the ISPERNS could be heard.

After a few months of being down, my Live Scanner Feed is back up.

It will be on 24 hours a day / 7 Days a week with a dedicated Yaesu FT-50RD

http://www.IncidentBroadcast.com (TeamSpeak Server)

Feed Info: http://scanil.com/F/Online-scanner.htm

Mostly area 911 systems for Fire/EMS, very little Police. This does NOT include any part of St. Louis City/County. Does NOT include STARCOM21 at this time -- can't monitor it yet :(

Channel:

IL - East St. Louis

Topic:

Full Time Feed-24/7 - Metro East St. Louis (IL)

User in channel:

1/100

Codec:

Speex 12.3 Kbit

Description:

*** Illinois side of St. Louis **

Channel Info/Listing: http://scanil.com/F/Online-scanner.htm

911 systems for Madison, St. Clair, Macoupin (Central & Southern Towers), Bond, Clinton, Montgomery, Jersey, Monroe, Washington Counites. This includes mostly Fire & EMS Agencies, only a little Police traffic.

Also monitor: ISPERN, I-REACH, IFERN, HF-4

Any questions, problems or suggestions, feel free to let me know.

Thanks
Terry

644. Re: STARCOM Update

Yahoo group: StarCom21
Date: 2006-08-17 12:25:41 UTC
From: jburgess1974
Topic: 640 Message: 644

Since statewide is statewide and regional will be regional. ISP is a statewide agency and there is 21 actual districts in 5 command regions in the state, where will the ISP fall into? I know that state troopers can make traffic stops any where in the state and may be called to handle a call in a connecting district and on a regulary basis troopers have to come to Springfield for training purposes or any where else in the state for the same purpose and at the IL State fair in Springfield troopers from around the state come for the 10 day event.

Currently if the troopers come to Springfield for training they contact Springfield Communications (D09) on HF-4 for communications and if a trooper handles a traffic crash in any where in a connecting district, the trooper needs to contact the connecting district dispatch on HF-4 to have them contact there communications center just to get a report number. With StarCom21 will the trooper be able to still contact there own dispatch to get a report number.

One more thing regarding the State Fair in Springfield will the state fair have there own group or will they still use one of the state police channels still for communications?

645. Re: *STARCOM21* Re: STARCOM Update

Topic: 640 Message: 645

While it would be great to have statewide patches to ISPERN and other mutual aid channels remember that these would probably cause the system to overload almost immediately. As it is now, even with limited use of the system, using the statewide MABAS talkgroup or other statewide talkgroups will take one channel at every site in which a radio is affiliated. With some sites only having a couple available voice channels this will cause other local traffic to get busied out.

What happens on a 3 channel site when both an ISPERN broadcast and a MABAS call is going out at the same time? With the control data taking one channel as well, this site is unavailable for local traffic.

Most trunked systems I have monitored that have ISPERN patches turn them off eventually to conserve channel loading. They will turn them on as needed for local traffic. One system in our area of suburban Chicago even reinstalled VHF radios in the cars to allow direct ISPERN communications for this reson and to allow contact when out of range of the home system.

If you are running Pro96Com (a wonderful program BTW) watch the affiliations and see how many radios are affiliated with MABAS and other statewide talkgroups. Since the state provided free radios to dispatch centers and agencies, many of these are set up and listening to these all the time. (I know mine is!)

Close Terry hehe, its Streator in Lasalle County. AMT Ambulance also serves Streator with its main HQ in Peoria. I was picking it up on the Peoria Simulcast system. The administrative channel for that area used to be on the Lasalle County Cleartalk system with Lasalle County sheriff. I havn't heard the Peoria area AMT on Starcom today so it doesn't appear they've switched yet.

Interesting. Because at the 911 center, we are still monitoring them on the Cleartalk system in addition to the VHF dispatch frequency that we use and have noticed any difference. To my knowledge those radios have not been switched over to the Starcom system.

Interesting. Because at the 911 center, we are still
monitoring them on the Cleartalk system in addition to
the VHF dispatch frequency that we use and have
noticed any difference. To my knowledge those radios
have not been switched over to the Starcom system.

Actually, now that I think about it. It was only Medic 26 & the AMT base in Streator that was on ID 20. Maybe AMT received 2 portables and were testing them out? Then again, why would they have there own TG. St. Marys Hospital & various other streets in Streator were mentioned so I know it was them.

Candidate emerges for dispatcher's job
Norma Mendoza, nmendoza@...
08/23/2006
Email to a friendPost a CommentPrinter-friendly
The Glen Carbon Public Safety Committee gave its approval to a recommended candidate for full-time police dispatcher and will ask the Village Board to hire her.

Police Chief David Bradford said about five candidates were interviewed by a panel from the Police Department and ranked according to skills and qualifications for the position and selected Coleen Born as the leading candidate.

Bradford said due to the shortage of dispatchers, the public services officer has been filling in as a dispatcher. He said there should be an increase in reporting violations of village ordinances and enforcement of the same once the dispatch position is filled.

Committee members are recommending that the Village Board adopt the Madison County Multi-Jurisdictional Hazardous Mitigation Plan in order for the village to participate in the plan. Bradford said the village emergency operations plan will become a subset to the county plan.

The plan will govern how the emergency response teams in the county and its municipalities are to respond to emergencies such as an earthquake, a flood or a spill of hazardous material.

The committee also recommends adopting a resolution to become a part of the state's Emergency Management Network. Bradford said the network and the Illinois Emergency Management Agency will provide funding and all the village needs to do after adopting the resolution is to install a satellite receiver on Village Hall.

Bradford told the committee that changes mandated by the Federal Communications Commission will render the department's radio system obsolete.

He said all public safety agencies are advised to upgrade their systems by 2013.

"That means a complete retooling of our radio system," he said.

The radio system the department uses is old, he said, and needs to be replaced anyway.

It was discussed two years ago, but because they knew the state was making plans to comply with the FCC rule and insisting that all law enforcement agencies in the state have interoperability, the department found it feasible to wait.

"Two weeks ago Madison County signed a contract with Motorola for the StarCom21 system," Bradford said. "We can piggy back under the county's license and act as a subsystem of their system."

He said applying under the umbrella of the county's license would save the village money and the administrative work would be handled by the county. He said replacing the department's system this way would cost approximately $141,000.

Bradford said the first step the village needs to take is to get proposals for the Police Department bay station, the hub of the radio system.

Well got an update on TG 20. I was hearing Medic 26 and unit at there HQ all the time. Then Thursday night I heard Medic 26 and another unit messing around on the radio talking about radio sex and stuff. Then a unit came on the air and said appropriate talk on the radios please. Then Medic 26 thought it was another one of the guys messing around and he said something like Steve hows it goin man. Then there wasn't another peep from them all night. Nothing heard from them all Friday however I did hear 2 guys on TG 20 that sounded like Officers. They identified as units 15 & 17. Were talking about making report copys for a witness and stuff about court, etc. So anyways, I wonder if AMT got punished for inappropriate radio use and now TG 20 has been re-issued?

Normal Fire abandoned the EF Johnson Multi-Net system on March 22, 2006. They now use Starcom21 for all their communications, but also utilize VHF repeaters in their rigs on 159.0525 (100.0 PL). Bloomington Fire also left the EF Johnson system a few months later, but they chose to go back to an analog VHF conventional system.

666. Site 108 on the air

Yahoo group: StarCom21
Date: 2006-08-29 22:33:24 UTC
From: n9jig
Topic: 666 Message: 666

I am picking up Site 108 on 866.4625 in the northern suburbs of Chicago. I don't have an exact location yet however. 855.2375 is reported as an Alternate Control Channel.

Additionally, Site 115 on 866.9625 (Maine North/Des Plaines) is transmitting data, but not decoding on any of my scanners, including a BC796, 396 or 996 or a RS 2096. If I leave the 2096 on it the radio displays "96" to indicate that it is hearing a 9600 baud data signal after a
few minutes of pondering, but the system ID and Site Number do not appear. The data also sounds "different".

667. Re: Site 115 on 866.9625

Rich,
Are you physically close to the transmitter? If you are try tuning 12.5 up or down.
I have one site close to me that if I tune up or down, the Pro96 will display "96",
but not decode anything. That is the only time the radio has indicated a 9600 cc
without a full decode, at least for me.

Well, it is a moot issue I guess, the 115 site is working normally
this afternoon. I did check it this morning and it was still sending
an abnormal data signal, but just now (2044 Hrs, Wednesday) it is
sending true controla data and reporting normally for the first time
in about 2 or 3 weeks.

The transmitter is supposedly at Maine North, the ISP facility in Des
Plaines right off of I-294 at IL-58. I am about 15 miles away. This
weekend I plan on taking a ride down to verify this and maybe try to
track down the 108 site. I suspect 108 is up here in Lake County
someplace, maybe Gurnee. I was in Naperville this morning and could
not here it at all on my 996 in the car.

They must be playing with Site 115 it as it was sending valid control
data for a couple weeks, then about 2 or 3 weeks ago it reverted to
some sort of undecipherable data until yesterday or Tuesday when it
started sending good data again. Now today (Thursday evening) it is
back to sending bad data again.

Site 115 is actually the towers along the tollway system. So its like a sub-zone within the north zone. I have found the I-90 / Rt 25 tollway tower and I-355 / I-290 tollway tower both transmitting site 115 on 866.9625. I have noticed that whenever the data channel goes goofy, like today and when the data channel was on 868.9125. I usually will find a tech working on the I-90 / Rt 25 site. I am wondering if they are having interference issues and thats why the frequency is changing and the data channel goes wierd?

Hope this helps

Dave Hudik

From: Michael W. Scheel
Topic: 676 Message: 678

Anderson might be Andover in Henry Co. Moline can be either at Black Hawk College or Black Hawk State Park in Rock Island. Their getting closer and I just got a BCD396T.

Ahh yes Andover is correct. I remember thinking that they might be on
Andover street here in Peoria when I initially heard them say that.
Maybe there attempting to get Dist. 7 into testing mode.

680. MABASRadio.org update

Yahoo group: StarCom21
Date: 2006-09-02 15:12:37 UTC
From: tweatherford@radioreference.com
Topic: 680 Message: 680
Attachments: 2 described; binary payloads are missing from this source WARC

From MABASradio.org:

Return to Meeting Minutes Page

Mutual Aid Box Alarm System

Communications Committee

Meeting Minutes

June 19, 2006

DRAFT

I. Call to Order

The meeting was called to order at 10:07 a.m. at Lisle-Woodridge Station 1. Present were committee members Paul Maplethorpe, Round Lake; Dave Dato, Wauconda; Steve Rauter, Lisle-Woodridge; Gregg Riddle, IFCA; John Lozar, Ducomm; Bob Mierop, Bolingbrook; Dennis Higgins, Livingston County; Larry Matkaitis, OSFM; and Tom Mefferd, DuPage OEM. Also present were Joe Kirts, DuPage OEM and Paul Marshall, Mike Greenaway and Pat Hughes, Motorola, Inc.

II. Approve Prior Meeting Minutes

D/C Rauter moved to approve the May 15, 2006 minutes as presented. Second by B/C Mierop. All AYES; motion carried.

III. STARCOM21

Representatives from Motorola provided a status update on the installation and operations of the STARCOM21 radio system in Illinois. The following topics were discussed:

· Downstate portions of STARCOM21 network are operational. Illinois State Police are conducing testing. The target start date for ISP’s operations on STARCOM21 is 12/31/2006.

· Redundant system controllers are located in Collinsville, Springfield and Downers Grove.

· No fees will be charged for system use until after the State accepts STARCOM21, expected in the fourth quarter of 2006. After the system is accepted, fire departments will be allowed to use the network during approved drills and emergency response without incurring any cost. If a department begins to use the system inappropriately, Motorola will contact ITTF/IEMA who in turn will warn the offending department before any bills are issued.

· Statewide talkgroups, including MABAS & ILEAS, are truly statewide. Concerns were raised concerning loading issues when statewide talkgroups are active.

· Regional talkgroups are only regional.

· Incident Talkgroups are statewide.

· Roaming issues were raised concerning the ability for a unit to be recognized across the entire network. Motorola indicated that units should be recognized anywhere within the state.

· Plans are progressing to include VHF to STARCOM21 patches for ISPERN and IREACH. D/C Rauter raised strong concerns that these patches could create a ping-pong effect that would overload both the VHF and STARCOM21 networks. Motorola recognizes that the VHF patches could be problematic.

· Motorola advised that the State EOC would have control of the network to seize control of all radios and make pre-emptive announcements. Many concerns were raised over this issue, especially if public safety related radio traffic is pre-empted, including the need for this feature at all. This spurred considerable discussion about the true function of STARCOM21 for the majority of the State's first responders. Mr. Mefferd reported that ITTF's two objectives for STARCOM21 were notification via alerting and coordination of statewide response plans.

· Questions were raised about scanning talkgroups.

· Motorola reported that the fire department's use of STARCOM21 was not intended for day-to-day operations.

· Additional talkgroups can be added to the system at no cost to ITTF/IEMA. Chief Maplethorpe reported that MABAS needs 3 talkgroups for MABAS, TRT and USAR. Motorola indicated that this would not be a problem, they only need authorization from Mike Chamness.

· A request was made to include MABAS as a member of the STARCOM21 user group.

· A long discussion ensued concerning the use of encryption, encryption keys and over the air programming.

· Training for use of the system was discussed. Motorola reported that two training sessions were held in southern Illinois that was based on radio operation. The Communications Committee concurred that a plan for the fire service's use of STARCOM21 needs to be prepared before any additional training can be offered.

· Console installations are only XTL5000 mobiles with tone control interfaces. Control stations are not completely compatible with dispatch consoles. ILEAS has purchased 43 consolette dispatch consoles that will be fully compatible with most radio consoles.

IV. Chicago IFERN

Mr. Riddle questioned that status of Chicago programming the correct CTCSS tone on IFERN. He indicated that Chicago's lack of proper CTCSS tone has caused numerous operational issues between suburban dispatch centers and Chicago's fire dispatch center. Chief Maplethorpe reported that he has made contact with officials in Chicago to resolve this issue. He agreed to follow-up with Chicago.

V. Recommended Practice – Emergency/Evacuation Tone

Chief Maplethorpe reported that MABAS President Reardon requested the Emergency/Evacuation Tone advocacy statement be converted to a Recommended Practice.

D/C Rauter moved to approve the Emergency/Evacuation Tone statement as a Recommended Practice. Second by Mr. Riddle. All AYES; motion carried.

VI. Advocacy Statement - Interdivisional Request

No Report

VII. MABAS Radio Test Schedule

Chief Bouma was absent.

VIII. Old Business

A. MERCI Base Station Project

Chief Dato reported that approximately one third of the hospital MERCI base stations have been installed.

B. VHF Interoperability Radios

Chief Dato reported that Motorola has shipped boxes to all fire departments with return instructions for reprogramming.

Mr. Mefferd request that MABAS Communications Committee hold off on developing the proposed interoperability document because ITTF is working on a similar document.

C. Rock Island County

Chief Maplethorpe reported that most of the Rock Island fire departments have converted to their new dispatch frequency (154.310 MHz). One department is still using IFERN since their trustees will not pay to switch frequencies. B/C Mierop reported that Bolingbrook has some extra VHF portables available. D/C Rauter reported that Lisle-Woodridge has numerous Minitor I pagers on 154.310 available as well.

D. Southwest Central Dispatch

No report.

E. EMnet

Mr. Mefferd reported that EMnet for fire departments in Illinois remains the top priority of the ITTF Communications Committee. The ITTF Communications Committee will hold their next meeting on June 21st.

Mr. Mefferd also reported that the order has been placed for the 9-1-1 PSAP EMnet terminals. Only 90 of 210 PSAPs have requested EMnet terminals. Site surveys are underway. Installations are expected to be completed by November 30th.

F. IAFC/Top Priority

After a brief discussion, the Committee concluded that no official action will be taken concerning IAFC’s Top Priority report. D/C Rauter indicated that he may follow-up on the report on his own.

G. MABAS Dispatch Yahoo Group

Mr. Riddle agreed to prepare an advocacy statement concerning the MABAS Dispatch Yahoo group for forwarding to the Committee.

H. Statewide Radio License

Chief Maplethorpe reported that a position paper was prepared and forwarded to President Reardon concerning the additional frequencies desired for the MABAS statewide radio license. He is awaiting guidance from President Reardon.

I. Carbondale Area

No report

J. SIEC

The SIEC bill has not been signed by the Governor.

IX. New Business

None

X. Information for the Good of the Committee

APCO Fire Service Dispatch Course: D/C Rauter reported that APCO will be conducting their new fire service dispatch course in Bolingbrook. Information is available on the MABASRadio website.

ISO Dispatch Center Credit: D/C Rauter reported that an Excel spreadsheet has been developed to assist fire departments and dispatch centers with ISO grading preparations.

XI. Adjournment

Chief Maplethorpe moved to adjourn the meeting. Second by Chief Dato. All AYES; the meeting adjourned at 11:54 a.m.

The next meeting for the MABAS Communications Committee is scheduled for Monday, July 17, 2006 at 1000 hours. The location of the meeting will be at Lisle-Woodridge Fire Station 1. Please mark your calendars.

Respectfully submitted,

Paul Maplethorpe

681. Possibly new talkgroups

Yahoo group: StarCom21
Date: 2006-09-02 16:18:01 UTC
From: dkarrick00
Topic: 681 Message: 681

Friday 09/01/06 I was running Pro96Com and it looked like there were six new talkgroups that were on the Normal tower (Tower 229).

They were 20800, 20801, 20802, 20803, 20804, 20805.

682. Re: TG 401 Techs on Peoria simulcast tower

I heard the same conversation on the Macomb Starcom tower. I am guessing that the techs talkgroup is statewide. That's the way they do it in Minnesota.

Good info! Looks like you found 3 sites #'s that weren't identified in the Radioreference database. I added the suspected site next to the sites/freqs you identified.

866.9375 0140h-0107; 10701 D07 Rock Island (Moline) [NEW]
867.8750 0140h-0123; 10705 D07 Rock Island (East Moline) [NEW]
867.9625 0140h-0103; 103 * D07 Henry (Andover) [already in the database]
866.8875 0140h-0127; 10704 D07 Rock Island (Moline) [NEW]

0140 is the system id and the -0### is the site.

Did you hear anything on these frequencies?
10702 D07 Rock Island (Rock Island) 866.48750 867.32500 867.85000 868.37500 868.95000

You may want to do a search between 774-776 MHz with step size 6.25 to see if there are any unidentified 700 MHz control sites around the Quad Cities. {The 396 is cool because if any LTR frequencies are found in a search range (in any band), the scanner will stop on an LTR transmission and it will display the LTR talkgroup in decimal format.}

Not from the location I was at. From the house, actually closer that the location I heard the above. But I am on the back of a slight ridge line. I can't see to get anything I guess I will have to get out a 800 yagi and try that out. I think I did hear something on 866.4875 with I was trying with my BC796D & BC296D.

> You may want to do a search between 774-776 MHz with step size 6.25

none heard yet. That was the second thing I tried out with the BCD396.

I must of missed that in the manual. I have a PRO-97 that I use for LTR searching. I got a vacation coming up during the Peroia Superfest so I hope to get out on the road something I have not been able to do this summer.

690. Lots of testing on Techs TG 1

Yahoo group: StarCom21
Date: 2006-09-06 04:53:41 UTC
From: Jason McDowell
Topic: 690 Message: 690

Lots of testing this evening on Techs TG 1 on the Peoria simulcast tower. Mentioned places like Fox River Valley dr and the state line but don't know where at on the state line. Then mentioned using Site 26 and few other places that I can't remember. I've noticed quite a bit more testing in the last week, maybe there finally getting it ready for the State Police testing. 2.5 months till estimated date of completion.

District 7 was doing a lot of short test counts on 155.370. So I figured that was why. I am fustrated that I can't hear any sites from my house. I can't be more that three miles from the BlackHawk State Park site in Rock Island. Maybe all the metro sites in the Quad-Cities are directional?

From: Jason McDowell
Topic: 690 Message: 693

Wow that is wierd that you can't hear any sites. Are you sure you have the system set as a Control Channel only mode? If your just entering the frequency in, make sure you have it set as a Motorolla P25 trunk system. You should at least be able to hear 2 towers. Down here in central Peoria I can normally get 4 towers and with some skip, it jumps to around 8-10 or so. Thats with just the normal stock scanner antenna.

Jason

> 774.30625 774.33125 774.34375 774.39375
>

Well, looks like I found either some missing
ones, or the info received is from a bad source.
I have several PRO96COM files that indicate
some missing frequencies:

My Tower358.txt file clearly shows the
following Control Channel & the 2 alternates:

-Frequencies
#Format: Channel,Usage,Frequency
"01-2128","c",775.30625
"01-2168","ca",775.55625
"01-2208","ca",775.80625

Not to mention the NEIGHBORS listing, take
a peak at Tower 353 in Caseyville, IL:

```
-Neighbors
#Format: TowerID,TowerIDHex,System ID,Channel,Frequency,Tower Name
301,"T0301",140,"01-2124",775.28125,"D?? - 700Mhz (700Mhz)"
305,"T0305",140,"00-2537",866.86250,"D11 - Belleville (St Clair)"
323,"T0317",140,"00-2617",867.36250,"D11 - E. St Louis (St Clair)"
333,"T0321",140,"00-2549",866.93750,"D13 - Evansville (Randolph)"
353,"T0335",140,"01-2004",774.53125,"D11 - Caseyville (Madison)"
```

Here is another PRO96COM file of mine showing more missing Control Channels & alternates. This is my PRO96OM file for Tower 353, in Caseyville, IL:

```
-Frequencies
#Format: Channel,Usage,Frequency
"01-1964","ca",774.28125
"01-2004","c",774.53125
"01-2044","a",774.78125
```

Obviously the source of the data (Listed at the very top of this E-Mail) does not live anywhere near St Louis, Mo. It may come close, but is not complete.

> 774.30625 774.33125 774.34375 774.39375
>

Oh, missed another one:

From my Tower359.txt with PRO96COM, here is
one more missing from the list, this clip
is the NEIGHBBORS listings from Tower 359:

-Neighbors
#Format: TowerID,TowerIDHex,System ID,Channel,Frequency,Tower Name
301,"T0301",140,"01-2124",775.28125,"D?? - 700Mhz (700Mhz)"
306,"T0306",140,"00-2699",867.87500,"D18 - Brussels (Macoupin)"
323,"T0317",140,"00-2617",867.36250,"D11 - E. St Louis (St Clair)"
325,"T0319",140,"01-2132",775.33125,"D11 - Edwardsville-SIUE
(Madison)"
353,"T0335",140,"01-2004",774.53125,"D11 - Caseyville (Madison)"
355,"T0337",140,"00-2539",866.87500,"D11 - Godfrey (Madison)"

(Do you see the missing control channel?
Tower-325, the EDW or Edwardsville site)

696. T333 on PRO96COM

Yahoo group: StarCom21
Date: 2006-09-07 04:40:29 UTC
From: Todd Hartzel
Topic: 686 Message: 696

Greetings all,
I'm sure this is a band opening in
the St Louis area. I am getting T333
from Evansville, IL on 866.9375. Here
is my fresh PRO96COM file on it.
Tower333.txt:

FileVersion:3
-TowerInfo
#This section is here for information only. With the exception
#of the Call Sign(s), This data is not Read back into the program at
all.
System ID : 140
System Name : Starcom 21 (ISP Radio Network)
WACN : bee00
Tower Number (Decimal): 333
Tower Number (Hex) : T0321
Tower Description : D13 - Evansville (Randolph)
Control Capabilities : Voice,Registration
Call Sign(s) : Unknown
Timestamp : Wed Sep 06 23:25:51 2006

-Tables
#Format: Table ID,Base Freq,Spacing,Input
Offset,Assumed/Confirmed,BandWidth
00,851.00625,0.00625,-45.00000,"Confirmed",0.00625
01,762.00625,0.00625,30.00000,"Confirmed",0.00625

-Frequencies
#Format: Channel,Usage,Frequency
"00-2465","v",866.41250
"00-2549","c",866.93750
"00-2859","a",868.87500

-Neighbors
#Format: TowerID,TowerIDHex,System ID,Channel,Frequency,Tower Name
301,"T0301",140,"01-2124",775.28125,"D?? - 700Mhz (700Mhz)"
305,"T0305",140,"00-2537",866.86250,"D11 - Belleville (St Clair)"
310,"T030A",140,"00-2535",866.85000,"D13 - Chester (Randolph)"
323,"T0317",140,"00-2701",867.88750,"D11 - E. St Louis (St Clair)"
349,"T0331",140,"00-2695",867.85000,"D11 - Sparta (Monroe)"
353,"T0335",140,"01-2004",774.53125,"D11 - Caseyville (Madison)"
358,"T033A",140,"01-2128",775.30625,"D11 - 700Mhz (700Mhz)"

Just alittle note to all. It seems most of
the NEIGHBORs being reported on T333, T358 &

T359 right-now are all disconnected. Some
may even be off air. T305 is good example.

697. Starcom21 in the Quad-Cities pt 2

Yahoo group: StarCom21
Date: 2006-09-08 00:23:49 UTC
From: Michael W. Scheel
Topic: 697 Message: 697

Last night I found a location in my room where I could get a control channel (forgot to write down the cc) I left the BCD396 in ID search and store. This morning I had 835, 2710, 49272, and 51856 in the scanner. Don't know if they were just noise or what. BTW District 7 was doing short test counts on HF2 154.845 this morning.

Question regarding StarCom21 control channels. I don't have a scanner yet that is capable of digital systems yet, but hoping to get a BCD396T scanner early next year. I already have the software which I downloaded from the uniden website. On the software I can program Motorola sytems and set only control channels only, but set system for P25 I don't have a check box for data control channels only. So my question is can I still just program control channels or would I have to program all frequencies?

Greetings,
Good choice. I was just commenting to
Terry (via private email), that now that we
have a listing of the some 75 control channels
for Starcom 21 (60 according to the posting,
but around 75 if you add in missing ones that
I can pickup from around the St Louis area) ;
its looking more and more like the BCD-396T
is the radio to use with STARCOM 21. The PRO-96
has certainly fallen out of favor.

PRO-96 has limitations:

- maximum of 50 programmable channels, per bank
- maximum of 120 programmable talkgroups, per
bank (and the talkgroups can NOT be shared
across several BANKS)
- and currently does not do 700Mhz trunking.

This does *NOT* mean that the PRO-96 can
not be used. But it will require rethinking
a solution.

STARCOM 21 is big. 75 DATA channels. Right
now the BCD-396T is the logical choice.

BCD-396T allows:

- maximum of 6000 programmable channels to a BANK
(BCD-396T refers to its banks as: SYSTEMS)
- maximum up to 5999 talkgroups, depends on how
much of the 6000 channels are used.
- performs 700Mhz trunking just fine

The BCD-396T can handle it all in 1 BANK (1 SYSTEM).
Also, I think the BCD-996T is identical to BCD-996T.

Obviously, when the PRO-96 gets updated to handle
700Mhz Trunking (hopfully that is still the plan)
a user wanting to monitor STARCOM 21 is going to
have to limit the nuumber of DATA channels he
can put into one bank. I would say, disect the
STARCOM 21's DATA channels into 3 BANKS. Use the
same method the STARCOM 21 builders used to disect
the system into THREE regions.

- 100-199 - North Illinois
- 200-300 - Central Illinois
- 300-399 - Southern Illinois

Just use the same method of disecting the DATA
channels into 3 banks. And then also disect the
talkgroups into those same 3 BANKS. Obviously,
there is going to be hundreds, if not a couple
thousand of talkgroups on this system. Leave
OUT programming talkgroups that belong to the
other 2 regions.

I'm not sure if this a perfect solution for the
PRO-96. Perhaps someone will come out with
something better.

The BCD-396T only needs the DATA Channels to
Trunktrack. I think same for BCD-996T.
I have heard the MOBILE BCD-996T is almost
a twin to the 396T.

From: Cris Hanna
Topic: 701 Message: 701

I still hear a fair amount of traffic on Low and High band freqs but just wondering if D-11 has about completely moved over and I need to get my new scanner.

BTW, any recommendations on where to get it from?? Obviously based on all reports, the Uniden is the way to go.

Thanks

Cris Hanna

Like I said they may be just noise. If I can find a good location to run unitrunker on the CC.
BTW I searched for more CCs while at work and got a bunch I'll post later. Conditions were very good last night.

706. Anyone out here with a Starcom agency

Yahoo group: StarCom21
Date: 2006-09-10 21:24:22 UTC
From: David white
Topic: 706 Message: 706

Is anyone in the group a member of a an agency that has gone,or is the process of going onto Starcom? Wondering what the state has said if your agency has clear 800 trunked frequencies to give to the system. Does that scenerio help with per month cost, equipment outlay etc..... Doing some work for agencies that have trunked systems now and may be taking a soft look at Starcom. thanks

From what I understand, your agency has no part in the system, the frequencies are already assigned and paired for each county in the system, that was all set up by motorola.

The RadioReference page for the system states: "Agencies that donate
their existing 800 MHz frequency pairs to the system will receive
substantially reduced rates for airtime." I'm sure I have also seen this
mentioned elsewhere.

http://www.radioreference.com/modules.php?name=RR&sid=2324&nopt=1

It might be a little late in the game, but it sounds like something you
should follow up on.

As I recall, the regular price per radio is $53 per month and you are
just renting/leasing the radios.

Again, follow up on this with someone who can give you definite answers
to be sure what I said is still true.

710. Re: Re: *STARCOM21* Anyone out here with a Starcom agency

Yahoo group: StarCom21
Date: 2006-09-12 00:27:53 UTC
From: Rich Carlson
Topic: 707 Message: 710

Starcom21 users that provide resources like system channels, radio towers etc. can negotiate with Motorola for lower operating costs (the monthly fee charged) or reduced prices for purchasing or leasing radio equipment (mobiles, portables, consoles etc.).

Users of StarCom21 provide their own radios, either purchased from Motorola, leased acquired from vendors. Leasing costs are not generally included in the standard $53.00 per month per radio fee assessed by Motorola for system users, but if an agency has something to trade (like freqs or towers) negotiations could result in free or reduced rates.

Subject: Re: *STARCOM21* Digest Number 249

No, Terry,
Hex 10 is Dec 16 for sure.
This text file is created by the Pro96com software, unedited by me.
Could not get a signal long enough for the cw id to kick in.
This file is several months old. I suppose things could have been changed,
but I doubt it. I can only report what the software sees.

I'm in Mclean County, and our sites are working great. Appears so far to be
a good system.

Thanks for the work you do with the list and RR.

Greg

In a message dated 9/11/06 12:54:43 P.M. Central Daylight Time, tweatherford@... writes:
Ok... finally go through all this info and updated the system with site neighbors and some
corrections.

The only conflict/question I have is about:

FileVersion:3
-TowerInfo
#This section is here for information only. With the exception
#of the Call Sign(s), This data is not Read back into the program at all.
System ID : 140
System Name : STARCOM
WACN : bee00
Tower Number (Decimal): 316
Tower Number (Hex) : T0310
Tower Description : (null)
Control Capabilities : Voice,Registration
Call Sign(s) : Unknown

-Tables
#Format: Table ID,Base Freq,Spacing,Input Offset,Assumed/Confirmed,BandWidth
00,851.00625,0.00625,-45.00000,"Assumed",0.01250
01,746.00625,0.01250,30.00000,"Confirmed",0.00625

-Frequencies
#Format: Channel,Usage,Frequency
"01-2264","c",774.30625
"01-2284","a",774.55625
"01-2304","a",774.80625

316 is shown to be
316 * D13 Jackson (Cora) 866.35000* 866.87500* 867.40000 867.92500 868.45000

and it more matches the sites surrounding it.

NOW, 774.30625 is on site 216 - Peoria

OH, but wait... now these 3 frequencies match exactly to:

314 * D12 Marion (Centralia) 774.30625* 774.55625* 774.80625*

So... mistake in translation of Hex Site ID maybe?

have the ability to learn about new control channels from neighboring
sites.

Greetings Terry,
I have no doubts that your statement is correct.
But I would like to 'Throw-A-Fly-into-the-Ointment'.

Say a user with the above programmed DATA Channels
travels down to the St Louis area (with his radio
turned 'OFF') ; and then turns it on upon arrival,
in an area where none of these DATA channels can be
received (perhaps due to being inside a bldg or
structure, or near other structures or topography).
Only the remaining 15 additional DATA channels could
be recieved by this user's radio (but they are NOT
programmed in, so he can not receive them). His Trunk
radio will let him know this, by sounding the infamous
Trunk Radio 'OUT-OF-RANGE' low-tones.

(Anyone that uses Trunk Radios regularly knows what the 'OUT-OF-RANGE' tones sound like)

This would be a problem for our traveling STARCOM 21 user. It is of course ; hypathetical only. And even I admit, this scenario is not very likely to occur. But it is NOT an impossibility.

Sounds possible.

Hopefully the radio would have been left "ON" and collected info as needed along the way.

Especially would be important if using a portable radio and not a mobile unit.

Terry

Can y'all give your best best of where to purchase a 996 from?

I, along with others, have been researching, looking for the best price DELIVERED.

Let us know.

That's one thing this group is here for.

Thanks
Terry

The best price I have seen is the Hobby Stop. They have it listed at $490 cash with $12 shipping. If you can catch them at a hamfest, the price is $490 cash. I see them frequently at hamfests, and I have purchased from them. www.bearcat1.com

727. StarCom21 Tower Sites

Yahoo group: StarCom21
Date: 2006-09-21 02:50:20 UTC
From: n9jig
Topic: 727 Message: 727

I have created CARMA Profiles for the complete list of StarCom21 Tower sites, available at the
following links:

http://www.carmachicago.com/profiles/word/wordProfiles.html (MS Word Version)

http://www.carmachicago.com/profiles/pdf/pdfProfiles.html (PDF Version)

These Profiles are designed to complement the RadioReference database at http://www.radioreference.com/modules.php?name=RR&sid=2324.

Enjoy!

The Sheriff of Fulton County met with all of the Police Chiefs in that county last month. The Sheriff reported that his department will be changing out their communications that are currently running on UHF.
He said that Motorola has pointed out that the Homeland Security Grants (90/10 % matching) will only fund the STARCOM21. He asked the Chiefs to meet back with him after some questions were looked into. He said that if Farmington and Canton agreed to come on board, then County commo would most likely go to STARCOM21 (or whatever solution was agreed on) for primary communications barring the outcome of certain questions being looked into.
The reason that I am writing is that I am wondering if what Motorola told the Sheriff was accurate? Is STARCOM21 the only "interoperability solution" being funded by the feds in Illinois?
Isn't the Sheriff of Peoria County pushing for a 800 mhrtz (MACOM) trunking solution?

The Peoria County Sheriff is a member of the Peoria County ETSB. That group is looking at a M\A-COM Open Sky system. The Peoria County Sheriff is a supporter of the analysis done by the ETSB in selecting the M/A-COM system as long as the funding is in place.

All...

Have updated the sites with what it believed to be the correct site information.

Only made a few "major" changes.... the rest were minor, city names.
Updated with the information from the CARMA profile that has tower locations, etc.

Now, only a few remaining "unidentified" towers --- plus the unknown tollway frequencies..... not sure what is going to happen there.

Yes, many of these are probably simulcast or even possibly duplicated sites, I just haven't had the time to research it yet.

That tower is also used to relay for the State Police in Macomb, and the people that take care of the Illinois river, (not coast guard) but can think of the name, well anyway it was close, plus the fact that who knows what they just added to the tower here in Manito, cel stuff I supose. So far I have not heard from Mason County as to if they are even thinking about SC21, sort of a tower space problem for them, they are currently doing a hard line to a remote at the Coal Docks to work some of there radio transmissions, and the tower at the jail is way to short to be of any good for direct.

That would likely be 223, listed as Havana by some, and Manito by
others, actually closer to Manito. It is just south of the fish
hatchery. There is a little drive to the tower off of 2500N halfway
between 2400E and 2500E. This about a mile east of where 2500N bends
to the south near Goofy Ridge.

View it at http://maps.google.com/maps?f=q&hl=en&q=40.422806+-89.89289&ie=UTF8&z=14&ll=40.

744. Hex or Decimal

Yahoo group: StarCom21
Date: 2006-09-27 02:28:00 UTC
From: n9jig
Topic: 744 Message: 744

OK, I have had a 396 from day one and now also have a pair of 996's. (BTW, I also have a 2096).

I monitored a couple Starcom21 sites recently and the 396 and 996 both displayed the Tower ID in Decimal while the same system/tower was ID'd in Hex on the 2096.

I can't recall ever noticing the format on the 996 but I could have sworn that when I first got
my 396 that it displayed APCO25 tower ID's in Hex, just like the Pro2096 and Pro96.

Did a firmware upgrade on the 396 change this format and I just missed this? (I have 1.11.03
now, and have upgraded the 396 at least 3 times since I bought it in June 2005).

Are you asking if theres been any Starcom traffic on that Havana tower you guys have been chatting about or just general Starcom traffic heard from any tower from people in that area? If its the 2nd question then there's been plenty of starcom traffic off of the Peoria simulcast tower along with the Congerville tower and Metamora 700 mhz. Mostly McLean County Sheriff but usually quite a bit techs & departments testing during the day time.

751. RE: *STARCOM21* Streator region of Peoria AMT Ambulance now using Starcom

Yahoo group: StarCom21
Date: 2006-10-02 19:22:07 UTC
From: Mike Curtis (KC)
Topic: 648 Message: 751

Was in Ottawa over the weekend - Streator AMT was (back?) on the Cleartalk system (TG 12368) for response and VHF (155.2050 100.0) for dispatch.

Found Site 134 (866.8375) full strength on the 396 connected to a Maxrad 7603S on a trunk mount. Didn't hear any traffic on it for the times I had to monitor. I didn't, however, pick up Site 131 (La Salle) on the search I had going so I don't know if the signal is spotty in Ottawa or it just wasn't up. Site 134 had good strength into Grundy County where I picked Site 125 that was booming in on 867.3875 well into Will County on the way back to the airport :-)

757. StarCom21 Towers (Again!)

Yahoo group: StarCom21
Date: 2006-10-04 23:13:48 UTC
From: n9jig
Topic: 757 Message: 757

As more and more information is developed on the StarCom21 system we are able to produce more and better information about it.

I have uploaded v4.3 of the CARMA Profile for StarCom21 tower sites. This now includes the St. Clair County sites and fixes a few errors on others. For example, somehow I forgot to include Site 118 in a previous edition.

To go with this Profile I have also produced a StreetAtlasUSA map detailing each of the 195 StarCom21 sites. Both are available on the CARMA Profiles web page at

http://www.carmachicago.com/profiles/pdf/pdfProfiles.html

A couple notes about Site numbers:

The sites are numbered as they would appear on a Uniden BC396 or 996 scanner. This is in Decimal Mode. For users of Pro96 or 2096 scanners you will need to convert the second 2 digits to Hex to match your display.

Simulcast site numbers are appended with a letter. This letter is for Profile and map purposes only and does not display on scanners or computer decoders. These only display the regular site number.

To use this map you must have DeLorme's StreetAtlas USA. I produced it with the 2005 version, but it should work with more recent editions as well. Just start the program and open the map file.

Tom Lau has produced a great map as an image file. This is available in the StarCom21 Yahoo Groups Files Section.

THIS AFTERNOON AT ABOUT 2:50 PM HEARD TECH'S POSSIBLE WORKING ON D16 RADIOS TESTING. TECH'S WHERE TALKING ON ID 400 WHICH I BELIEVE IS RADIO TECH CHANNEL. I HEARD TALK ABOUT COPY TESTS ON HF4 AND STANDBY ON ISPERN. APPARENTLY SIGNAL JUMPING AROUND. ONE TECH ASKED FOR LOCATION RESPONSE WAS I-39 BY MCDONALDS IN WINNEBAGO COUNTY AT ONE POINT THEN ANOTHER POINT MENTION 3-4 MILES EAST OF DISTRICT. BY THE WAY I HEARD THIS IN SPRINGFIELD. AWESOME.

763. StarCom21 question

Yahoo group: StarCom21
Date: 2006-10-07 01:54:40 UTC
From: jburgess1974
Topic: 763 Message: 763

Hi, Everyone

I have a question I would like to ask and also have something I would like to share.

Since I have seen in the past the state police is supposed to take over the StarCom21 system December 31 2006. I was wanting to know since we are already going in the 4th quarter, is the StarCom21 still on schedule?

The one thing I would like to share with the group is before I purchased my newest scanner which is the Uniden BCD396T, I have pondering how to organize the StarCom21 system on the scanner. I believe the way I have organized the information is efficient and easy to find systems. I just want to share the information in case anybody else is trying to think how to setup their scanner for the StarCom21 system. I am going to attempt to put this in a word document and put it under the files section of this group.

764. SC21 on schedule, ?????

Yahoo group: StarCom21
Date: 2006-10-07 03:01:10 UTC
From: Ron H.
Topic: 764 Message: 764

Being not the betting type, I would say that they will not have it all complete and on line by the deadline !!!!
Illinois is not the only state that is receiving the same equipment, but under a different NAME, thus if Motorola can get ALL up and running it would surprise me. I am waiting until its working, so there is radio traffic to hear, I have no interest in listening to techs doing testing, and who knows Uniden may just change the firmware in the scanner to do a better job. Seems like if you live close to the state lines, and need to talk to another county just over the state line, it is still a problem, so how will this work ? or rather not work ?. I still do not see what the great need is for this system to fully work state wide and not work over the line. Hearing the system in a distance, this was via the SC21 repeater system, I would guess and not direct. I am wondering what the next radio expenditure will be for the state and local agencies ? heck, lets just all go Sattelite Direct, LOL, then we can do it on moded celphones.

Yahoo group: StarCom21
Date: 2006-10-07 03:59:09 UTC
From: Rich Carlson
Topic: 763 Message: 765

There are still some sites that are incomplete as of now, but I
believe all the sites are provisioned. It is possible that all the
sites will be up and operating by the end of the year.

As for the State Police "Taking Over" in actuality they are not, but
rather they will be switching to the StarCom21 system. The system
itself will be still be owned and operated by Motorola, and the State
Police will lease airtime on it, just like any other user.

From: Rich Carlson
Topic: 766 Message: 767

Yeah, there does seem to be a hole there,

In looking at the StreetAtlas map with the tower sites noted, it appears that northern DeKalb County should be served by 3 of the Kane County Simulcast towers (126A, B and D) as well as the Rochelle tower (136). The Rochelle tower is right where DeKalb, Ogle and Lee counties meet, on the Tollway Tower near Woodland Road.

Southern DeKalb County looks like it will need a tower or 2, as well as Kendall County which also looks pretty bare of coverage.

I think Motorola is being pretty generous on their coverage maps, but then again the system was not designed for portable coverage, so maybe they are covered by sites in the neighboring counties.

Well Starcom has come along a very long way in the last 4-5 months
however I don't believe it will be fully complete with all SP
districts on it by January 1st. Hardly any SP districts are in test
mode right now which that would probably take at least 2-3 months
alone to see how it works and find any dead spots. I'm going to go out
on a limb and guess summer of 07 before all the kinks and everything
is a full go.

districts on it by January 1st. Hardly any SP districts are in test
mode right now which that would probably take at least 2-3 months
alone to see how it works and find any dead spots. I'm going to go out
on a limb and guess summer of 07 before all the kinks and everything
is a full go.

Topic: 763 Message: 770

Reference the organizing of Starcom into your scanner. What I did with my 396T is I put each district with its towers on the same quick key. Peoria District 8 has 3 so far, so I labeled them ISP D8 Starcom A, ISP D8 Starcom B and ISP D8 Starcom C. I put all 3 on quick key 13. The sucky part is that it takes 3 seconds to scan thru but have to have it that way as all towers pick up different things. Like McLean County Sheriff will mostly come in on Tower A which is Congerville but it will sometimes come in on Tower A and Tower B which is Peoria Simulcast. Thats about the best way I found to organize it.

Well on between the Congerville, Peoria Simulcast and the 700 Mhz Metamora tower, I get quite a bit of traffic. Most of it is McLean County Sheriff but most of the rest is techs testing and various users chatting on the statewide TG's. Usually a chat about every 15 minutes at least during a normal weekday and evening. I havn't heard the Pekin Prison yet I don't believe. What tower are they working off of?

775. bcd-396T P25 band plan

Yahoo group: StarCom21
Date: 2006-10-08 17:07:00 UTC
From: Todd Hartzel
Topic: 775 Message: 775

Greetings all,
Its nice to know that the
BCD-396T (and its big-brother the
996T) listens to the DATA channel
to figure out the BAND plan for P25
9600-baud systems.

You can go into the MENUs of the
BCD-396T and manually DELETE the
BAND PLAN for the Starcom 21 system.

- MENU > Program System > Starcom 21 >
Edit Sys Option > Edit Band Plan

Then just DELETE both:

0:851.00625/625
1:762.00625/625

Then simple return to regular
scanning of the Starcom 21 bank.
And within seconds the 396T
puts a copy of the band plan
back into radio.

Its a nice automatic feature.

I guess that means the 396T/996T
can also automatically grab a
copy of the band plan to any
motorola VHF/UHF P25 system too.

sorry meant to say "p25" traffic. they have their own antenna system. there are 5 freqs. 408.2100,409.4100,408.8100,409.0100,410.0100. i found these with a normal 406.000-420.000 search. they were saved to the "quick save" system. (uniden bcd396d). decodes perfectly,BUT! heres the weird part. if you enter these freqs. in a motorola "p25" system,like the manual says,you wont hear a thing. any ideas why? long live dog jello.

??? Motorola P25, is this a radio model, if so is this an actual digital radio, if not, then does it have the digital card in it. As for the StarCom 21 radios, its my guess, that unless you have this done by Motorola it will not work. I would supose something to do with the code plug. Most have a password, to even clone the radios, maybe someone that is a Motorola Tech can better explain all of this. Then maybe not.

I have been just hanging out, trying to figure out what everthing is, so I will ask. Motorola Type II Smartcom, is this compatible with the new tri-band radios, that Motorola has,that do SC21, or is this a total different system, compared to SC21 radios. And would guess that it is digital, also guessing that the 996 scanner will do this type II also

Motorolla Type 2 Smartzone and all other versions of type 2 is just a trunking system like what Starcom is. It can be digital or analog. All scanners can do that type of trunking unless its digital then of course you need the higher end scanners.

Remember the Illinois Terrorism Task Force issued a STARCOM21 radio to every Police and fire department in the state that asked for one. I am sure there will be many agencies and talk groups throughout the state, especially for the first five years that it is operational, as it will be free to access the system.

Not free to access the system.... If you transmit on it, you start paying from that point, they know who has each radio. Then after transmitting you start getting billed, the way they told most departments.

ARE you sure about this?, wasn't there an agreement for the first five years ??? that there is NO charge, my understanding was that this would sucker people into the systems,and also be the tune up period, then at the end hit them with the sur-charge per unit that is coded to be a user. Would anyone that truly knows, "not guessing" care to make a post on this article. Maybe there is a Motorola top dog in the group that could make this post, this would really be a help to those that are needing to budget in the future for this expense. Knowing this would dispel any and all rumors!

Ron,
I had a Motorola Rep from Bloomington in my PD and he told me that right now we are encouraged to "play" with our Starcom21 radios all we want. (Ours were received on a grant). At some point(And he emphasized that we would receive plenty of notice), we would be getting billed for every radio we used. It would be about $ 50.oo per radio, per month. This was called "airway charges" and he went on to say that it was part of the contract with the State of Illinois. All of the towers, hardware and licensing etc...fees would be paid in that manner. (more or less). I do not work for Motorola but I do remember that... so it is not rumor. I was told no "matter if it was a portable or mobile unit..if it was keyed up in a given month it would be charged the monthly fee". I can not recall how long the "charges would need to be paid" but I was told to concentrate on the quality of service we would be receiving for that amount (which did include SOME) maintenance cost. From a cost analysis perspective it had some merit and it would be the only real game in town. Every time I try to summarize something a Motorola rep. says I seem to receive some type of admonishment. (I know you guys read this stuff so feel free to correct any little error on my part), But I do know... that was pretty much what I was told.

ARE you sure about this?, wasn't there an agreement for the first five years ??? that there is NO charge, my understanding was that this would sucker people into the systems,and also be the tune up period, then at the end hit them with the sur-charge per unit that is coded to be a user. Would anyone that truly knows, "not guessing" care to make a post on this article. Maybe there is a Motorola top dog in the group that could make this post, this would really be a help to those that are needing to budget in the future for this expense. Knowing this would dispel any and all rumors!

What the Chief says makes perfect sense, but it's a very, VERY, big paradigm shift for public safety communications. Let me preface the rest by saying, I'm a retired, 22 year, paramedic (military and civilian). I also happen to be a two-way dealer for Relm and Bendix/King so we/I have no interest in the Starcom Project. My interest is personal as a scanner and communications hobbyist.

For years, Police, Fire and Ambulance/EMS services have purchased their own, proprietary radio systems. And it would take an act of God/ and the City or County Council to update/upgrade/replace the equipment or system. And it's also the reason that a system like Starcom is needed. Police couldn't talk to Fire or EMS in the same jurisdiction, much less Police in a different jurisdiction or just as importantly, in a Mutual Aid situation. And so Starcom and similar trunked radio systems across the country were born.

It really does require a shift in thinking. For intent and purpose, agencies are giving up their own systems and going with "SUPER" Nextel-like system. And just like they would with Nextel, they are "renting" air time on Motorola's Starcom Network. Having Motorola (or GE, or whomever) setup and run this system is much smarter than the state of Illinois do this. The state would have to hire how many more radio techs and spend how much to train them, as well as paying to keep up the infrastructure, etc., etc. Motorola is on the hook for all this. The state also can't afford to pay for everyone's comm usage every month. Liken it to a General Contractor building a new mall. He has a group of Nextel radios that he pays for, but he's got to talk to all the sub contractors, so they have their Nextel group and pay for that, but they can also talk to the General contractor, or one of the other subs.

This practice has been going on in the business world for years with regional communication companies, "renting" trunked radio systems, because a small business couldn't afford to put up a tower or two, or three, depending on coverage area required. So they rent the system.

That's all that's happening here. But it's a big change for us "old timers" in the way we get our communication needs filled.

Having been around long enough to understand the need for a better way to turn the wheel, I still would like to think that agencies will maintain a back up system of there own, for most parts there present system is paid for and fully operational, I still am not convinced that the SC21 system will handle an entire state-wide traffic pattern if, and I hope it never happens, there is a major disaster. But then there will always be the good ole faithful Amateurs to depend on. As in the SAR world, its is most proper to look over the edge of the cliff before you jump, and it will not matter who says its going to be just fine. But yes I think that given a couple of years, trial and error that this could be one of the most expensive endevors that the state has promoted, but should it work, yes, if it is maintained. Will some of the lower tax based villages and ems services be able to afford this, this is one of the problems that can get out of hand. I would be safe in saying that there will be those that will at most, may have only 1 or 2 radios, and will have to work in that fashion, I wonder if anyone has complied the exact amount of communications devices are in service in the State of Illinois and totaled the cost to the tax payer on that basis ? I would voice my thoughts that the current user fee that has been set for the future is simply to high. With that thought I close and want to express that this is only my opinion based on the way things have went in the past years.

800. Starcom logging for today

Yahoo group: StarCom21
Date: 2006-10-18 02:30:16 UTC
From: Jason McDowell
Topic: 800 Message: 800

Put the UASD logger on Starcom Congerville, Peoria Simulcast &
Metamora 700Mhz towers while I slept today. Logged from about 8am till
4pm. I find the MCSO hits to be rather high but I believe the logger
may have counted multiple hits when some transmissions break up. Also
some of the MCSO transmissions were on both Congerville and Peoria
Simulcast.

30358 Mclean Co Sherif Congerville Twr 289 hits
30330 MABAS Statewide Peoria Simulcast 41 hits
51856 ? Congerville Twr 2 hits
30366 Normal PD F1 Congerville Twr 4 hits
52223 ? Congerville Twr 1 hits
30373 McLn Co Health Congerville Twr 4 hits
30328 IESMA SW Congerville Twr 3 hits
7006 SC County Callin Peoria Simulcast 3 hits
51864 ? Congerville Twr 1 hits
30331 IL Public Health Peoria Simulcast 1 hits
30321 ITTF Region 10 Peoria Simulcast 1 hits

801. TG 1026

Yahoo group: StarCom21
Date: 2006-10-18 22:26:41 UTC
From: citrus801
Topic: 6 Message: 801

FYI - I heard TG 1026 on Champaign Site 203 Sunday night. It sounded like units talking to a dispatcher. Possibly on 'channel 4'. No specific locations mentioned. Radioreference has the TG listed as possibly used by weather spotters.

Most commonly heard TG's on Site 203 - Champaign (from most-to-least often heard)
*McLean Co Shf 30358
*MABAS 30330
*IESMA 30328
*Normal Fire 30372 (not sure why but you'll hear this one for a half hour or so on various days)

Don't quote me on this, but I thought just awhile back that Motorola re-programed some of the radios to work as they should. If you can put it on line and see if you can get a call into Springfield or some where that maybe closer. I am not the guru operator of the SC21, but do know there is some that are working.
ONE QUESTION, is the Life Flight people using the SC21 now, as I monitor with a comercial radio, and don't hear them as of late on 155.34, open tone.

What are some of the pre-programmed TG's? If its the basic statewide ones like ITTF Regions, MABAS, IESMA then you should hear something as long as there is a control channel active near you. I hear the statewide TG's everyday at least 10 times or so. Try keying up on one of the statewide TG's, see if anyone answers.

RadioReference at
http://www.radioreference.com/modules.php?name=RR&sid=2324 has sites
and freqs for District 11. Check Sites 301, 305, 323, 325, 349, 353,
355 and 358 for StarCom and 359 for St. Clair County itself. The red
channels are all confirmed as Control Channels, black ones have been
heard or licensed to the sites, and may or may not actually be data
channels.

There may not actually be a site in the city of Collinsville itself,
but coverage would be drawn from nearby towers, the State Police
District 11 may also be served in part by towers in adjacent counties.

The coverage in that area is pretty good out in the country. In my travels in the area I have consistently been able to hit multiple towers from up to 60 or 70 miles away. Flat terrain will do that for you!

817. ID Tracker II logging freeware program for 396T

Yahoo group: StarCom21
Date: 2006-11-14 18:55:23 UTC
From: citrus801
Topic: 817 Message: 817

BCD396T owners:

David M. Hitchner (K5DMH) created a freeware program to log talkgroups found on your 396T. It records the number of hits per talkgroup and includes the ability to record .wav files of what the 396T monitors (I haven't tried the recording function of the software). If you don't already have logging software, check out this site. It could help identify some new talkgroups for Starcom21 or any other trunked system while you are at work, asleep or otherwise away from your scanner.

McHenry will have a simulcast (Site 120) with 6 sites:

Woodstock, Ridgefield, Harvard, Union and Hebron.

There is also spillover coverage from the Kane and Lake County simulcasts.

These sites do not appear to be on-line yet, Moto has said that all
sites should be installed by the end of this year.

rumor has it that McHenry County Sheriff and associated municipal
departments will all be going to Starcom21 the middle of next year.
I'll believe it when I see it.

I work in one of the assoc. depts for MCSO. We were informed to be Project 25 compliant within the next 12 mo.

Can anyone give me an idea what it will cost per radio to convert? I need to budget.

Project 25 compliant or StarCom21? While StarCom21 is Project 25 compliant, you can also use Project 25 on other systems or even in conventional modes.

If you are talking about joining StarCom21 then figure on anywhere from $3000 to $5000 depending on options for mobiles and portables. If you are going to convert your existing VHF system or build your own UHF or 800/700 system then you need to get professional consultants to design and cost the system.

I heard rumors that McHenry was looking at building an add-on to Lake County's EDACS system, any truth to that?

I heard it would be about $2500 to 3000 per radio. So yeah it'll cost a boatload.

824. McLean County Sheriff Dave Owens

Yahoo group: StarCom21

Owens honored at retirement party
By Laura Rineer
lrineer@...

BLOOMINGTON -- Soon-to be-retired McLean County Sheriff Dave Owens laughed as he recalled his first day in office.

“I can remember sitting alone in my office and thinking, ‘What the heck did I get myself into?’” he said. “But I hope what I’ve done in the last eight years has been positive and has helped the people of McLean County.”

Owens, who is retiring after 33 years at the sheriff’s department, was honored at a retirement party Sunday afternoon at Crestwicke Country Club. The party was also held to honor Lt. Bonnie Serone, who is retiring after 25 years with the department.

Owens said he is looking forward to spending more time with his wife, family and friends.

“I’m going to be spending a lot more time running after grandkids,” he said. “I’m also looking forward to being just plain Dave instead of Sheriff,”

Owens and his wife Bonnie have a 15-day cruise to Hawaii planned for January. He is also planning on doing some part-time contract work for the Illinois Law Enforcement Alarm System, where he currently serves as board co-chairman.

Derick Love, chief deputy of the department, has worked with Owens for more than 20 years.

“I’ll miss his easy nature,” he said. “He lets you do your job and doesn’t bother you. And he’s always very reasonable.”

Love said the general feeling around the department is that people are going to miss Owens’s presence at the department.

“He couldn’t have been a better boss and I’m sad to see him go,” he said.

Lt. Jeff Elston agreed.

“He’s been there through my entire career, what can I say?” he said. “It really becomes like a family when you’ve been together that long.”

State Rep. Dan Brady, R-Bloomington, said he worked with Owens during Brady’s two terms as McLean County coroner.

“We worked on a lot of high-profile cases together, especially after he became sheriff during my second term,” he said. “Sheriff Owens was never about fanfare. He was about getting the job done.”

Brady said Owens was instrumental in bringing the new emergency radio system, StarCom 21, to McLean County.

“StarCom 21 has been extremely helpful to this county,” he said.

Owens said he will miss the people he worked with every day.

“We’ve got good solid relationships,” he said. “Some of the people I worked with for over 20 years.”

826. UASD and ARC996 StarCom21 (IL) Files in Files Section

Yahoo group: StarCom21
Date: 2006-11-24 01:42:45 UTC
From: n9jig
Topic: 826 Message: 826

While stuck inside this week due to the flu I worked up data files for the 142 StarCom 21 sites in both UASD and ARC996. Also included is a short PDF describing the files. To use these files you must have either Unidens UASD-996 software (Free download from Uniden) or ARC996 (commercial software from www.butel.nl).

The Simulcast sites are centered on the coverage area at a point near the middle while the single transmitter sites are centered on the actual tower.

To use these files just download the Zip file, expand it, and place the files in the folder used
by your application. Usually ARC996 puts them in the c:\Program Files\Butel\ARC996PRO \data folder while UASD uses \My Documents\UASD_Database\BCD996T\UASD_systems.

These files work fine even if you do not have a GPS as the radio will disregard GPS info if a
GPS in not connected. If you wish to use these files without the GPS feature but you do have a
GPS connected to your radio go into the software and un-click the "Use GPS" feature for the affected sites.

This is a Motorola system, no order is required. All you need to enter is the active control channel. The radio will locate the rest of the freqs automatically.

If you hold on the control channel the radio should read out the tower number and system ID. If this information displays then you should be able to hear any voice traffic when it comes thru.

From: Rich Carlson, N9JIG
Topic: 831 Message: 834

The Pro97 will not work on StarCom21. This is an entirely digital 9600 system, the Pro97 is an analog only radio and only supports 3600 baud Motor trunking.

The ***ONLY*** scanners that will track StarCom21 completely are the BC396 and BC996.

The Radio Shack Pro96 and Pro2096 will track on 800 MHz. sites only. They can hear 700 MHz sites only after a software mod, but will not track them.

The BC785 and BC250 will hear the audio only on 800 MHz sites but not track the system and will not hear 700 MHz at all.

im wondering if there is a list if Starcom radio ID's
im using pro96Com for Sites 101, 102, 108, 115 (so far) im playing on going out to boon county to log out there but back to the point i see the same radio id's over and over and would like to know what town it is

839. How's reception on the simulcast sites with a 396T?

Yahoo group: StarCom21
Date: 2006-12-06 00:17:26 UTC
From: citrus801
Topic: 839 Message: 839

I've read that in Michigan, Arizona, and Hamilton County, Ohio, 396T users trying to listen to 9600 ASTRO Simulcast systems, especially those systems with CQPSK modulation are getting "choppy" P25 reception even with a full singal strength. The CARMA Illinois Mutual Aid Guide lists Starcom21 as a CQPSK system.

My question is for those who monitor the Starcom21 simulcast sites with a 396, is the audio "choppy" or does it sound just as good as when listening to other non-simulcast Starcom21 sites?

My concern is if I will get "choppy" reception while listening to the new Champaign County METCAD ASTRO simulcast TRS when it comes online (as other have reported with the Macomb County TRS in Michigan as well as in a few other cities). Also, is there a way to know if a new simulcast ASTRO TRS will be CQPSK or C4FM?

Thanks

In the Chicago area I monitor Sites 101, 108 and 115 on a regular basis and they all sound just fine on both my BC396 and my BC996. Each of these sites are simulcast, and in fact I went out last weekend to verify that each of the 108 sites are operational in Lake County (they were).

Yeah the audio sounds great. Almost as if there sitting right next to me. Course a great deal of factors come into play with digital reception and the towers. Hills, other interference towers like cell & tv, etc.

I spoke with a tech last Friday. He informed me that in many districts in downstate IL the radios are not even ready to being installed in the squad cars and some employees have yet to undergo training on the system. He stated that they were recently advised Spring 07 would be a very optimistic date, with very late 2007 (November-December) a more probable switchover timeframe.

However, the local techs (can't speak for all districts) have been changing the installation protocalls in the squad cars in anticipation of the switch. Newer consoles are being used that will make the switch quite simple. In addition, the new lowband mobile installations are more temporary, utilizing the 1/4 wave base loaded NMO antenna that can be swapped out when lowband is scrapped versus the old ball mount and whip setup.

I had heard they wouldn't be on the starcom until spring of '07 at the earliest. Someone commented a while back that it would be more like Sep. of '07.

845. Request status of STARCOM21 sites in Rock Island County

Yahoo group: StarCom21
Date: 2006-12-08 07:11:58 UTC
From: Jason W. Watts, KB0KGH
Topic: 845 Message: 845

On a recent trip to Davenport, I did have the sites programmed for Rock Island County as listed on RadioReference. I was in NW Davenport and I wasn't able to hear. I see the sites are at 100 W according to the FCC Licenses, so is there something I'm doing wrong? Or are the sites not even up yet?

Thanks,

Jason W. Watts

I notice the freqs have five decimal places in the 700 mhz mode via radio reference but when I attempt to program my 396t with the UASD software it defaults to four decimal places - why does it does this and does this mean I won't be able to monitor the freqs properly?

This is the same situation we had 20 years ago when we started going to 4 digits from 3...

The radio will program to the correct freq whether you use all 5 digits or just the first 4 when programming it.

Actually you are like me. I am hear in the centtral north area of
Davenport. At Home I barely make out any control channels. Best I can
get is when I go to Lookout Park by the old marycrest College or at the
eastbound rest area on I-80 in Bettendorf. The sites seem to be pretty
directional around here.

Fairview prepares for future storms with new storm radios
BY LAURA GIRRESCH
News-Democrat
FAIRVIEW HEIGHTS - Following a year full of storms, city leaders said a new communications system will make all the difference in response time and save the city money.

The city is improving the way police officers, firefighters and public works employees talk to each other while on the job, so they can know where help is needed and stop costly damage more quickly.

Mayor Gail Mitchell said he doesn't know how the city will pay cleanup costs from the Nov. 30 ice storm, which could cost the city $242,000.

In 2003, St. Clair County spent $8.9 million in federal grants and county funds to establish a digital radio system.

Currently, several municipalities in the county use the system, and Fairview Heights will soon join them.

In July, the city's volunteer Fire Department received a $305,000 federal grant to buy new portable and mobile radios and hire dispatchers. The Police Department will spend about $300,000 to connect to the new system, which could be ready in Fairview Heights in four months.

When Police Chief Ed Delmore started his job in 2005, he wanted a new communications system for the department. The April tornado, July's major storms, and the Nov. 30 ice storm have just underscored the need.

During the storms, police, fire, and rescue crews across the county couldn't communicate with one another in the field with the current radios, which have poor sound and loose signal easily.

When the ice storm hit, a handful of department officials had test radios for the new system, but their officers in the field did not.

The radios helped, but on a small scale.

"It was a Band-Aid at best," Delmore said.

City Administrator Don Greer said the new system will boost timeliness, which is key for the city's agencies in preventing costly damages.

856. Lee County SO on StarCom21

Yahoo group: StarCom21
Date: 2006-12-17 00:37:39 UTC
From: Rich Carlson, N9JIG
Topic: 856 Message: 856

I have been hearing TG 1076 on a couple sites in the Rochelle area over the last month or so and finally ID'd it as the Lee County Sheriff. They were heard on the 111 (Rockford), 124 (Forreston) and 136 (Rochelle) sites today. I put in 154.785 (the VHF channel for LCSO) and it was silent.

I have also heard them coming thru the 108 (Lake County) site in the past so either there is a radio affiliating in this area on it or there is something else happening.

On the 101 (DuPage County) site I was hearing TG 1077, as 2 guys were testing waterflow alarms in a building.

Also, I was able to confirm today that none of the 126 (Kane County) or 120 (McHenry County) sites are operational yet, and that the following sites ARE working:

101, 108, 111, 113, 115, 124, 135, 136

857. Bloomington PD 2 simulcast on TG 30375 -- status

Yahoo group: StarCom21
Date: 2006-12-18 18:25:13 UTC
From: citrus801
Topic: 465 Message: 857

I'm inferring that the BPD 2 453.925 simulcast on TG 30375 is activated "as needed" (not on a full-time basis like the 30378 patch), as was the case Friday when it was used by BPD and NPD Proactive units dispatched by Bloomington Dispatch. On Saturday and Sunday, Bloomington PD dispatch was on BPD 2 because BPD 1 had radio problems, but on these days BPD 2 wasn't simulcast onto Starcom21.

Sheriff's department set for upgrade
By STEVE HORRELL, stevehorrell@hotmail.com
12/26/2006
Email to a friendPost a CommentPrinter-friendly
Thirty-year-old radio system will be replaced
The Madison County Sheriff's Department has begun the first phase of a three-month project to replace its 30-year-old radio communication system with a state-of-the-arts system.

On Friday, a building that will house the radio components was in place behind the Madison County Jail. Workers had spent most of Wednesday driving it over to the jail and eventually hoisting it by crane over the fence. "I'd say by spring this should all be up and running," Madison County Sheriff Robert Hertz said. "There won't be a more state-of-the-art system around."

The building will store radio components in one room and a generator in an adjoining room. "The generator will be providing power in case the regular power fails," Hertz said. "It's important that those radios remain functional even during a storm or an outage."

Conduit runs from the building underground to a new radio room inside the jail where workers on Friday were installing drywall.

The new radio room is down the hall from the old radio room. "It's pretty tight quarters," Hertz said, pointing to the equipment. "Some of it is old, but it's still functional."

Hertz said the old system was brought over from the old jail when the new one on Randle Street opened 23 years ago.

Madison County will pay about $2.2 million for the system, manufactured by Motorola. Hertz said the new system, known as Starcom21, will improve communication between the sheriff's department and other public agencies.

The county will pay for the project using the remainder of the $17.7 million in tobacco settlement money. The money stopped accruing last month when the Supreme Court let stand a ruling dismissing a $10 billion verdict against Phillip Morris USA. The trial was conducted in Madison County. In March of 2003, Circuit Judge Nicholas Byron ruled in favor of 1.1 million people who smoked "light" cigarettes in Illinois.

Phillip Morris' parent company, Altria Group, Inc., argued that it could not afford to pay a $12 billion bond, and Byron reduced it to $6 billion.

Altria placed the term note into an escrow account with U.S. Bank. The money earned 7 percent interest.

Madison County was allowed to keep the $17.7 million it got in interest generated from the bond. It used the windfall to pay off a $5.5 million bond on the Administration Building, to offer early retirement to employees, and to purchase and renovate the Criminal Justice

Center on St. Louis Street in Edwardsville.

Over the years, the county has repeatedly turned down Hertz's request for a new radio system because of budget restraints. This year the Madison County Board approved his request in July.

From: citrus801
Topic: 862 Message: 862

I've ran search and store on quite a few occasions over the last few months in Bloomington-Normal and Champaign and here are the unidentified talkgroups that the scanner found active on Starcom21:

Normal Site 229
-51868
-30448
-13004
-32662
-4027
-4026
-13000

Champaign Site 203
-51864
-2038
-51865

Also, I noticed over Christmas/New Years that Pontiac Site 207 is off the air and no control channel is currently transmitting from this site.

Starcom21 Yahoo!Group Files section:

I changed the two site numbers maps so that 700 MHz sites show up with a different colored dot to distinguish them from 800 MHz sites. I've also posted Starcom21 ARC396 MEM files for McLean County, St. Clair County public safety, and Lee Co Sheriff.

863. 116 new state police cars waiting to hit the highways

116 new state police cars waiting to hit the highways
Vehicles being phased in as old ones are retired

By DANA HEUPEL
STATE CAPITOL BUREAU
Published Thursday, January 04, 2007

There were 116 state police cars at the Illinois State Fairgrounds Wednesday, but nothing sinister was going on.
The new Ford Crown Victorias are being stored there until they can be put into service, said Master Sgt. Rick Hector, a state police spokesman.

He said the cars began arriving at the fairgrounds last April and are gradually replacing patrol vehicles that have been driven to destruction.

"Ideally, we shoot for 80,000 miles, which is normally about four years," he said.

But some of the cars can remain on the roads for as long as a decade, depending on the mileage, Hector added.

Early last year, state police estimated the average mileage for the 2,300-vehicle fleet at 122,000 and said about 700 cars had traveled more than 150,000 miles. The current replacement of 500 cars will lower that average only to about 108,000, Rep. Rich Brauer, R-Petersburg, said at the time.

Gov. Rod Blagojevich announced the replacement of the 500 state police cars last January. To pay for it, he and lawmakers enacted legislation increasing fees for traffic offenders who ask for court supervision.

Becky Carroll, a spokeswoman for Blagojevich, said the vehicles are being leased through a master contract under the state Department of Central Management Services. She said Wednesday evening that details of the leases were not immediately available but estimated the cost at $5 million to $6 million.

Hector said 325 Crown Victorias came from Landmark Ford in Springfield and 175 Chevrolet Impalas from Miles Chevrolet in Decatur. He said 294 vehicles arrived at the fairgrounds from April through June, and 206 more came in October.

Once the new patrol cars arrive at the fairgrounds, workers must spend a week on each to install equipment such as radios, mobile data computers and cameras, Hector said. The cars are stored at the fairgrounds while waiting to be prepped for service because of its central location in the state and its secure area, he said.

Jeff Squibb, a spokesman for the Illinois Department of Agriculture, which manages the fairgrounds, said it is not uncommon for the state police and other state agencies to use facilities there when they are not rented out for other events. State police also conduct training exercises, such as evasive driving, traffic stops and emergency operations, on the

grounds, he said.

The Department of Agriculture does not charge the state police rent to store the vehicles at the southwest corner of the fairgrounds, near a state police communications building, he said.

"It's kind of a reciprocal agreement," Squibb said. "... They don't charge us for providing security at the state fair, either."

All of the remaining 116 Crown Victorias are expected to be on the roads by March, Hector said.

Dana Heupel can be reached at 788-1518 or dana.heupel@sj-r.com.

870. TG 9015 Starcom ISP Dist. 7 testing

Yahoo group: StarCom21
Date: 2007-01-06 03:27:18 UTC
From: Jason McDowell
Topic: 870 Message: 870

It's confirmed that ISP Dist. 7 ID channel 7A is TG 9015. 2 Troopers testing it and identified this channel as Dist. 7A and that they were pulling into post. Audio loud and clear on my end and stated it was clear on there end. Almost like talking thru cell phones they said. Proceeded to talk about how the mobile works and what it identifies as in dispatch and on the portable. No dispatch testing yet though. They also said they tested with a couple units down in Dist. 20 but don't know the TG ID. Heard this on Peoria simulcast Tower at 21:00ish Friday.

Jason

871. Starcom21 700 Mhz in Rock Island County

Yahoo group: StarCom21
Date: 2007-01-06 10:47:22 UTC
From: Michael W. Scheel
Topic: 871 Message: 871

The other day (tuesday) I was searching the 700 band and got 775.33125
as site 136 (verified with radioreference.com). This morning I picked it
up again and it had the site number of 128 (Rock Island County / Moline
again according to radioreference.com) which is the first 700 Mhz site
in the county if correct. Still can't pick it up at home though. the
location I was at is further north in Davenport by I-80 but higher and
may of been line of sight to the transmitter site.

--
===
It finally got down to the question of which should be permitted
to remain in the field--the war correspondents or the soldiers.
There wasn't room for them both. It was decided to retain the
soldiers.

872. RadioRefernce.com (ISP D18)

Yahoo group: StarCom21
Date: 2007-01-07 03:40:02 UTC
From: jburgess1974
Topic: 872 Message: 872

I was just out on radioreference.com and noticed under ISP Dist 18 mentions reference to rumor possible ISP D18 going fully online Feb 07. How accurate could this rumor be and since D09 & D18 are dispatched from the Springfield Communications Center located just South of Lake Springfield, could ISP D09 being going fully online along with D18 if true?

874. Have some site questions

Yahoo group: StarCom21
Date: 2007-01-07 16:08:17 UTC
From: Dave
Topic: 874 Message: 874

I have a BCD396T and need some programing help. Assume for the moment this is for just one district (District 11), not statewide.

1. If a district has multiple sites and I can receive them, do I program each site as a seperate system in the scanner, or can I just enter the freqs from each site into one system in the scanner for example ISP or District 11?

2. If I'm listening to say Site A, and a car use using another site say Site B, I assume I won't hear that transmission unless I have site B programed, is this correct?

3. Are the cars say in the northern part of the District on site A able to hear hear and communicate with the Cars on the the southern site B?

Basically, what is the best way to program and monitor a District wide system?

Thanks for any help and insight.

875. Re: *STARCOM21* Have some site questions

Topic: 874 Message: 875

StarCom21 has several groups of Simulcast sites. If you download the CARMA Profile from the Files Section or the CARMA Profiles Page at http://www.carmachicago.com/profiles (scroll down, it is on the right lower part of the page) you will see the Simulcast sites listed there. The sites listed in colors (yellow, blue or green) are Simulcasts, and these sites share the same frequency sets among each site in that group. For these sites you only need a single System programmed for it, each specific site in the group sends the same data and conversations in exactly the same freqs from all towers.

In the District 11 area (to cite your example) only the St. Clair County system is simulcast all the true StarCom sites are individual towers.

For non-simulcast sites you would program each tower separately as a Site within a System. This way they can all share the same talkgroup list. To cover District 11 I would suggest that you program in Sites 325, 323, 305, 301, 355 and 358 for sure, and if you like to listen to things at the edges of the District think about 333, 349, 314, 330, 312, 307, 306 and 356 as well.

The one thing to remember about StarCom21 is that the way the sites are listed on RadioReference can be confusing. The sites are not necessarily geared towards a specific District or County for coverage. They are set up to provide coverage to geographical areas but not to use county or district borders as boundaries. Look at the site map that is in the Files Section (by Citrus801) to see the general idea of tower locations to determine coverage for your area. I use a 20 to 30 mile circle around each tower to determine maximum coverage, due to the flat terrain in Illinois that is a pretty good bet.

I do not suggest entering freqs from multiple towers in the same Site on your 396 unless they are far enough apart not to be heard at the same time. For example, you can program sites 304 and 306 into the same site as they are not likely to be heard at the same time, but don't try to put the freqs for 323 and 325 in the same Site, the radio will lock onto the first control channel it finds and disregard the other(s).

As for whether the cars in one part of the district being able to hear the others, if they are all affiliated to the same Talkgroup then yes, they would. If Car 11-1 is affiliated to Talkgroup 9999 on Tower 325 and Car 11-2 is affiliated to the same talkgroup but at Tower 314, both towers would broadcast the same conversation, but on different frequencies. This way both cars can hear the same

conversation even though they are not in range of the same tower.

Topic: 874 Message: 876

Thanks Rich for the great explanation. This paragraph still confuses me. The part about each site within a system and you later say not to put adjoining sites in the same system (I now understand thst part, I think).

"For non-simulcast sites you would program each tower separately as a Site within a System. This way they can all share the same talkgroup list. To cover District 11 I would suggest that you program in Sites 325, 323, 305, 301, 355 and 358 for sure, and if you like to listen to things at the edges of the District think about 333, 349, 314, 330, 312, 307, 306 and 356 as well."

Now the way I understand it, on the BCD396T I would assign site 325 as its own system (BCTD396 terminology) and 353 as its own seperate system, 355 as its own and so on so they would be independent of each other, copying identical talk groups to each one. I could also assign the distant sites to each of these as desired.
Did I come close to grasping the set up for the 396?

I'm getting St. Clair Co ok, but I think my problem with D11 was having adjacent sites in the same sytem (knowing the little activity there is).

Oh heck, one more question, FM or Auto modulation?

Thanks again,
Dave

877. Re: *STARCOM21* Have some site questions

From: Rich Carlson, N9JIG
Topic: 874 Message: 877

You should enter each StarCom site number as it's own "System" in the 396. For Simulcast sites (359 for example) you only need to use one 396 "System", as each of the Starcom/St. Clair sites under 359 share exactly the same freqs etc.

I was confusing things a bit with the 996. The 996 allows you to program in one main System (Starcom for example) and then multiple Sites (359, 325, 305, etc.) within it. You can then turn off individual Sites as needed.

The 396 does not have that ability, you just program each StarCom Site as it's own System.

Clear as mud, eh?!

Topic: 879 Message: 879

Any updates, corrections, duplicates, questions or SUGGESTIONS -- PLEASE let me know.

Are I-CALLS actual radio IDs transmitting to another radio ONLY or ????? (like a NexTel?)

Do each transmission show the radio ID's currently transmitting?
If so, we could create a wiki page to update who is who, such as 5-54 is xxxxxxx radio ID.

Thanks
Terry

880. Plainfield ILL on Starcom

Yahoo group: StarCom21
Date: 2007-01-10 00:07:36 UTC
From: dataman60435
Topic: 880 Message: 880

Today along with the CSO's some PD patrols were using TO113-D5 and TO101-Dupage for there calls. I had both towers going with the Uniden 396 using the "Custom Search" on 700....There were really no dropouts and the audio was great. On the PRO96/2096 conventionaly the digital was excellent but would not stop on the 700 freqys , had to hold on each one ...For the person that asked this question here i read where you should use "FM" on all P25 systems, on the Starcom calls for Plainfield i have set the Uniden 396 to AUTO 7 with the AGC "ON"....

881. Peoria area Starcom loggings today

Yahoo group: StarCom21
Date: 2007-01-10 01:38:20 UTC
From: Jason McDowell
Topic: 881 Message: 881

Well I put the UASD logger on for about 10 hours today while I slept. I also put the recorder on but for some reason the clarity was rather choppy today. Maybe from the wind, I dunno. I'm not sure which ID's belong to what but other than the regular McLean County traffic, I heard a Pontiac PD unit calling another one. Some techs talking from around Effingham. A lincoln PD unit calling another one and some various EOC's talking back and forth. Anyways heres what all I got from the Peoria Simulcast, Congerville and Metamora 700 mhz towers.

882. Starcom ?'s

Yahoo group: StarCom21
Date: 2007-01-11 00:06:45 UTC
From: Mike
Topic: 882 Message: 882

I haven't been very active in this group, and I regret that as the time comes upon us to make the change to the new system.

I couldn't find a file which stated which scanners were good to cover the system maybe there is one and I am missing it.

I was looking at getting a new scanner and selling off my BC898T. I understand the Pro-2096 is a commonly used Digital scanner anyone comments on it?

883. Re: *STARCOM21* Starcom ?'s

While the Pro2096, Pro96 BC796 and BC296 work fine on 800 MHz.
Starcom21 sites, it will not track any sites that use 700 MHz. The
only scanner out there now that can properly track all StarCom21
sites are the BC996 and BC396 from Uniden.

Just to confuse the matter a bit more; the Pro96 and 2096 can hear
700 MHz. after a simple programming trick, it will not track them.

With my outside antenna I can pickup the control channel at D-18 Nilwood, 775.3062. I am in Chatham. Also heard traffic today on D-9 866.9250 ISP Aircraft calling on what they referred to as "AIROPS", TGID 13105.

From: Jason McDowell
Topic: 887 Message: 887

Little bit ago on way to Walmart, heard a little blib on TG 13005 on the Peoria simulcast tower. Wasn't very clear on my end and could tell they were having troubles also. Was able to copy a Lincoln 6 calling some other unit and also heard a Springfield mentioned, rest was unreadable.

890. TG: 13007 = ISP D10

Yahoo group: StarCom21
Date: 2007-01-15 17:33:09 UTC
From: citrus801
Topic: 890 Message: 890

ISP D10 is testing on 13007. It sounded very clear on my 396 (I had AGC off and P25 threshold set at 5 and modulation set as FM). Operations are still heard on 154.695 (not simulcast onto 13007), but I have heard an alert message simulcast on 13007 and 154.695. There was a slight delay where 13007 is a half-second behind what was broadcast on 154.695. I haven't heard 42.540 today but I'm not saying that it isn't used anymore either.

Topic: 893 Message: 894

StarCom21 is the name of the system being installed in Illinois.

APCO25 is the technical protocol developed by APCO, this defines the various parameters of the trunking systems. APCO16 defines a different type of trunking etc. APCO25 uses digital modulation of a specific type, a specific type of control data signal and other technical specs.

So, basically, StarCom21 is an APCO25 compliant system.

From: Tom Yu
Topic: 890 Message: 895

Tonight I heard a D 10 trooper X 17 on TG 13007 just after 1 AM talking with Pesotum on Tower 203. Both sides could be heard loud clear but I'm 100% not sure if he was on a Starcom radio or if it was just patched but I was scanning District 10 high and low band channels on another radio and did not hear anything. The kind of strange thing was that I could hear traffic on both high and low band and it was not being rebroadcast on Starcom. I also copied another trooper who was working Vermilion county but did not catch the car number (could have been the same one).

The 785 only tracks systems that run 3600 baud. The Starcom system is 9600, so the 785 won't follow the system. You can program all of the frequencies for a tower and it will decode the digital, but it won't follow the channel switching. You can hear conversations if there is only one conversation on the system. Otherwise, you will get a mix of more than one conversation as the radio scans. At present, most towers are not carrying any traffic. Testing is being conducted at many locations, so you might hear something, but infrequently. If you travel around the state, you will find some locations using 700 MHz frequencies. The 785 won't go there.

I'm not familiar with the BC785D banks but Starcom is a P25 system. I
do know that you won't be able to track the 700 mhz freqs though.

Just an FYI on the coverage area, D22 is not being received by the Congerville, Peoria Simulcast or Metamora towers. Appears to cut off just south of McLean County.

904. New CARMA StarCom21 Profile

Yahoo group: StarCom21
Date: 2007-01-18 13:00:40 UTC
From: n9jig
Topic: 904 Message: 904

I have uploaded the latest CARMA StarCom21 Profile to

http://www.carmachicago.com/profiles/StarCom21.pdf

New to this version is a fill-in table for ISP and other State Talkgroups. Each District will
have a standard channel plan, with the following Talkgroups available:

Dispatch A
Dispatch B
Dispatch C (some districts)
Detail A
Detail B
Detail C (some districts)
IREACH Patch
ISPERN Patch
Local Patch (Probably the District HF-2 channel)
Car to Car
Investigations
Vehicular Repeater (actually probably a simplex freq instead of talkgroup)

Thanks to our friend Ron we already know District 5's A and B Dispatch talkgroups, close monitoring of the system will help us fill in these blanks as they start testing and using them.

There are also fill-in tables for District Chicago, which has more groups available than other districts, as well as various Zone-wide and Statewide groups.

As you determine the talkgroup assignments please fill in the table on your copy of this Profile and send the information to the CARMA and StarCom21 Lists. If you are a member of the RadioReference community please also let them know as well. Any information CARMA gets on this is shared with RadioReference and vice-versa.

Also included is Tom Laue's most excellent StarCom21 Map showing tower locations (Uniden format). This map is also in the Files Section along with one with RadioShack style site numbers.

I heard that too on TG 17014 site 203. I heard it from the other room, but it sounded to me like he said unit "Bravo 22-42" so I assumed it was ISP D22.

Autosearch found a hit on TG 13008 on Wednesday on site 203 in Champaign.

Seems the best time to hear ISP on Starcom21 is around 11pm or 7am when units are beginning/ending their shift, sometimes they get on the air for a radio test. ISP D10 is still using only VHF for their operations (just testing, etc. on Starcom21). Has ISP D22 stopped using VHF completely?

It appears that there is a lot of testing, connecting, etc. right now. I heard a MABAS channel on the Champaign site 203 a few minutes ago. Those talking were in the Chicago Western suburban area. It was just conversation, no dispatching. Mostly plans for tomorrow's work. McLean County Sheriff appears on our tower frequently now. I think there is a lot of testing between locations as well as I have heard some of that type of traffic. I have heard no real ISP traffic on it yet. I'm sure we will soon. Until then, we might hear from any location on the local towers as a test.

Topic: 908 Message: 908

I heard a totally unreadable signal on talk group 17074 this afternoon. It was totally garbled and unreadable. I am still hearing mostly clear transmissions on talk group 17014, although a few are garbled as well. Has anyone done the upgrade to their pro-96 to 1.3 from the R.S. website? I have read where in some areas it made the reception worse and they went back to the original setting. When I hear these "garbled" transmissions, is that my radio or is it just the technitians doing testing? Thanks for any info, still learning. Also, sometimes I can hear the dispatcher talking on 17014 but cannot hear the unit he is talking to. What is the cause of this?

From: kd4ygg
Topic: 912 Message: 912

Leaving work this afternoon at approximately 3:45 PM (19-Jan-2007), I turned on the PRO-96.

Caught talkgroup 17038 ISP District 11 Collinsville Dispatch A off the Darwin, IL site in Clark County.

Interesting pursuit near the Alton Belle casino.

Even more interesting is the fact that the Darwin site sits on the Illinois-Indiana state line in the far eastern portion of ISP District 12 Effingham!

Things are getting interesting!!!

Question, isn't all of the data, FM, norrow band, digital, or is there open voice mixed into the system.
Another question, if one buys the very same scanner, can another person that has there's setup, just load the data into it. Such as in the Peo. Taze. area.
Also does one need to load a seperate data bank into the scanner for different areas, example, what works in the Peoria area will not work when in Springfield, or does it. Or do you just keep loading in data to be able to travel thru-out Illinois? Sounds like a stupid question to even me, but as things are going toward being able to hear more than testing, or so the group says, it maybe the time to purchase a scanner.

St Louis (D11) area listeners...

Anyone been noticing the strange sounds coming out over ISPERN (155.475) ever since they PLUGGED in the patch to the STARCOM21 system?

Mainly, a strange serious of beeps after each transmission from D11.

D11 is a wild one. The St Louis area is good listening. Action is easy to find.

But as of recently, since the PLUG into Starcom21, there have been some weird sounds on 155.475.

I will admit this. The ISPERN patch on STARCOM21 is the best way to listen to 155.475 ; especially for those of us in Missouri with -NO- rooftop base antenna for 155.475. This way we will hear ALL comms (dispatcher, mobiles & portables) loud and clear.

Of course, those that listen often, know that D11 pursuits frequently come into St Louis City. A crook's mentality is, let's loose them in St Louis City. So they cross the PSB. Sometimes the MLK. Sometimes the JB. Very rarely, cross the COR.

From: kd4ygg
Topic: 922 Message: 922

Have the BC396 going on hear at work today.

Heard an Amber Alert for the kids from northwest Indiana on Talkgroup 17038 from both Darwin and Casey towers. Alert was preceded by the typical ISPERN District 12 annoucement like "back in the old VHF days".

No other dispatch type traffic. I guess the ISPERN alert I heard on Friday was just a rebroadcast from District 11 ISPERN.

929. ISP Dispatch Talkgroups - A Pattern ???

Yahoo group: StarCom21
Date: 2007-01-23 03:33:16 UTC
From: kd4ygg
Topic: 929 Message: 929

Even with the limited information so far, it looks like a pattern emerging for at least the ISP Dispatch talkgroups.

Still trying to decipher the patterns for ISPERN, IREACH, DETAILS, CAR, INVESTIGATION, LOCAL talkgroups.

I know the system is in a state of flux, and anything can happen but here's what it APPEARS (and I strongly stress APPEARS) to be:

ISP North Zone - 9000 series talkgroups
9000 District 1A
9001 District 1B
9002 District 2A
9003 District 2B
9004 District 2C
9005 District 3/4A
9006 District 3/4B
9007 District 3/4C
9008 District 3/4D
9009 District 3/4E
9010 District 3/4F
9011 District 3/4G
9012 District 3/4H
9013 District 5A - Confirmed
9014 District 5B - Confirmed
9015 District 7A - Confirmed
9016 District 7B
9017 District 15N - Unsure If Tollway Is In Pattern
9018 District 15N - Unsure If Tollway Is In Pattern
9019 District 16A
9020 District 16B
9021 District 17A
9022 District 17B
9023 District 21A
9024 District 21B

ISP Central Zone - 13000 series talkgroups
13000 District 6A
13001 District 6B
13002 District 8A
13003 District 8B
13004 District 9A
13005 District 9B
13006 District 9C
13007 District 10A - Strong Indication This Is Correct
13008 District 10B

13009 District 14A
13010 District 14B
13011 District 20A
13012 District 20B

ISP Southern Zone - 17000 series talkgroups
17000 District 11A
17001 District 11B
17002 District 11C
17003 District 12A - Confirmed
17004 District 12B
17005 District 12C
17006 District 13A
17007 District 13B
17008 District 13C
17009 District 18A
17010 District 18B
17011 District 19A
17012 District 19B
17013 District 19C
17014 District 22A - Confirmed
17015 District 22B
17016 District 22C

AGAIN, THIS IS NOT OFFICIAL - JUST LOOKS LIKE A VERY UNIFORM, WELL THOUGHT OUT PATTERN OF THE TALKGROUPS BASED ON WHAT WE'VE SEEN SO FAR.

If you hear them, let us know!!!

930. Correction: 17038 - ISP District 11 ISPERN

Yahoo group: StarCom21
Date: 2007-01-23 03:58:58 UTC
From: kd4ygg
Topic: 922 Message: 930

After reviewing the talkgroups and what I heard, 17038 is ISPERN but for District 11 Collinsville.

All transmissions both last Friday and today gave the callsign for ISP District 11.

931. Southern Zone - Another Piece of the Puzzle???

Yahoo group: StarCom21
Date: 2007-01-23 04:06:22 UTC
From: kd4ygg
Topic: 931 Message: 931

More pattern analysis.

All of this is based on the talkgroup layout provided by Rich - THANKS!!!!!!!

Based on previous post that 17038 is indeed ISP District 11 ISPERN....

17017 - 17034 are zone-wide talkgroups with the exception of the following:

17080-17085
Three Auxiliary talkgroups, Radio Tech talkgroups, Fire Interop, and EMS Interop.

So Here's the best guess for 17035-17079:
17035 D11 Detail A
17036 D11 Detail B
17037 D11 IREACH
17038 D11 ISPERN
17039 D11 Local
17040 D11 Car-Car
17041 D11 Investigations
17042 D12 Detail A
17043 D12 Detail B
17044 D12 IREACH
17045 D12 ISPERN
17046 D12 Local
17047 D12 Car-Car
17048 D12 Investigations
17049 D13 Detail A
17050 D13 Detail B
17051 D13 Detail C
17052 D13 IREACH
17053 D13 ISPERN

Your mention of the radio zones. I wonder if down the line they might go to regional dispatch centers. Say chicago, northwest, central and south. With a statewide system the possiblity is there. Then since the cost of not building a new dispatch center for each new districts. They could go to smaller districts in some areas. Kind of like how the CHP is setup in the Los Angeles/SF bay areas.

Just daydreaming at four a.m.

Subject: *STARCOM21* ISP Dispatch Talkgroups - A Pattern ???

Even with the limited information so far, it looks like a pattern
emerging for at least the ISP Dispatch talkgroups.

Still trying to decipher the patterns for ISPERN, IREACH, DETAILS,
CAR, INVESTIGATION, LOCAL talkgroups.

I know the system is in a state of flux, and anything can happen but
here's what it APPEARS (and I strongly stress APPEARS) to be:

ISP North Zone - 9000 series talkgroups
9000 District 1A
9001 District 1B
9002 District 2A
9003 District 2B
9004 District 2C
9005 District 3/4A
9006 District 3/4B
9007 District 3/4C
9008 District 3/4D
9009 District 3/4E
9010 District 3/4F
9011 District 3/4G
9012 District 3/4H
9013 District 5A - Confirmed
9014 District 5B - Confirmed
9015 District 7A - Confirmed
9016 District 7B
9017 District 15N - Unsure If Tollway Is In Pattern
9018 District 15N - Unsure If Tollway Is In Pattern

9019 District 16A
9020 District 16B
9021 District 17A
9022 District 17B
9023 District 21A
9024 District 21B

ISP Central Zone - 13000 series talkgroups
13000 District 6A
13001 District 6B
13002 District 8A
13003 District 8B
13004 District 9A
13005 District 9B
13006 District 9C
13007 District 10A - Strong Indication This Is Correct
13008 District 10B
13009 District 14A
13010 District 14B
13011 District 20A
13012 District 20B

ISP Southern Zone - 17000 series talkgroups
17000 District 11A
17001 District 11B
17002 District 11C
17003 District 12A - Confirmed
17004 District 12B
17005 District 12C
17006 District 13A
17007 District 13B
17008 District 13C
17009 District 18A
17010 District 18B
17011 District 19A
17012 District 19B
17013 District 19C
17014 District 22A - Confirmed
17015 District 22B
17016 District 22C

AGAIN, THIS IS NOT OFFICIAL - JUST LOOKS LIKE A VERY UNIFORM, WELL THOUGHT OUT PATTERN OF THE TALKGROUPS BASED ON WHAT WE'VE SEEN SO FAR.

If you hear them, let us know!!!

Years back the ISP studied and proposed a reorganization that merged and realigned districts so that there were about 12 (IIRC) statewide. The only thing that came of this plan was the merger of D3 and D4 to become District Chicago and the combining of dispatch functions for D18 at Springfield with D9.

I have a copy of this study someplace and will look for it later.

This plan would have returned the State Police back to a similar layout it was in the early 1960's but without the subposts. At that time here were 14 Districts and several subposts. Subposts had dispatchers, and were often headed by a Lt. instead of a Captain. Subposts used the same freqs as the main post.

The StarCom21 system is set up in 3 Zones now (North 1, Middle 2, South 3) and that is the regions used for several channel groups.

I have not heard any rumors about merging communications further, the big reason against this would be that dispatchers would not be as familiar with a larger area and Command & Control gets more unwieldy over larger areas. The reasons for this would be cost savings for reduced infrastructure and personnel.

Arizona went to regional dispatch centers for it's State Patrol as part of the UHF upgrade 10 or 15 years back and that seemed to work pretty well,

Might make sense in down state, seems like there are alot of counties for example dist 12 has about 7 with about 100 troopers and no cities larger than about 25,000 as an estimate but that includes I-57 and I-70 with good mileage of both.
Mike

936. ISP District 10 Dispatch A Confirmed

Yahoo group: StarCom21
Date: 2007-01-23 18:22:50 UTC
From: kd4ygg
Topic: 936 Message: 936

Confirmed 13007 as District 10 Dispatch A this AM.

Talkgroup 13007 loud and clear on the way into work this morning. Receiving it off the Darwin tower just south of Marshall. Unit X-17 (DOT Enforcement) stopping vehicle in Champaign County.

17038 also active with District 11 ISPERN multiple times. Still unsure why District 11 ISPERN would be broadcasting this far east, unless testing is still in process.

937. IDOT on Starcom?

Yahoo group: StarCom21
Date: 2007-01-24 01:58:02 UTC
From: tjrapps@sbcglobal.net
Topic: 937 Message: 937

Does anyone know if the state snow removal/salt trucks which are currently on low band (47-48 mhz) will also be put on Starcom? I'm thinking with the way the state is financially, they will be on low band for some time to come.

From: mws72@qconline.com
Topic: 939 Message: 939

I finally heard some traffic on Starcom21. I was scanning the local sites this morning while out this morning. Still can't heard anything at home though. Anythng I caught a brief transmission on 9019. But didn't heard what was said and couldn't get the site as I was in traffic. Sure surprised me when I heard the voice as it didn't have any of reception problems I have heard with other P25 systems.

My understanding is that IDOT at least down here in Region 7 I believe, which is based out of Effingham, just did some radio upgrades, in which they know by the transmitter which truck or unit is calling in, as it is displayed on the console, why spend that money then go to Starcom?

I'm not sure if they are here in IL but for the Safe-T statewide system in Indiana, all of the DOT and Corrections is on that system. So I imagine they'll switch eventually seeing as its a statewide system.

2 points of interest regarding the IDOT and IDOC systems.

Here in the Chicago area, ISP District Chicago is on an 800Mhz EDACS system and will be switching to Starcom21 eventually. However, IDOT is on that same system and has car to car capabilties with the troopers. Once EDACS gets scrapped, then what?.... IDOT still uses some UHF up this way but what about interop?....This would bea good question at the CARMA Yahoo Group since that group has a wealth of resources and may already know, or know who to find out from.

I have a friend who works at Stateville and he is high enough up the totem pole to get a straight answer. He said IDOC has no money in this fiscal year (2007) or the next one that starts on July 1, 2007 (FY2008) for any new systems or radio upgrades. He confirmed they have been approached to upgrade by Motorola (but he is not sure if they were talking Starcom) but have no $$$$$$$$. He said they have over 36 overall TG's and that no fewer than 10 talkgroups are in use for security there 24/7.

Mike, if you mean recent switches to 800Mhz trunked systems, you are somewhat correct. Most institutions are trunked. But, Stateville has been 800Mhz analog trunked for over a decade. It was my understanding that IDOC was allowing the use of their frequencies to Starcom21 to be a part of the system. But, who is gonna pay for IDOT and IDOC to be users if they don't have the money within their agency budgets?.....IDOC buses and vans have had 42.500 and 155.475 to contact ISP in case something goes wrong during a transport or transfer.

Can you guys confirm how this antenna
(http://www.scannermaster.com/800MHz_SMA_Antenna_p/14-541014.htm) performs compared to the
Radio Shack 20-283 800Mhz
duck on:

-VHF
-UHF
-800Mhz bands?

Looks just like the Watel version. If so it only works "ok" in the 800MHz band from my experence.

948. New Starcom21 Info

Yahoo group: StarCom21
Date: 2007-01-25 00:02:52 UTC
From: n9jig
Topic: 948 Message: 948

KD4YGG came up with probable Talkgroup assignments for ISP on StarCom21 and these have been added to the most recent CARMA Profile available at

http://www.carmachicago.com/profiles/.

Many thanks to John, Tom and all the CARMA, StarCom21, RadioReference and ScanIllinois members who have provided info on this system

Please let me know about any errors or additions.

949. TG 17039 - ISP D13 ISPERN???

Yahoo group: StarCom21
Date: 2007-01-26 00:44:04 UTC
From: kd4ygg
Topic: 949 Message: 949

A friend of mine is indicating 17039 as active off the DuQuoin tower with ISPERN broadcasts.

This changes the whole pattern idea.

17038 ISP D12 ISPERN
17039 ISP D13 ISPERN

Anyone in District 11????
What TG are you hearing ISPERN on???

KD4YGG

950. Re: *STARCOM21* TG 17039 - ISP D13 ISPERN???

Yahoo group: StarCom21
Date: 2007-01-26 02:30:29 UTC
From: Rich Carlson, N9JIG
Topic: 949 Message: 950

Don't most ISP districts simulcast ISPERN on local channels? If
District 11 does, then could the listener have actually heard the
Local patch on 17039 simulcasting an ISPERN dispatch?

If a D11 unit had affiliated with the tower in DuQuoin then that
traffic would be transmitted on it.

If common protocol holds, there is likely an advance team already in Peoria prepping for the visit. Perhaps the encrypted talkgroup is one of the FED interoperability talkgroups or some of the Executive Detail talkgroups? One would expect encryption on these type talkgroups.

958. TG's 13004 and 13002

Yahoo group: StarCom21
Date: 2007-01-27 02:20:13 UTC
From: Jason McDowell
Topic: 958 Message: 958

Earlier today about 2pm on the Peoria Simulcast Tower I copied 1 short key up on 13002 which is predicted to be Peoria Dist. 8A. Then just a few minutes ago about 8:15 pm I copied several 1-5 count tests and several silent key ups on TG 13004 on the Peoria Simulcast Tower. 13004 is predicted to be the Dist. 9A dispatch. The Dist. 9 stuff was loud and clear.

959. New files uploaded:

Yahoo group: StarCom21
Date: 2007-01-26 18:24:02 UTC
From: citrus801
Topic: 959 Message: 959

I uploaded three files..

1) I updated the Starcom21 ISP usage map to show there is some actual operations (more than just testing) by ISP in Districts 10, 12, and 22 on Starcom21. (If there are other districts using Starcom21 on a partial or exclusive basis for dispatch, let me know and I'll update the map.)

http://groups.yahoo.com/group/STARCOM21/files/IL_State_Police_Starcom21_usage_map.jpg

2) I posted a text file of all the unique Starcom21 control channel frequencies reportedly utilized by Starcom21 (source: Radioreference.com)

http://groups.yahoo.com/group/STARCOM21/files/Starcom21_system_control_channel_frequencies.txt

3) Some people had been requesting feedback on the 800 MHz SMA antennas' performance on 700/800 MHz and other bands compared to the RS 800 antenna. In short, I found the RS antenna to be slightly (but notably) superior on 800 MHz, slightly better on UHF, and FAR better on VHF than the SMA 4" 800 MHz antenna. The small SMA 800 MHz antenna works well for local 800 MHz, just not as well for distant/weak signals or signals in other bands. Still, you can beat the size of the 4" antenna plus you don't have to use the ugly BNC<>SMA adapter. I posted my findings...

http://groups.yahoo.com/group/STARCOM21/files/BCD396T_800mhz_antenna_comparison.xls

-I've previously posted a few ARC396 Starcom21 MEM files to the files section for McLean, St. Clair, and Lee Counties. Feel free to add your own ARC396 MEM files.

960. Re: *STARCOM21* Re: Antenna for the 396 with SMA

Another nice one I found was the Antenex
DEXE821SM. It's about 8 inches long and has some
gain along with an SMA connector. It's a half
wave helical very similar to the praised Seeker
800:

http://www.radiobooks.com/products/sek800.htm

I am going to order the short one and the longer
one and compare. I'll let the group know how
they compare.

Yahoo group: StarCom21
Date: 2007-01-28 03:33:53 UTC
From: Todd Hartzel
Topic: 962 Message: 962

Greetings,
I listened to 17037 the other day when
a D11 unit, something like: V6?? or 6V??
something was stopping a verified stolen vehicle.
I think in E St Louis, Il. The reception
was very very good on my bcd-396t on the T305
out of Belleville, Il.

Also heard D18 have a car following. But
that reception was not good on 17037. It
was there, but reception was aweful.

Also keep hearing the 155.475 All-Points
from D11 going out on 17037 too. So looks
like 17037 can be verified as D11 ISPERN.

While this is not all about SC21, I have noticed that I am now hearing all of the surrounding SP dist. (around Dist 8) Tazewell County, etc. on low band, about a week ago there was testing on the different districts, which seemed to be low band, but it maybe possible that the simocast option is now working, as before I did not hear other state police dist. This is not on a scanner, but on a base low band radio, set for NO TX., with an external 25 foot antenna.
As for the Question about the Sec. of State going to SC21, unless someone has an inside source for this info, like from the radio shop at the Springfield HQ, I doubt that this can be confirmed. One thing I have noticed is that during the past couple of years, I can count on one hand the number of SOS cars that I have seen in Tazewell County. One other thing I have noticed is the SP, CSI cars don't have VHF antennas on them anymore, just the 7-800 antenna, what this means, don't have a clue, but do know they have a radio in the u.c. cars. But you need to know the cars as they do not have anything but regular lic. plates on them, just a hodge podge collection of vehicles.

968. Major Radioreference Update

Yahoo group: StarCom21
Date: 2007-01-29 21:18:00 UTC
From: kd4ygg
Topic: 968 Message: 968

The Radioreference site has been updated with "predicted" talkgroups.

The central and southern zone talkgroups are most likely 80% correct or better based on observations, reports, and the "template" that Rich has in his CARMA profile.

The main thing on northern zone is Chicago and the Tollway (have always loved Chicago, but the Tollway traffic is something else - but I digress). Really unsure how these fit into what appears a VERY regular and PREDICTABLE pattern in the southern and central zones.

Please share any observations and corrections with the group so we can make corrections as needed.

BTW - Southern Zone goes live 31-Jan-2007 according to anonymous sources very close to the project.

Jim

DEC = Decimal - these are the ones to enter
HEX = Hexadecimal - ignore these.

972. TG 13045

Rich

Both myself and my friend down south near Benton, IL are experiencing the same thing - multiple districts ISPERNs being broadcast on an individual talkgroup.

For example, I've heard District 11, District 18, and 12 ISPERNs on the District 12 ISPERN talkgroup.

He has monitored District 11, 13, 18, 19, and 22 just off the District 13 ISPERN talkgroup.

It could be a local patch we are hearing, but I don't recall hearing this much multiple-district ISPERN traffic on 155.4750 back in the "good old days".

Perhaps all ISPERN traffic is rebroadcast across each zone (northern, central, or southern)???

However, if a trooper is outside his zone (say near Paris, IL) when an ISPERN alert goes out on District 10 (central zone) AND IF he is actually affiliated with a District 12 tower (southern zone), would we hear all central and southern ISPERN's???

Also, if there are two districts on ISPERN at the same time, the audio is so garbled it sounds like encryption instead of digital voice. Monitored multiple times.

Looks like they're still working on the system, but it could be very interesting to hear ISPERNs and other traffic from across the state - who needs VHF ducting and low band skip????

73's

From: tweatherford@radioreference.com
Topic: 974 Message: 974

Well wouldn't there have to be some sort of local "sorting"????

If a receiver can pick it up, it will probably simulcast it..... since they are all CSQ.... if you were, per say, to put each district on a tx PL tone.... then it would fix the issue (if you call it a problem ;))....but then districts next to each other wouldn't here each other..

?????

He has monitored District 11, 13, 18, 19, and 22 just off the District 13 ISPERN talkgroup.

It could be a local patch we are hearing, but I don't recall hearing this much multiple-district ISPERN traffic on 155.4750 back in the "good old days".

Perhaps all ISPERN traffic is rebroadcast across each zone (northern, central, or southern)???

However, if a trooper is outside his zone (say near Paris, IL) when an ISPERN alert goes out on District 10 (central zone) AND IF he is actually affiliated with a District 12 tower (southern zone), would we hear all central and southern ISPERN's???

Also, if there are two districts on ISPERN at the same time, the audio is so garbled it sounds like encryption instead of digital voice. Monitored multiple times.

Looks like they're still working on the system, but it could be very interesting to hear ISPERNs and other traffic from across the state - who needs VHF ducting and low band skip????

Are you just hearing the dispatcher side of the ISPERN or are mobiles
activating the patches?

Good Call....

Hopefully ..... it would only be actual ISP districts simulating their OWN transmissions, not those of all.... but guess we'll see.

As far as mobiles, just like I've said before..... where do you cut the line.

This has been a continual question I've seen on the whole situation, as with any patch. (I-REACH, IFERN, ISPERN, etc.)

The chances are these are patched together then. There are several ways this could be set up:

When the dispatcher selects ISPERN on the console, he can also select which tower he broadcasts from (in those districts that have multiple towers) It may be that the SP has set it up so that ISPERN traffic from VHF tower A is simulcast on StarCom Towers X, Y & Z as well as the ISPERN talkgroup for a neighboring district or 2.

All this type of stuff is programmable in the console, and the dispatcher may have the ability to select which ISPERN talkgroups to use. It is also possible that this is hardwired into the system.

979. 700Mhz & The Pro-96/2096

Yahoo group: StarCom21
Date: 2007-01-30 16:01:27 UTC
From: kd4ygg
Topic: 979 Message: 979

Have been looking at the PRO96COM files that I have for some of the 700Mhz sites (don't have any close by to my current location).

In the TABLES section, it gives a listing of Table ID, Base Freq, Spacing, Input Offset, Assumed/Confirmed, Bandwidth

For the 700Mhz sites:

Table ID = 01
Base Frequency = 762.00625
Spacing = 0.00625
Input Offset = 30.00000
Assumed/Confirmed = Confirmed
Bandwidth = 0.00625

This makes me wonder - IF one were to program a 700Mhz system in the WIN96 program (using the EXTENDED FREQUENCIES option), with the above entries in the 9600 BAUD CUSTOM TABLE, can the PRO-96 be made to trunktrack 700Mhz?

Sorry for asking this - may be a repeat question. Just don't have any sites near me to confirm.

Thanks
KD4YGG

You got it. The 17037 talkgroup allows me to hear D11
(dispatch-mobile-portables), D18 (dispatch-and-some
mobiles), D12 (dispatch) & D13 (dispatch).
I totally agree, who needs VHF ducting & low
band skip.

981. "UC 13" working DuPage EOC on IESMA TG

Yahoo group: StarCom21
Date: 2007-01-30 18:38:40 UTC
From: Kevin
Topic: 981 Message: 981

Heard "UC 13" working DuPage EOC (DuPage County Office of Homeland Security and Emergency Mangagement) this morning on TG 30328 (IESMA). I'm guessing that UC13 (also called UCV13 by DuPage EOC) would be one of the ILEAS/MABAS Unified Command Post vehicles - in this case, possibly the vehicle from ITTF Region 13 (Adams, Pike, Brown, Hancock, Schuyler and Scott counties). Has anyone heard this callsign on the Starcom21 system before, and can anyone confirm whether or not I'm correct on my guess? FWIW, you can see a photo of one of these vehicles at http://tinyurl.com/2sjhrj . Last I read, there were to be 13 of these vehicles posted around the state.

This TG 13045 was uses today when George Dubiu was in E.Peoria. They
had all the interstates and bridges shut down. 164.8875 was heard in
Metamora but it was incripted.

985. Very Simple Question, INCRIPTION

Yahoo group: StarCom21
Date: 2007-01-31 00:17:59 UTC
From: Ron Handke, TC-62
Topic: 985 Message: 985

Knowing that we are all wanting to monitor the StarCom 21 system, the question that I have is what happens if most department think that it is a better move to use full incription for all radio traffic, no I have not purchased the proper scanner yet, just hanging loose to see where this all goes, but that thought has came to mind. Will there be a decipher option in scanners to be able to copy the incription, or will this be a lost cause, or maybe this is not something to think about.
Knowing that many of those in the group are pros at this by now, would someone care to make a post about this subject.

Listening to the encrypted traffic is illegal. So, if everyone decides
they want to use encryption, we are out of luck.

Not only is it illegal, there is no scanner on the market, or that will be on the market that will decipher the encrypted traffic. If they encrypt, we will not be able to monitor. I have seen a few comments about Indiana's digital system called "SAFE T" that indicate there is not much encrypted traffic on that system. Hopefully Starcom will follow suit. I would think it would be very expensive to put encryption on all departments. Maybe that in itself will keep the system in the clear. Let's hope.

From: Dave Phelps
Topic: 985 Message: 988

I've been doing encrypted IP networks for 5 years. 5 years ago it was not very easy or cheap. Now, it's easy and cheap. Starcom is a digital system that digitizes and packetizes audio samples (just like cell phones, and IP packets), so encryption is a no-brainer.

As long as the radio has the right encryption keys, it can encode and decode very easily. It's nothing but a data stream, just like IP networks. The signal strength requirements would be no more than it is for successful audio reception.

I would be quite surprised if the encryption hardware isn't already built into most of the radios. The only expense is most likely paying huge license fees to Motorola to wave the magic wand to enable the new "feature."

I don't think Motorola will start marketing it until they get a satisfactory number of subscribers. Then when new subscriptions start to drop off, they will market encryption as a new feature to the existing customers for a license and upgrade fee.

Unlike the cellular networks, there will be no competition to Starcom in the foreseeable future. Motorola was very smart in that regard. No competition means virtually unlimited profits. Once you go to Starcom, it will be nearly impossible to go back. The frequencies will be reallocated, and all of the communications equipment will be gone. To get off of Starcom will be quite costly and painful.

I am curious about how they will handle their encryption keys. The movie and music industry give me hope. If it's like their idea of security, then they will use a standard encryption algorithm (like DES, 3DES, or AES) the keys will be static, difficult to change, and published on the internet within a week or so.

Then you just need to come up with the receiver to decode the signal. That might seem impractical, but they will already exist. Many emergency service agencies will already have the new Motorola "scanners" just to listen to their encrypted brethren on the radio. It might be expensive, but they will exist. Probably already do.

Disclaimer: I can't tell the future. I'm just guessing.

I didn't know that encryption was "cheap". My only point on the scanners that could recieve and decode encrypted transmissions is that for the general public, the guy who just wants to sit at home and listen in, he's going to be out of luck. I don't think there will ever be a scanner offered to the general public that decodes encrypted comm's, and if there ever is, (which I doubt), it would be a very expensive piece of radio equipment that most people would not be willing to or able to purchase.

From: Kevin
Topic: 981 Message: 990

I'm now not sure that this unit would have been from ITTF Region 13 (Quincy area) - they were in a DuPage county suburb for training or an exercise when they called DuPage EOC the first time late in the morning. In the mid-to-late afternoon, they called DuPage EOC again to advise they were back in quarters. I'm thinking that this unit - whoever it was - might be from the Chicago area. Can anyone confirm prior reception of a unit "UC13" or any other "UC" callsign on Starcom21? Does anyone know who "UC13" is? There is an ILEAS/MABAS Unified Command van assigned to ITTF Region 4 (Kane and DuPage counties) - last I heard, it was housed somewhere in DuPage county.

Thanks!

992. Request For Control Channel Data

Yahoo group: StarCom21
Date: 2007-02-01 15:06:48 UTC
From: kd4ygg
Topic: 992 Message: 992

There are four sites that have no confirmed data channel information.

Site 122 Rock Island
Site 138 East Dubuque
Site 139 Galena/Elizabeth
Site 143 Winnebago

Anyone in these areas that can help out?

If you're running PRO96COM, even better.

Thanks
KD4YGG

As I started this discussion, I want to thank everyone, while some disagree with some of the post, it truly has enlighted everyone as to the problems that are in the crystal ball. And I want to point out, that NO ONE is wrong with making post as they are want the sender thinks. But as with any system, remember back when the scanners where crystal controlled, and I remember someone saying thats the best it can get, and now look at the scanners that are on the market, if I was a guessing person, I would say that someone will develope a way to de-crypt, the digital encryption, maybe not tomorrow but BC and RS will see the market for such and who knows! Just thoughts!
Just don't say it's illegal, yes we all know that fact, but so is running a stop sign!

Maybe OT, maybe not. I'm not a newbie, but for the life of me, I cannot pick up any SC21 traffic on my PRO96 no matter how I program it. I have other P25 systems programmed, so there is nothing wrong with the radio. Gotta be operator headspace error.

I've tried comtrol channels only, all frequencies at an active site, other folks' .p96 files as templates...nada.

Any assistance given off-list to my sorry self will be appreciated.

Where are you located?
There might not be much active in your area just yet.

Which towers?
If it is a 700Mhz site, the PRO96 is "not supposed" to be able to
trunktrack those sites.

Other things
I'm sure you know what you're doing, but just checking....

Are you in OPEN mode?
Have you programmed the TRUNK mode at Motorola

From inside sources, Dupage is tracking all of the Unified Command UC posts throughout the state and acts as dispatch. When a child was missing here in McLean County a couple months back i monitored our local commmand vehicle call DuPage EOC while enroute, onscene, and in quarters....

999. 13007 - ISP District 10 Dispatch A

Yahoo group: StarCom21
Date: 2007-02-02 19:24:11 UTC
From: kd4ygg
Topic: 999 Message: 999

Heard some testing today on 13007.

Talk of radios coming in and training to be held "after the holiday (i.e. President's Day ???)", so it appears District 10 will be going live in late February/early March.

Audio very clean and natural sounding.

I heard the same. Many sites are playing around with the radios today, so I have heard a lot of different conversations. I guess it is their "new toy". I think the "holiday" that they referred to is actually Lincoln's Birthday, which is a State of Illinois holiday. The rest of the states take President's Day.

I work 150 yards from the DuPage EOC and I heard the transmission about that time. It was DuPage EOC not DuComm being called. UC13 was at training up here somewhere. They (Dupage EOC)were also trying to get either McClean or another far off county to give them a radio check. People confuse the Dupage EOC and DuComm as being one and the same and they are not. And, it wasn't Lincoln, I believe it was Long Grove being mentioned. Also, Winnetka and Wilmette were doing a radio check on the same TG today. Didn't sound like Rich on the radio though.

The radio check this morning was between CFD 2-1-3A and the Wauconda Fire Chief. Then CFD 2-1-3A tried calling McLean County EMA but a Motorola tech answered from his desk in Schaumburg and asked if they wanted him to call on the phone to McLean County EMA to answer the radio. As this was happening McLean County Sheriff Dispatch answered CFD 2-1-3A and gave him a radio check instead.

Someone asked earlier about 122
I have a control channel on 867.325 iding as 122. Still can't hear them at home, all the ones in the Quad-Cities have to be on directional arrays. At work the best I can hear are the ones at the Andover site on 800 and Kewanee on 700.

Now if I could talk one of my Illinois co-workers to run my 296D with idtracker on a laptop at their homes.

From: jburgess1974
Topic: 1008 Message: 1008

I have heard from a source that works for the ISP that supposedly a lot of testing going o as of last weekend but there are a of glitches in the system where troopers couldn't hear dispatch and dispatch couldn't hear troopers in the fields. So ISP is bringing in all the cars to check to see if the radios in the cars are hooked up correctly. I live very close to the Zone 2 and Zone 3 border and really have not heard any conversations or testing going on.

From: rangerd4ever
Topic: 1010 Message: 1010

put the XTL5000 on the passenger seat in the squad today and actually heard traffic on several statewide talkgroups. Lots of testing on MABAS, one guy on portable at his desk in southern Illinois talking to Gurnee fire and Chicago fire. I for one can hear a little digital "wobble" on the audio but it may be just our radio. Interesting to hear folks talking to each other from all over the state. Not sure how practical it is but neat to listen to.

Brian,

That's the problem with digital. Everyone sounds "robotic" and it's hard to tell who's who. I'm sure you weren't the only one who didn't recognize Rich. Starcom 21 audio sounds slightly improved over NWCD digital but not much. We can only hope that future technological advances to digital improve the audio range to approach the quality of today's analog audio.

Thanks Dave!

Hope you are doing well.

I listen to Midway trunked and Metro Corr Ctr. and they often sound like crap because I don't have a base unit or outside antenna. Starcom21 sounds way better to me and I thought it was because I was closer to the tower (101). It's definitely a different kinda sound for sure. I would have bet money i didn't know who that was on the radio. Ha!

Topic: 1013 Message: 1013

The Village of PLFD IL is using Starcom every day, they have some wobble in the backround and a few drops but great sounding on the Uniden396 on T101...T101 is much better than D5-T113, the data channel on 113 keeps going off and on as others are also reporting listening to the system.PLFD uses the same freqy on T113=774.80625 for all dispatching and channels 1=ID111 and CH2=ID1002.Using the PRO96 and 2096 in conventional mode on 774.80625 works great...Decoding is better than on the Uniden396..Being told by others that the Uniden 996 is very slow decoding compared to the 396?? Have not heard anymore testing at D5 on ID9013...Ron in Joliet

Hearing CENCOM with New Athens EMS unit on 155.28 CSQ (their normal dispatch channel) --- both CENCOM and mobile unit, 4C19, loud and clear, same signal strength. I'm assuming then that they must be simulcasting on SC21???

Can anyone confirm this?

Thanks
Terry

From: tweatherford@radioreference.com
Topic: 1017 Message: 1017

As far as I know...

154.965 was ONLY used mobile-to-mobile. I personally have heard it since the late 90s when I was often in the area. I haven't been in the area enough lately to hear or confirm its use.

I heard 42.34 in use as much as 2 weeks ago, when conditions are good enough I can pick it up here in Glen Carbon. I still do hear 155.475 ISPERN D18 just fine.

The most recently licensed frequency (Base) was 155.445 for Litchfield & Carlinville towers. Yes, this has been the D9/Command Center frequency for years, but possibly may be the new HF-2 channel.

I am monitoring both 42.34 and 155.445 now to see if I can pick up anything.

With the number of SC21 towers in Calhoun County (one of the smallest counties in the state) and the few scattered through out the rest of the D18 area --- I'll be surprised that they actually get good coverage.

Mt Olive 700mhz, Nilwood 700mhz, 307 Beaver Dam 800mhz.
NO sites in Jersey, Greene or Montgomery Counties, huh? Odd... should be something in Hillsboro, Greenville and Jerseyville areas.

Updated site 338 to D20, not D18 as listed. (Pike County) One thing to note, site 235 is D20 Pike but site/zone 235.

Terry

When I was in Springfield in October I stayed on
the 22nd floor of the Hilton, and was able to
hear 155.445 in use as the Command Center channel
as it has for some years. I did not have 154.695
in the scanner though....

One thing to remember about StarCom21 towers, is
that the District the tower lies in has no real
meaning. The fact that a tower is in District X
doesn't mean it is intended for use for that
district, they are intended to complement each
other and provide seamless coverage to the entire
geographical area.

Hearing radio techs talk this AM regarding radios being handed out within next week.

Talk of which talkgroups will be in the scanlists, etc.

Also, talk of "ops channels" that aren't in the first radio zone - I'm guessing these fall in after the routine dispatch, ISPERN, etc.

1022. ISP D18

1023. 17000 & 17037 talkgroups (starcom 21)

Yahoo group: StarCom21
Date: 2007-02-09 02:55:54 UTC
From: todd hartzel
Topic: 1023 Message: 1023

Greetings all,
On 17000, is the ISPERN D11 dispatcher
putting out the APB. But on 17037, you still
get the D11 ISPERN mobiles, portables & other
nearby ISP Districts: 12, 13 & 18. I think
I mighta heard D07 on 17037 too, putting out
a broadcast on ISPERN. Signal was alittle
weak, but clearly heard on 17037.

Now the D11 ISPERN dispatcher will not appear
on 17037. He/she only appears on 17000 now.
All other ISPERN stuff goes to 17037 though.

I listen to both Tower 305 & 358. On both
BCD-396T & PRO-96.

Just for info only, normally on any of my VHF
radios, I can hear:

- D11 ISPERN (VHF-Base)
- D11 ISEPRN (VHF-mobiles*)
- D18 ISPERN (VHF-Base**)

* mobiles from D11 have to be within a 11 mile
range of my QTH to receive effectively (say within a
radius from St Louis City as close as: Granite City,
Madison City, Caseyville, Dupo, Cahokia, Collinsille,
Fairmount City ; all of my antennas are indoors).
No outdoor antennas permitted at my QTH.

** D18 VHF-Base is good 24/7 at my QTH. During
band openings, the signal from D18 ISPERN is as
good in quality as D11 (sometimes better).

Not just any digital scanner will do, you have to have either the BCD396T or the BCD996T in order to track Starcom which Metcom uses. The Pro-96 and Pro-2096 can only track the 800 freqs portion of Starcom, not the many 700 freqs it has. Plus Uniden has many better features than the Radio Shacks in my opinion.

The only problem with the Radio Shack digital scanners is that they do not track the 700 Mhz control channels that I am currently monitoring here in Peoria with something to occur at 14:00. Have heard Chicago, Metcom, Woodford county and some other downstate counties checking in on ILEAS Southwest ID. Will report on later today.

I think if you went with the 396T, you'd find it 100 times easier to program and operate than the Radio Shack models. I'm a 13 year scanner veteran of Uniden models and an old Pro-90. It took me 4 hours to figure out how to enter a trunked system on my Father in laws Pro-97 where when I got my BCD396T it took me only a half hour to skim the manual and get it entered in correctly LOL.

1032. Starcom Test Friday

Yahoo group: StarCom21
Date: 2007-02-10 13:20:34 UTC
From: dataman60435
Topic: 1032 Message: 1032

Hearing today Friday a state wide test of the Starcom system, seems like most all towers turned on. The test seemed to be conducted from Argonne as thats where they ended by signing off...Over 30 check ins heard around the state like a ham net...EXCELLENT coverage, heard them here in Joliet on towers 101,102,113,126 on Uniden 396,PRO96, 2096...They used for a start the ILEAS=30329 and were suppose to go on with others like Mabas=30330 checkins but due to a large water main break in Chicago semmed to had to cancel the rest of the test...Village of Plainfield still dispatching 24 hours on Starcom with 90% success rate....Ronin Joliet

This test was resumed at about 3:30ish with another 25-30 radio
checks. Probably about 50-60 checks all together, all loud and clear
from the Peoria and Metamora towers.

I am hearing unreadable, (garbled sound) transmisions on 13068. Is this encrypted or is my pro-96 not set right to recieve it? These transmissions are on Sat. morning before and during the Obama speech in Springfield. Also heard a very breif garbled transmission on 13067. These are on 867.975.

On some scanners, encrypted talkgroups will sound like this:
http://www.freqofnature.com/sounds/p25enc.wav

On the 396, I've only seen one STARCOM21 ENC talkgroup pop up and the scanner muted out the garbled audio. I don't know how the 396T handles conventional encrypted radio transmissions. I've read on CARMA that the encryption used by the Secret Service sounds different than the link that I provided above.

***

Does anyone else find that while listening to P25 Starcom21 traffic, whenever the officer whispers into the radio, it sounds really pixilated and hard to understand. If someone talks directly/loudly into their radio, it doesn't sound so bad. Some officers were in a standoff and talking quietly into their radios and it was almost unintelligible on my 396T scanner. Hopefully their Motorola radios sound clearer.

I have a BC796D that works fine for tracking the Starcom system as
long as you have the ID groups.

It can't do the 700 mhz freqs though. You can still listen to them but
it won't trunk track them.

I hope this isn't a sign of things to come across the state. There is alot of information on the state police frequencies during events such as the snowstorm that is going on. Hopefully they will not encrypt the dispatch or car to car transmissions. I don't see any harm in leaving those in the clear.

More than likely given the high TG numbers, this may just be for the special ops unit like the detectives and such. Most new digital systems for PD's have the Ops groups going encrypted with normal traffic in the clear.

Durbin says new communication system vital
Steve Rensberry, srensberry@theintelligencer.com
02/14/2007
Email to a friendPost a CommentPrinter-friendly

Meeting Tuesday with Illinois Emergency Management Agency Director William Burke, Durbin urged an expansion of a new statewide communications system.

"Our first responders and emergency officials have to be able to communicate in case of a natural disaster or terrorism attack," Durbin stated in the release.

According to the statement, Illinois has entered into a partnership with Motorola Corporation to develop a system called "STARCOM 21," which will enable users throughout the state to operate on one frequency.

"The STARCOM radios will help firefighters, EMTs, police and other emergency officials communicate with each other no matter where a disaster strikes," Durbin stated.

The first phase of federal funding has equipped about 2,000 first responders with the new radios, with the Illinois State Police planning to conduct a final statewide test of the new system sometime in May.

Durbin takes credit for securing more than $27 million for "interoperable communications equipment," over the past few years, an estimated $10 million of which was used to purchase 1,700 STARCOM 21 radios.

Is it possible that this was actually District 11 Car to Car? Were you able to confirm locations as in District 12 instead of 11?

The info I had was that there would be an A, B & C Talkgroup set for District 19 which would put everything above 17013 off by 1 if KD4YGG's derived pattern holds out (like it appears to be!)

The listing on the RR site shows only an A & B group for District 19, with 17013 being D22A.

Argh, yet again, I'm sure another unlicensed frequency, with the unlicensed 700 MHz band. We'll have to be monitoring while passing traffic stops.

I'm assuming they would be in the 794-797,803-806 range???
or is is 789-792, 797-801 ???

(Not sure what the split [input] is... for 700 MHz)

Hi all,

Has anybody heard any traffic on the new starcom system yet. I have not heard any testing what so ever. Im still hearing traffic on the old vhf frequencies. Thats why im asking for the control frequencies for the new starcom system again. If you have heard distric 11 on the new system, please post the frequencies for me. So i can double check my programing on my Bcd 396t.

Thanks, Bob Lewis de Kc9boz

Rich

It was definitely District 12.
Location was extreme eastern part of Clark County on I-70.

Can you recheck District 19?
I thought the same thing for A,B,and C when I originally put
the "Suspected Patterns" plans together but did not see this on the
CARMA profile.

Regardless, this is proving to be fun.

Would they not just continue to use the present freqs, to interlink to SC21, you would not want to enter the extender freq as you are going to hang up your scanner, its the same with interop freqs that are patched into the SC21 system thru out the area, you would want to listen on one end or the other, not the middle. Just my thinking, as I never have used any radios, LOL

1054. ISP radio setup???

Yahoo group: StarCom21
Date: 2007-02-18 01:06:01 UTC
From: jburgess1974
Topic: 1054 Message: 1054

Hi group.

I have a few questions regarding theSC21 and the ISP.

Currently the ISP radio channels are arranged in the following manner or so:

LF-1 District low band
LF-2 Car to Car
LF-3 District Mobile frequency
LF-4 District base frequency
LF-5 Rural intersystem
LF-6 Intersystem
HF-1 ISPERN
HF-2 Possible Secretary of State Police
HF-3 IREACH
HF-4 Statewide / Channel "7" / Aircraft
HF-5 Intersystem (bases only)

Except ISP Communications ☐ Springfield LF-3 is D09, and LF-4 is D18 high band.

The SC21 system right now shows according to R.R. Dxx Dispatch A, B, (perhaps C) and Detail A, B, (perhaps C), ISPERN patch, IREACH patch, LOCAL patch, car to car, and Investigations.

One question I have is when the ISP goes to the SC21 system will the channels be labeled differently as they are now or will they be labeled the same way following the same labels as shown in the grid at the bottom of this message or just a slightly different order? If the SC21 follows the same labels that are already in use where would the District Detail A, B, (perhaps C) and District Investigations fall into place?

LF-1 District low band District Dispatch A
LF-2 Car to car District car to car
LF-3 District mobile District Dispatch B
LF-4 District base District Dispatch C
(if there is one)
LF-5 Local intersystem Local Patch
LF-6 Intersystem ????
HF-1 ISPERN ISPERN Patch
HF-2 Secretary of State ????
HF-3 IREACH IREACH Patch
HF-4 Statewide / Channel "7" / Aircraft ISP Air Ops
HF-5 Intersystem ????

If the channel setups will be completely different label's what could be the labels and would the radios include ITTF Incident 1, ITTF Incident 2, ITTF Incident 3?

1055. Re: [StarCom21] ISP radio setup???

Yahoo group: StarCom21
Date: 2007-02-18 03:03:11 UTC
From: Rich Carlson, N9JIG
Topic: 1054 Message: 1055

Under SC-21 each District will have 2 or 3 "Dispatch" talkgroups (A, B and sometimes C) as well as 2 or 3 Detail talkgroups. In addition each District will have a Car to Car talkgroup. Investigations TG and patches to ISPERN, IREACH and HF2.

The usages will pretty much be up to each district, and may change as they figure out the capabilities and limitations of SC21. Expect the majority of Dispatch ops to be on the Dispatch A channel of course, with some districts that have multiple TC's using B and C when personnel and needs exist.

Traffic details and other events will use the Detail groups, and these might also be used for Car to Car in some cases.

I have noticed theres been a big decrease in the amount of official state police radio testing in the Peoria area. Still a lot of Statewide TG testing but hardly none State Police talk in the last week.

The police generally don't like (or respond to) people calling and asking about their radio set-up/ equipment. They have better things to do with their time than respond to questions about their radio system. I would say find out in some other manner than calling them. I know of several officers/supervisors that would like nothing better than to encrypt everything. They don't like being listened to and are tired of having to use cell phones and computers to communicate sensitive matters.

REBUTTLE; on the other side of the coin, as to calling the CopShop to find out about there radios, you would be amazed to find out that most don't have a clue as to how-what-or why they work!, only the very few, maybe one in each dept. that are TRUE, LICSENED com officers. SO YES, please do not call, being privy to certain radio freq's, I would not give you the time of day, well maybe not that blunt, there are many in the group that have better info and data than even the radio shops have, and for this we thank those that go the extra mile to provide the resource, and would you believe that this has in past events, helped save lives. So don't sell the effort short!

From: ka9qpn@juno.com
Topic: 1060 Message: 1060

As of Friday night, my PRO-96 was happily receiving Plainfield at about 90%. (Which is probably about what the users are getting, judging by my experience in listening to Colorado's statewide P25 system---'10-9, you were digital...') Not real sure what I did differently, as I was using my original .p96 file, populated from a Radio Reference web import. The audio, when decoded, was outstanding, as I could hear individual officer's "key in the ignition' chimes and even the broadcast radio clearly in the background once.

Interestingly enough, it was ironic to hear the continued use of the 'obsolete' ten-codes on the interoperability radio system. Made me chuckle.

Thanks to all who responded to my questions on and off list.

In a way I have a story about some cops and a technical problem. I called once to report a problem with a traffic signal. I was informed that I didn't know any thing about how traffic lights worked. Since in my earlier life after high school I work for a company that replaced a lot of them over a summer, I thought I did. But I didn't say anything more that to thank the officer for his very good grasp of the situation and my lack of knowledge. A couple of weeks later they had a serious accident and a routine investigation found my phone call recording about the problem. The former officer drives a pop truck route now.

1063. Starcom Reception Questions and info...

Yahoo group: StarCom21
Date: 2007-02-19 10:10:55 UTC
From: Mike
Topic: 1063 Message: 1063

I should have my new scanner soon, actually within about 10 hours or so. I have a question.

I live in Clay County out here where there is not anyone going to be using the system except ISP dist 12. I was wondering what I will be able to receive just ISP dist 12, or will I be able to get St. Clair County and Bloomington also?

I have heard ISP Dist 12 is carrying the portables but not using the system yet. I also was told by a friend that the trooper said they were connected by repeaters and satellites, which I doubt the satellites, could be though. They can listen and my friend said the comms he heard were as clear as if they were local.

Police here are always getting calls for things like, stop lights not changing, and usually when they get there it is a motorcycle not heavy enough to trigger the change, or some small car, which is too far up on the line for the new camera activated ones to work lol.

While I know it takes time to formulate a system, with testing, and then actual use, and of course we are all just hanger on's to watch and wait for the system to come on line.
As with any system, I wonder what the BACK-UP is for the system, in this part of the state, knowing that we can and have had towers go down, I mean DOWN to the ground level, so posing this, if the tower West of Manito and the Peoria tower hits the ground, what happens to the comms. in this area, whats the back up? I would gamble on the theory that seeing all the cute little round low profile antennas (worthless) on squads, that the SC21 radios will not TX more than 15-20 miles, so what tower do they use ?
And would guess that then the scanner people will hear little to none, which does not matter, but this will also play a big role in those agencys that have converted to the SC21 system and trashed there old systems.
I still do not get the clear picture of what the SC21 system can do that is for the most part a replay of what is being used in areas at present. I truly don't see the entire purpose of being able to talk from St Louis to Chicago, or for that matter from Peoria to Springfield. About the only net broadcast that plays an important part, is the ISPREN system, which in a sense is linked to simocast when needed.
I sometimes wonder if by chance that some agencys are having second thoughts about the entire program.

From: citrus801
Topic: 1067 Message: 1070

While the scanner is scanning the Starcom21 system, hit hold and the display will show information like 0140h-0145

140 is the system Id for Starcom21 and the part after the "-" is the site number in decimal format (like is shown on Radioreference.com). If your scanner showed 0140h-0145, you are receiving site 145 from Knox County, IL. If any talkgroups are active while holding on the control channel, you'll see those talkgroup numbers/alpha-tags pop up on the screen.

Here is a map of the site number locations:
http://groups.yahoo.com/group/StarCom21/files/Starcom21_Site_Numbers_Map.jpg

From: Jason McDowell
Topic: 1071 Message: 1071

Sounds like Peoria Dist. 8 might be gearing up for some Starcom simulcasting. Tonight when they did there 10pm roll call and daily summary report the dispatcher sounded the tone to get the Officers attention. She did it 3 times and each time it was broadcast on low band, hi band and TG 13002. However, no voice audio was broadcasted over 13002, only over low and hi band. Just an FYI.

Jason

1. I was informed that lowband was supposed to be abandoned once everything was fully operational and the switch has been officially completed. My guess is that the licenses for lowband will eventually just be allowed to expire.

2. I've been hearing "14-xx attending Starcom Training in SPI" for the past few mornings when District 14 gives out shift assignments at 7:00 a.m., so officers are currently being trained.

The plan for ISP is that after the districts switch over to StarCom21 for operations that any low band operations will end. Each district will retain it's HF2 channel and any district that doesn't have an assigned HF2 will get one.

The HF2 channel will be soft-patched to the "Local Patch" talkgroup so that units that do not have a StarCom21 radio can communicate as needed with those that do.

It is unlikely that low band licenses will be cancelled outright, as the same licenses usually contain high band channels as well, so it is most likely that when they come up for renewal the low band channels will be deleted individually. The licenses could survive a cycle however as a hedge.

ref; low band, having talked to ??? about what is on the joint use tower in Mason County, I asked about the Low Band antenna-repeater system, he said it was going to stay as they had no orders to dismantle it at present, this is at the same site as the SC21 system is. You won't find a coord. for the site that shows the use of Low Band, actually the tower is owned by the Corp of Engineers, this is the one in the Mason State Forest, near the Fish Hatchery. They just recently added a new genset to the site, and have a pad poured for the second one, why he did not know.

I was also picking up TG 1001 (Plainfield PD) from tower 126 today (Kane County) as I drove through Wheaton (DuPage County). The data channel was an 800 MHz one but the voice activity....which I did not have programmed into my 396 came out as something like 774.83xxx. I did a quick glance as I was driving. I was hitting the data channel with 3 bars on a Radio Shack 800 rubber duck and Diamond SMA to bnc adapter.

Hey Ron, thanks for the dedicated listening and posts from Will County!

From: "dataman60435" <ronil9@...>
This tower has been on for about two weeks now, i can copy the Village of Plainfield daily on it with ID1001...As far as District 2 no districts are actually operating on Starcom in my area or in the state as yet that i know of....D5 tests daily on ID9013 but still uses 42mgz for dispatching....Ron in Joliet

1082. Henry Co going to Starcom?

Article in the Argus/Dispatch mentioned that the Henry Co. Board was looking into Starcom for the Sheriff's Office.
Also mentioned was the 95% portable coverage and the $19,000 a year cost.

1088. Deals on the 996?

Yahoo group: StarCom21
Date: 2007-02-25 14:24:27 UTC
From: Cris Hanna
Topic: 1088 Message: 1088

Well the tax man is being rather generous so I guess its time to take the plunge. Anyone found a deal they particularly like? What about antennas? I have an Antenna Specialist which has the 800 mhz “choke” on bottom rod.

Seems ok.

I’ve also seen some reviews that say the VHF reception on the 996 leaves something to be desired. Now obviously as SC21 takes hold, there may be less and less VHF traffic, but if I go for it now I still want good VHF coverage..

Looking forward to you’re comments

Cris Hanna

All I can go from is that I have commercial radios, both High and Low, that have the SP dist. in them, (TO MAKE VERY CLEAR)(they do NOT have TX enabled)(that statement is for the SP folks in the group), but going on if the SC21 system was all up and going, you would have a solid stream of audio, and thats if the SC21 was patched as it will be for a time, into the Low and High Band. Maybe the SC21 system will be like high speed internet, fiber cables, and just will not be able to, at present handle all of the radio traffic, yes there is a limit !, and this came from a big M tech., just an off hand quote, so just maybe within another 2-3 years, it will with alot of tunning be a good thing, LOL (Sunday Humor) Sorry, you Scanner SC21 people are missing all the fun info on the radios this week end. Just kidding, of course, as the people with the scanners have spent alot of time and effort to provide data, and that a great thing! keep up the good work.

The ole man states, as I found out when wanting to hear all of the Edacs traffic in Tazewell, it does work, BUT, do not try to scan VHF and UHF, your scanner should be dedicated to SC21, buy a cheap VHF scanner, connect them with a "T" bnc conector to the same antenna and "Now Your Hearing"!
Scanners like radios, can only scan so fast, and the SC21 system is FAST. Thus you will miss out on radio traffic and wonder why.
Another note, the antenna type is not critical, its the height of the antenna that will allow you to hear distance stations, this also is critiacal when transmitting, that is unless you are using an area repeater. Need to make just one more FIRM statement, remember that the HIGH antenna is also a good collector for the Lightning Strikes, so you may want to have a Lightning Protector in line, maybe even 2, these need to be connected to an EARTH ground, and not a water pipe, better yet, disconect the $500.00 scanner when there is lightning in the area. AND remember that that wall wort is an excellent collector for the strikes, a small 12vdc SEALED battery, with a trickle charge is great, this way when the lights go out, you still can hear, plus the batteryand or charger, will act as a filter if there is a strike.

1098. TG 9021 - ISP D21 Ashkum

Yahoo group: StarCom21
Date: 2007-02-28 05:18:13 UTC
From: citrus801
Topic: 1098 Message: 1098

There's a strong indication that TG 9021 is D21 since I heard the mention of Ashkum on this talkgroup today (heard on site 203 Champaign).

A few days ago I was hearing Plainfield PD's TG on the Champaign site.

FYI...ISP D10 is not using Starcom21 for their operations at this time - they are still on VHF. ISPERN is still on VHF only as well.

If it does digital, it will only pick up the 800 range. Starcom is 700/800 MHz and is digital APCO 25. I have a 296 and I'm not ready to spend another $500+ for another radio. In Cook County, the north end will use the 800 MHz and the south end will use the 700 MHz.

1100. Dist 12 using Starcom 21 today...

Yahoo group: StarCom21
Date: 2007-02-28 15:43:34 UTC
From: Mike
Topic: 1100 Message: 1100

Dist 12 has been trying out Starcom 21 today. I was hearing traffic I couldn't tell where or whom it was. They are stretching the district and trying it out from the sounds of it. They also appear to be using a truck or something, not sure if it is a commm truck or a state truck, but they are talking about moving the truck and then taking early lunch and starting over again later.

They are working in Clark County area, also heard talk of Montrose they must be on I-70.

There was discussion about moving 100 feet away, not sure if trying car radios or portables or what.

This came up on the Dist 12 Car to Car talkgroup. I was picking it up on the Clay County Tower, so my guess would be there is a portable here locally or the tower is setup to transmit all right now for testing.

1105. Bond issue for police radios gets panel's OK

Yahoo group: StarCom21
Date: 2007-03-01 04:47:11 UTC
From: tweatherford@radioreference.com
Topic: 1105 Message: 1105

By Charles Keeshan
Daily Herald Staff Writer
Posted Wednesday, February 28, 2007

McHenry County will borrow nearly $5 million to fund the first overhaul of its sheriff's communications system in more than three decades under a measure backed by finance leaders Tuesday.

The plan, if approved by the county board, would put about 850 new radios — along with the equipment to support them — in the hands of sheriff's deputies, investigators, county highway personnel and disaster workers within the next year, replacing a system that has been in place since the 1970s.

Sheriff Keith Nygren said the upgrade is necessary because of new federal requirements for law enforcement communications, as well as to give his department the ability to communicate with police and emergency agencies across the state.

"The technology has changed so dramatically that if we're going to be able to talk to one another, we're going to have to change with the times," Nygren said. "We learned from Sept. 11 that if we can't all talk together — whether it be police departments, fire departments or public works — then we're going to have big problems."

The measure, approved unanimously by the county board's finance and audit review committee, calls for the county to issue about $4.88 million in bonds in order to purchase radios and connect to Motorola's Starcom 21 Network.

With interest, repaying the bonds over 10 years as planned will cost the county almost $6.1 million.

Even with a $40 million surplus, finance officials say borrowing is a smarter option than simply paying cash out of the county's substantial cash reserves.

"We can borrow at 4.2 percent (interest) while our investment return now is close to 5.25 percent," finance committee Chairman Marc Munaretto said. "It would not be good financial stewardship to take away those investment dollars at this time."

Paying for the radio upgrade out of the surplus, Munaretto said, also would jeopardize board policy of having at least five months of county expenses in reserve.

Officials said they are optimistic about receiving as much as $2 million from the federal government to fund the new radios. Acquiring that financial assistance was among the county's chief priorities this year for its Washington, D.C., lobbying firm.

Dist 12 is using Starcom 21 Talk group for Dist 12 Car to Car regular now, well from what I have heard. Between 0700-0900 I heard traffic, they were setting up some sort of a traffic patrol in a school zone.

I drove past Dist 12 HQ yesterday, lots of squads there, and also Walker Communications truck there, probably finalizing and installing radios. There were so many squads there that some were parked in the alley to the west (backside) of the HQ, which is unusual.

3-2-07

Talk of running a truck to the scales, and talk of meeting in Farina for lunch, also talk of getting some citations around 0930. These are coming in on the Clay County Tower on the Car to Car talkgroup. There is alot of chit/chat and informing the others what they are doing. Not any dispatch comms that I have heard. They have called each other by first names or just by their ID's minus the 12-. It sounds to be only about 4-5 troopers.

1120. McHenry County: SC21: Law enforcement radio funds win OK

Yahoo group: StarCom21

By KEVIN P. CRAVER - kcraver@...
Comments (5)
WOODSTOCK – The McHenry County Board approved borrowing money for a new law enforcement radio system, paving the way for an upgrade within a year.

Board members unanimously approved borrowing just under $4.9 million Tuesday to replace the system in place since the 1970s with one compatible with the Motorola Starcom 21 system used by the state. The money will cover about 850 new radios, as well as updated dispatch equipment.

Some parts of the McHenry County Sheriff’s office radio system are 35 years old, Sheriff Keith Nygren said. The new “narrowband” system allows communication with all county offices and state agencies.

“Most radio people will tell you that if you get 15 years out of a system, you’re doing pretty good,” Nygren said. “We got more than double out of ours. It’s time.”

The radios will equip deputies and squad cars, as well as court security, emergency management and Animal Control, Nygren said. They also will bring the sheriff’s office into compliance with Federal Communications Commission regulations requiring police to have narrowband systems by 2013.

The $4.9 million cost is less than half of the $12 million or so estimated years ago because the Starcom system uses Motorola’s towers and does not require the county to buy or upgrade antennas. It also works better in spotty parts of the county, Nygren said.

Undersheriff Eugene Lowery said maintaining the current system has been a struggle. “[The new system] is certainly reassuring to us from an officer safety point of view, but it’s also reassuring that the odds of failure in the field will be drastically reduced, which could save a sheriff’s deputy’s life one day, or the life of a citizen,” Lowery said.

The county is asking its Washington lobbying firm, Ferguson Group LLC, to seek up to $2 million in federal funds to defray the cost.

The following are comments from the readers. In no way do they represent the view of NWHerald.com or Shaw Newspapers.
Having trouble logging in? Click HereReport Abuselooking4liberty wrote on March 07, 2007 8:03 AM:"$5764 per radio? "

'Moor Mike wrote on March 07, 2007 12:20 PM:"This will clearly stop crime in it's tracks. crime does not stand a chance against a $5700 radio! go get 'em boys!"

radiohead wrote on March 07, 2007 1:46 PM:"I am assuming you both missed reading part of that article. It said 850 radios AND new dispatch equipment. You also have to factor in paying the people to remove the old equipment and put in the new. It doesn't put itself in for free. My guess is that you will complain and complain about it but as soon as something

bad happens because the radios were so old, you'll complain about that too. If you want your emergency services to be compliant and be able to provide the best service they can, stop complaining and let them do what they have to do."

ZAMINDAR wrote on March 07, 2007 3:28 PM:"=====Its a done deal====Now to pay for it ,AND IT WILL COST,,,PER CAR ==WHAT IS THE FULL COST OF A POLICE CAR LOADED,AND THE PRICE OF THE CAR IT SELF....$40.000 PER CAR...WHEN THE CAR IS SET TO HIT THE STREET.."

radiohead wrote on March 07, 2007 4:15 PM:"They don't have to buy new cars, just radio equipment. The cars don't come equipped with anything other than what a car normally comes with...and most of them don't even have a radio or air conditioning. So it is still just the cost of the radio equipment and the install. It's not a bad deal, that stuff is not cheap. Might as well spend it on the equipment instead of going into the board members paychecks."

My feed has moved from IBN to INB, still on a teamspeak server.

http://www.incidentnewsbroadcast.com/index.php

NO, I am not broadcasting StarCom21, but would be more than willing to if someone would donate a scanner to me :)

Also, currently not broadcasting anything St. Louis or St. Louis County

Thanks
Terry

Copying consistent traffic on TG 13004 from the Peoria simulcast tower. Its routine work traffic for Dist. 9 Springfield, almost like there simulcasting regular ops. I can only copy the mobile side and thats fairly broken up, but being 80 miles away it can be somewhat expected. I'll keep it manualed on here and see if they keep it on or what.

I was getting traffic on this T/G off the Normal tower today as well.
Sporadic operations. I could hear both vehicle and base. Last traffic
I heard was something at the 125/97 intersection.

Yeah its just a simulcast of regular traffic right now. Lincoln 1 just
came up on the actual Starcom radio and asked for a radio check from
Springfield. The dispatcher said not all Officers are trained yet on
the radio and its not a full go yet. So right now its just a simulcast
from the regular frequencies.

I'm in the Springfield area and I'm hearing the some of the mobile's from d-9 on 13004 but not the base. It's defintely a simulcast from hf-2 (154.935). I have a second radio monitoring that freq. Some of the mobiles that are farther away are coming in garbled/broken on 13004. Only the cars that are within Sangamon county seem to be coming in clearly for me. Also, there is a two or three second delay from the vhf transmissions and the starcom transmissions. I am missing the first couple of words on the starcom transmissions. I don't know if I need to do the upgrade from R.S. or if it is their equipment.

simulcast from hf-2 (154.935). I have a second radio monitoring that
freq. Some of the mobiles that are farther away are coming in
garbled/broken on 13004. Only the cars that are within Sangamon
county seem to be coming in clearly for me. Also, there is a two or
three second delay from the vhf transmissions and the starcom
transmissions. I am missing the first couple of words on the starcom
transmissions. I don't know if I need to do the upgrade from R.S. or
if it is their equipment.

From: Jesse Risley
Topic: 1140 Message: 1140

ISP District 20 has simulcasting up and running today as well. From near Macomb, I can copy tower 211 in Augusta simulcasting ISPERN and lowband operations on talkgroups 13036 and 13037 respectively.

1143. Dist. 8 Starcom ISPERN

Yahoo group: StarCom21
Date: 2007-03-12 21:43:40 UTC
From: Jason McDowell
Topic: 1143 Message: 1143

Copying an ISPERN link on TG 13033 on the Peoria simulcast tower, it appears to just be the Southern districts. Most is unreadable but Dist. 9 is crystal clear. Havn't heard any Dist. 8 simulcasts or anything North of Dist. 9. Also TG 13004 Dist. 9 High band simulcast still active today.

Heard ISPERN broadcasts from ISP D12, 18, and 21 on TG 13035 Site 203 Champaign. Didn't hear any mobiles while I've listened this evening.
ISP D10 units are still using VHF with no simulcast on Starcom21.

Also heard ISPERN broadcasts by ISP District Chicago and Lake County Sheriff's Dept on TG 13035. I wonder if we'll always hear these distant ISPERN's or if this is just for testing. It reminds me of listening to the ISPERN patch on the Grundy County TRS.

VHF high band conditions have been real good the
last few days. I am guessing that because of the
good conditions the receiver is just picking up
signals further than usual. I heard DIstrict 14
(Macomb) direct in McHenry County on Sunday.

Hello all
On Sunday March 11 at 2:00 pm and at 10:00 pm during ISP Dist. 8 shift change, a meesage was broadcast that ISPERN was to be patched to the 800 mhz system starting March 12 to March 19 and the troopers were to commit/report on any concerns they had about the quality of the signal.From what I have heard today, it sounds like the vhf signal recieved by the Dist. 8 vhf ISPERN reciever is then being rebroadcast on the local district Starcom talkgroup id. Dist. 8 patch acts like the VOX or whatever is being used to keyup the Starcom system needs the sensitivety adjusted so it only unkeys Starcom at the end of the transmission and not between words of the transmission.

I heard an ISP D10 trooper talking to Pesotum and the troopers portion was simulcast onto 13035 but interestingly, when ISP D10 Pesotum base talks they are not heard on this talkgroup (I could only hear D10 by listening to 155.475 on a different radio). Similar to what others have reported, I only hear other districts' ISPERN broadcasts, but not ISP D10's where the site is located. I don't understand how a trooper in the Danville area is going to be concerned about hearing an ISPERN broadcast for Jersey County in ISP D18.

This is the ISPERN Patch list that I have, if any of these assignments can be confirmed or denied please let us know:

Dist ISPERN TG
1 9050
2 9051
Chg 9052
5 9053
6 13032
7 9054
8 13033
9 13034
10 13035
11 17038
12 17039
13 17040
14 13036
15 None?
16 9055
17 9056
18 17041
19 17042
20 13037
21 9057
22 17043

Expect to hear nearby districts broadcasts as they are received on local receivers connected thru the consoles, basically if the District hears it so will you.

My guess is that what we are hearing on StarCom is a patch from the District 10 ISPERN receiver. Thus, we would hear the cars, and we would hear the other districts nearby (depending on conditions), but when District 10 transmits, their receiver is muted. We won't hear D10 that way. I further think this is just a check of the system and will not be the normal setup. Everything is in test mode right now.

From: Jason McDowell
Topic: 1153 Message: 1153

I put the ScanRecorder on Starcom Peoria Simulcast tower for 8 hours this afternoon. Caught quite a bit of ISPERNs and also several transmissions from TG 9014 which shows to be Joliet Dist. 5 dispatch B. The transmissions from them on the recording were unreadable though. As for the ISPERNs, caught a bunch of Dist. chicago broadcasts which were mostly clear. Caught a few Dist. Rockfords, Dist. Ashland (21) and Collinsville. Along with the more closer Springfield, Pontiac. Most of them were clear with a few breakups probably due to reception on the VHF side. No digital garble though when it was clear.

Jason

Sounds like they taking just the rx audio from the site or console. I have seen the same happen with some talkgroups on the Racom system here in Iowa. Including once where they were taking the decrypted audio from the dispatcher and putting out on the tg but if you listened to vhf side you just heard the encryption. Oops, actually took a while they figured that out and fixed it.

All of these assignments, both on CARMA and RR are best guesses so far. Until the system shakes out we won't know for sure.

We arrived at a couple scenarios by taking a few knowns and extrapolating them out based on what we understand each district to be assigned. For instance we have heard that some Districts will have 2 and others 3 Dispatch talkgroups, and after figuring out a few of them came up with educated guesses as to the others.

ISPERN talkgroups are an interesting batch. It appears that we can pretty much figure out the District assigned to a talkgroup by the traffic we DON'T hear on it, as some listeners have found that the patch mutes the audio coming from the local console. Therefore you would not hear District 5's base on District 5's ISPERN patch, but you would hear District 6's base on District 5's patch. Clear as mud, eh?

Village board OKs new radio system
By NORMA MENDOZA, nmendoza@theintelligencer.com
03/15/2007
Email to a friendPost a CommentPrinter-friendly
The Glen Carbon Police Department will join the Illinois State Police and the Madison County Sheriff's Department in using the Starcom 21 interoperable radio system. Glen Carbon trustees approved the purchase at their meeting Tuesday night for a total of $198,967.

Police Chief David Bradford said the cost includes portable phones for each officer, accessories for the system, revamping the dispatch console and installation.

The cost also includes $133,560 for 10 years of annual fees at $13,356 per year.

Bradford said he learned in a call to Motorola that the company will agree to the village policy of paying net in 30 days instead of Motorola's 20-day policy.

"They are going to fax the revision to us," he said. "We will also get two free program upgrades per year by paying the user fee annually instead of monthly and we will get a two and one-half percent discount on the fee."

The system operates on 700-900 MHz digitally as compared to the existing radio system which is 300 MHz and analog. Bradford said it will eliminate the necessity to have a mobile phone in each squad car in addition to a portable phone. He said it will allow communication throughout the state and across the river in Missouri which could be essential during a major crisis.

Trustees also agreed to purchase a 2007 3/4-ton Dodge Ram pickup truck for the Street Department from Bob Ridings in Taylorville through the state contract for $21,010, which includes a trade-in allowance of $600 for the 1992 Dodge Ram currently in use.

Public Works Director Tom Sedlacek said it also includes additional equipment such as a snowplow package, tow hooks and a lift gate on the back.

The board approved an ordinance to grant a change in zoning to two-family residential from single-family residential for a duplex at 406 and 408 Glen Carbon Road near the entrance to Shingle Oaks subdivision. It is the second time the request has been approved; the owner obtained village board approval for the change in 1986 when he was planning to build the duplex.

The board approved the appropriation of $320,000 in Motor Fuel Tax funds for the 2007-08 street maintenance program. In other action, trustees approved:

• An agreement with the Illinois Department of Transportation in which IDOT agrees to provide 80 percent of the funding for the reconstruction of Glen Crossing Road from Route 159 to just east of Waterford Lane, not to exceed $731,200. The village portion of the

project is approximately $182,800;

• An engineering service agreement with Juneau Associates Inc. in the amount of $20,300 for negotiating right-of-way easements for the Glen Crossing Road project.

• Change order one to add $38,233 to the cost of the Clay Street improvement project for the completion of off-site storm sewer improvements to Forest Ridge Drive, increasing the total cost of the project to $143,627;

• Change order No. 7 adding $7,962 to the cost of the Old Meridian Road reconstruction project because of the increased price of the bituminous material making the total cost of this project $563,625; some 3.44 percent more than the original contract with Thiems Construction Co.;

• A seasonal mowing contract with Four Leaf Lawn Care for $6,667;

• A contract with Melrose Pyrotechnics to provide the fireworks for the Glen Carbon Homecoming, the same as last year. Mayor Robert Jackstadt noted that TheBANK of Edwardsville has agreed to provide the $5,000; and,

• A donation of $100 for the Glen Carbon Fire Department and Firefighter's Auxiliary to help with expenses for the annual Easter Egg Hunt.

Jackstadt named Cindy Kennedy as Employee of the Month of March. In addition to her daily duties, Kennedy, a finance clerk for the village for three years, took on the task of assisting and entering the fiscal year 2008 budget draft while adjusting to changes in the Finance Department, including the departure of Finance Director Rick Jett and prior to the new director's starting date.

Jackstadt said Kennedy spent many long hours and weekends working with Jett, Treasurer Lynn Weller and village department heads in tracking, verifying and entering the budget information for more than 24 fund accounts.

"During this overwhelming process, Cindy remained steadfast and focused in completing her work within the allotted time frame," Jackstadt said.

Jackstadt announced that the public is invited to a planning workshop to discuss revisions to the comprehensive plan at 7 p.m. March 29 in the Public Safety building behind Village Hall (Police Department).

Sheriff's Department looking forward to new radios
Communications upgrade project almost complete

By Chad Morelli
Saturday, February 3, 2007 1:06 PM CST

Deputies and other personnel at the Madison County Sheriff's Department will soon be working with some of the most advanced communication equipment in the state.

After nearly six months of upgrading radio equipment and revamping its dispatch system, the Sheriff's Department is now looking forward to the final phase of a $2.1 million project launched in August.

The upgrade will allow deputies to take advantage of the STARCOM21 in-car radio system, a widely used telecommunication technology that relies on a series of relay towers throughout the state. Over the next few months, all of the department's vehicles will be upgraded to the new equipment.
According to Capt. Eric Decker, who leads the Administrative Services division of the Sheriff's Department, the radios offer a number of advantages.

"It's a truly statewide system, so that no matter where you are, you can be in communication with other law enforcement personnel," he said. "There will be no more worrying about dead spots in the county where you might not be able to use your radio."

The upgrades are almost complete, Decker said, and deputies will begin training on the new radios next month.

Currently, deputies are using in-car radios that rely on VHF waves, technology that is more than 30 years old. Decker said with the older radios, it was becoming increasingly difficult to make repairs or find parts that worked with the older systems.

With the STARCOM21 system, the radios are entirely digital and do not require VHF waves.

Many police departments are abandoning their current radio systems because of the amount of traffic on public radio airwaves. The Federal Communications Commission intends to slice up many of the available radio frequencies over the next decade or so, making the airwaves more accessible for radio stations, private enterprises and the public.

In some cases, police agencies relying on VHF radio bands will see their available bandwidth cut in half, Decker said. With so much traffic traveling on VHF, he said the STARCOM21 digital radios offer a better solution.

The Illinois State Police upgraded to the STARCOM system in 2000, a $25 million investment requested by then-Gov. George Ryan. With more and more agencies going digital, police will be able to better communicate and respond to emergencies.

Bradford said it will eliminate the necessity to have a mobile phone in each squad car in addition to a portable phone. He said it will allow communication throughout the state and across the river in Missouri which could be essential during a major crisis.

Trustees also agreed to purchase a 2007 3/4-ton Dodge Ram pickup truck for the Street Department from Bob Ridings in Taylorville through the state contract for $21,010, which includes a trade-in allowance of $600 for the 1992 Dodge Ram currently in use.

Public Works Director Tom Sedlacek said it also includes additional equipment such as a snowplow package, tow hooks and a lift gate on the back.

The board approved an ordinance to grant a change in zoning to two-family residential from single-family residential for a duplex at 406 and 408 Glen Carbon Road near the entrance to Shingle Oaks subdivision. It is the second time the request has been approved; the owner obtained village board approval for the change in 1986 when he was planning to build the duplex.

The board approved the appropriation of $320,000 in Motor Fuel Tax funds for the 2007-08 street maintenance program. In other action, trustees approved:

• An agreement with the Illinois Department of Transportation in which IDOT agrees to provide 80 percent of the funding for the reconstruction of Glen Crossing Road from Route 159 to just east of Waterford Lane, not to exceed $731,200. The village portion of the project is approximately $182,800;

• An engineering service agreement with Juneau Associates Inc. in the amount of $20,300 for negotiating right-of-way easements for the Glen Crossing Road project.

• Change order one to add $38,233 to the cost of the Clay Street improvement project for the completion of off-site storm sewer improvements to Forest Ridge Drive, increasing the total cost of the project to $143,627;

• Change order No. 7 adding $7,962 to the cost of the Old Meridian Road reconstruction project because of the increased price of the bituminous material making the total cost of this project $563,625; some 3.44 percent more than the original contract with Thiems Construction Co.;

• A seasonal mowing contract with Four Leaf Lawn Care for $6,667;

• A contract with Melrose Pyrotechnics to provide the fireworks for the Glen Carbon Homecoming, the same as last year. Mayor Robert Jackstadt noted that TheBANK of Edwardsville has agreed to provide the $5,000; and,

• A donation of $100 for the Glen Carbon Fire Department and Firefighter's Auxiliary to help with expenses for the annual Easter Egg Hunt.

Jackstadt named Cindy Kennedy as Employee of the Month of March. In addition to her daily duties, Kennedy, a finance clerk for the village for three years, took on the task of assisting and entering the fiscal year 2008 budget draft while adjusting to changes in the Finance Department, including the departure of Finance Director Rick Jett and prior to the new director's starting date.

Jackstadt said Kennedy spent many long hours and weekends working with Jett, Treasurer Lynn Weller and village department heads in tracking, verifying and entering the budget information for more than 24 fund accounts.

"During this overwhelming process, Cindy remained steadfast and focused in completing her work within the allotted time frame," Jackstadt said.

Jackstadt announced that the public is invited to a planning workshop to discuss revisions to the comprehensive plan at 7 p.m. March 29 in the Public Safety building behind Village Hall (Police Department).

From: Jesse Risley
Topic: 1161 Message: 1161

I had a conversation with an ISP radio tech on Tuesday. He informed me that there are no plans on the table to encrypt normal, routine state police communications at this point in time. However, some groups such as DCI, state/federal interops, ITTF, etc. have already acquired radios that have the encrypted capabilities and will generally operate in that mode. He did stress the full encryption is not entirely out of the option and is being pushed by some, but at this point in time most Starcom 21 traffic should be in the clear.

Full implementation of the system here in western IL has once again been pushed back, but gradual changeovers are beginning in most districts with the simulcasting of ISPERN broadcasts.

There has been use on both dispatch and car to car in District 14.
There also has been some encrypted traffic on another talkgroup.

District 14 is just messing around with the radios now. They're seeing how far they work (they are amazed when they can talk from Oquawka on the Mississippi to south of Macomb).

No word on when they will go live. It seems a select few have been handed portables.

Any of the sites listed in the Profile with 700 MHz. Control Channels
will have 700 MHz. voice traffic.

The 396/996 scanners will automatically locate the voice channels so
they have not been included in the CARMA Profile.

The RadioReference.com StarCom21 page does list voice channels. So far
the StarCom21 system has remained segragated in that those sites with
700 MHz. control channels have only 700 MHz. voice operations.

AFAIK all StarCom21 sites except 120 and 126 (and perhaps one or two
in the Quad Cities area) are operational, so any of the couple dozen
700 MHz. sites could produce voice traffic at any time.

1183. Starcom21 P25 AGC settings

Yahoo group: StarCom21
Date: 2007-03-27 22:07:59 UTC
From: citrus801
Topic: 1183 Message: 1183

There's been a lot of conversation about the best P25 settings for monitoring Starcom21 on the 396T. I've gone back and forth with many different configurations but this is what I like right now:

For Starcom21, I'm currently using digital AGC on, P25 threshold of 9, and set the P25 Response Time and P25 Reference Gain both to -2. With these settings, I can listen to Starcom21 with an earbud and it doesn't sound pixilated. In general, Normal PD sounds the most pixilated while ISU PD, Normal Fire and McLean County Sheriff sound better to me. If somebody is whispering, it sounds bad no matter what settings I try.

Hi
Thanks for the reply. I don't have the software or programming cable for this scanner i work as a public safety supervisor and Lee County went to starcom we lost the ability to receiver there traffic so i have to program this thing by hand. any help would greatful

thanks
Wayne

Files for all StarCom sites are on the CARMA Profiles page at

http://www.carmachi cago.com/ profiles. Scroll to the bottom, and

download the files. They are present in both ARC996 and UASD formats.

I checked a little more, and the frequencies listed may not be the
actual ones used. They will test on those, but they are waiting for the
rebanding to take place, so all could change later.

No carrier on any of these frequencies yet.

Yeah, that's what I was explaining to someone yesterday, asking why they haven't got their license yet.

The FCC has all 800 mhz licenses in a freeze right now, basically YOU CAN NOT file for a regular license for use on 800 mhz in IL.

Only an STA (Special Temporary Authority) ..... which still basically gives you the same rights, but you have to re-apply after 3 months I believe.

The worst of all...

A lot of frequencies on StarCom21 will probably change .... .and will go through a lot of this again.

Not knowing what's changing when... changing before an application has even been submitted, etc.

Of course though, throught the blanket license, 700 mhz should stay the same.

Hell, why wouldn't you just use 700mhz statewide then and screw the 800 mhz BS?

Great! It looks good on RR for now. The system is still on schedule
and should be in operation by summer. We will submit information as we
get it. The management is most cooperative, so I think we should be
able to get all the details on talk groups and other items.

Thanks for the information. I will start monitoring immediately as I
expect testing to begin any time.

Just wanted to tell you that starcom shouldn't be going active in that area untill sometime in may or June. I was in that area over the weekend and they were still active on the VHF system.

Jason

It was coming through on Tower 126 Kane County off of control channel 868.9375. I was picking it up in the area o I88 and Rte 53....Lisle/Naperville area of DuPage County. Nothing came over tower 101 in DuPage though. It was pretty clear from here.

Topic: 1202 Message: 1202

I finally heard a real transmission last on tower 123 in East Moline. It was from District 22 (forgot to note the TG number) and it seemed strange but nice to actually hear it from here. Several troopers were heard with a dispatcher. Reception was very clear with the 396T at out of the box setting for digital voice.

OT: really like hearing the southern accent in the female dispatcher's voice. Maybe it is genetics or something. My mother's side of the family is from Metroplis area. You know Superman's adopted hometown. :)

ISP D22 A (TG 17014) has also been heard on the Champaign site 203.
It doesn't sound like a simulcast from VHF but rather that they are
actually using Starcom21.

BREAKING NEWS: Governor expected in Alton on Wednesday

04/02/2007

Email to a friendPost a CommentPrinter-friendly
Gov. Rod R. Blagojevich is expected to be in Alton at 1 p.m. Wednesday as part of his push of controversial budget proposals.

His office announced Monday what some locals had been hearing the last several days - that he will be here as part of his "Investing in Families" campaign. Alton is one of a series of communities to be visited in a bus campaign that began Monday at a rally at Chicago's Navy Pier rally.

The governor is expected to be at Lincoln-Douglas Square at Broadway and Market streets.

The trip will discuss his Fiscal Year 2008 budget plan, which relies on a new gross receipts tax on business to help pay for health insurance coverage for all state residents and provide an additional $10 billion to Illinois schools over the next four years.

"We have a unique opportunity to fundamentally reform the way state government meets its responsibilities so that middle class and working families are at the center of what we do," the governor said in a statement. "For decades, working families have shouldered more and more of the tax burden while the wealthiest corporations in our state have paid less and less."

More on this story can be found in Tuesday's Telegraph.

1212. BC 796D Question

Yahoo group: StarCom21
Date: 2007-04-04 19:10:36 UTC
From: thall1971
Topic: 910 Message: 1212

Hey all
I hope someone can help me out here. I have a BC 796D and I have programed the Starcom system in, but when I have the talk groups for McLean County, ISUPD, Normal PD and Normal Fire, I get problems. The biggest thing I have noticed is that when I have the TG scanning, it stops on one, but for some reason the freqs keep flashing from the 2 primary channels. I have tried to put 1 primary into another bank and go that route, but to no avail. Can anyone help me out with this.

Tim

1213. ISP on Starcom21

Yahoo group: StarCom21

From: jburgess1974
Topic: 1213 Message: 1213

I have been listening to my Uniden 396T lately and this week hearing more and more ISP traffic only on districts dispatch A channel. This week so for been hearing traffic stops mainly in D22 all week and starting this afternoon started hearding D19 traffic stops from tower 230. Hearing most transmissions very clear. I am guessing ISP coming online and still using old system as backup.

1214. Dist. 14 TG 17014

Yahoo group: StarCom21
Date: 2007-04-04 23:01:13 UTC
From: Jason McDowell
Topic: 1214 Message: 1214

Been hearing TG 17014 this evening and yesterday evening on Peoria Simulcast tower, doing normal routine dispatch ops. Coming in clear but the audio is rather low. I have my 396 set on 5 with AGC on. Everything else I can hear fine but 17014 is rather low audio. Techs if you read this list, might want to bump the audio up a few lol.

I also heard 17014 on the Lakewood tower, and McLean County TG 30358 on the Champaign tower recently. Not sure why those are being transmitted that far away on other sites.

Well you may be able to find a used 396T under $500 but its like this....

-For roughly $450, get the Pro-96 and won;t be able to properly trunk track the 700 mhz frequencies. Won't have the close call, repeater find, UHF military air, and dynamic memory.

-For about $70 more, Get all of the above and properly trunk track everything. Just keep in mind, more and more digital trunk systems are going 700 mhz now.

I concur with Jason, put together a few more dollars and get a BCD996T. Best scanner available with the most features and is the ONLY mobile scanner that can properly track all StarCom21 sites.

The Pro96/2096 are great radios but can not track 700 MHz. sites and does not have any of the other features that the 996 has. The GPS feature itself is fantastic for those of us that travel around the state a lot, it will automatically turn on and off sites as you move around the state. In fact I produced a complete file of StarCom sites with GPS data so that users of the BCD996T can follow the system with the GPS connected.

A BCD396T handheld has many of the same features as the 996, except for the GPS and site programming. It is the best alternative to the 996 and is the ONLY handheld that can properly track all StarCom21 sites.

I heard 17014, which is Ullin District 20, on the Springfield tower as I drove through today. Also, 17011, Carmi District 19, was there as well. It looks like those 2 districts are running mostly on StarCom and probably have been patched to several sites just to have some traffic for users to check out the radios. I wasn't home today, so I didn't hear them on the Champaign tower, but I understand they may have been on it.

I can't say enough good things about the Uniden 396 and 996 scanners :) You can get both for $499 + shipping straight from Uniden and from many other places on the web.

Yes, you can get the BCD396T for about $525. Its handheld. The BCD996T
is a mobile version that you can mount in your car or bring inside.
Its online slightly more in price and includes GPS programming
capability if you have a GPS receiver to hook up to it and it has
multi-site programming convenience for the trunked systems with many
towers in the same vicinity but all carry different traffic.
Originally, you would have to make a new system for each tower, but
for the 996 you can put all the towers in one system I believe.

1226. Illinois Tollway traffic on Starcom21 today

Yahoo group: StarCom21
Date: 2007-04-05 23:14:56 UTC
From: Kevin
Topic: 1226 Message: 1226

I'm hearing a couple of TGs rebroadcasting Tollway traffic this afternoon on Starcom21 site 101 (DuPage County). TG 2002 is carrying traffic from one of their 800 Mhz maintenance channels, and TG 2004 is carrying traffic from one of their 800 Mhz patrol channels (ISP D15). Only listened for a little while in the car, unknow if they have any other TGs going or if traffic is being broadcast on other sites or not.

Reported that ISP District 11 should be on SC21 by the end of this month.

Officers did have portable radios, but were sent back for "rebanding" (? maybe re-programming?)

IDOT (especially the emergency roadside assistance vehicles) may also be leaving low-band at the same ONLY if ISP D11 completely abandons the low-band system completely, as they use 42.5 to communicate with ISP vehicles.

From: Dave Springer
Topic: 1054 Message: 1229

Mike,

I'm sorry to be so late responding to this, but better late than never.

I had the experience of calling a PD on an open mic broadcast. I was very nice to them, and gently pointed out that it makes no sense to broadcast that someone has an open mic since the offender will not hear the broadcast on their unit while they are transmitting. I nicely explained that they had to wait for the tot to shut the offending repeater down

I was told to give my complaint to Internal Affairs. BTW, no it was NOT Moline PD and the offender was not a canned captain who now has a son on the FD in the same city. lol

That department has a true us against them attitude.

Mike <cifn2@...> wrote:
Police here are always getting calls for things like, stop lights not changing, and usually when they get there it is a motorcycle not heavy enough to trigger the change, or some small car, which is too far up on the line for the new camera activated ones to work lol.

From a contributor:

The Madison County Sheriff's Office is scheduled to transition to the StarCom 21 system on or about April 24, 2007. On or about April 24, 2007 the Madison County Sheriff's Office is scheduled to go "live" on a brand new "New World" Computer Aided Dispatching (CAD) system, therefore there will be A LOT less radio traffic once everyone gets used to this system.

This is a great example of what I call 'lost civilization' stuff: an action is taken that really makes no sense, and no one can quite recall why that particular action was first proposed...just that 'we've always done that this way'. Nobody wants to change it, either. Who knows how 'check for an open mike' got into the training manual or what the writer was thinking? Guess that those that know will continue to snicker about it when we hear it as long as it isn't causing a safety issue.

Sorry for the OTP...did hear D1 testing on Wednesday about mid afternoon from my office in Naperville.

Actually reference the open mic issue, it can be beneficial to announce the "check for open mics" statement if there are 2 Officers together on a call or on patrol. Also many times, the dispatcher will announce the statement on the departments alternate channel that is scanned on the in car radios.

1237. 796D v. 700 MHz

Yahoo group: StarCom21
Date: 2007-04-08 05:22:38 UTC
From: p_gauen
Topic: 1237 Message: 1237

I know the my 796 won't accept 700 MHz band. If I program in the 800 MHz frequencies and talkgroups in my area (ISP D11) what will I get and what will I miss?

Some local sites are 700 and some 800...is everything simulcast on all? I suppose closest site to mobile radio will work its call on whatever frequency is available, as with cullular service, but other mobiles will need to hear too, unlike cellular, and some of them will be closer to 800 sites. I don't quite grasp how this will fit together.

You will only hear talkgroup(s) of users (STARCOM)
that are currently affiliated with that tower.
And you will only receive the current talkgoup
that the user is tuned to.

>
> Some local sites are 700 and some 800...is everything simulcast on >
> > all?

STARCOM 21 is not simulcasting. In southern IL,
only the St Clair System (T359) is simulcasted
at each site.

STARCOM 21 is a zoned system. Talkgroups are
only heard at a TOWER if a system user's radio
is tuned to that TOWER. You are basically at
the mercy of any user(s) that have their SYSTEM
radios turned 'ON'on to that 800Mhz site. And
each radio can only tune into one talkgroup at-
a-time. Although TALKGROUP scanning might be
possible on those SYSTEM radios. You might hope
for that.

Now for the good news... ISPERN & IREACH will
probably be tuned-in by each and every 911
center in Illinois. Likewise, the 911 Center's
STARCOM 21 radios will be tuned in at all times.
So you will probably get those on your scanner at
all times ; regardless of which 700 or 800Mhz
site you tune to.

Here is an unlikely scenario that could
hypethetically play-out.....

If all of the BOND county D11 units were
to go to D11 HQ in Collinsville, and no D11
units were left in BOND county. Then there
would be NO system radios tuning into the
D11 Dispatch talkgroups. Hence, people
listening with scanners to any of the 700 &
800Mhz sites in BOND county would probably
hear NO dispatch talkgroups ; none at all.

Even I freely admit...
This scenario is very unlikely. Plus,
I think most STARCOM 21 tower sites are
located in the nearby counties. Not sure
if any of them are in BOND county.

Thanks for the help.

I guess the logic I'm testing is a presumption that at most times there would be one or more D11 cars proximite to an 800 MHZ site, keeping those channels active so those cars would be in the loop even for traffic directed to cars worked on 700 MHz. It will be interesting to see how this plays out, and to see what kind of range I'll get from the 800 MHz towers in Godfrey, East St. Louis, Belleville and Sparta. I presume we can use talkgroup scanning to monitor the D11 frequencies and Madison County sheriff, which I suppose will operate under the Starcom 21 umbrella.

I presume we can use

I would think they would force the towers within a district to carry the dispatch talkgroups. The Racom (edacs) network forces a tg to selected towers.

I was almost thinking the same thing.

This could go even further to include simulcast ISPERN towers to do the same thing.

1243. Re: Illinois Tollway traffic on Starcom21 today

Yahoo group: StarCom21
Date: 2007-04-09 20:28:54 UTC
From: Kevin
Topic: 1226 Message: 1243

An update to the below information...TG2004 is carrying patrol (ISP D15) "South" traffic (Zone 1 - 355 & 88 W. of 355, Zone 2 - 88 E. of 355 & 294 S. of Cermak Rd. toll plaza), TG2037 is carrying patrol (ISP D15) "North" traffic (Zone 3 - 294 N. of Cermak Rd. toll plaza & Edens spur, Zone 4 - Northwest Tollway) and TG2002 is carrying maintenance traffic. At this time, all three TGs appear to be simply repeating traffic being heard on the their 800 Mhz conventional channels.

Time will tell if these TGs will continue to carry the same traffic when they switch over to Starcom 21 or if the above usage patterns are just for testing purposes.

1244. FW: [ILLINOIS_APCO] Reminder: Region 54 700/800 Mhz RPC Meeting on Wednesday

Yahoo group: StarCom21
Date: 2007-04-09 18:04:34 UTC
From: Jeff Turner
Topic: 1244 Message: 1244

Cross Post - Hope you don't mind.

Jeff

REGION 54 700/800 MHz PUBLIC SAFETY
PLANNING COMMITTEE MEETING

WEDNESDAY, APRIL 11TH, 2007
1:00 P.M.

Region 54 (Southern Lake Michigan) Public Safety Regional Planning Committees will hold a plan review meeting on Wednesday, April 11th, 2007 as follows:

Region 54 800 MHz Public Safety Regional Planning Committee meeting will convene at 1pm at the Grundy County Office of Emergency Management 1320 Union Street, Morris, Illinois.

The purpose of this meeting is to:

a. City of Milwaukee and Milwaukee County speak to how the use of the mutual aid channels will be coordinated.
b. Starcom21 mobile app
c. McHenry County, IL
d. State of Indiana
e. Review of other recent issues

Region 54 700 MHz Public Safety Regional Planning Committee meeting will convene immediately following the 800 MHz RPC meeting at the Grundy County Office of Emergency Management 1320 Union Street, Morris, Illinois.

The purpose of this meeting is to:

a. Address any outstanding or additional comments regarding the Draft 700 MHz Draft Plan.
b. Send Draft Plan to Adjacent Regions.

The Region 54 Public Safety Regional Planning Committee meetings are open to the public. All eligible public safety providers whose sole or principal purpose is to protect the safety of life, health, or property in the Southern Lake Michigan area would utilize these frequencies. It is essential that not only public safety, but all government, Native American Tribal, and non-governmental organizations eligible under Section 90.523 of the Commission's Rules be represented in order to ensure that each agency's future spectrum

needs are considered in the allocation process. Administrators who are not conversant with telecommunications technology should ensure that their respective agencies are represented by suitably conversant staff.

All interested parties wishing to participate in the planning for the use of public safety spectrum in the 700 MHz, 800 MHz band, and/or the newly allocated 4.9 GHz band within Region 54 are encouraged to attend. For further information, please contact:

1245. Fw: [ILLINOIS_APCO] St. Clair Radio System Update

Yahoo group: StarCom21
Date: 2007-04-09 23:46:46 UTC
From: Terry Weatherford, WX9SAR
Topic: 1245 Message: 1245

From 911 Coordinator of St. Clair County:

----- Original Message -----
From:
To:
Sent: Friday, April 06, 2007 8:01 AM
Subject: [xxxxxx] St. Clair Radio System Update

In the interest of testing my new access to this group I thought I would provide you with an update concerning the St. Clair 700/800 system. The Grant is now over. The result is 7 Channel- 10 site- Project 25 - digital simulcast system with a prime site - connected to the Starcom21 controller in Collinsville. The system has over 1000 subscribers using it for communications today and we will be adding 250 more in the next month. The implementation of the second PSAP, Fairview Heights, is in progress and their Police, Fire and Public Works have already been issued radios. The police are now able to communicate in parts of the mall and other places where radio communications had been unavailable. We have communications with various entities on both sides of the river including the United States Coast Guard and St. Louis City FD and PD. We have patched 3 talk groups of the military VHF trunked system at Scott AFB to our trunked system to provide complete interoperability on the airport grounds. Our users pay no monthly radio fee. We have talked on a portable radio from the Wisconsin border to Kentucky Dam and from St. Charles CO, MO to Indiana.
.

There is another benefit to dispatch keying up over the open mic. The officer may not know until it is too late that he said the chief is a fat slob on the air. Instead, dispatch walks on the open mic to prevent the officer from saying something that probably shouldn't be on the air.

This is a great example of what I call 'lost civilization' stuff: an action is taken that really makes no sense, and no one can quite recall why that particular action was first proposed...just that 'we've always done that this way'. Nobody wants to change it, either. Who knows how 'check for an open mike' got into the training manual or what the writer was thinking? Guess that those that know will continue to snicker about it when we hear it as long as it isn't causing a safety issue.

Sorry for the OTP...did hear D1 testing on Wednesday about mid afternoon from my office in Naperville.

So true. Many years ago, one of our reserve offices had wedged the mike in his seat (maybe...I always suspected his partner) and a faint but graphic description of a porno movie that he'd seen the night before was going out over the air. (This was in the days before time-out-timers. I was able to find where he was carrying on with his description parked next to another officer and frantically wave to him to shut up. Didn't hurt his career any, as he went on to become my boss and chief of another agency. We got time-out-timers on the next batch of radios, though...

1248. Tollway traffic heard in Grundy County

Yahoo group: StarCom21
Date: 2007-04-11 19:35:48 UTC
From: Mike
Topic: 1248 Message: 1248

TG 2002, reported the other day to be Tollway maintenance, is being heard very well on site 125, Grundy County. Pretty good distance from any of the Tollway system. Nothing on TG's 2004 or 2037 that were being reported heard on site 101.

Mike McGowan

1249. ISP on SC21

Yahoo group: StarCom21
Date: 2007-04-11 21:45:10 UTC
From: jburgess1974
Topic: 1249 Message: 1249

Sounds like ISP is starting to come alive on SC21. This afternoon started hearing D13 Disp A on talk group 17006.

Not sure if a pattern is developing yet with only three district's with Dispatch A channels active. If there is a pattern developing looks like districts coming alive on Wednesday's and Friday's going from South to North and East to West.

On Champaign, 13047 is being used frequently today for testing portables. I heard things like, "I'm inside a building" or "I'm in my house" and other similar conversations. This is on tower 203. It appears this talkgroup series is for testing/demos.

1253. d13 on T358

Yahoo group: StarCom21
Date: 2007-04-13 03:28:28 UTC
From: Todd Hartzel
Topic: 1253 Message: 1253

Greetings all,
Lots of action coming from d13
on talkgroup 17006. Lots (I mean lots)
of traffic stops on I-57.

One unit: Unit 1362 was on a routine
traffic stop ; and stopped a wanted
subject at mile marker #64. The wanted
stop was broadcast on talkgroup 17039.
The d13 ISPERN talkgroup.

These talkgroups are only coming into
the St Louis area thru Tower T358 (that
I am aware of). T358 seems to cover
alittle into D13 and someone down there
is tuned in.

I have tried monitoring other Towers around
St Louis, but 17006 & 17039 are NOT being
piped-into-those.

I just heard unit 1377 tell Duquion that they
were switching to Channel 13B. But have
not heard Channel 13B - 17007 yet. So
apparantly no one on T358 is interested
in monitoring Ch 13B.

1254. ISP D14 to SC21 5/9 or 5/16

We got to tinker with a STARCOM portable and he says either 05/09 or 05/16
is the slated switchover date here in the District 14 area. They are
apparently still deciding exactly what (besides ISPERN) to simulcast between
VHF-Hi and STARCOM TGs, but he claims that all VHF highband stuff is being
maintained as is.

1255. D 10 Testing

Yahoo group: StarCom21
Date: 2007-04-13 16:54:40 UTC
From: Milt Forsberg
Topic: 1250 Message: 1255

District 10 is checking out the system. Yesterday and today the cars are using the car to car group, 13047, to see how the coverage is. I think some have not used a repeater system before and they are amazed at how well they can talk to distant cars. There is a little chatter on the main dispatch group, 13007, as well. I hear some demo transmissions that appear to be coming from a classroom. All shifts appear to be using the system for testing. This is on tower 203 in Champaign. It sounds like D 10 will be ready for the May 1 switch to StarCom. If you are in the area, it is fun listening to the troopers playing with their "new toys".

1259. Major Talkgroup update to SC21 on RR.com

Yahoo group: StarCom21
Date: 2007-04-13 19:17:04 UTC
From: tweatherford@radioreference.com
Topic: 1259 Message: 1259
Attachments: 2 described; binary payloads are missing from this source WARC

Updated talkgroup numbers according to the Carma Profile.

Most of these are UNVERIFIED and assumed using the scheme of verified TGs.

I do make mistakes, so please let me know if anything is wrong.

One thing I do want to do......if, for now, mark or comment EVERY SINGLE talk group that is verified to be in use (or has been used at one time) --- such as:

13007 32cf D D10-A Illinois State Police District 10 - Dispatch A
13008 32d0 D D10-B Illinois State Police District 10 - Dispatch B
13020 32dc D D10-DET-A Illinois State Police District 10 - Detail A
13021 32dd D D10-DET-B Illinois State Police District 10 - Detail B
13034 32ea D D10IREACH Illinois State Police District 10 - IREACH Patch (currently hearing, sometimes broken T021E)
13035 32eb D D10ISPERN Illinois State Police District 10 - ISPERN Patch
13041 32f1 D D10LOCAL Illinois State Police District 10 - Local Patch
13047 32f7 D D10-C2C Illinois State Police District 10 - Car To Car (testing portables in homes, buldings) (heard on T203)
13053 32fd E D10-INV Illinois State Police District 10 - Investigations (encrypted, heard on site 203 Champaign)

Thanks
Terry

1260. d11 talkgroup 17000

Yahoo group: StarCom21
Date: 2007-04-13 20:46:19 UTC
From: Todd Hartzel
Topic: 1260 Message: 1260

Greetings All,
Talkgroup 17000 for D11 is alive and well today. And it is coming thru on most of the towers that I can receive at my QTH:

- T305
- T353
- T358
- T359 (have not tried T359)

I am hearing Units: 11xx series & dispatch. Talked briefly about prisoner pickups in St Clair County.

T358 is very busy now with the active D11 & D13 talkgroups. If you can get it, it would be a nice Tower to park your 396T or 996T on.

1261. ISP D10 TG 13041 car-car

Yahoo group: StarCom21
Date: 2007-04-13 22:19:58 UTC
From: citrus801
Topic: 1261 Message: 1261

Currently hearing ISP D10 speed zone detail on TG 13041 Site 203 Champaign. This doesn't sound like a simulcast of a VHF channel, it sounds like they are using Starcom21 radios. Regular patrol ops are still on HF2.

1262. Talkgroup-simulcasting

Yahoo group: StarCom21
Date: 2007-04-13 23:02:36 UTC
From: Todd Hartzel
Topic: 1262 Message: 1262

Greetings all,
This is referencing a previous message
on the subject of Talkgroup-simulcasting
across all of a District's towers.

It would be very nice if this is the plan
for SC21. But, locally in St Louis there
is a very good example of it NOT occuring:

Talkgroup:

17037 - D11's ISPERN Patch

While Talkgroup: 17037 is being heard on
most of the D11 towers I can hear at my QTH:

- T305
- T358
- T359

there is one TOWER not carrying 17037.
Its Tower T353.

Again, if the plan is to have Talkgroup-
simulcasting across each of a District's
towers, then that's cool. And will make
most people happy. But, I gotta admit,
on those rual TOWERS located between
several ISP Districts. If their talkgroups
stay busy for awhile, it could overwhelm
those RUAL TOWERS where only a very few
repeaters are assigned. Plus the DATA
channel takes one repeater too. T353 is
located very centrally in D11. In the
middle of the dense urban zone of the
Metro-East of St Louis -- 'American Bottoms':

http://en.wikipedia.org/wiki/American_Bottom

So its quite a surprise that T353 would not be
included for ISPERN, if Talkgroup-simulcasting
was indeed in-use across all of D11 towers.

Today, Apr 13, they were running a wolf pack clocking speeders on I57
using talkgroup 13041 around mile 234, which is just West of Champaign.
They were using 13041 for all the car to car communications giving
speeds, times, etc. The report of the traffic stops was not given on
StarCom, but probably on the current VHF channels.. And, they were very
busy with stops, about one each minute. Speeds of violators were 80 mph
and above. One was reported at 118 mph. A talkgroup of 13097 appeared
once today, but I don't know what that group's function is.

Thanks for keeping RR updated!

1266. Starcom21 Towers

Yahoo group: StarCom21
Date: 2007-04-17 00:15:45 UTC
From: jburgess1974
Topic: 1266 Message: 1266

I have a question regarding SC21 Towers. According to RR.com and the SC21 Profile on the carmachicago.com website there are three tower's, one in each section (North, Center and South), that are considered Master towers which are towers: 101A (Lisle), 230 (Springfield), 353 (Caseyville).

My question is if people that are in range of any one of these towers able to hear more of the talk groups than any other tower located in the state? If not what are the actual purposes of these towers? Thanks in advance.

1267. Re: [StarCom21] Starcom21 Towers

From: Rich Carlson, N9JIG
Topic: 1266 Message: 1267

No, you will not hear any more traffic from those towers since they are Master Sites. That is just where the switching equipment is located and is included in the Profile and RR listing as a matter of reference and completeness.

FOr the most part you will only hear traffic from a tower when a radio is affiliated to that tower. There are some exceptions, especially during this early use and testing phase we are in now.

As far as I know, each site holds the actual "system controller" for that zone.

Can't say any more than that, Rich?

Yes, each site has a controller as well as the recievers and
transmitters, the master sites also have the equipment needed to tie
in all the sites in it's Zone and connect the 3 Zones together.

From: troopertripp
Topic: 1277 Message: 1277

I was told that McHenry County Sheriff's units and Municipal dispatched by Sheriff will switch to SC21 by the end of this year. That being said; I was talking to a district 2 ISP patrol supervisor last week who told me they do not have radios in any dist 2 cars yet. He further stated that the towers are not operational in McHenry County yet. I don't have a sc21 radio yet so I haven't listened and don't know. Any one scanning heard any traffic up here in McHenry County. I was given the order sheet to budget and purchase radios for the switch this fall. Just curious?

I am watching Towers 108 (Lake County) and 115 (North Cook) in Pro96Com and both report that Tower 120 (McHenry) is "Failed". We have the proposed locations for the McHenry sites but AFAIK they have yet to complete the installation.

I think that 120 is the last site to be provisioned, but I don't know why. It might be due to some re-engineering to accomodate MCSO and thier planned move to the system (if the original plan didn't provide the required coverage) or they may be having site acquisition issues.

From: Jason McDowell
Topic: 1281 Message: 1281

Well its weird, last week, Dist. 8 Peoria was using 13046 as car to car for a traffic detail. This week theres been a ton of chatter on TG 13045 from Dist. 8 units just testing it out and chatting. Maybe there giving 2 Car to Car TG's to each district?

Jason

Topic: 1281 Message: 1282

Jason,
What you heard on TG 13046 was the motorcycle Mary units talking last week. I believe all Mary units are based out of Springfield ISP District 9 whose car to car TG is 13046. What you and I heard today where ISP District 8 cars using the correct TG 13045 for car to car for District 8. You may want to program in TG 13046 as both Mary units and ISP District 9 because they could be running speed enforcement zones anywere in the state on this car to car talk group.
Later,
Bernie

A few days ago down here on I-255 south of I-270, heard 2 Mary units talking to each on 154.95 CSQ (usually DCI w/tone other during a speed detail.

They were asking if the air unit was using HF-4, "Mobile" (which I assume is 154.95), or "Starcom". They said "the Plane will be using StarCom"

Terry,

You've already seen the reply regarding the proper HF-4 freq...

Back in the "old days" when I was on the road, "mobile" was 42.50. The aircraft always worked either on HF-4, the district's HF-2 freq, or 42.50 with ground units. That **MIGHT** have been what they were referring to when he said "mobile". (And we all know what happens when we "ASSUME"... hehehehe)

Then again, I've been off the road for 8 years, so..... ;-)

Definitely sounds like Madison County Sheriff is being simulcast FROM SC21 to 155.595. Can hear mobile units same on the scale as dispatch and all has a "hint" of digital garble on the voice.

I'm assuming 155.595 "BM - Base/Mobile" is being simulcasted on/from TG 7315.

Any others monitoring to confirm any info?

Terry

FYI...

Have not heard conversation one on 155.04 or 155.85 for the last 5 hours.
Only hearing normal Sheriff dispatch units on 155.595.....

Either they are NOT being simulcast or not being used at this time.

Almost forgot, about 1pm yesterday afternoon, on 155.595 did hear unit saying "Transporting Radio Service to Madison PD".....

That's still about it.... 155.595 still sounding like simulcast at this point.

Terry

PS.... still requesting donations of a P25 capable scanner for live online broadcasts for Madison & St. Clair County..... lol longshot YES, desperate HELL YEAH.....

Also.... not currently broadcasting any live scanner right now on IBN or INB..... awaiting future action to return to IBN or use a local program to broadcast on WinAmp/WMP

Everyone,

It's my understanding that StarCom21 has not yet come to D-02... therefore LO and HI band usage, and some EDACS (I think). "Way back when" I was told that D-05, D-02 and D-Chgo will be the LAST to transition to StarCom21.

Mark - N9WYS

-----Original Message-----
From: carmachicago@ <mailto:carmachicago%40yahoogroups.com> yahoogroups.com On Behalf Of Rich Carlson, N9JIG

Basically it is because "It's what they have". I spoke to a D-2 trooper a couple years ago about the subject and he told me that the low band covers the district much better than high band.

Yahoo group: StarCom21
Date: 2007-05-02 03:57:17 UTC
From: Patrick Gauen
Topic: 1304 Message: 1305

Early Monday afternoon, heard very loud and clear routine dispatch on D11 ISPERN TG except it signed off as a D9 message. I was in Collinsville at the time, 90 miles from Springfield. Maybe a D9 car was passing through and its presence triggered patch through one of the local sites.

Tuesday. mobile in Granite City, heard fading, garbled D11 ISPERN TG chatter that seemed to involve Mo, perhaps St. Louis PD. As they have communicated in past on ISPERN, wonder if some Mo dept (city, county, MSHP) dispatchers have Starcom to interconnect.

Ahhh...imagining that irresistible "new car" smell?
Check outnew cars at Yahoo! Autos.

1306. Dist 17 testing on TG 9019

Yahoo group: StarCom21
Date: 2007-05-02 19:56:10 UTC
From: Mike
Topic: 1306 Message: 1306

Originally intended for this group, posted to Carmachicago by mistake.
Sorry if the double posting troubles anyone.

Once again, heard from Grundy County (125). Testing was going on in the far northern parts of LaSalle County. Lake Holiday, Leland, and Earlville were mentioned. Troopers radio changed to transmit from several different sites during testing, especially around Lake Holiday. Looking at the map of sites, this is probably one of the deadest spots in Northern Illinois. It would seem a future site in the Yorkville/Plano/Sandwich area might be in order. He also had trouble transmitting when going under an overpass. Perhaps also having to do with the distance from any of the towers.

IMERT, Illinois Medical Emergency Response Team, which is sort of based out of St. Fancis Hosp, in Peoria, they have put together a response team that can respond to a major disaster. I think they have members that are from about a 60 mile radius of Peoria. And from what I understand there is a request for Tech. people that may want to join, there team is not all medical, but has other aspects that members cover.

1313. McDonough County Sheriff

Yahoo group: StarCom21
Date: 2007-05-08 03:37:07 UTC
From: Jesse Risley
Topic: 1313 Message: 1313

The McDonough County Sheriff's Department has recently began to use Starcom21 for some of their operations. I have heard them quite a bit this evening on the District 14 - Macomb tower on TGID 20.

From: Andrew Perley
Topic: 1313 Message: 1320

McDonough County Sheriff has been doing sporadic simulcasting of their Primary (154.755) and also been using TGID20 for dispatching again tonight. There is talk about problems with the simulcasting equipment and deputies switching to starcom to check signals at various spots around county. Seems like they have been switching back and forth between 154.755 and TG 20 for dispatching and car-car communications. Heard all this on the Macomb tower 224.

Side note - those of you with a BCD396t..What do you have set as your p25 level for optimization? I can't seem to get the "awsome digital audio" that people seem to love. All I seem to get is what sounds like a bad connection over a direct connect conversation.
Andrew

1321. StarCom21 updates, link to Indiana

Yahoo group: StarCom21
Date: 2007-05-12 18:44:50 UTC
From: tweatherford@radioreference.com
Topic: 1321 Message: 1321
Attachments: 2 described; binary payloads are missing from this source WARC

Updated SC21 page on RadioReference with info from yahoo group.

Also updated the misc. text window on the page.

And this was reported from a listener in Coles County: (Pro-97)
(Looks like an analog link to the Indiana SAFE-T system on an Illinois tower)

hrd something on Mattoon sc21 tonight, sounds like Indiana patching..lots of tg's
867.4375, secondary control channel, operating analog but with digital talkgroups-weird
M36:7829 and later M36:1700 on display
04864 "Clark County, 61-8"
05872 kept hearing "westfield 10" and other units
others, no voice heard--got too bad reception (the Mattoon tower was receiving bad, i heard the control freq clearly)
03776, 05888, 08448
voice freqs were 858.7375 and 858.4625
nothing heard on other areas control freqs....they werent part of the simulcasting (casey, paris)
note: 858.4625 not listed as Mattoon freq...odd
3776 Brazil PD dispatch, 5872 and 5888 Vigo County sheriff dispatch, no listings for the others (4864 and 8448) yet- Clark county IN isnt on system yet per RR forums [Offline Message (Thu May 10 00:28:16 2007)]
858.4625 NOT licensed here, just city of Champaign and Pace Suburban Bus Svc...shouldnt be on Mattoon sc21 tower!

Indiana tg's on Mattoon tower
testing it out on the indiana and IL sides both i guess
weird-Motorola analog control channel with digital TG's
and that unlicensed voice freq

So, sounds like SAFE-T may be using a SC tower for additional coverage, may be possible that SC uses some SAFE-T towers for better coverage.

Can anyone figure this out or explain it?

Currently getting the MERCI-3 patch (155.16 CSQ) broadcasted on 154.19 186.2 PL, which is the St. Clair County Fire Net.

Additional note: always been CSQ, sometimes 100.0 on paging tones, but have been receiving some 186.2 PL on page & dispatch lately on 154.19 from CENCOM-St. Clair County. One area of the county continues to use 173.8 PL (Caseyville).

Also, as previously noted, I've been hearing the patch/simulcast of the sheriff's mobile units on the base station on 155.595 (formerly base/mobile, not a repeater). They sound slightly digitized/garbled to me, although others don't seem to think so.

Although its definitely no big deal, I've added a recording of the file
http://f1.grp.yahoofs.com/v1/IFJHRmv3t8wbnUrftqrCyEBVnI9y-hpsqn3nbPsX3MjU2DOnEqw86pV44PV-jm9smMtBh-7GTQBdHOgH4obeHA/Audio/155595-starcom-simulcastpatch.wav

(if that doesn't work, try this http://groups.yahoo.com/group/StarCom21/files/Audio/)

So far, this is the uses heard in Madison County since they joined SC21 on April 25.

7308 1c8c D 67-SD JAIL Madison County: Sheriff - Jail Operations
7315 1c93 D 67-SD DISP1 Madison County: Sheriff - Dispatch (Patch to/Simulcast of 155.595 BM 4/07)
7317 1c95 D 67-SD ??? Madison County: Sheriff - unidentified

Thanks!

Topic: 1321 Message: 1323

Just a couple notes,

Both systems use the same frequencies is the explanation.

The fact that the Pro97 displayed a 3600 control channel
would indicate this was NOT a Starcom21 transmission.

The fact it displayed the sys id of 7829 pretty much says it was
picking up the SAFE-T system.

There would be no inner-op between the SAFE-T and Starcom systems.

Now tonight, 155.16 CSQ is being broadcast on 155.28 CSQ, I'm sure part of the SC21 patches in St. Clair County.

Hearing 4C76 & 4C73 calling CENCOM and St. Elizabeths Belleville, can here CENCOM and the hospital too. These units are both MEDSTAR Ambulance units, not units that would be from a local municipality that is using SC21.

155.16 no longer being broadcast on 154.19.

Apparently they are using one of the TG that can be patched "on the fly" to whatever frequency they want. Almost sounds like a mistake, no reason for some of these to be on what there are.

Sorry if I already sent this before

Law enforcement radio funds win OK

By KEVIN P. CRAVER - kcraver@...
Comments (11 comment(s))
WOODSTOCK – The McHenry County Board approved borrowing money for a new law enforcement radio system, paving the way for an upgrade within a year.

Board members unanimously approved borrowing just under $4.9 million Tuesday to replace the system in place since the 1970s with one compatible with the Motorola Starcom 21 system used by the state. The money will cover about 850 new radios, as well as updated dispatch equipment.

Some parts of the McHenry County Sheriff’s office radio system are 35 years old, Sheriff Keith Nygren said. The new “narrowband” system allows communication with all county offices and state agencies.

“Most radio people will tell you that if you get 15 years out of a system, you’re doing pretty good,” Nygren said. “We got more than double out of ours. It’s time.”

The radios will equip deputies and squad cars, as well as court security, emergency management and Animal Control, Nygren said. They also will bring the sheriff’s office into compliance with Federal Communications Commission regulations requiring police to have narrowband systems by 2013.

The $4.9 million cost is less than half of the $12 million or so estimated years ago because the Starcom system uses Motorola’s towers and does not require the county to buy or upgrade antennas. It also works better in spotty parts of the county, Nygren said.

Undersheriff Eugene Lowery said maintaining the current system has been a struggle. “[The new system] is certainly reassuring to us from an officer safety point of view, but it’s also reassuring that the odds of failure in the field will be drastically reduced, which could save a sheriff’s deputy’s life one day, or the life of a citizen,” Lowery said.

The county is asking its Washington lobbying firm, Ferguson Group LLC, to seek up to $2 million in federal funds to defray the cost.

1326. Fw: Fairview Heights Update

Yahoo group: StarCom21
Date: 2007-05-15 07:06:16 UTC
From: tweatherford@radioreference.com
Topic: 1326 Message: 1326

From a submitter:

Just an update. The consoles for Fairview Heights PD and Fairview Fire are to be up and running by the end of the month. Fairview PD will be going on to their own talkgroup and get off of the one they are using now (Fairview Public Works). The Fire Dept. will be still paged out on 154.415 CSQ 103.5 and the 800 system will be hooked up (simplex) to transmit over the VHF frequency. I am starting to run over a few new talkgroups. I will send them to you as I acquire and identify them. French Village Fire (also dispatched by FHPD) will be staying on the VHF until they can purchase radios as well.

There a few threads on Radioreference, but I'll respond here for the group.

The digital models will do 700/800Mhz P-25.
They will do P-25 i-calls.

Availability scheduled for October 2007.

As to the GRE/RadioShack relationship, I do not know.
GRE is wanting to sell directly to dealers.
Don't know if this means RadioShack will carry or not.

Subject: [StarCom21] Re: New GRE Scanners

There a few threads on Radioreference, but I'll respond here for the group.

The digital models will do 700/800Mhz P-25.
They will do P-25 i-calls.

Availability scheduled for October 2007.

As to the GRE/RadioShack relationship, I do not know.
GRE is wanting to sell directly to dealers.
Don't know if this means RadioShack will carry or not.

1076 is Lee County.... no known 3xxx TG.

Some of the TG numbering *may* be off may 1 digit (instead of 9099 it may be 9098).
Alot The listings on radioreference.com are educated guesses.

Yesterday in the Rock Island area, I heard what I believe was a
demonstration of the emergency button 10-second transmit feature on
TGID 9015. I could hear what sounded like an instructor explaining it
to a class in the background. This happened a couple of times
throughout the day.

I also heard someone saying "Test, Test" on 9069, and what Lee Co
Sheriff's office on TGID 3076.

9015 is supposed to be ISP Dist7 Dispatch A
9069 is supposed to be another districts Car-to-Car (dist 20?)
3076 I saw listed somewhere as Lee County.

Hello, I have begun the long road of finally updating the ScanIllinois.com website.

The front/home page now looks much cleaner and is easier to read.

Database and other pages will be updated in the upcoming months and many get deleted do to the fact the information is already been placed on RadioReference.com.

Thanks!

From: mvhyden61
Topic: 1342 Message: 1342

I work at a casino in the Quad City area in district 7. Yesterday, Tuesday, a couple of our gaming agents went for training on the new radios. Some of which I heard. One of them told me last night that they were monitoring districts 13, 19, and 22. My question is, if they can listen to them, why can't I hear them on my 396T? I hear them once in awhile for a few hours, but nothing constant. I live and work within the coverage area of 5 towers and get good signals from at least three at any given time. Those are: East Moline #107, East Moline #123, Moline #127, Moline #128, and Rock Island #122. At home, I also get Andover #103 and Kewanee #117. I have the radio set for ID Search on all systems and haven't programmed any TGIDs yet. Does anyone else in this area hear them, or is it just me? I do hear the IMERT units sometimes.

You can only hear them because someone else in your listening area had those districts tuned into there radios. When there handheld switches to that districts TG, the towers in your area now receive the traffic and so will you. Thus the reason why you can only receive at various times.

Jason

FOR IMMEDIATE RELEASE
May 24, 2007

Governor Blagojevich announces Motorola to donate $294,000 worth of radios for state's college campus security effort
Radios will improve communications between campus security and local responders during emergencies

SPRINGFIELD - Governor Rod R. Blagojevich today announced Schaumburg-based Motorola, Inc. is joining the state effort to strengthen emergency communication on Illinois college campuses. Motorola will help provide STARCOM21 radios valued at $294,000 to college campuses as part of the Governor's recently-announced initiative to strengthen safety for students, faculty, staff and visitors at Illinois institutions of higher education.

On April 29, Gov. Blagojevich announced three college campus security initiatives, including $330,000 in grants from the Illinois Terrorism Task Force (ITTF) that is being used to purchase 171 STARCOM21 radios. Motorola, developer of the network, has agreed to contribute an additional 132 radios, bringing the total number of radios to be distributed to college campuses to more than 300. The radios will provide colleges with the capability to access the interoperable communications network used by other responders during emergencies.

"I want to thank Motorola for joining us in this effort. We have a responsibility to make sure students are safe on college campuses and their donation will provide campus security forces with the most up-to-date equipment needed to communicate with first responders in an emergency," Gov. Blagojevich said.

STARCOM21 is a statewide communications system deployed in a public-private partnership between the State of Illinois and Motorola. This network allows emergency management, law enforcement, fire and public health agencies to talk to each other from nearly anywhere within the state. STARCOM21 is one of several statewide interoperable networks developed by Motorola for first responders in the United States.

The ITTF made STARCOM21 radios available to every public safety agency throughout the state, including law enforcement, fire, emergency management and public health departments. A total of $10.7 million has been dedicated to the procurement of STARCOM21 radios for state and local public safety agencies in Illinois.

"Motorola is very pleased to be participating in the Governor's campus safety initiative by providing mission-critical portable radios, including donating 132 of the radios to support the state's efforts," said Jack Molloy, vice president, communications and electronics, Motorola Enterprise Mobility Solutions. "Motorola is looking forward to working with the State of Illinois in this effort to help increase safety on more than 180 college campuses throughout Illinois."

Motorola's donation is valued at approximately $294,000 based on STARCOM21 contract pricing. The model being ordered for the colleges, the Motorola XTS1500 portable radio, is one of Motorola's mission-critical public safety handheld radios that is used for public safety and other public service and public works uses.

The Illinois Campus Law Enforcement Administrators will allocate the radios, which are expected to be made available to campus security forces prior to the beginning of the fall semester. A training session will be held for those receiving the radios so that they'll be able to use them once they return to their campuses.

In addition to the STARCOM radios, the Governor's other college security initiatives include:

. Creation of an Illinois Campus Security Task Force with members representing community colleges, public and private colleges and universities, proprietary institutions, the ITTF, the Illinois Emergency Management Agency (IEMA), the Illinois State Police (ISP), the Illinois Law Enforcement Alarm System (ILEAS), and the Illinois Campus Law Enforcement Administrators. The Governor directed the task force to identify training needs and implement programs that will help campus security officials prepare for, respond to and recover from security incidents on their campuses.

. Appointing the Illinois Board of Higher Education (IBHE), the Illinois Community College Board (ICCB) and the Illinois Campus Law Enforcement Administrators to the ITTF. The participation of these groups in the ITTF will also allow other public safety bodies to gain additional insight into the security issues and incidence response requirements unique to college campuses. The ITTF currently has more than 70 member organizations representing state and local agencies, public safety organizations, municipalities with populations over 100,000 and the business community.

How should we keep track of individual radio id's that we identify? Yahoo!Group database (like CARMA's fire tone-outs), Radioreference.com Wiki page, other??? I'm not so fond of using the Yahoo!Group database if it is like the CARMA fire tone-out page since you can't edit any of the records if you find mistakes.

I was listening to the site in Bloomington-Normal and identified a lot of the Normal PD, Normal Fire, and METCOM radio id's. For some reason, the IDs don't show up on Pro96com for the McLean County Sheriff and Rural PD officers. Something to consider is that departments may only have enough radios to cover one shift, so you might see radio 413421 being used by officer 101 today and tomorrow you that radio id might correspond to officer 309. I think that the 413100 series are Normal PD portables, 419xxx series are METCOM's dispatcher consoles, and 413400 series are Normal PD mobile radios in the cars and Normal Fire mobile radios. ISU PDs radios are in the 416xxx range.

I added my pro96com radios file for Starcom21 McLean County to the Yahoo!Group database:
http://groups.yahoo.com/group/StarCom21/files/PRO96COM/Radio_IDs/Radios.txt

Both District 18-Litchfield and District 11-Collinsville are using 67.0 PL now on base on 155.475, ISPERN.

I'm assuming this has something to do with SC21 Patch.

ISP District 11 dispatch is now 67.0 PL on 154.665, formerly CSQ. Mobiles are still 110.9 PL, not sure if any simulcasting at this time.

Although still hearing Glen Carbon PD on 460.35 D023, it is reported they have moved to SC21.

On a side note, Glen Carbon Ambulance Service is supposed to start on Monday, operating out of the Glen Carbon Fire Protection District station 2.

Ambulances ready to roll

Email to a friendPost a CommentPrinter-friendly
Director, staff begin duties Monday
The Glen Carbon Ambulance District is poised to begin service on Monday, new Ambulance Director Jim Friedel said. Friedel was officially named director at the Glen Carbon Fire Protection District's April meeting.

Two brand new, advanced-life support ambulances are awaiting lettering that will identify them as Glen Carbon ambulances when service begins.

The district has hired six full-time and six part-time paramedics to staff the ambulances. Friedel said two paramedics will be on each ambulance run.

The service will be available around the clock and the ambulance crews will work 24 hours on and 48 off. They will also get a day off every three weeks ensuring that no one will have to work three duty shifts in one week.

Only one of the 12 was hired from within the Fire Department. Friedel said most of the firefighters do not want to give up their status as firefighters. He said most of the part-time personnel have full-time jobs elsewhere. They will be called on an alternating basis to fill in when needed and to become familiar with the service.

At its final meeting before service begins, the Ambulance Committee approved the purchase of two medical supply bags at $1,485 each so that each of the two ambulances will be fully equipped and the second one ready for backup duty. Friedel said the purchase price is probably less than it would cost to make up the supply bags themselves.

Carl Walton, president of the Fire Protection Board, called its regular meeting to order after the Ambulance Committee meeting. It was the last meeting for Treasurer Alexia Eberhart whose term expires May 31. Madison County Chairman Alan Dunstan did not reappoint Eberhart to the board.

Firefighter Tom Bowles was appointed as the third board member. In the reorganization of the board, Walton and Tom Kowalski were re-elected as president and secretary respectively

and Bowles was elected to serve as treasurer.

Eberhart and Bowles split the old business and new business of the meeting so each could contribute.

Eberhart reported the Fire Protection District received a grant of $600 for safety and education from the Illinois Public Risk Fund, its insurer. Walton noted it is the first time the district has received a grant from the insurer.

Eberhart reported that the Ambulance District has reimbursed the Fire District $48,000 for its expenses in getting the ambulance service set up.

Trustees approved the $75 tuition cost for Walton to attend the Interstate Investigators Fire Investigation Conference in Collinsville June 21 and 22.

Fire Chief Mike DeConcini reported that emergency medical service calls represented more than 80 percent of the total calls to which the department responded.

He told the board the Fire Department has two trucks that were replaced which are still in good condition.

"They're two good trucks that can still be used," he said. "One of them can get in to fight weed fires which the other trucks can't do." He suggested that the board consider building a garage at Fire Station 1 (in Old Town) where the trucks can be kept.

Walton said the board is already considering putting up a two-unit building at Fire Station 2 (on Glen Carbon Road near Route 159).

Board members and Friedel discussed the best way to keep track of incident numbers with dispatches coming from the Police Department to the radio at Fire Station 2 and whether one or both of them should assign the numbers.

Friedel noted they would have to communicate with each other to make sure they are using the same numbers. A suggestion was made to let the ambulance crew keep track of the incident numbers.

They decided to try out a dual system to see how it works. Friedel said the paramedics cannot leave the hospital until they have an assigned number for the incident.

Walton reported that it is no longer possible to communicate with Glen Carbon Police squad cars because the police have a new radio system.

"They can no longer hear us or respond to calls from us," he said.

Assistant Fire Chief Ralph Well reported that the Fire Department will participate in the Glen Carbon Homecoming Parade on June 16. The board also agreed to allow the village to advertise the Homecoming on its marquee at Fire Station 2. The Fire Department will also operate the beer stand at the Homecoming. It is the department's major fund-raiser each year.

Kowalski said the district should be aware that the Federal Communications Commission is proposing legislation to prohibit in-house paging. The Fire Department would be affected if the FCC were successful.

Kowalski said it is time for the Fire Protection District to develop a new 10-year plan for the district because it has reached the end of the previous one. Walton agreed and asked DeConcini and Friedel to think about a long-range plan for their services.

"Where will you be in 10 years and what will you be needing?" Walton said.

1357. Lee County Illinois, Dixon City and Rural FD move to Starcom on June 01, 2007

Yahoo group: StarCom21
Date: 2007-06-04 00:55:27 UTC
From: thomas_radke
Topic: 1357 Message: 1357

Hello All,
VHF frequencies for both Dixon City Fire Dept on 154.370 and Dixon Rural Fire Dept on 154.190 appear to have gone silent as of June 01, 2007. Lee County Sheriff have already moved to the Starcom21 Digital TRS. Dixon PD still on VHF but unknown if they are simalcasting yet on Starcom.

It appears that the only scanners that will track this 700/800Mhz Digital system 100% are the Uniden BC996 or BC396. Looks like I will need to finally shell out the $520 for one of these new beauties!

Anybody have any system info or talkgroup info for Starcom Public Safety/Dixon Fire or Police would be appreciated?

Hoping Lindsey will update his site with these new talkgroups as soon as someone confirms the talkgroups for Dixon,IL?

1358. TG 20, TG 13082, TG 13083

Yahoo group: StarCom21
Date: 2007-06-05 00:55:21 UTC
From: jburgess1974
Topic: 1358 Message: 1358

Today I was searching tower site 230 and I was hearing TG 20 as now being having something to due with possible Sangamon County ESDA. I heard one volunteer rural fire department in Sangamon County contact another Sangamon County volunteer fire department and just a minute ago heard somebody get on this talk group and said test, test and Sangamon County asked traffic for Sangamon. So I think it is unclear actaully what TG 20 is or will finally be. I personally emailed Sangamon County Dispatch and asked if they plan on going to SC21 and was told that when they moved into a new facility they got the recommended equipment to be compatible for SC21, but at this time no plan's on moving to SC21. However if the SO, Springfield PD & FD, C-Med (Ambulances), or any other police or fire department would decide to switch the Dispatch center would already have the recommend equipment.

Regarding TG 13082 and TG 13083 I heard on tower site 230 as ISP Academy training.

Just some FYI in regards to those not using Star Com.
While they may not even be signed up or want to, the following are not
Peoria County, Tazewell County, Fulton County, Mason County, Logan County ????
There are 2 of the listed that have indicated no desire to be in the system, but who knows as time goes on.

There is now a Radioreference.com wiki page for Starcom21 where you
can add the radio id's that you have identified by using pro96com.

http://wiki.radioreference.com/index.php/Starcom21

If you add or change a record, please change the date field too so we
can see which are the latest additions to the page.

1371. Re: I-80

Yahoo group: StarCom21
Date: 2007-06-05 22:13:37 UTC
From: citrus801
Topic: 1359 Message: 1371

I selected the sites within 15 miles of I80 as follows:

113 D05 Will (Simulcast)
125 D05 Grundy (Morris)
103 D07 Henry (Andover)
134 D17 LaSalle (Ottawa)
114 D17 Bureau (Providence)
123 D07 Rock Island (East Moline)
127 D07 Rock Island (Moline)
107 D07 Rock Island (E. Moline)
102 D3 Cook County South Simulcast
117 D07 Henry (Kewanee)
128 D07 Rock Island (Moline)
131 D17 LaSalle (LaSalle)
133 D17 Bureau (Ohio)

These are the control channel frequencies that I have for those sites:

774.30625
774.55625
774.80625
867.075
867.3875
868.9625
867.9625
866.8375
867.3625
857.4875
868.3625
868.9375
867.875
866.8875
866.9375
774.09375
775.09375
775.34375
775.30625
775.55625
775.33125
866.95
867.475
775.28125

Someone can correct me if I am missing a site or control channel frequency.

You may find some IL State Police car-car on Starcom21. I heard some
in the Champaign and Bloomington areas, but I don't know about up
north near I80.

This channel was referred to as Detail B on the air by some ISP D10 troopers.

1373. Starcom outage

Yahoo group: StarCom21
Date: 2007-06-06 03:50:46 UTC
From: fminton283
Topic: 1373 Message: 1373

The consoles at District 13 (DuQuoin) and District 19 (Carmi) went dark today at 4:00 PM. The only comms available are via a small backup telephone handset.

Motorola is clueless, not being able to properly nail the problem down. And since the ISP techs are not allowed to service any of this mess, there is no telling when things might come back up.

This is the problem that us in law enforcement with a background in radio have been screaming about. No way this mess is ever going to be a reliable communications resource. Not enough towers, to few voice channels, and the main thing, turning the backbone over to telco instead of a more reliable RF solution.

May God be with those on a lonely road somewhere when the crap hits the fan.

Pretty sad.

This is what some of us old guys have preached on since the advent of the first new, shiny 'bells-and-anvils' systems. When you go live and dismantle the old system, what do you do when the new system breaks? You threw out your tincans and string already.

My old jurisdiction learned this one the hard way 7 years ago when their 800 conventional system was rendered unusable by interference for a week. Free lessons, anyone?

Flip,

What was total outage time? 16:00 -? Also do they no longer have their VHF high and low band radios at the base stations & remote towers? It seems to me, as a new resident down here, that all of the various IL. state law enforcement vehicles, ISP, SOS Investigators, ICC Police, etc all have the old low band VHF antenna on the left rear of their cars. I note the Fire Marshals do not seem to have them however.

Thanks,

Dave

I started hearing wide area traffic again around 10:00 PM or so. Not sure the exact time because I didn't hear them broadcast that it was back up, like they did when it went down. But traffic picked up to normal levels at about that time.

Yes they still have their old gear, at least High band. I think they have removed at least some of their low band units, from what I have seen from the cars parked at the office. However I do know for a fact that the troops aren't carrying High band portables anymore. This means that they don't have access to their old HI/LO in car repeaters.

If they didn't have their old gear, they would be in a real spot a good deal of the time. "Switch over to Hi band" is heard quite frequently in the three districts I regularly monitor. What happens when they are out of the car and they get told that? That means they have to go back to their car. I hope they have time to do that.

I am not sure about SOS and the other units, I still hear them regularly on High band. I have no idea if they plan on switching over or not. I would assume that they would eventually.

Not sure about down south but up here in the Peoria area they use TG 13045 quite extensively for car to car chatter. I imagine they have that capability down south also.

1383. TG 13028 Statewide IESMA

Yahoo group: StarCom21
Date: 2007-06-08 01:57:58 UTC
From: Jason McDowell
Topic: 1383 Message: 1383

Well, had a horror sighting elr this afternoon on this TG lol. Encryption was being used for probably a good 2 hours at least. Its gone back to analog right now but was encrypted for a good portion of the afternoon. So it looks like any department can flip on that encryption whenever they want.

Jason

I noticed last week that the site was using 867.400 and then I got busy
with the QC airshow and Princeton Hamfest and forgot about it.

1386. ISP D5 C/C using TG 9068?

Yahoo group: StarCom21
Date: 2007-06-08 22:24:01 UTC
From: Kevin
Topic: 1386 Message: 1386

This afternoon, I heard a couple of 5-xx units on Starcom21 TG 9068. The latest CARMA Starcom21 profile (V4.8.2) shows this to be D7's c/c but it seems that it is likely D5's instead.

Along those same lines, on 5/9 Bobby Ray Ransom posted on the CARMA Yahoogroup that he had heard some testing, etc. on a handful of TGs - included in these were 9013(D5-A), 9014(D5-B), 9044(IREACH 07?) and 9052(ISPERN 07?). N9WYS had previously posted that D5 was going to have a Starcom21 training session on 5/9. Looking at page 11 of the profile, if TG 9068 is actually D5's c/c instead of D7's c/c, it is altogether possible that 9044 is actually IREACH 05 and 9052 is actually ISPERN 05 (all three of these uses are only off by one district from the profile's "educated guess" applications). I didn't hear what Bobby Ray heard and I guess D7 could have had their training on that same day, but the above scenario seems to be a logical possibility.

With more districts reported to be coming online in the near future, I'm thinking that it won't be long before we can firm up more of the actual applications for these ISP TGs.

I don't own a trunking scanner yet but why is it a horror when somebody is using encryption on a talkgroup? Is it because you think you are missing out on something good? Or does it make it a pain for some reason?

Until you have an entire system go encrypted.....like we have here in Cook County, Illinois, you wouldn't really understand. It's not a matter of missing 'something'. It's the fear that the entire system, once online, will go encrypted. Some things do need to be encrypted....like the MEG's, etc. But, when everything goes silent, it's not too cool for a hobbyist.

I keep wondering if this is not the truthfull purpose behind the entire move to SC21, to provide a likeness to the Military radio systems, that have for the most part encryption most of the time or so they say.
Whats to say that won't be done in say a few years, to provide a greater security blanket over all radio transmission on the system. Of couse I don't understand all the bells and whistles on the SC21 system or care too, but digital or encryption will as one said cool the hobby of owning a scanner, other than maybe some smaller agencys will still continue to use the old radios.
Now would that not lower the cost of the high priced scanners, QUICK, as there would not be much purpose to have one, if encription was full time ?????
Years back, when agencys put scramblers on the radios, it was possible to purchase an after market unit that would decipher the voice, didn't work all that great, but did work.
So just maybe some tech will figure out a way to embed this in the newer scanners, and of course they will cost $1099.99 instead of $493.99.

Sure, but now that would be expressly illegal to sell or use. Without sounding like one of the tinfoil hat guys, this begs the question: what's so important that it needs to be hidden? Chicago PD's gang/drug stuff is mostly in the clear or very low power (and is some of the best scanner listening out there).

I don't want to open up the 'us vs. them' debate that always comes with these scrambling discussions. But, I really believe that the gangs think themselves so invincible that they don't feel that they need to monitor the opposition. It's the low-level criminals who occasionally use radios now. And us hobbyists whom the press and some upper echelon LEOs love to demonize.

The thing about encryption, is that if they go encrypted it defeats the reason for purchasing a digital scanner to monitor and turns out to be a waste of money!!!

Ron,

Stop fretting about something that is so easily solved. You go to a hamfest, buy a used commercial rig, and programm it, not to transmit of course, just to monitor. Most of the Moto software is available on the russian site free for the download. And of couse now most of the programming is ribless.

73,

Dave

District had their training two weeks ago, I think. I heard the training/testing on 9015. I have also heard some chatter on 9069, which I am guessing is Dist 7's car-to-car. Some of these have been posted on radioreference.com.

I have been hearing that district 7 will be going operational with the SC21 in the third or fourth week of June.

Kevin <kevin.orourke1@...> wrote:

WOW.. Between Ron's and Dave's posts, you both need to learn a few things about the way encryption works and the laws being broken by un-encrypting a signal. 1) Go buy a Moto encrypted radio, thats easy, 2) "obtain" the keyloader and the software from the Ruskies, then 3) hope your grandchildren want to listen to your radio, because it will take THAT LONG to load each possible key into the radio, 1 at a time, till you hit on the 1 that a perticular group is using.. BTW, they can and DO CHANGE THEM OCASIONALLY, especially if a radio is lost or stolen! The legallity is a whole 'nother story. The FCC really frowns down on a hacker decoding encryption.. remember the satellite boys?
Have fun and good luck..
BTW, have you found my paging encoder yet Dave?????????

Confirmed Dixon City Fire and Dixon Rural Fire Departments have moved
to a new channel 154.145Mhz PL 146.2Hz for Dispatch and all fire
Comms. Probably got tired of all of the interference.
Statewide MABAS Fireground Channels also in use IE: FG-RED 153.830
Rumor has it they are moving to Starcom as well with Lee County
Sheriff, unknown if they are currently simalcasting on Starcom 21?
154.190 and 159.390 being used for simalcast for rural lee county fire
dispatch.

Last I heard, Lee County Sheriff was still on VHF, they were having trouble with the system. I am going to Sterling on Saturday. I'll get back with you.

06/11/07 - Just returned from this area from over the weekend.
Confirmed Dixon City Fire and Dixon Rural Fire Departments have moved
to a new channel 154.145Mhz PL 146.2Hz for Dispatch and all fire
Comms. Probably got tired of all of the interference.
Statewide MABAS Fireground Channels also in use IE: FG-RED 153.830
Rumor has it they are moving to Starcom as well with Lee County
Sheriff, unknown if they are currently simalcasting on Starcom 21?
154.190 and 159.390 being used for simalcast for rural lee county fire
dispatch.

1406. ILEAS/ITTF Unified Command Posts, ITECS trailers, etc.

Yahoo group: StarCom21
Date: 2007-06-13 19:35:38 UTC
From: Kevin
Topic: 1406 Message: 1406

This morning I heard UC6 (ILEAS/ITTF Unified Command Post vehicle) working DuPage EOC on the Starcom 21 IESMA TG (30328). This made me curious as to the unit numbers and locations of the UCPs and ITECS trailers thoughout the state. After a little Googling, I found the information (and more) in the Illinois Terrorism Task Task Force 2006 Annual Report (submitted on 3/1/07) http://www.ready.illinois.gov/ittf/pdf/2006ITTFAnnualReport.pdf . In it, you'll find information on "Statewide Deployable Vehicles" (pdf pages 71-73, document pages 66-68) that includes a map showing the locations of the UCP vehicles and ITECS trailers as well as information on Mass Decon and Armored Personnel Transport vehicles. Also of interest to the scanning hobbyist is a handful of agency region and resource maps (pdf pages 80-86, document pages 75-81).

Lots of other interesting reading in this document as well....

1407. Starcom 21 TG 9066 - D2 c/c?

Yahoo group: StarCom21
Date: 2007-06-14 08:40:40 UTC
From: Kevin
Topic: 1407 Message: 1407

Heard a rather casual conversation between two troopers checking out their new Starcom 21 radios on TG 9066 at 3am. They were discussing, among other things, whether or not they'd have "Chicago" (District Chicago) and "Joliet" (District 5) channels in the radios (in addition to their own district's channels). Also mentioned was the fact that Darien PD uses earphones with their speaker mics (D2's portion of I-55 passes along the south border of that town). Seeing that TG 9068 has already been confirmed as D5 c/c, from looking at the CARMA Starcom 21 profile it's reasonable to believe that 9066 is likely the D2 c/c TG.

1408. Starcom 21 TGs today

Yahoo group: StarCom21
Date: 2007-06-14 06:55:58 UTC
From: Kevin
Topic: 1408 Message: 1408

Was able to listen to the Starcom 21 system for a few hours today and here's a few TGs of interest (all were heard on either the South Cook or DuPage sites):

2013 - I believe this to be Tollway, and likely maintenance users. Heard a handful of guys (obviously in the same room with each other) testing their new radios. They got a kick out of the digital delay (heard coming from the other radios nearby), with one guy going so far as to recite the famous line from Lou Gerhig's speech "Today (today today), I consider myself the luckiest man (man man) on the face of the earth (earth earth)".

9100 - brief exchange between an unknown unit on the "tollway talkgroup" and "Oak Brook" (tollway dispatcher in Downers Grove), listed as the "EMS Zone 1" TG in the profile.

9002 - a handful of key-ups with faint voices in the background, listed in the profile as "Dist. 2A" TG.

9083 - encrypted comms on and off for hours, listed as DII-Zone 1B in the profile.

June 14, 2007

I was getting traffic off the Wayne County,IL Tower on the following talkgroups.

17102- Talk about some problems and a Yagi and worrying about signal bleeding into other states. One guy said something about standing in his back yard on his portable with a miller in his hand. They discussed a section of I-57 where they were working down the center. One asked the other about supper, and then he said he would call him back on that channel if he found out anything.

17014- Talk about which channels they needed/wanted and about receive and transmit tones.

Heard Dist 13 to Dist 19 on Dispatch A (Dist 13)

I think there was some problem in Southern Illinois yesterday because I heard them calling certain troopers and telling them to call radio service with their radio ID so motorola can get them turned back on.

I heard some test traffic from Dist 22 Ullin also.

I heard Dist 13 notify one of their troopers to use Dispatch A as the other one was unusable. I say a tower outage or something must have occured.

This morning 6-15-07- Heard Radioservice to Collinsville with a good copy from both.

Michael,
I've had traffic on these D10 TGs this morning and last night:

30358 -- This may actually be a D9 TG, but I'm hearing it fine on my D10 group. It serves as a local sheriff/police TG and has been busy with traffic from Farmer City, Leroy, and Colfax over the last few days since my 396 arrived. The locals seem to be making good use of their new capabilities.

13041 -- D10 units running speed detail this morning

13047 -- Tfc ref supply pickup at post yesterday (believe this was D10)

30328 -- en-route message, not sure whether it was D10 tfc or not

30366 -- picked up traffic ref. to METCAD (Cham. County system) last night on this, with both Champaign city and SO unit IDs

Generally, from a few days listening, Starcom is still coming online in terms of use in D10. Not sure whether this is due to lack of installed mobiles or what, as the system seems to be working well.

I heard the same two guys as I talked about last evening chatting about antennas and things this morning. They said we are going to have to go over there and turn on 680 because they are using Cellphones and IWIN, they have no communications. They said they didn't know when things would be back to normal and discussed they were not sure which direction to head. Must be a tower outage and they cannot locate it. I heard one mention being close to Nashville and the transmissions were garbled and broken up, that is the way it has been all along lol

1418. ISP District 15 patrol comms on Starcom 21 TG 9099

Yahoo group: StarCom21
Date: 2007-06-16 05:52:47 UTC
From: Kevin
Topic: 1418 Message: 1418

This afternoon I monitored ISP D15 patrol activity on Starcom 21 TG 9099. Was not able to monitor their existing 800 Mhz conventional freqs to determine whether or not this was a rebroadcast of traffic on those freqs or whether this was purely SC21 action. Traffic monitored was fairly light in volume and was heard on the site 101 (DuPage).

Do the scanners that monitor Star Com 21 and the ISP channels have to be APCO 25 compatible or will a regular trunk tracker work? I have a Uniden BCT8 will it work or do I need to upgrade

You will need a scanner which can monitor digital the APCO25 scanners will. Your BCT8 will not monitor anything but regular analog transmissions.

You need either a Pro-96, (handheld), Pro-2096, (base model), from R.S. or a BCD 396t or bcd 996t from Uniden. They are 450-550 dollars. Also be aware that some comm's as of late on Starcom21 have been encypted and even those scanners will not decode it. Your best bet is a BCD396t or 996t because the R.S. models do not trunk on the 700 mhz freq's and Starcom is utilizing these frequencies. If you want to wait GRE is coming out with a couple of models but they won't be available until October.

Nothing on Starcom here in D-9 that I've heard. Everything is on 154.935, 155.46, 42.66 and 151.25.

citrus801 <citrus801@...> wrote: I heard ISP D8 units on both 13016 and 13045 so I believe those
listings are correct on Radioreference.com

I heard some chatter on 13063 which sounded like it is an ISP D6 car-
car channel (600 units and Pontiac were mentioned). 13044 is
definitely an ISP D6 car-car channel; it was used at the Special
Olympics this weekend in Normal.

I chatted with a trooper in Mt. Vernon yesterday. He said his radios are working great. The low band is out of his car. The main Starcom21 radio antenna is mounted on the roof where is ISPERN radio antenna used to be.

Currently having issues with the fire patch from 154.415 and 800mhz. Some paging tones & some voice communications not coming over both radios as need.

Lots of references to the "VHF side" and the *800" side... with test pages and counts from dispatch and mobiles/portables.

From: Kevin
Topic: 1435 Message: 1435

Someone just self-ID'd Starcom 21 TG 1052 as "fireground". Argonne Lab's FD dispatch is TG 1051 and their security is TG 1053 - I'd say it's safe to assume that TG 1052 is Argonne Lab FD fireground.

I agree Terry this is crazy, and if you want the frequency I suggest you search yourself online via FCC licenses and also do a little scanning the old fashioned way to find the frequency, run a bank scan and just let it run a certain band. The frequencies have to be licensed with the FCC, so i would look there, to try and "hide" they might have licensed it under just a generic like Village of Woodhaven Lakes or maybe even under a county or 911 license.

Lee County does use Starcom occasionally. I have definitely heard them loud and clear using talkgroup 1076. I've heard them several times. I would assume they are still using VHF while experimenting with Starcom.

I have been listening to the same thing on and off for almost a month. As Terry Weatherford said in an earlier post, the TalkGroup IDs that were previously posted were an educated guess, and there may be some minor differences as we see the different districts coming online one at a time. I am not sure, but I thought I had seen that correction posted on RadioReference database already. 9069 is Dist 7 Car-to-Car, not 9070. I'm not sure what Dist 5's car-to-car TGID will be.

The reports I've heard are that the troopers are finding very good coverage in almost every circumstance. Parts of Knox county are not well covered, and the downtown areas (ie river valley) of the Illinois Quad Cities are not very well covered, either. I work in downtown Rock Island, and I can barely get reception of the SC21 systems, but that may be because of my building. My window faces towards Iowa.

If the antenna is used only for 700/800 MHz try a
unity gain spike antenna first, or buy a spike
and whatever other gain antenna looks good.
Mounting the spike of the center of the roof
would work great.

Here is a great article that addresses gain:

You might even stop by the local radio shop and ask if they have a used 800 gain nmo mount, these are the one that where used for the mobil celphones, about 12 in tall. I have used these for years foran 800 scanner ant. and they work very well. You can also find them at Ham Fest, this is also what I used for a base antenna, so why spend the bucks for things that you can buy for less. Remember you are talking SCANNER receive, not the actual radio that should be matched to the Frequency, here is another idea, just cut off a 1/4 wave antenna if you must have a perfect copy of an 7-800 mhz. antenna.

1457. [StarCom21] Downstate TGs Confirmed

Yahoo group: StarCom21
Date: 2007-06-24 03:48:31 UTC
From: firemann57@aol.com
Topic: 1449 Message: 1457

Driving I-57 on Thursday and Friday, I confirm StarCom21 Talk Groups as follows:

17006 ISP D-13 Dispatch
17011 ISP D-19 Dispatch
17014 ISP D-22 Dispatch

17050 sounded like it was in use by D-12. I believe others may have commented previously that both D-11 and D-12 heard on this TG.

13069 and 13071 were both heard in connection with the huge response to the barricade / hostage situation that occurred Thursday in Arcola. Unfortunately, I passed there late in the operation and didn't capture any of what was surely a rich scanning experience.

From: Bob
Topic: 1449 Message: 1458

Were 13069 and 13071 on the Mattoon tower druing the standoff in Arcolaa? (Maybe Pesotum tower?) I started listening too late, and I heard encryption when it was about over on 17076 (OSC 3A) and 13050 (D-6 Investigations), and later on 13095 and 13097 (also both encrypted.) Those last two I don't know the use of, and all 4 I heard were on the Mattoon tower. I'm guessing either 13095 or 13097 is Task Force or Coles County CRT...Not sure yet. I've heard both on the Mattoon site many times.

From: todd hartzel
Topic: 1460 Message: 1460

Greetings all,
The St Clair Cnty Simulcast (T359 of
Starcom 21) has suffered some sort of
County wide failure. The system was in
quite disarray. T305 (The Belleville
Site) was being overwhelmed with all of
the normal 70xx & 71xx series talkgroups
showing up there. As of 4:20pm (CT), they
started going talkgroup-to-talkgroup that
the system was back online. But problems
might still occur, including:

- Slow radio response while switching from
talkgroup-to-talkgroup.
- Slow radio response time while Keying down
on the PTT button.
- Reduced covereage (penetration) inside of
buildings.

One announcement also said that the remaining
simulcast-sites should be back online soon.
Not sure when it started. Obviously I was
catching the end of this system failure.

Along with T305 of Starcom21 catching the users
from T359's failure ; The NPSPAC-X RPTs were
very busy too. CTCSS: 156.7Hz. All 5 repeaters.

Get the free Yahoo! toolbar and rest assured with the added security of spyware protection.

Mike,

What no one has yet to tell you is that your Pro 433 will not work with the new StarCom21 system being implemented by Illinois State Police and many Sheriff's Offices, City PD and Fire around the state

In the next 6 months you will most likely not be able to hear the State Police at all, and potentially most other Law Enforcement/Public Safety Agencies in IL

From: Ron H.
Topic: 1475 Message: 1475

Did they ever get on line, seems like a couple of weeks ago they where ready to start using the HT's, and the system crashed.
Here is something else, straight from a Trooper, most will start with HT's then later install mobils, or thats what his Capt. said. This Trooper has the HT, but the system does not seem to work, and also, ISPREN is here to stay, simocast or whatever. Yesterday in the Peoria area, I got a new Illinois Map from a Trooper driving a 1 week old Vehicle, it has Low Band, but uses the gain antenna, not the long whip antenna, plus all of the normal radios, no SC21 mobil, just a portable laying in his gear box, so you tell me. Just going by what I saw, and yes I know one radio from the other.
This person did not have much to say about SC21 !!!!
There are counties in my area that have not made any effort to switch to SC21, due to forth comming cost in the future.
Having just used the State Surplus Bldg. to work the dog on building searchs, I did not see any old radios that had been turned in to be sold at auction.
If today there was a State Wide Diaster, we would sink faster than the Titanic!!

What I heard on 16466 wasn't encrypted. However, I have heard some encryption used on 30328 over the past couple of days which surprised me.

The following talkgroups are confirmed to be correct on radioreference.com
*13021 ISP D10 DETAIL B
*13047 ISP D10 CAR-CAR

Both of these were referred to by those names on the air.

1478. Just a simple question

Yahoo group: StarCom21
Date: 2007-06-27 21:29:42 UTC
From: Ron H.
Topic: 1478 Message: 1478

This is not a HOW TO question, but a question in regards to the operations and authorization of a radio (mobil or portable)for use on the SC21 System. Saying this, if some legit agency wanted to add another radio at there own expense, what agency or person authorizes this. Of couse knowing that Motorola sells and sets up the radios, but who would tell Motorola, yes this department can purchase and be assigned a designator to be on the system. I have read all the documents and never could fully understand where the Top Dog stands. Just curious about how all this is structured. Don't say FCC, as most in the group are fully aware that all radios must be licened to operate, and in this case it is supposed that the agency already has permission to use (say 5 units) and they are operational.
Please, only those that have absolute valid information need reply. If for some reason you would rather, then reply direct to my email, as this may be what you would consider a confidential matter.

1479. ISP Air Ops TG on Starcom21

Yahoo group: StarCom21
Date: 2007-06-27 21:34:14 UTC
From: Kevin
Topic: 1479 Message: 1479

TG 13105 has been user identified as the "Air Ops" TG by ISP "Lincoln" (Aviation) units. Yesterday, one Lincoln unit said that he was hearing the others from the Toledo, OH area (unknown if he was airborne or not) and speculated that perhaps this was made possible by the "Ohio system"! I sensed no levity in any of the users' voices, so I don't believe they were joking around. Previous reports say that this is a statewide TG. Perhaps this was an extreme case of 700/800 Mhz skip??

Unknown if it's related, but I've also heard some informal comms on TG 13106. Has anyone ID'd the user/application of this TG yet?

Yes, listening to it right now. It is a patch for sure, and sounds terrible.

Heard radio service testing 13033 last night. Sounded much better.

Isn’t the system licensed to the State of Illinois?

Typically they have to report the number of mobiles, HT’s, repeaters, etc in use on each license

Sometimes they just start out with a nice huge number and don’t worry about actual numbers but according to this document

HYPERLINK "http://www.cms.illinois.gov/cms/telecom/News/Pub/TelecomGuide1103.doc"www.cms.illinois.gov/cms/telecom/News/Pub/TelecomGuide1103.doc

The Illinois Division of Telecommunications seems to be in control

Subject: [StarCom21] Just a simple question

This is not a HOW TO question, but a question in regards to the operations and authorization of a radio (mobil or portable)for use on the SC21 System. Saying this, if some legit agency wanted to add another radio at there own expense, what agency or person authorizes this. Of couse knowing that Motorola sells and sets up the radios, but who would tell Motorola, yes this department can purchase and be assigned a designator to be on the system. I have read all the documents and never could fully understand where the Top Dog stands. Just curious about how all this is structured. Don't say FCC, as most in the group are fully aware that all radios must be licened to operate, and in this case it is supposed that the agency already has permission to use (say 5 units) and they are operational.
Please, only those that have absolute valid information need reply.
If for some reason you would rather, then reply direct to my email, as this may be what you would consider a confidential matter.

Ok. That makes sense. I heard a couple of IMERT units on 30328
talking to each other and to DuPage EOC. Then, the field units said
switch over to the command channel and I heard them on 16466.

I was thinking the system was licensed to Motorola so actually anyone could be a user if they paid the fees. The state paid for the structure and will continue to support it, for the length of the contract.

Due to the contract that Motorola has with the State of Illinois, they (Motorola) can't just put anybody on the system. There was talk at one time that quasi-public safety agencies like private ambulance services, tow truck operators, and utility companies might be allowed to go on. I'm sure Motorola would love to have more units on to help pay for the system (and sell more radios).

1491. SC21 Talkgroups Updates (9xxx Series)

Yahoo group: StarCom21
Date: 2007-06-28 22:20:57 UTC
From: tweatherford@radioreference.com
Topic: 1491 Message: 1491
Attachments: 2 described; binary payloads are missing from this source WARC

Talkgroups and "heard" description were updated to match the Carma Profile and it seems to fall a little more in place to what has been heard on most of the talkgroups that have had traffic.

Please review and let me know of any issues.

Thanks
Terry

1493. Talk group finds

Yahoo group: StarCom21
Date: 2007-06-28 23:35:22 UTC
From: tweatherford@radioreference.com
Topic: 1493 Message: 1493

Folks, PLEASE

take the time to sumbit ANY finds on Talkgroups to RadioReference.com so I can update the talkgroup information.

Currently, I have to use RR, regular email and monitor multiple yahoo groups just to find the information to get it updated.

Trust me, I spend A LOT of my personal time on all this and wouldn't mind that it be a little easier.

I do appreciate the info I see and get, but a submission is much better.

Click on the SUBMIT tab at the top of the StarCom21 page.

http:/www.StarCom21.com

Requesting info like:
Talkgroup xxx:
"Confirmed in use on tower xxx/location"
"heard in use"
"heard xxxxxxxxx"

Anything right now is a start.

If it is already marked as confirmed or heard and you have no additional info to add, then you do not have to submit.

Just spend the last 4 hours updating the talkgroups, so please review.

Thanks very much
Terry Weatherford

1494. Peoria site

Yahoo group: StarCom21
Date: 2007-06-29 13:42:45 UTC
From: mws72@qconline.com
Topic: 1494 Message: 1494

For some reason I decided to add the Peoria site 237 to my scanner last night. So what do I get this morning at my second favorite starcom scanning site this morning. Direct from Peoria about 80 air miles to the south east. TG 13045. District 8 car2car. Decoding was pretty good I was able to make out the troopers speech ok. Also heard District 9 ISPERN patch. At least it was ISPERN and the carma profile said it was D9. Little harder on decoding. That was site 223 which I am guessing is about 100 miles south of here to Mason county. Searched both 700 and 866-869 range and got a bunch of sites. But no surprises all the sites matched to control channels on the radioreference list. Which I had printed yesterday for some reason :) only TGs I heard was the two above, both I did hear the D8 C2C several times. But only on 237.
Well back to home and the starcom deadzone.

Yeah Mike, you might of been getting some good skip this morning. Either way Dist. 8 Troopers use TG 13045 quite frequently and the Dist. 9 ISPERN patch has always been broken up since it was turned on a few days ago. It has been a little more clearer today I noticed but not to much.

1496. Dist. 6 Pontiac and Dist. 8 Peoria ISPERN

Yahoo group: StarCom21
Date: 2007-06-29 20:49:28 UTC
From: Jason McDowell
Topic: 1496 Message: 1496

Not sure if it's someone playing with the ISPERN patches but I just heard Dist. 6 & 8's ISPERN patches on the Peoria simulcast tower. Both were rather broken up from whomever was talking. TG's 13033 and 13032.

1497. Dist. 14 ISPERN now

Yahoo group: StarCom21
Date: 2007-06-29 21:43:19 UTC
From: Jason McDowell
Topic: 1497 Message: 1497

Ok this is driving me nuts LOL. I'm now receiving Districts 6, 8, 9 and 14 ISPERN patches on the Peoria Simulcast Tower. All of them are coming in scratchy also so its getting kind of annoying. I think the tech may have to lower the squelch possibly so that when the voices get lower the patch doesn't cut out. Hopefully they at least get the Peoria simulcast clear, it would be nice to hear all the ISPERNS again.

Jason

I get that on the ISPERN patch off of Wayne County it used to broadcast all ISPERN now it is just local I think, I used to get Chicago and all now it is just southern Illinois stuff. I think they decided it was too much traffic. Down here it sounds like muffled not really scratchy just has that bad data sound to it.

1499. Heard some traffic...

Yahoo group: StarCom21
Date: 2007-06-30 00:53:14 UTC
From: Mike
Topic: 1499 Message: 1499

I heard some traffic off the Jasper County Tower, just got in on the tail, and saw the ID was not already programmed in, and it showed 13035. It was an ISPERN I am guessing because the end was State Police Macomb. Just FYI.

I'm only hearing the base stations. The simulcasts on all the ISPERN patch districts i'm hearing appear to be receiving the northern broadcasts better. Chicago is starting to come in fairly good now. Heard a Round Lake and a Rosemont hit and runs in last hour. I was snoozing during that periodic beeps thing so not sure on that one.

1502. District 7 HF2

Yahoo group: StarCom21
Date: 2007-06-30 03:37:18 UTC
From: mws72@qconline.com
Topic: 1502 Message: 1502

Just found out that District 7's HF2 has a tone of 67.0 on base transmit. Now I don't have to listen to the intermod anymore.

Of course I have to have two channels one for base tone and one for the mobile tone but I don't mind. Just like programming for LF1.

ISP D10 now transmits 155.475 (67.0) for ISPERN broadcasts. I also heard the ISP D10 ISPERN broadcast at the same time on TG 13035 on the Champaign site. Pro96com showed the radio id for the patch as 2910130.

I've also been hearing ISPERN's on TG 13032 on the Champaign site (which is listed as ISP D6 ISPERN). No radio id shows up on Pro96com for this patch.

1504. Rock Island County Sites.....

Yahoo group: StarCom21
Date: 2007-07-01 10:00:45 UTC
From: KB0KGH@mchsi.com
Topic: 1504 Message: 1504

I was in the Quad Cities on Saturday and saw a few STARCOM21 sites operational that I had programmed into my BCD396T. For some reason, I didn't hear any traffic on any of these STARCOM21 sites when I was in the area.

I noticed that on the control channel, it shows up as "DAT" on my BCD396T, but also shows the frequency of the control channel when scanning IDs. When I stopped on the control channel, I saw site information. I'm told by group members on the BCD396T group that this is normal.

I was in Rock Island County a very short time in my car. My first time seeing a little bit how a Project 25 Standard system works.

How much traffic have any of you in the Quad Cities noticed on the Rock Island County sites?

Thanks,

Jason W. Watts

You were picking up District 14 Macomb ISPERN on Starcom. Your not to far from the border so keep the Hancock tower programmed in.

You should of heard very little traffic, most of the monitoring on Starcom is in the South, Central and NE area of IL. NW IL seems to be the last part to activate.

1508. Starcom vs Ispern

Yahoo group: StarCom21
Date: 2007-07-01 23:50:57 UTC
From: dataman60435
Topic: 1508 Message: 1508

Hearing thru the D5 T113 ISPERN on ID13032, sounds very poor as most of the local Starcom signals have lately , Village of Plainfield on Starcom now 24 hours and having a hard time with the 700 signals....Argonne National Lab security and FD also on 24 hours now, they sound great....Ron in joliet...PS: Been using a Cell Phone 800mgz mag-mount antenna with the coax cut down to 5' instead of usual 15' and works great....

1509. Re: [StarCom21] Starcom vs Ispern

ISPREN is still going to be transmitted on the old freq, as well as Simocast on SC21, so if you truly want to hear ISPREN, then keep that freq. in your old scanner, by the way the old system does not have a tone, only when it is Simocast will a tone be embedded.
If I am wrong, then I should not hear ISPREN from 4 SP dist. as I have today on the VHF base radio.

I've been stuck working in Macomb all weekend, and have heard TG13036 and 13037. 13036 is District 14 ISPERN patch and 13037 is District 20 ISPERN patch out of Pittsfield and has been patched into District 14 for some reason. Some of the troopers must have noticed it, too, because they were telling others of the "skip" they were receiving on their Starcom portables. There was a lot of clipping on the audio ... signals that were getting across ... the ISPERN patch's squelch must be tight.

Unfortunately, very little. I hear IMERT units almost daily. (That's exciting.) Sometimes a couple of D7 units go C2C. The ISPERN calls everyone's talking about right now are unintelligible. So not very exciting right now. I'm really happy when I can suddenly hear D22 Ullin for a couple of hours. Luckily, there's lots of other things to hear to justify the cost of my BCD396T.

Normal for the Quad-Cities so far. I might hear/see one talkgroup pop up
once in a while. But most is just scanning the sites. Make sure you
add the 700 Mhz sites for Kewanee and Moline, if you don't have them in.

As mentioned above very little. A little of Lee County (IL) Sheriff and
car to car for Peoria and several far downstate districts. Tonight I was
getting ISPERN tgs for District 6, 8, & 9 coming up a little.

Could we also start including what radio we're using when we report what we're hearing.

Most of the ISPERN patchs sound like crap. However, today, 13032 coming from Site 110, Melvin-Sibley, sounded great.

From: tweatherford@radioreference.com
Topic: 1521 Message: 1521

30335 ITTF R16 MetroEast
**heard here in Glen Carbon a few days ago.. just some key ups is all I got.

Oh, everyone, by the way, got my 396 last Friday :)

Can only pick up the East St. Louis (323) and Edwardsville sites (325) (all the time) from home and occasionally pick up East St. Louis (353) and St Clair County (359) but not good enough to decode the signal.

Oddly enough, and no I haven't attenuated the Edwardsville tower yet (less that 1/2 mile from my home)... but all Glen Carbon PD traffic has been coming off the East St. Louis tower, nearly 15 miles away.

FYI... taking a train trip from St. Louis to Chicago and then on to Kalamazoo Michigan on Thursday (and back on Monday morning) then a trip to Northern Michigan @ Sault Ste. Marie and across the boarder to Canada too, to see what's going on up there.

Any recommendations or requests, lol, let me know.

Terry

I think Michael meant StarCom21 sites in the area, not Sheriff's Frequencies.

On another note, I was going to head to the Dubuque Area that one weekend I went to the Quad Cities, but my girlfriend and I decided to see some relatives in the Quad Cities. Otherwise, I would have been in a position to see if some of the Jo Daviess County StarCom21 sites were up and running.

From: todd hartzel
Topic: 1521 Message: 1524

Greetings Terry,
Congrats on the 396t. Its an awesome
handheld radio. Once you get past the little
learning curve of the dynamic channels & such,
it becomes so easy to use. Obviously you get
alot more towers then me. I am in St Louis
City. I get: T305, T353, T358 & T359. The
E. St Louis T323 is not detectable in most
places in missouri, except in downtown St
Louis. And I do mean, downtown only. It
does not not cover Missouri outside of Downtown.

I do have a question Terry: is T323 or T325
stronger at your QTH? I would guess T325.
My lack of reception of T325 while visiting
Illinois was a surprise. While at D11 HQ at
I-255 & I-55/I-70 interchange, reception of
T325 is aweful there. I was kinda surprised.
My only explanation for this, EDW T325 is on
a directional antenna.

But, on-the-other-hand, EDW T323 has excellent
coverage driving on NB I-55 from Hwy 143. I drove
directly to the EDW tower on the SIUE campus.
Its the (north campus) Cougar Lake Tower.
I think the South Campus Tower is WSIE-FM &
453.600/453.900 repeaters.

1534. Public Health TG 30331 activity

Yahoo group: StarCom21
Date: 2007-07-12 19:06:20 UTC
From: Kevin
Topic: 1534 Message: 1534

Yesterday (Wednesday 7/11) at 10am, I heard a "radio drill" (net?) on TG 30331 (S/W Public Health). Public Health Region 2_ (I think they used a letter suffix but not sure) was conducting what sounded like a radio check-in net on this TG. Counties were in central/west central portion of the state (likely IDPH's Peoria region). After the roll call, person conducting the net directed participants to switch their radios to their specific sub-region(?) channel (talkgroup). Noting else was heard (I was monitoring sites 101 and 102). If anyone has started a list of the various nets on SC21, please add this one. Unknown if this is every Wednesday at 10am or perhaps just the second Wednesday at 10am.

Has anyone else noted other SC21 nets?

1535. RE: [StarCom21] Public Health TG 30331 activity

From: Mike Curtis (KC)
Topic: 1534 Message: 1535

I heard the same drill here in Ottawa on Site 134. I heard Peoria calling the same counties later on on 30321 (ITTF Region 10).

This morning I heard some radio tests on MABAS (30330) with a couple people talking to a "chief" and doing portable tests at some venue. Been picking up radio techs in the last hour on 9013 (ISP Joliet Disp A) with really low volume testing emergency activation.

it's being used in conjunction with the NASCAR races tonight, Saturday
and Sunday at Chicagoland Speedway.

1537. Duestion about District 15 and Starcom

Yahoo group: StarCom21
Date: 2007-07-14 00:18:36 UTC
From: Brian
Topic: 1537 Message: 1537

i have been scanning starcom and the 800MHz District 15 system

question is the D-15 system a Simulcast system where all the North Patrols are the same traffic and all the south Patrols are the same traffic?? or is Each of the 9 Freqs. didferant IE is F-1 north the same as F-5 North or is it differant Radio traffic?

im useing a Pro 2055 with the stock ant. to scan D-15 and a pro 96 with the much better 800 MHz ant to scan starcom

the problem is with the 2055 all i really get in clear is F-5 north

i hear the same traffic on F-5 north and starcoms 9098 TG

is 9098 realy F-5 North and thats it
or is it F-1N, F-2N, F-5N and F-9N

i guess what im asking is i know 9098 is F-5 North but should i be looking for differant TGs for the other F-# Norths or is 9098 plain and simple D-15 North Patrol

also 9099 is F-7 South or is it agian just plain D-15 South Patrol?

1538. ISP D-19 Carmi and pursuit ISPERN patch

Yahoo group: StarCom21
Date: 2007-07-14 00:42:21 UTC
From: Bob
Topic: 1538 Message: 1538

I am hearing ISP D-19 Carmi Dispatch TG 17011 this evening on the Mattoon, Paris, and Casey towers. Last night I heard D-10 and 12 ISPERN patches also on the same three towers; Mattoon PD, Coles County Sheriff, and ISP units involved in a 100-mph chase out of Mattoon south on I-57. The pursuit was called off and the stolen vehilce, involved in a PD-only hit-and-run in Mattoon previously, was stopped in Effingham a while later. The driver was a 16-year old female. Did anybody else hear the ISPERN patch of their traffic?

Topic: 1539 Message: 1540

Digital ones, that a regular scanner that you likely have won't receive. The new system isn't a typical trunked system. It is a digital trunked system. Meaning you need a digital scanner to receive it, and they cost right around $400-500 bucks.

But District 12 has not gone to the digital system yet. They were supposed to a few weeks ago and that was scrapped. Not sure why, but they do use car to car on the starcom system sometimes. There are too many frequencies to list, but go to this link, if you have digital, if not useless. You input the towers from the huge list, for your local area, say a few surrounding counties, or your own only would work. And then you might hear something, but If you don't have a digital scanner you will likely not hear, or hear what sounds like a bunch of noise nothing you could understand.

1541. Garbled IEMSA

Yahoo group: StarCom21
Date: 2007-07-14 05:05:57 UTC
From: Mike
Topic: 1541 Message: 1541

I noticed Terry, that on RR you have IEMSA is sometimes garbled. Last week, I heard Dupage County EOC radio a mobile unit and ask him if he could do a radio check, they had the new radio installed. He said sure, do you want to try it without encryption first? So I am guessing that garbled might be encryption?

Mike

1542. Dist 19 Patch

Yahoo group: StarCom21
Date: 2007-07-14 08:16:42 UTC
From: Mike
Topic: 1542 Message: 1542

Dist 19 just had a vehicle pursuit, in Edwards county, they ended up on foot. While using starcom21. I heard the dispatcher say something that I would have loved to hear. She offered to setup a patch between IREACH for the deputies, and the trooper said it wouldn't be needed they could communicate with them without the patch. So they must have the ability to setup patches both ways for operability.....

I didn't know that. I figured the patches were just one way.

1544. Use of 155.46 for Illinois State Fair?

Yahoo group: StarCom21
Date: 2007-07-14 16:38:18 UTC
From: tjrapps@sbcglobal.net
Topic: 1544 Message: 1544

I'm wondering if the state police assinged to the state fair in Springfield next month will be using 155.46, like they have for the past 15+ years, or starcom, or some other freq. Currently, district 9 (Springfield), is using 155.46, and 154.935 quite heavily for their d-9 comms, with a little (very little) activity on 42.66. Maybe starcom will be used this year as the main state fair comm. method?

1545. Re: Use of 155.46 for Illinois State Fair?

Here's what I think we've been hearing lately:

I think F1 and F2, the North D-15 freqs, have been tied to SC21 TG 9098.
I think F3, F4, and F5, the South and North-South tollway D-15 freqs, have been tied to TG 9099.

Depending on where you are located when you switch to the actual D-15 frequencies to check what's being simulcast it can be deceiving.? You may hear traffic on SC21 but not on the D-15 freq.? I think this is because the D-15 system is configured with different frequencies on different towers.? If you're close to an F-1 tower (Gurnee, Park Ridge, Belvidere) you may think that you're hearing a simulcast of only F-1.? Then you change location closer to Deerfield, Elgin, or South Beloit and you start thinking that SC21 is only simulcasting F-2.

Personally, I'm not taking the time to go in and change the alpha tags on my talk groups yet because this whole thing seems to be in some state of flux.

Will be interested in others' opinion.? This is what I think we're hearing.

From: frankwhitmore
Topic: 1547 Message: 1547

I have been hearing snips and bits of conversations on D07 Detail B (tg 9033) on tower 107 in East Moline. I can't tell for sure, but it sounds like troopers working at or near the John Deere Golf Classic in Silvis. Can anyone else confirm. Also, I did hear D07 Dispatch A and/or B (TG 9015/9016) being used briefly this week by a District 7 trooper and a dispatcher. Can anyone else confirm this?

I've had several D07 troopers tell me different dates when they would be switching to SC21, but each date has come and gone. Sounds like there are delays in the transition (statewide?) and this will take longer than they thought.

D07 Car-to-Car (TG9069) is still active sporadically on the local towers.

www.kjcountry.com reports-

Two Teenagers Arrested After High-Speed Chase
Two northern Illinois girls were in custody Friday after a high-speed chase following a drive-off from a gas station in Mattoon.
The drive-off occurred in a vehicle stolen from Wilmington. The pursuit involved speeds of more than 100MPH, and proceeded from Coles County south on I-57 to near Neoga where authorities called off the chase about 9pm Thursday. The vehicle was spotted and the girls taken into custody about 3am Friday at the Green Creek Rest Area north of Effingham. No one was injured in the incident.

The girls involved are 16 and 15 years old.

Not at all surprising. I believe I stated about this time last year that I would be surprised if starcom was fully operational in 2 years, and so far I'm right on. As a matter of fact, I wouldn't be one bit surprised if we are sitting here next July, still speculating on when it will be fully operational across the entire state.

Has anyone monitored or confirmed, or even heard of or seen ---- actual non-TRS "portable-to-portable" frequencies from StarCom21 Units?

I know Fairview Heights Fire has actual simplex channels on their portable radios for Fireground operations.

St.Clair County/St. Louis City are also licensed for some... plus no telling what can be using in 700 MHz with out an actual license.

764.05625 WQDT269 M SWAT / Nationwide Itinerant Low Power for interoperability with 700mhz system in MO FM
764.06875 WQDT269 M SWAT / Nationwide Itinerant Low Power for interoperability with 700mhz system in MO FM
775.99375 WQDT269 M SWAT / Nationwide Itinerant Low Power for interoperability with 700mhz system in MO FM
794.05625 WQDT269 M SWAT / Nationwide Itinerant Low Power for interoperability with 700mhz system in MO FM
794.06875 WQDT269 M SWAT / Nationwide Itinerant Low Power for interoperability with 700mhz system in MO FM
805.99375 WQDT269 M SWAT / Nationwide Itinerant Low Power for interoperability with 700mhz system in MO

St. Louis Metropolitan Police Department
Website
WQGN802 PA License TF/M - 4940.0 - 4990.0 (probably for IP Surveillance Cameras)

Frequency License Type Description Mode
764.05625 WQFX336 M Itinerant Interoperability/Mutual Aid Channels (2000 2wt units) FM
764.06875 WQFX336 M Itinerant Interoperability/Mutual Aid Channels (2000 2wt units) FM
775.99375 WQFX336 M Itinerant Interoperability/Mutual Aid Channels (2000 2wt units) FM
794.05625 WQFX336 M Itinerant Interoperability/Mutual Aid Channels (2000 2wt units) FM
794.06875 WQFX336 M Itinerant Interoperability/Mutual Aid Channels (2000 2wt units) FM
805.99375 WQFX336 M Itinerant Interoperability/Mutual Aid Channels (2000 2wt units) FM

The big thing about the state fair, to me, is that most communications can be simplex/portable BUT the one thing is that before, it seems every officer in any part of the fairgrounds always had to be on the same frequency, with SC21 repeaters or simplex channels, they could be broken up now, for such things as concert security, patrol, admin, etc.

Thanks!
Terry

From: tweatherford@radioreference.com
Topic: 1556 Message: 1558

heard yesterday while in CarmaLand...

1001 Plainfield Police
1053 ANL Security; 8xx units and "Post 291"
1056 ANL Ops2
2002 unid
2036 D15 ISPERN -- Bbbbbad link.
2037 D15 traffic stops?
9142 heard Adam 22 calling Adam 37 saying "testing communications outside of xxxx" "Having difficulties with portables in District 2"

So, not much to report new on SC21. See other things found in a future message on here and a full report tomorrow on ScanIL yahoo group.

it sound like D- 15 North Patrol(9098) is being used. I hear the same
traffic on 9098 as i do on the north Patrols 800 MHz system
.

1559. East Dubuque

Yahoo group: StarCom21
Date: 2007-07-17 02:58:55 UTC
From: Michael W. Scheel
Topic: 1559 Message: 1559

Site 138 in East Dubuque was using 866.4 as a control channel saturday.
It was the only system heard in the 866-868 band using a BC396T. Unable
to check on the Galena site.
--
===
It finally got down to the question of which should be permitted
to remain in the field--the war correspondents or the soldiers.
There wasn't room for them both. It was decided to retain the
soldiers.

Yes, ISP aircraft still use the P-Paul prefix. L-Lincoln is also used.
Bill E.

Hearing speed enforcement going on between an air unit (P6?) and multiple ground units (113, 132, etc) on talkgroup 9000 (listed as D1 Dispatch A) on the Ottawa Site (134). I'm new to the state, is Paul 6 an ISP aircraft?

With all due respect, I believe that's wrong - from recent traffic on the ISP AIR OPS TG (13105), it seems that the "PAUL" units are indeed the aircraft themselves while the "LINCOLN" units are Air Ops pilots. Have heard more than one conversation between "LINCOLN" units discussing (aircraft-type) mechanical issues with the "PAUL" units in the last few weeks.

Yesterday
Verified heard mobile unit CSQ on 155.475, also patched through on 17037 along with 67.0 PL ISP D11 Dispatch.

Today
Not heard on SC21 yet, but now just heard 155.37 HF5 Statewide Point-to-Point - ISP D11 Collinsville using 67.0 PL.

Note: 155.37 has never known to be in use by any agencies in this part of the state, even though MANY are licensed for it. Unfortunately it is very active in St. Louis City/County for the same purpose. The only reason I've ever known ISP Collinsville to use it is to contact StL City/County or their mobile units during a high-speed pursuit.

I have my LIVE scanner feed back online at INB.

Teamspeak software required.
More info and download at www.incidentnewsbroadcast.com

It will be a full time (24 hours a day) feed, will be BCD396T/StarCom21 most of the time, except when I have the radio out with me. Then it will just be the ham receiver as I've had in the past.

I am still testing, so it will sound better later.

Thanks
Terry

Looks like Highland is currently testing out SC21 equipment.

Not sure what department, assume it would be PD, but they are talking about "21 sulfer and 21 nitrogen" so may be the Public Works Department.

Highland is located in Madison County IL, which the Sheriff is now on SC21 and the Village of Glen Carbon, which is about 20 miles west of Highland.

(Around IL 143 & I-55 for reference)

Nothing against Terry, but INA's server isn't very user friendly, it is down quite often, and when you do decide to get online there are only a few feeds, yet they continue to brag that they have full time feeds.

Might I suggest another alternative. I don't get the same things as Terry but I cover all of Dist 13 and Dist 19

http://www.incidentbroadcast.com/index.php

Middle of the page just down from top there is a banner link that will connect you to the teamspeak if you already have teamspeak installed.

Mike

Brian if you have teamspeak installed, there is nothing new to
download, it is just a matter of joining a server. You shouldn't blame
the software for poor service from a host or group.

If you havn't noticed, theres an ongoing feud between IBN and INB on teamspeak lol. Anyways Terrys feed is usually up but if you read the description of his feed on the right, it says the feed will be down today due to computer issues with teamspeak.

If you are using TeamSpeak2 what server do I connect to, to hear scanner feeds? So many to choose from I am lost. Password required also??

1584. Re: Online Scanner Feed/Teamspeak server addresses

Yahoo group: StarCom21
Date: 2007-07-22 03:40:28 UTC
From: Jason McDowell
Topic: 1570 Message: 1584

This thread is getting a little off topic but heres all the known
teamspeak scanner server addresses, either bookmark the links for
future use on teamspeak or copy and paste into the quick url in teamspeak.

IBN- www.incidentbroadcast.com:8767

INB- feeds.incidentnewsalerts.com:8825

SBN- radio.scannerbuff.net:8767

ScanMass- 216.86.155.108:8005

MVBN- mvbn.kc8qch.com:8768

Fairfax, VA- boris.serveirc.com:8767

Mesa County, CO- 72.174.20.210:8767

Thats about all that I know about, there may be more but don't have
time to look right now.

1585. ISPERN Simulcasts

Yahoo group: StarCom21
Date: 2007-07-22 03:11:13 UTC
From: jburgess1974
Topic: 1585 Message: 1585

Just heard at about 22:06 TG 13035 doing a reboadcast from D21 regarding reboadcast for D10. This was on tower 217. Very possible D10 ISPERN is TG 13035 and doing lot of simulcasting of ISPERNS (TG 13034, 13035, 17040)apparently on SC21.

1586. Re: [StarCom21] ISPERN Simulcasts

Yahoo group: StarCom21
Date: 2007-07-22 03:52:03 UTC
From: tweatherford@radioreference.com
Topic: 1585 Message: 1586

what is happening here... on D18 and D11 ISPERN patches is that they are just receiving other actual 155.475 transmissions from the distant tower and simulcasting those through on the local patch.

The actual patches for D18 and D11 ARE NOT simulcasting ISPERNS off of local towers for some reasons. Must still be in a testing mode.

Also, I've notice increased power on the District 18 155.475 tower or they are using multiple towers instead of just Beaver Dam. Can here them on portable inside work in Collinsville.

Hearing key-ups on TG 17000, D11 Dispatch A tonight.
Haven't heard anything else at this time on this TG.

Also, heard an new Madison County Sheriff TG the other night.
7316 1c94 D 67-SD ??? Madison County: Sheriff - unid, possibly Car-to-Car (heard 7/07)

ISPERN Patches continue to be heard, most are as other people have mention before. Also, as I've stated before, actual local 155.475 transmissions from District 11 ARE NOT coming over the D11 patch. Is Everyone else seeing this issue on their local patch?

Now also using 17002 "Dispatch C"
Have not heard 17001 in use yet, but have slept half the day, since coming off of midnights

Earlier in the day, they had something patched onto ISPERN (155.475 VHF, not SC21) but couldn't tell where it was coming from.

Also heard mobiles on 155.475 overnight being patched on the D11 ISPERN patch during a car chase. Had to listed to D11 base on 155.475 but could hear mobiles (which are still CSQ) fine on 155.475!

Very exciting day down here in the MetroEast!

17001 now heard in use....

Sorry for multiple emails today, but this is just (almost) too much!

17000 may be Madison County (11K9x?, 11-37, 11-89)
17001 sounds like it may be St. Clair County (11-39, 11-48, 11-78, 11-96)
17002 nothing confirmed at all... may be Bond, etc??? (11-11, 11V6 "Eleven Victor Six")

Same dispatcher on all three TG, not heard on car-to-car of course.

Did hear dispatcher on 154.665 67.0 PL saying to a unit "unaware if you have StarCom or not, because you're on HF-2" which would be 154.665 (110.9 PL mobiles)

While I'm on it..... Macoupin County 911 Channel 2 has been more active today, could not determine who was using it, only recognised the dispatcher. (154.7475 D131 Narrowband)
Coming in loud and clear here recently.
---154.7575 and 158.205 now "play" CW-ID's at regular intervals.

Starcom is quicker than teamspeak. I am listening to
terry's INB
teamspeak feed and my 396 in Springfield. Hearing ISP
D11 on both but
teamspeak is about 1 second behind. Does this mean
anything??? No.

1596. RE: [StarCom21] Re: [ScanMetroStLouis] District 11

Yahoo group: StarCom21
Date: 2007-07-25 04:40:42 UTC
From: Cris Hanna
Topic: 1594 Message: 1596
Attachments: 2 described; binary payloads are missing from this source WARC

I live in St. Clair County and don't yet have a Starcom capable Scanner

St. Clair County still has lots of traffic today on 154.74 their main dispatch channel

And D11 was on 154.665 this morning as I drove to work in St Louis and as I drove home to Belleville tonight

Still hearing fair amount on 42.56 out of D11 still today as well

From: StarCom21@yahoogroups.com [mailto:StarCom21@yahoogroups.com] On Behalf Of tweatherford@...
Sent: Tuesday, July 24, 2007 11:34 PM
To: ScanMetroStLouis@yahoogroups.com; STARCOM21; ScanStLouis@yahoogroups.com
Subject: [StarCom21] Re: [ScanMetroStLouis] District 11

17001 now heard in use....

Sorry for multiple emails today, but this is just (almost) too much!

17000 may be Madison County (11K9x?, 11-37, 11-89)
17001 sounds like it may be St. Clair County (11-39, 11-48, 11-78, 11-96)
17002 nothing confirmed at all... may be Bond, etc??? (11-11, 11V6 "Eleven Victor Six")

Same dispatcher on all three TG, not heard on car-to-car of course.

Did hear dispatcher on 154.665 67.0 PL saying to a unit "unaware if you have StarCom or not, because you're on HF-2" which would be 154.665 (110.9 PL mobiles)

While I'm on it..... Macoupin County 911 Channel 2 has been more active today, could not determine who was using it, only recognised the dispatcher. (154.7475 D131 Narrowband) Coming in loud and clear here recently.
---154.7575 and 158.205 now "play" CW-ID's at regular intervals.

Subject: [ScanMetroStLouis] District 11

Now also using 17002 "Dispatch C"
Have not heard 17001 in use yet, but have slept half the day, since coming off of midnights

Earlier in the day, they had something patched onto ISPERN (155.475 VHF, not SC21) but couldn't tell where it was coming from.

Also heard mobiles on 155.475 overnight being patched on the D11 ISPERN patch during a car chase. Had to listed to D11 base on 155.475 but could hear mobiles (which are still CSQ) fine on 155.475!

Very exciting day down here in the MetroEast!

Terry

Teamspeak and any online radio services broadcasted via online, will be delayed, think about it, it has to come out of the scanner into the computer, and scattered across the net then back into your computer.

Starcom is quicker than teamspeak. I am listening to
terry's INB
teamspeak feed and my 396 in Springfield. Hearing ISP
D11 on both but
teamspeak is about 1 second behind. Does this mean
anything??? No.

1598. Re: [StarCom21] Re: [ScanMetroStLouis] District 11

My point was simple Mr. think about it that both
signals were
originating in the metro east area and traveling to
Springfield and one
got there sooner than the other.

Not exactly sure you understand how the internet or Teamspeak for
that matter works, but the scanner is tied into the teamspeak client,
which is routed into the server which is in another state, and then
you connect to it.

I don't know what your point is other than.... you expected no delay?

Amtrak from St. Louis MO to Kalamazoo MI, car to Sault Ste. Marie MI/Canada:
--Frequencies that are confirmed with RR database are not mentioned
--I have NOT had time to review any CARMA pages yet

These are my notes... I have check and verified ALL with radioreference.com, some with CARMA (mostly Will County).....

just requesting any additional info, confirmation or questions. I really don't have any additional info and have thrown away the notes from everything listed.

Thanks for any help!
Terry

Today...

17018 (listed as D12 Detail A) is "Mary 41 to Collinsville" -- Maybe D11 Detail "C" (as 17016 is A and 17017 is B)

7301 Madison County Animal Control Shelter "Shelter Dispatch to King 91"

17076 is continued to be encrypted (Illinois State Police: Operational Services Command - Zone 3A)

17102 lots of key ups, 2 mobile units talking about interstate being closed down to accident where a fireman from Sesser was ran over and killed by a Greyhound Bus

Correction to previous email 13105 may have been 13005 which is the Aircrafts Mobile Statewide

1608. Re: [StarCom21] today's heards

Yahoo group: StarCom21
Date: 2007-07-28 12:01:14 UTC
From: Michael W. Scheel
Topic: 1604 Message: 1608

friday Morning I was hearing all three District 11 Dispatchs and for
District 12 Dispatch A. Was on Kewanne and One of the East Molines
towers.

Intereting earlier I heard two District 7 cars on a car to car TG on the
Kewannee 700 Mhz tower but could not heard them on a 800 Mhz tower, One
was at mile post 17 but did not heard if they said with Interstate (but
both 80and 74 would be in Henry County). Heard more Friday than I think
all before. But still nothing at home :(

17002 "Radio Service to Collinsville on Talkgroup C as in Charles"
Can we run a radio check on ISPERN through the repeater?
--Heard no traffic on ISPERN Patch or ISPERN

17102 is definitely Radio Service -- (Possibly Zone 3, currently listed as 17081) talk about new software and correct Icons on the control head, resume installation on car, then send it out the door and keep them going. Units: A39, A94 (Adam)

District 11 DISPATCH is now coming over on ISPERN TG

Non-SC21
Air unit being heard on 155.475, using 67.0 PL

I would just take out the data channels I didn't program them in for my scanner I don't think. Wayne County, I am in Clay County I will tell you what I have in my scanner.

I removed all the programming from Uniden of course I havet the software and cable making it rather easy.

I put in the Wayne County Towers which I think also rebroadcast the Dist 13 broadcasts. ISPERN should broadcast everything across the state once more groups go to Starcom21. You should probably put the Clay County Tower located under Flora in, that will get you Dist 12 ISP, that is 3 complete ISP districts anymore would more less be a waste. I programmed all the talkgroups in listed on www.radioreference.com That way when I see a talkgroup I know who is talking. But mainly program the towers in and if you don't get a signal off them, might as well get rid of them unless you plan on another antenna later, or you just want them for skip etc. But the thing is with Starcom 21, the system is like a cellphone network it only turns a tower on when there is a portable or mobile in that area to receive it, so if a dist 12 mobile has roaming (or something along those lines lol) and goes into dist 19, you might might receive dist 12 traffic off the dist 19 tower in Wayne Co.... it will transmit to the closest tower. I haven't got anything off of the Richland County Tower sadly, not sure if it is working, or just too far away, I get the Jasper, and Clay and Wayne. I cannot get Centralia/ Marion CO tower or the Effingham Tower I don't think either, I have also tried Vandalia (Fayette Co) and got ditto too.... so who knows.

Good Luck

From: Kevin
Topic: 1620 Message: 1620

Sounds like ISP District Chicago is holding (or held) Starcom 21 training classes today. Heard activity this morning on TG 9005 (Dist Chgo A?) and have heard some activity this afternoon on TG 9067, which units have self-IDd as "Chicago car-to-car".

Hearing Dist. 9 loud and clear all day today on the Peoria Simulcast tower. They appear to be using TG 13004 for normal day to day ops and TG 13005 for BOLO's that don't go out over ISPERN.

TG20 Demonstration talk in the Madison County area, possibly Glen Carbon, Troy or Highland, is a fire department (also, leaving some portables at firehouse to demo). Only using first names, no ID #'s.

7318 ENC Madison County Sheriff (?) continued use
4152 ENC Have heard a few times now

NEW
7142 ENC Probably St Clair County agency

All heard on Edwardsville 700 mhz tower.
Also hearing District 18 actively on this tower too.
17009 D18 Dispatch A
17040 D18 ISPERN patch

Also heard earlier in the day on the Radio Tech TG17102, 2 techs talking about programming portables. A-94 Gene was taking directions from A-39 Phil. They were discussing problems with cloning a radio and it only recognizing site 23 (323 E St Louis) and not toggling to 25 (325 Edwardsville) or site 55 (355 Godfrey). The final solution was to take the battery off the portable for about 5 minutes to clear of the registry of "bad sites" in the radio. ("bad site table")

They were also attempting to flash and/or put in the "Patrol Code Plug", which is apparently for regular troopers. The "Investigations Code Plug" was also mentioned, saying the documentation "lists an incorrect Talk Group ID" and would screw the radio up

Also gave a troopers ID number (not "car" #) and last name, saying he needed to be issued a radio in his name.

Pretty exciting day again!

Just a reminder, my feed is online at IBN Teamspeak. Download at http://www.IncidentBroadcast.com <http://www.IncidentBroadcast.com>

Thanks!
Terry

Terry, I heard the discussion between the techs on TG 20 also, I'm up here in Springfield. Also hearing TG 13004 (district 9) regularly now. I also heard the TG 17102. Heard a test on 30329 IESMA? Also TG 13063 and 13046 car to car. 13063 I think is dist.10, 13046 is d-9. I still have on occasion a transmission that is garbled or broken, very tinny sounding. This is always from a patrol unit, dispatch always comes in clear. D-9 had one unit that was transmitting on TG 13017 which is a detective TG. She could not switch over to 13004. Obviously still some issues to work through. Also hearing TG 9083 (encrypted, I think). It should be interesting around here late next week when the state fair starts.

Drove from Ottawa to Rockford up I-39 and back today and observed ...

T134 (Ottawa) has great coverage all the way past the Lee County line, likewise T136 (Rochelle) has excellent coverage from Rockford down to Lee County.

On T134 (Ottawa), 1001 (Plainfield PD) and 1076 (Lee County SO) were active.

On T131 (LaSalle), 13004 (Dist 9 Disp A) was active with a unit talking to Paul 8 about enforcement and the results of Paul 8's trip to the doctor. 1076 (Lee County SO) was active as well, but are also still on VHF for some traffic.

On T136 (Rochelle), 9099 (Dist 15 Disp South) was very active with great audio.

On T111 (Rockford), 3 (Radio techs) were chatting it up about an analog patch problem then about the bridge failure in MN and related topics. Earlier had heard garbled transmissions on 30330 (MABAS) which I believe the techs on 3 were talking about.

.

They're having troubles this morning with garbled/broken transmisions. 9-24 was unable to hear dispatch clearly. Techs working and transmitting on 13004. Seems to be a couple dead spots. One is around mile post 106 on I-55.

1630. t353 connected in, but not really

Yahoo group: StarCom21
Date: 2007-08-04 18:11:14 UTC
From: todd hartzel
Topic: 1626 Message: 1630

Greetings all,
Been using the PRO96COM program on several of
the
Metro-East towers of SC21 that can be heard in
Missouri (St Louis City). These towers:

t305, t333 (at times),t353, t358 & 359

t353 is acting alittle weird. Its on-air, and
broadcasting its status as: CONNECTED

But there is no trunk activity.

Here is my t353 pro96com file as of this morning:

FileVersion:4
-TowerInfo
#This section is here for information only. With the
exception
#of the Call Sign(s), This data is not Read back into
the program at all.
System ID : 140
System Name : Starcom 21
WACN : bee00
Tower Number (Decimal): 353
Tower Number (Hex) : T0335
Tower Description : D11 - East Saint Louis
Control Capabilities : Voice,Registration
Call Sign(s) : WQBV730
Timestamp : Sat Aug 04 07:08:54 2007

-Tables
#Format: Table ID,Base Freq,Spacing,Input
Offset,Assumed/Confirmed,BandWidth
00,851.00625,0.00625,-45.00000,"Confirmed",0.00625
01,762.00625,0.00625,30.00000,"Confirmed",0.00625

-Frequencies
#Format: Channel,Usage,Frequency,Input Frequency
"01-1924","i",774.03125,804.03125
"01-1964","c",774.28125,804.28125
"01-2004","a",774.53125,804.53125
"01-2044","a",774.78125,804.78125

But no activity at all. No talkgroups, no radios,
pro96com is not capturing any activity. Although
receive quality is good here for this TOWER.

Obviously its not: CONNECTED, even though pro96com insists otherwise.

Also here are my other pro96com files to prove that t353 is not connected to ANY of the nearby TOWERS:

#1 - t305

1631. Reporting t359 alternate control channel change from pro96com program

Yahoo group: StarCom21
Date: 2007-08-04 19:10:18 UTC
From: todd hartzel
Topic: 1626 Message: 1631

Greetings all,
To those that monitor the St Clair County
Simulcasting system (t359). There has been a CONTROL
CHANNEL ALTERNATE change made.

The old 866.700 frequency looks like its not even
being used by the t359 right now as reported by
pro96com.

Please very careful view my t359 file. Look for the
866.5625 listing. It is now flagged according to
pro96com as an ALTERNATE control channel frequency.

866.700 has been completely DROPPED from the current
frequency list. Not sure if this is temporary or
permanent. Here is my t359 file. Look for the
866.5625. 866.5625 replaces the 866.700 frequency as
an ALTERNATE CONTROL CHANNEL. Make sure to make this
change to all of your PRO-96 & BCD-396T radios (all of
their clones too). You only need the 3 CONTROL
CHANNELS programmed in to correctly trunk-track.

PRO96COM file: v = Voice Channel
c = Control Channel
a = Alternate Control Channel
i = CWID or Site/system ID Channel

From: Jason McDowell
Topic: 1629 Message: 1632

I wonder if the moderate skip conditions had anything to do with the reception. It's a guess I pose.

Jason

TG20 more info....
Unit were talking about being able to still get good coverage in "Old Ripley" where he lived. Says the service is better than his cell phone.

Also heard an interesting patch to 155.055 I-REACH, I believe was CSQ, was a district 11 car that was also talking on D11 Disp-A.... sounded HORRIBLE and only lasted a few minutes.

Nothing else interesting today.

Terry

Terry Weatherford wrote:

TG20 Demonstration talk in the Madison County area, possibly Glen Carbon, Troy or Highland, is a fire department (also, leaving some portables at firehouse to demo). Only using first names, no ID #'s.

7318 ENC Madison County Sheriff (?) continued use
4152 ENC Have heard a few times now

NEW
7142 ENC Probably St Clair County agency

All heard on Edwardsville 700 mhz tower.
Also hearing District 18 actively on this tower too.
17009 D18 Dispatch A
17040 D18 ISPERN patch

Also heard earlier in the day on the Radio Tech TG17102, 2 techs talking about programming portables. A-94 Gene was taking directions from A-39 Phil. They were discussing problems with cloning a radio and it only recognizing site 23 (323 E St Louis) and not toggling to 25 (325 Edwardsville) or site 55 (355 Godfrey). The final solution was to take the battery off the portable for about 5 minutes to clear of the registry of "bad sites" in the radio. ("bad site table")

They were also attempting to flash and/or put in the "Patrol Code Plug", which is apparently for regular troopers. The "Investigations Code Plug" was also mentioned, saying the documentation "lists an incorrect Talk Group ID" and would screw the radio up

Also gave a troopers ID number (not "car" #) and last name, saying he needed to be issued a radio in his name.

Pretty exciting day again!

Just a reminder, my feed is online at IBN Teamspeak. Download at
http://www.IncidentBroadcast.com

Thanks!
Terry

I believe that completely. I monitor d-18 and d-9 here in Springfield. D-18 comes in clearer and better than d-9. D-9 is still in the first week of using it, so I imagine they will continue to "tweak" things for a while. Sometimes the cars are coming through garbled and unreadable, and dispatch asks them to repeat their transmision. D-18 doesn't seem to have any of that going on.

Topic: 1636 Message: 1636

To anyone that can help,I am still new at this and learning. Something doesn't seem right, though. I am using a Pro-96. I am hearing quite a bit of traffic but not all of it. Exactly what frequencies should I have programmed into my 96 to hear d-9 and d-18? Does anyone use one of the pre-programmed folders in their Pro-96? I realize that I am not able to program the 700mhz freq's. (I have not opened them up because I don't have WIN 96.) Any help is appreciated. Basically, I am asking how some of you more experienced listeners have your pro-96 programmed/set up. Thanks for any help you can offer.

In regards to monitoring 700 mhz band...without buying one of the few digital scanners that monitor these freqs, is it legal and is it possible to convert one of the 400 mhz frequencies into 770? I know there used to be a converter you could hook to your 450 mhz band freqs to hear cell phones at 890 mhz, it should be able to be done for the 700 freqs while using another digital scanner. Am I just dreaming?

From: Mike
Topic: 1636 Message: 1639

TJ, I have programmed all the frequencies not listed as control channels from Radio Reference for Dist 12, Dist 13, and Dist 19, off the local towers. Avoid programming towers over 50-60 miles away, as you will just be wasting space in my opinion unless you have a good high up antenna. I live in Clay County, and cannot get anything off the neighboring Marion County or Richland County Towers they are respectively too far west and too far East I guess. I took out the preprogrammed things on my Uniden figured it was a waste and tired of hearing all the aircraft crap. Hope this helps.

Heard Dist. 7's shift roll call assignment simulcasted on TG 9015 today. Also heard Dist. 6 playing around with the emergency button and chatting on TG 13000. This is from the Peoria Simulcast Tower. And still hearing Dist. 9 full time on TG's 13004 and 13005. Should also mention that Springfields ISPERN messages come in loud and clear now that they've gone full time Starcom.

Topic: 1636 Message: 1646

Thanks Mike. I am still figuring this thing out. As far as I can figure, the Pro-96 just uses the data freq. to monitor the system. I seem to be occasionally missing some transmisions. I'm wondering how much I'm missing by not being able to program the 700mhz freq's. I'm going to invest in WIN 96 to see if I can open up 700. I think I'm going to get one of the GRE scanners when they come out.

Not hearing any control channel on the following sites (108 Lake) (115 Cook, north).

The Starcom21 radio here at my work location is affiliating on Site 102 (Cook County, south) with a rather poor RSSI of 22.
